FAR Subpart 19.4 is revised to specify the activities of procurement center representatives and the requirement for contracting personnel to interface with the representatives and their advisors. Pub. L. 98–577 provides for the appointment of breakout procurement center representatives and specifies their duties and responsibilities.

Item X—Regulatory Guidance on Sec. 211 of Pub. L. 95–507

FAR 19.705–2 is revised to delete, as a factor in determining whether subcontracting possibilities exist, a potential contractor's longstanding contractual relationship with its suppliers. This factor is relocated to 19.705–4(d)(3) as a consideration in evaluating subcontracting potential for a particular acquisition.

Item XI—Withholding of Funds From Construction Contracts Progress Payments

FAR 32.103 is added and FAR 52.232–5 is revised to reflect policy set forth in OFPP Policy Letter 83–1.

Item XII—Preolicitation Notice for Construction

FAR 36.302(b) is revised to add a reference to FAR 36.204 which sets forth estimated price ranges for work to be performed.

Item XIII—Definition of Government Property

FAR 45.101(a) is revised to include the term "Contractor-acquired property" in the FAR definition of "Government property."

Item XIV—Contractor Use and Rental of Government Property

FAR 45.401 is revised to add additional coverage on the use and rental of Government property.

Item XV—Clarification of Small Business Concern Representation

FAR 52.219–1 is revised to clarify that the portion of the representation regarding the source of manufactured supplies refers to the end items being acquired rather than the materials and supplies that went into the end item.

Item XVI—FAR 52.249–6, Termination (Cost-Reimbursement)

FAR 52.249–6(g)(1) has been revised to allow a contractor whose contract has been terminated to recover those costs that may continue for a reasonable time with the approval of or as directed by the contracting officer.

Therefore, 48 CFR Parts 8, 12, 13, 15, 19, 32, 36, 38, 45, and 52 are amended as set forth below:

1. The authority citation for 48 CFR Parts 8, 12, 13, 15, 19, 32, 36, 38, 45, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2453(c).

PART 8—REQUIRED SOURCES OF SUPPLIES AND SERVICES

2. Section 8.403–4 is added to read as follows:

8.403–4 International Federal Supply Schedule.

(a) The International Federal Supply Schedule (IFSS) provides sources of supply (supplies and services) at reasonable prices to U.S. Government activities located overseas. The use of the schedule is mandatory only on GSA.

(b) The schedule is divided into two sections. Section A includes those items which were awarded under sealed bid procedures, while Section B covers items that were awarded under negotiated procedures.

(c) Ordering offices need to review the information in the schedule and any applicable contractor's catalogs/price lists to ensure the proper placement of orders. Orders are placed directly with the contractors.

(d) Ordering offices shall forward copies of any orders (at the time the orders are issued) to the contracting office designated in the IFSS.

3. Section 8.404–1 is amended by revising paragraph (e)(3), by redesignating paragraph (f) as paragraph (g), by adding new paragraph (f), and by revising new paragraph (g) to read as follows:

8.404–1 Mandatory use.

* * * * *

(e) * * *

(3) When products are purchased from commercial sources on the open market (i.e., not under an existing Government contract) at delivered prices that are lower than the prices provided by multiple-award schedule contracts, ordering offices shall forward the following information, at the time the orders are issued, to the contracting office designated in the multiple-award schedule that was not used:

(i) Copy of the order.

(ii) Identification of the Federal Supply Schedule.

(iii) Name of the schedule contractor.

(iv) Applicable schedule contract number.

(v) Schedule contract price.

(vi) Schedule special item number (SIN).

(vii) Manufacturer's model and /or part number.

(f) *Report documentation.* Documentation of subdivisions (e)(3)(ii) through (e)(3)(vii) of this section may be provided as attachment(s) to the order, annotated directly on the order, or a combination of both. Interagency Report Control Number 0262–GSA–AR has been assigned to this report.

(g) *Absence of follow-on award.* Ordering offices, after any consultation required by the schedule, are not required to forgo or postpone their legitimate needs pending the award or renewal of any schedule contract.

4. Section 8.703 is amended by revising paragraph (b) to read as follows:

8.703 Procurement List.

* * * * *

(b) The Procurement List identifies—

(1) Workshop supplies available from the General Services Administration (GSA) stocks at supply distribution facilities and the Defense Logistics Agency (DLA) system; and

(2) Supplies that are also available from Federal Prison Industries, Inc.

5. Section 8.704 is amended by revising in paragraph (a) the first sentence to read as follows:

8.704 Purchase priorities.

(a) The Act requires the Government to purchase supplies or services on the Procurement List, at prices established by the Committee, from qualified workshops if they are available within the period required. * * *

* * * * *

8.708 [Amended]

6. Section 8.708 is amended by removing in the second sentence of paragraph (c) the words "(see Subpart 49.4, Termination for Default)." and inserting a period following the word "delivery".

* * * * *

7. Section 8.712 is amended by revising paragraphs (a), (b), and (b)(1), and by adding paragraphs (c) and (d) to read as follows:

8.712 Specification changes.

(a) The contracting activity shall notify the workshop and appropriate central nonprofit agency of any change in specifications or descriptions. In the absence of such written notification, the workshop shall produce the supplies or provide the services under the specification or description cited in the order.

(b) The contracting activity shall provide 90-days advance notification to the Committee and the central nonprofit agency on actions that affect supplies on the Procurement List and shall permit them to comment before action is taken, particularly when it involves—

(1) Changes that require new national stock numbers or item designations;

* * * * *

(c) For services, the contracting activity shall notify the workshop and central nonprofit agency concerned at least 90 days prior to the date that any changes in the scope of work or other conditions will be required.

(d) When, in order to meet its emergency needs, a contracting activity is unable to give the 90-day notification required in paragraphs (b) and (c) of this section, the contracting activity shall, at the time it places the order or change notice, inform the workshop and the central nonprofit agency in writing of the reasons that it cannot meet the 90-day notification requirement.

8. Section 8.715 is added to read as follows:

8.715 Replacement commodities.

When a commodity on the Procurement List is replaced by another commodity which has not been previously acquired, and a qualified workshop can produce the replacement commodity in accordance with the Government's quality standards and delivery schedules and at a fair market price, the replacement commodity is automatically on the Procurement List and shall be acquired from the workshop designated by the Committee. The commodity being replaced shall continue to be included on the Procurement List until there is no longer a requirement for that commodity.

9. Section 8.1104 is amended by redesignating paragraph (d) as paragraph (e), and by adding a new paragraph (d) to read as follows:

8.1104 Contract clauses.

* * * * *

(d) A clause substantially the same as the clause at 52.208–7, Tagging of Leased Vehicles, for vehicles leased over 60 days (see 41 CFR 101–38.6).

* * * * *

PART 12—CONTRACT DELIVERY OR PERFORMANCE

10. Subpart 12.3, consisting of §§ 12.300, 12.301, 12.302, 12.303, and 12.304, is revised to read as follows:

Subpart 12.3—Priorities and Allocations

Sec.

12.300 Scope of subpart.
12.301 Definitions.
12.302 General.
12.303 Procedures.
12.304 Solicitation provision and contract clause.

Subpart 12.3—Priorities and Allocations

12.300 Scope of subpart.

This subpart implements the Defense Priorities and Allocations System (DPAS), a Department of Commerce (DOC) regulation in support of authorized national defense programs (see 15 CFR Part 350).

12.301 Definitions.

"Authorized program," as used in this subpart, means a program approved by the Federal Emergency Management Agency (FEMA) for priorities and allocations support under the Defense Production Act of 1950, as amended (50 U.S.C. app. 2061, et seq.), to promote the national defense. Schedule I of the DPAS lists currently authorized programs.

"Controlled materials," as used in this subpart, means the various shapes and forms of steel, copper, aluminum, and nickel alloys specified in Schedule II, and defined in Schedule III, of the DPAS.

"Delegate Agency," as used in this subpart, means an agency of the U.S. Government authorized by delegation from DOC to place priority ratings on contracts that support authorized programs. Schedule I of the DPAS lists the Delegate Agencies.

"Rated order" means a prime contract for any product, service, or material (including controlled materials) placed by a Delegate Agency under the provisions of the DPAS in support of an authorized program and which requires preferential treatment, and includes subcontracts and purchase orders resulting under such contracts.

12.302 General.

(a) Under Title I of the Defense Production Act of 1950, as amended (50 U.S.C. app. 2061, et seq.), the President is authorized (1) to require that contracts in support of the national defense be accepted and performed on a preferential or priority basis over all other contracts, and (2) to allocate materials and facilities in such a manner as to promote the national defense.

(b) The Office of Industrial Resource Administration (OIRA), DOC, is responsible for administering and enforcing a system of priorities and allocations to carry out Title I of the Defense Production Act for industrial items. The DPAS has been established to promote the timely availability of the necessary industrial resources to meet current national defense requirements and to provide a framework to facilitate rapid industrial mobilization in case of national emergency.

(c) The Delegate Agencies (see Schedule I of the DPAS have been given authority by DOC to place rated orders in support of authorized programs. Other government agencies, Canada, and other friendly foreign nations may apply for special rating authority in support of authorized programs (see 15 CFR 350.55).

(d) Rated orders shall be placed in accordance with the procedures in the DPAS. Contracting officers responsible for acquisitions in support of authorized programs shall be familiar with the DPAS and should provide guidance on the DPAS to contractors and suppliers receiving rated orders. Agency heads shall ensure compliance with the DPAS by contracting activities within their agencies.

(e) Under the Defense Production Act, any willful violation of the Act, the DPAS, or any official action taken by DOC under the DPAS, is a crime punishable by a maximum fine of $10,000, one year in prison, or both (see 15 CFR 350.70 and 15 CFR 350.74).

12.303 Procedures.

(a) There are two levels of priority for rated orders established by the DPAS, identified by the rating symbols "DO" and "DX." All DO rated orders have equal priority with each other and take preference over unrated orders. All DX rated orders have equal priority with each other and take preference over DO rated and unrated orders. DX ratings are used for special defense programs designated by the President to be of the highest national priority.

(b) DOC may issue a Directive to compel a contractor or supplier to accept a rated order, to rearrange production or delivery schedules, or to improve shipments against particular rated orders. Directives issued by DOC take precedence over all rated and unrated orders as stated in the Directive.

(c) In addition to any other contractual requirements, a valid rated

order must contain (see 15 CFR 350.12) the following:

(1) A priority rating consisting of the appropriate DO or DX rating symbol and a program of identification symbol to indicate the authorized program (see Schedule I of the DPAS).

(2) A required delivery date or delivery dates.

(3) The signature of an individual authorized by the agency to sign rated orders.

(d) The DPAS has the following three basic elements which are essential to the operation of the system:

(1) *Mandatory acceptance of rated orders.* A rated order shall be accepted by a contractor or supplier unless rejected for the reasons provided for mandatory rejection in 15 CFR 350.13(b), or for optional rejection in 15 CFR 350.13(c).

(2) *Mandatory extension of priority ratings throughout the acquisition chain.* Contractors and suppliers receiving rated orders shall extend priority ratings to subcontractors or vendors when acquiring items to fill the rated orders (see 15 CFR 350.15).

(3) *Priority scheduling of production and delivery.* Contractors and suppliers receiving rated orders shall give the rated orders priority over other contracts as needed to meet delivery requirements (see 15 CFR 350.14).

(e) Agencies shall provide contracting activities with specific guidance on the issuance of rated orders in support of agency programs.

(f) Contracting officers shall follow agency procedural instructions concerning the use of rated orders in support of agency programs.

(g) Contracting officers, contractors, or subcontractors at any tier, that experience difficulty placing rated orders, obtaining timely delivery under rated orders, locating a contractor or supplier to fill a rated order, ensuring that rated orders receive preferential treatment by contractors or suppliers, or require rating authority for items not automatically ratable under the DPAS, should promptly seek special priorities assistance in accordance with agency procedures (see 15 CFR 350.50–350.55).

(h) Contracting officers shall report promptly any violations of the DPAS to DOC in accordance with agency procedures.

12.304 Solicitation provision and contract clause.

(a) Contracting officers shall insert the provision at 52.212–7, Notice of Priority Rating for National Defense Use, in solicitations when the contract to be awarded will be a rated order.

(b) Contracting officers shall insert the clause at 52.212–8, Defense Priority and Allocation Requirements, in contracts that are rated orders.

PART 13—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

11. Section 13.404 is amended by revising paragraph (a) to read as follows:

13.404 Conditions for use.

* * * * *

(a) The transaction does not exceed $500 or such other limits as have been approved by the agency head;

* * * * *

PART 15—CONTRACTING BY NEGOTIATION

12. Section 15.406–5 is amended by revising paragraph (c) to read as follows:

15.406–5 Part IV—Representations and instructions.

* * * * *

(c) *Section M, Evaluation factors for award.* Identify all factors, including price or cost, and any significant subfactors that will be considered in awarding the contract (see 15.605(e) and (f) and the multiple award provision at 52.215–34) and state the relative importance the Government places on those evaluation factors and subfactors.

13. Section 15.407 is amended by adding paragraph (h) to read as follows:

15.407 Solicitation provisions.

* * * * *

(h) The contracting officer shall insert the provision at 52.215–34, Evaluation of Offers for Multiple Awards, in requests for proposals if the contracting officer determines that multiple awards might be made if doing so is economically advantageous to the Government.

14. Section 15.605 is amended by adding paragraph (f) to read as follows:

15.605 Evaluation factors.

* * * * *

(f) In addition to other factors, offers will be evaluated on the basis of advantages and disadvantages to the Government that might result from making more than one award (see 15.407(h)). The contracting officer shall assume for the purpose of making multiple awards that $250 would be the administrative cost to the Government for issuing and administering each contract awarded under a solicitation. Individual awards shall be for the items or combination of items that result in the lowest aggregate cost to the Government, including the assumed administrative costs.

15. Section 15.611 is amended by adding in paragraph (a) a second sentence to read as follows:

15.611 Best and final offers.

(a) * * * Oral requests for best and final offers shall be confirmed in writing.

PART 19—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

16. Section 19.402 is amended by revising paragraph (a) to read as follows:

19.402 Small Business Administration procurement center representatives.

(a) The SBA may assign one or more procurement center representatives to any contracting activity or contract administration office to carry out SBA policies and programs. Assigned SBA procurement center representatives are required to comply with the contracting agency's directives governing the conduct of contracting personnel and the release of contract information. The SBA must obtain for its procurement center representatives security clearances required by the contracting agency.

* * * * *

17. Section 19.403 is added to read as follows:

19.403 Small Business Administration breakout procurement center representatives.

(a) The SBA is required by sec. 403 of Pub. L. 98–577 to assign a breakout procurement center representative to each major procurement center. A major procurement center means a procurement center of the Department of Defense that awarded contracts for items other than commercial items totaling at least $150,000,000 in the preceding fiscal year, and other procurement centers as designated by the Administrator, SBA. The SBA breakout procurement center representative is an advocate for (1) the appropriate use of full and open competition, and (2) the breakout of items, when appropriate and while maintaining the integrity of the system in which such items are used. The SBA breakout procurement center representative is in addition to the SBA procurement center representative (see 19.402). When an SBA breakout procurement center representative is assigned, the SBA is required to assign at least two collocated small business technical advisors. Assigned SBA breakout procurement center

representatives and technical advisors are required to comply with the contracting agency's directives governing the conduct of contracting personnel and the release of contract information. The SBA must obtain for its breakout procurement center representatives and technical advisors security clearances required by the contracting agency.

(b) Contracting officers shall comply with 19.402(b) in their relationships with SBA breakout procurement center representatives and SBA small business technical advisors.

(c) The SBA breakout procurement center representative is authorized to—

(1) Attend any provisioning conference or similar evaluation session during which determinations are made as to whether requirements are to be acquired using other than full and open competition and make recommendations with respect to such requirements to the members of such conference or session;

(2) Review, at any time, restrictions on competition previously imposed on items through acquisition method coding or similar procedures and recommend to personnel of the appropriate activity the prompt reevaluation of such limitations;

(3) Review restrictions on competition arising out of restrictions on the rights of the United States in technical data and, when appropriate, recommend that personnel of the appropriate activity initiate a review of the validity of such an asserted restriction;

(4) Obtain from any governmental source, and make available to personnel of the appropriate center, unlimited-rights technical data necessary for the preparation of a competitive solicitation package for any item of supply or service previously acquired noncompetitively due to the unavailability of such technical data;

(5) Have access to the unclassified procurement records and other data of the procurement center;

(6) Receive unsolicited engineering proposals and, when appropriate—

(i) Conduct a value analysis of such proposal to determine whether it, if adopted, will result in lower costs to the United States without substantially impeding legitimate acquisition objectives and forward to personnel of the appropriate center recommendations with respect to such proposal; or

(ii) Forward such proposals without analysis to personnel of the center responsible for reviewing them who shall furnish the breakout procurement center representative with information regarding the proposal's disposition;

(7) Review the systems that account for the acquisition and management of technical data within the procurement center to ensure that such systems provide the maximum availability and access to data needed for the preparation of offers to sell to the United States those supplies to which such data pertain which potential offerors are entitled to receive; and

(8) Appeal a failure by the procurement center to act favorably on any recommendation made pursuant to subparagraphs (c) (1) through (7) of this section. Such appeal must be in writing and specifically recite both the circumstances of the appeal and the basis of the recommendation. The appeal shall be decided by a person within the employ of the procurement center who is at least one supervisory level above the person who initially failed to act favorably on the recommendation. Such appeal shall be decided within 30 calendar days of its receipt by the procurement center. All such decisions shall be final.

(d) The duties of the SBA small business technical advisors are to assist the SBA breakout procurement center representative in carrying out the activities described in (c) (1) through (7) above to assist the SBA procurement center representatives (see FAR 19.402).

19.706-2 [Amended]

18. Section 19.706-2 is amended by removing paragraph (b)(3).

19. Section 19.705-4 is amended by revising paragraph (d)(3) to read as follows:

19.705-4 Reviewing the subcontracting plan.

* * * * *

(d) * * *

(3) Evaluate subcontracting potential, considering the offeror's make-or-buy policies or programs, the nature of the products or services to be subcontracted, the known availability of small and small disadvantaged business concerns in the geographical area where the work will be performed, and the potential contractor's longstanding contractual relationship with its suppliers.

* * * * *

PART 32—CONTRACT FINANCING

20. Section 32.103 is added to read as follows:

32.103 Progress Payment Construction Contracts.

When satisfactory progress has not been achieved by a contractor during any period for which a progress payment is to be made, a percentage of the progress payment may be retained. Retainage should not be used as a substitute for good contract management, and the contracting officer should not withhold funds without cause. Determinations to retain and the specific amount to be withheld shall be made by the contracting officer on a case-by-case basis. Such decisions will be based on the contracting officer's assessment of past performance and the likelihood that such performance will continue. The amount of retainage withheld shall not exceed 10 percent of the approved estimated amount in accordance with the terms of the contract and may be adjusted as the contract approaches completion to recognize better than expected performance, the ability to rely on alternative safeguards, and other factors. Upon completion of all contract requirements, retained amounts shall be paid promptly.

PART 36—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

36.302 [Amended]

21. Section 36.302 is amended by adding in paragraph (b)(1), following the word "range)" the reference "(see 36.204);".

PART 38—FEDERAL SUPPLY SCHEDULE CONTRACTING

22. Section 38.102-4 is added to read as follows:

38.102-4 International Federal Supply Schedule.

(a) The International Federal Supply Schedule (IFSS) has been established to provide sources of supply (supplies and services) at reasonable prices to U.S. Government activities located overseas. The use of the schedule is mandatory only on GSA.

(b) The IFSS is divided into two sections. The items included in Section A are awarded under a solicitation using sealed bid procedures, as covered in Part 14, while the items listed in Section B are awarded under a solicitation using negotiated procedures, as described in Part 15.

PART 45—GOVERNMENT PROPERTY

45.101 [Amended]

23. Section 45.101 is amended by revising in paragraph (a) the definition of "Government property" to read as follows:

* * * * *

"Government property" means all property owned by or leased to the Government under the terms of the contract. It includes both Government-furnished property and contractor-

acquired property as defined in this section.

* * * * *

24. Section 45.401 is revised to read as follows:

45.401 Policy.

In performing Government contracts or subcontracts, Government production and research property in the possession of contractors or subcontractors shall be used to the greatest possible extent, provided that a competitive advantage is not conferred on the contractor or its subcontractors (see Subpart 45.2). Prior approval of the contracting officer having cognizance of Government production and research property is required for any use, whether Government or non-Government, to ensure that the Government receives adequate consideration. Government use is defined as use in support of U.S. Government contacts and non-Government use is all other use (including direct commercial sales to domestic and foreign customers). As a general rule, Government use is on a rent-free basis. Non-Government use is on a rental basis. When Government production and research property is no longer required for the performance of Government contracts or subcontracts, it shall not continue to be made available to a contractor for non-Government use.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

25. Section 52.208–7 is added to read as follows:

52.208–7 Tagging of Leased Vehicles.

As prescribed in 8.1104(d), insert a clause substantially as follows:

Tagging of Leased Vehicles (May 1986)

While it is the intent that vehicles leased under this contract will operate on Federal tags, the Government reserves the right to utilize State tags if necessary to accomplish its mission. Should State tags be required, the Contractor shall furnish the Government documentation necessary to allow acquisition of such tags. Federal tags are the responsibility of the Government.

(End of clause)

26. Section 52.212–7 is revised to read as follows:

52.212–7 Notice of Priority Rating for National Defense Use.

As prescribed in 12.304(a), insert the following provision:

Notice of Priority Rating for National Defense Use (May 1986)

Any contract awarded as a result of this solicitation will be a [ ] DX rated order; [ ] DO rated order certified for national defense use under the Defense Priorities and Allocations System (DPAS) (15 CFR Part 350), and the Contractor will be required to follow all of the requirements of this regulation. [Contracting Officer check appropriate box.]

(End of provision)

27. Section 52.212–8 is revised to read as follows:

52.212–8 Defense Priority and Allocation Requirements.

As prescribed in 12.304(b), insert the following clause:

Defense Priority and Allocation Requirements (May 1986)

This is a rated order certified for national defense use, and the Contractor shall follow all the requirements of the Defense Priorities and Allocations System regulation (15 CFR Part 350).

(End of clause)

28. Section 52.215–34 is added to read as follows:

52.215–34 Evaluation of Offers for Multiple Awards.

As prescribed in 15.407(h), insert the following provision:

Evaluation of Offers for Multiple Awards (May 1986)

In addition to other factors, offers will be evaluated on the basis of advantages and disadvantages to the Government that might result from making more than one award (multiple awards). It is assumed, for the purpose of evaluating proposals, that $250 would be the administrative cost to the Government for issuing and administering each contract awarded under this solicitation and individual awards shall be for the items or combinations of items that result in the lowest aggregate cost to the Government, including the assumed administrative costs.

(End of provision)

29. Section 52.219–1 is revised to read as follows:

52.219–1 Small Business Concern Representation.

As prescribed in 19.304(a), insert the following provision:

Small Business Concern Representation (May 1986)

The offeror represents and certifies as part of its offer that it ☐ is, ☐ is not a small business concern and that ☐ all, ☐ not all end items to be furnished will be manufactured or produced by a small business concern in the United States, its territories or possessions, Puerto Rico, or the Trust Territory of the Pacific Islands. "Small business concern," as used in this provision, means a concern, including its affiliates, that is independently owned and operated, not dominant in the field of operation in which it is bidding on Government contracts, and qualified as a small business under the size standards in this solicitation.

(End of provision)

30. Section 52.232–5 is amended by removing in the title of the clause the date "JAN" and inserting in its place the date "MAY" and by revising paragraphs (c) and (e) of the clause to read as follows:

52.232–5 Payments under Fixed Price Construction Contracts.

* * * * *

(c) If the Contracting Officer finds that satisfactory progress was achieved during any period for which a progress payment is to be made, the Contracting Officer shall authorize payment to be made in full. However, if satisfactory progress has not been made, the Contracting Officer may retain a maximum of 10 percent of the amount of the payment until satisfactory progress is achieved. When the work is substantially complete, the Contracting Officer may retain from previously withheld funds and future progress payments that amount the Contracting Officer considers adequate for protection of the Government and shall release to the Contractor all the remaining withheld funds. Also, on completion and acceptance of each separate building, public work, or other division of the contract, for which the price is stated separately in the contract, payment shall be made for the completed work without retention of a percentage.

* * * * *

(e) In making these progress payments, the Government shall, upon request, reimburse the Contractor for the amount of premiums paid for performance and payment bonds (including coinsurance and reinsurance agreements, when applicable) after the Contractor has furnished evidence of full payment to the surety. The retainage provisions in paragraph (c) above shall not apply to that portion of progress payments attributable to bond premiums.

* * * * *

31. Section 52.249–6 is amended by inserting a colon following the word "clause" in the introductory text and deleting the remainder of the paragraph; by removing in the title of the clause the date "(APR 1984)" and inserting in its place the date "(MAY 1986)"; by revising paragraph (g)(1) of the clause; and by removing both derivation lines following "(End of clause)" to read as follows:

52.249-6 Termination (Cost-Reimbursement).

* * * * *

(g) * * *

(1) All costs reimbursable under this contract, not previously paid, for the performance of this contract before the effective date of the termination, and those costs that may continue for a reasonable time with the approval of or as directed by the Contracting Officer; however, the Contractor shall discontinue these costs as rapidly as practicable.

Intervals for Drydocking and Tailshaft Examination on Inspected Vessels; Notice of Proposed Rulemaking

BEST COPY AVAILABLE

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 31, 61, 71, 91, 167, 169, and 189

[CGD 84-024]

Intervals for Drydocking and Tailshaft Examination on Inspected Vessels

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to amend the intervals between drydock and tailshaft examinations, by generally extending them, for certain classes of inspected vessels. These changes are being proposed to decrease the cost incurred by the marine industry in meeting these examination requirements and to harmonize with the intervals specified by the various classification societies and the invervals currently under consideration internationally. If the intervals for these examinations can be changed without decreasing overall vessel safety, vessel owners and operators will realize a significant economic savings.

DATES: Comments must be received on or before June 30, 1986.

ADDRESSES: Comments on this proposal or the draft regulatory evaluation should be mailed to Commandant (G-CMC/21), [CGD 84-024], U.S. Coast Guard Headquarters, Washington, DC 20593. The comments may be delivered to and will be available for inspection or copying between 8 a.m. and 4 p.m., Monday through Friday, except holidays, at the Marine Safety Council (G-CMC/21), Room 2110, Coast Guard Headquarters Building, 2100 2nd Street, SW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: LCDR Jeffrey G. Lantz, Project Manager, at (202-426-4431).

SUPPLEMENTARY INFORMATION: On May 4, 1984, the Coast Guard published in the Federal Register (49 FR 19061) a notice of its intent to consider extending the intervals between drydock and tailshaft examinations. To ensure a thorough scrutinizing of all issues concerning these examinations, the Coast Guard solicited answers to nineteen specific questions. These questions concerned the safety aspects of extending these intervals along with the economic impacts of these examinations. A total of seventy-six responses were received. A discussion of the comments received is presented below.

Interested persons are invited to comment on the proposed rulemaking or draft regulatory evaluation by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice [CGD 84-024], the specific section of the proposed regulations or supporting documents to which their comments apply, and give reasons for each comment. Receipt of comments will be acknowledged if a stamped self-addressed post card is enclosed. To the extent permitted by law, the proposal may be changed in light of the comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held at a time and place to be set in a later notice in the Federal Register if requested by anyone raising a genuine issue.

Drafting Information

The principal persons involved in the drafting of this rule are LCDR Jeffrey G. Lantz, Project Manager, Office of Merchant Marine Safety and Mr. Michael N. Mervin, Project Attorney, Office of Chief Counsel.

Discussion of Comments

A total of seventy-six comments were received in response to the Advance Notice of Proposed Rulemaking published in the Federal Register on May 4, 1984 (49 FR 19061). The ANPRM solicited responses to fourteen specific questions concerning drydock examinations and five specific questions concerning tailshaft examinations. Three of the questions concerned the economic impact of these examinations, two for drydock and one for tailshaft. The summary outlined below does not include responses to these questions. Instead, they were used to determine the overall economic impact of this proposed rulemaking as shown in the draft regulatory evaluation.

The comments were generally favorable towards some extension of the present drydock and tailshaft examination intervals. In the absence of Coast Guard regulations, most vessel owners/operators would follow the classification society requirements for the intervals between these examinations. Ships operators generally desire a thirty month interval extendable to thirty-six months. Barge operators desire an interval ranging from three to five years. The responses indicated that hull coatings have performed well in service and that unscheduled drydockings are performed only to repair damage and constitute only about ten percent of all drydockings. Most commenters were against regulatory requirements for measuring hull thickness and were also against shortening drydock intervals as a vessel ages or because of vessel carries corrosive or environmentally hazardous cargoes.

The following is a breakdown of the comments to the ANPRM. Not all commenters replied to each question posed in the ANPRM.

31	steamship owners/operators
15	tug/tow and barge operators
6	offshore supply and/or crew boat operators
2	classifications societies
2	marine engineering suppliers
3	independent surveyors
2	dredge/drydock companies
3	small passenger vessel operators
3	MODU operators
1	shipyard
8	various associations

The following is a summary of the comments received to each question posed in the ANPRM.

Concerning Drydock Examinations

Question 1a: In the absence of Coast Guard regulations what would vessel owners or operators adopt as appropriate drydocking or hauling-out intervals for various types and sizes of vessels?

Seventy-three commenters responded to this question of which seventy-two were in favor of extending the interval. Forty-two commenters stated that, in the absence of Coast Guard regulations, they would follow the schedule set forth by classification societies, presently thirty months. In general, these commenters suggested that an unnecessary economic burden could be alleviated by making the intervals coincide with those used by the American Bureau of Shipping (ABS), thus avoiding a duplication on inspections. They also desired some flexibility in scheduling the drydock examinations. One operator of ocean passenger vessels recommended that the thirty month interval apply to vessels regulated under Subchapter H. Nine commenters stated that a three year interval would be appropriate, one arguing that this would allow an owner to schedule the drydocking so that the time of year would be advantageous to applying those bottom coatings which are temperature sensitive at application. One commenter stated that the interval should be five years with no more than three years between a drydock or an underwater examination. Eight commenters stated that barges should have a four year interval. Four commenters stated that a 5 year interval should be set for vessels in fresh water

BEST COPY AVAILABLE

service. Three commenters stated that the decision to drydock a vessel should be based on the vessel condition, taking into account the condition of the anodes placed on the vessel to inhibit corrosion, the condition of the coatings, or electric current readings on vessels having an impressed current cathodic protection system. Two commenters recommended two year intervals for small passenger vessels while two other commenters recommended one year for small passenger vessels. One shipyard owner recommended that the interval between drydock examinations not to be extended for safety reasons and because an extension would have an adverse economic effect on the shipyards.

Question 1b: How often are vessels hauled or drydocked earlier than scheduled because of hull damage or other problems?

Twenty-eight commenters responded to this question. The commenters related their experience with unscheduled drydockings, which, in general, were all different. On the average, the comments indicated that ten percent of drydockings are unscheduled. (Our inspection records indicate that this number is probably low.) Most commenters did not specify the causes of the unscheduled drydockings.

Question 2a: Would vessel schedules, particularly for large seagoing steam vessels, permit major inspections of the boiler and steam piping to be conducted at intervals the frequency of which did not correspond with the vessels drydocking interval?

Twenty-eight steam vessel operators addressed this question. Thirteen stated that their schedules do not permit boiler inspections unless their vessels are undergoing a drydocking examination. The primary concern was the need for a five to six day down period to perform the boiler and steam piping examinations which their vessel schedules afforded only during drydock examinations.

Fifteen operators stated that boiler inspections could be performed at times other than drydock examinations. Six of these commenters stated that it would require additional planning and coordination and was only feasible if the boiler inspections were conducted in a piecemeal fashion over a period of time. One operated a vessel with four boilers which allowed for the boilers to be taken out of service on staggered intervals for examination without disrupting the vessel's schedule. Two operated vessels on the Great Lakes which allowed them to conduct boiler examinations during winter lay up. Two commenters stated that it was more expensive to conduct boiler inspections independent of drydock examinations while one stated that the high cost of shipyard labor made it unattractive to conduct the boiler examination concurrently with the drydock examination. One commenter suggested that the boilers be on an independent schedule (as unfired pressure vessels are) and not necessarily tied to either the inspections for certification or the drydock examination. One commenter recommended giving consideration to extending the interval between DC heater and other unfired pressure vessel examinations to keep them in harmony with the drydock examination interval if it is extended.

Question 2b: Would similar problems exist with diesel powered ships, and if so, to what extent?

Fourteen operators of diesel vessels responded to this question. Ten commenters stated that main propulsion diesels, auxiliary boilers and unfired pressure vessels could be examined at times other than in drydock, however, others maintained that it was more convenient to conduct these inspections during drydock availabilities. Two operators of diesel electric powered MODUs stated that the only restriction was that these examinations had to be performed when the vessel was shut down, which meant that drilling could not be ongoing. Four commenters stated that these inspections should coincide with the drydock examination. The primary reason given was that vessel schedules do not permit the time necessary to conduct these inspections other than during drydock examination and that this equipment is already shut down and available for inspection then. One steamship operator stated that it would be unfair to provide different intervals for diesel machinery inspections.

Question 3: Would a system that, following an examination after an initial period of service, required drydockings to be conducted more frequently as a vessel ages be feasible or desirable, i.e. one that required a large seagoing ship to be examined within 2 years of being placed in service (or at the guarantee drydocking provided for in many shipbuilding contracts), then again after completing 7, 12, 16, 19, 21, 23, 25 etc. years of service?

Forty-seven commenters responded to this question. Thirty-one commenters stated that such a system was neither feasible nor desirable. Several of these commenters stated that there was little evidence to support the contention that vessels required more frequent drydock examinations as they aged. They also pointed out that a system that required more frequent drydockings as a vessel ages would penalize the owners and operators that properly maintained their vessels.

Nine commenters stated that a system requiring more frequent drydock examinations with vessel age is desirable. One of these recommended that, for seagoing barges, the interval between drydock examinations should be five years when the barges are new and should appropriately decrease as the barges age.

Seven commenters stated that this system would only be desirable if the drydock examinations were required to coincide with classification societies' special surveys.

Question 4: Should specific requirements for hull gauging (measurement of hull thickness) be included in the regulations? If so, how long after the vessel is placed in service should the first gauging be conducted and at what intervals should the gauging be repeated?

Fifty commenters responded to this question. Thirty-three commenters stated that a regulatory requirement to include gauging is not needed because Coast Guard inspectors have the authority to require gaugings when necessary and classification society rules for gauging are adequate. Sixteen commenters stated that gauging requirements should be included in the regulations. Nine of these sixteen commenters stated that if gauging requirements were included in the regulations, they should reflect the American Bureau of Shipping rules and provide for gauging when the vessel is ten years of age and every five years thereafter. One commenter stated that gauging should be allowed in lieu of alternate drydock examinations.

Question 5a: Should past experience with a specific vessel be considered in determining when it should next be drydocked?

Forty commenters responded to this question. Fifteen commenters stated that past experience should be considered. One of these commenters stated that this would be difficult to administer as a regulatory requirement. The commenter suggested that the Marine Safety Information System (MSIS) might aid in administering this requirement. Some commenters stated that extensions should be granted to properly maintained vessels that met or exceeded the minimum standards. Two MODU operators indicated that credit should be given for unscheduled drydockings.

Five commenters stated that present vessel condition and not past experience should be the criteria for determining

drydock intervals. They also stated that if conditions indicate the need for a shorter interval, then repairs/renewals should be immediately required and the normal interval restored.

Twenty commenters stated that past experience should not be considered to determine when a vessel should be drydocked. Most indicated that it would be too complex and arbitrary and that a fixed extension to the interval was the only fair approach. Many commenters stated that the Coast Guard already has the authority to grant drydock extensions or require an early drydock examination if vessel conditions warrant.

Question 5b: If so, how could it be considered without being unduly arbitrary.

Seven commenters responded to this question. Three commenters stated that by clearly publishing the policy concerning shortened drydock intervals based on past history and by carefully documenting a vessel's past history, the Coast Guard could negate any claim that a particular judgment was arbitrary. Four commenters stated that shorter intervals may be warranted for a vessel or a class of vessels when a trend of deterioration exists.

Question 6a: Should greater or lesser consideration be given to the hull material (wood, fiberglass, aluminum, steel)?

Twenty-one commenters responded to this question. Fourteen commenters favored considering the differences between hull materials in determining drydock examination intervals. Seven commenters stated that hull material was not as important as other considerations such as coatings, corrosion protection systems, fastenings in wooden hulls, etc.

Question 6b: Should greater or lesser consideration be given to the percentage of service in fresh vs. salt water.

Twenty-seven commenters responded to this question. Twenty-three commenters stated fresh water service justifies longer intervals between drydock examinations because there is less corrosion and fouling. One of these commenters pointed out that while fresh water service benefits steel hull vessels it has the opposite effect on wooden hulls since wood generally rots quicker in fresh water than in salt water. Three commenters noted that keeping track of the percentages of time a vessel operates in fresh water and salt water is difficult and time consuming. They therefore recommended that, since vessels operating inland are primarily in fresh water, the intervals between drydock examinations should be based on the certificated route with an inland route having a longer interval than an oceans route. One commenter stated no consideration should be given for fresh water service.

Question 7a: How well have tank coatings, special hull paints and hull protection systems performed in service?

Forty-four commenters responded to this question. Forty-two commenters stated that coatings have performed well, either superior to or in accordance with manufacturers' claims. Two commenters stated that coatings were not worth the cost, however, both of these commenters operated vessels in ice, which resulted in the coatings being abraded.

Question 7b: Has their performance been consistent between similar vessels?

Forty-one commenters responded stating that performance was consistent provided the coatings were properly applied. Surface preparation and proper curing were two of the critical variables mentioned.

Question 8: Should consideration be given to the vessel's operating area because of the likelihood of ice damage, undetected damage from grounding, scouring, etc?

Forty commenters responded to this question. Thirty-four commenters stated that no consideration should be given to a vessel's operating area. They pointed out that damage reports are currently made to the Coast Guard and the ABS, either of which can call for a drydock examination if it is necessary. They also stated that a system to keep track of operating area would be too complex to administer and that a prudent operator would survey for damage following a suspected grounding or similar incident in order to determine if a drydocking is required. Six commenters stated that operating area should be considered.

Question 9: Because of the different type of hull structural loading involved, should differing intervals be specified for displacement hulls than for nondisplacement hulls?

Fourteen commenters responded to this question. Eight commenters stated that consideration should be given to the type of hull. One small passenger vessel operator pointed out that when a planing hull rises partially out of the water at high speeds, it is subject to more pounding than a displacement hull, which degrades coatings and subjects the hull to more severe stress. Five commenters stated that no consideration should be given. They maintained that hull structure loading was a design problem and that the highly stressed areas would be built stronger.

Question 10: Should more consideration be given to the type of cargoes that the vessel carries because of the corrosive effects of those cargoes?

Thirty-two commenters responded to this question. Twenty-five commenters stated that this consideration is already in place under 46 CFR Subchapter O and that no further consideration is required. Six commenters stated that consideration should be given to the nature of the cargo carried. One commenter felt that the corrosiveness of the cargo was only critical on single skin barges.

Question 11: Should more frequent examinations of the hull be required when a vessel carries bulk cargoes that may be particularly harmful to the marine environment if accidentally released?

Thirty-two commenters responded to this question. Twenty-eight commenters stated that no consideration is warranted because most spills resulted from transfer operations, groundings and collisions and that more frequent drydock examinations will not prevent these type of spills. Four commenters favored more frequent drydock examinations for vessel carrying these cargoes.

Questions 12 and 13: These questions requested information concerning the economic impacts of drydocking examinations. Responses to these questions are addressed in the draft regulatory impact analysis.

Question 14: To what extent would shipyards and repair facilities be adversely affected if the Coast Guard were to increase intervals specified for tailshaft examinations or drydocking?

A shipyard owner stated that increasing the interval between drydock examinations would have an adverse economic impact on shipyards as well as decreasing overall vessel safety. All other commenters stated that the impact on shipyards would be minimal but would be an economic boon to vessel owners and operators. Several commenters stated that the impact on shipyards should not be a consideration, but, rather, the impact on the shipping industry and vessel safety should be the criteria used in deciding suitable drydock intervals. Several vessel owners/operators stated that the economic impact to shipyards would be minimal since shipyard income stems from repair work and not "up and down." One commenter stated that it was difficult to find a shipyard to do a bottom survey if there was no projected repair work.

Concerning Tailshaft Examinations

Question 1: In the absence of Coast Guard regulations, what would vessel owners or operators adopt as appropriate intervals and methods for tailshaft examinations? What is the experience with, and what intervals have been adopted on vessels not subject to inspection?

Forty-five commenters responded to this question. Eighteen commenters stated they would follow the ABS requirements for tailshaft examinations. Two commenters went further and suggested that tailshaft examinations should be delegated to the ABS. Three commenters stated a six year interval was appropriate while thirteen commenters suggested five years, one commenter four years, three commenters two and one-half years. Four commenters recommended a ten year interval for oil lubricated bearings provided certain conditions such as oil analysis and bearing weardown readings were regularly performed. Three commenters recommended that for oil lubricated bearings, the tailshaft should be examined at the first drydock examination after delivery and then not be subject to any scheduled examination unless problems develop. The reasoning expressed is that tailshafts with oil lubricated bearings have an excellent safety record and that drawing the tailshaft for examination does not harm than good because the bearing may only be damaged when the shaft is drawn.

Question 2: The present marine engineering regulations require tailshaft examinations only on vessels in ocean and coastwise service, presumably because loss of propulsion is a greater concern when offshore. The potential loss of a vessel's capability to maneuver in near-shore or inland waters is of equal or greater concern; if tailshaft examination requirements are to be retained, should they be extended to inspected vessels operating in these waters also?

Fourteen commenters responded to this question. Ten commenters stated the regulations should not be extended to vessels operating on inland waters. Operators of vessels on the Great Lakes stated that they have a proven record of conducting these examinations as conditions warrant and there is no regulatory requirement for drawing the tailshafts of these vessels. Four commenters recommended extending tailshaft examination requirements to vessels operating in inland waters.

Question 3: Since loss of motive power quickly and directly affects the earning capacity of a vessel, is it possible that economic considerations would drive vessel owners and operators to conduct tailshaft examinations, particularly on newer vessels where there is a substantial equity to protect, as frequently as is presently required?

Twenty-seven commenters responded to this question. Thirteen commenters stated that owners/operators continuously monitor the tailshafts of their vessels and consequently perform an examination if problems arise in order to preclude the loss of earnings. Eleven commenters stated that they would simply follow classification society guidelines for performing tailshaft examinations. Three commenters stated there was no economic incentive to perform the examination while one commenter pointed out that bearing weardown measurements are conducted annually on vessels operating on the Great Lakes.

Question 4: Should regulatory consideration be given to alternative means of monitoring bearing wear down?

Twenty-nine commenters responded to this question. Twenty-three commenters stated that consideration should be be given to keeping abreast of proven technological advances such as oil analysis and plug guaging arrangements. Six commenters stated that that no consideration should be given.

Question 5: This question requested information concerning the economic impact of tailshaft examinations. Responses to this question are addressed in the draft regulatory analysis.

In addition to the specific questions posed in the ANPRM the following comments were also received.

Nine commenters recommended that the Coast Guard allow underwater examinations to be substituted, on an alternating basis, for scheduled drydock examinations. Two of these commenters were classification societies, both of which allow alternating underwater surveys and drydocking. Two commenters pointed to the acceptance of underwater surveys by the classification societies as the basis for their recommendation. Three commenters pointed to the current Coast Guard regulations which allow for semi-submersible and jack-up MODU's to be surveyed while afloat as the basis for their recommendation. One commenter noted that underwater surveys have provided cost savings and asserted that, when properly performed, the survey provided the information necessary to determine if hull repairs were required. This comment was submitted by an owner and operator of construction barges which normally have long transit times to a drydock facility. Since the underwater surveys could be performed at more accessible locations, a cost savings was realized due to the decreased time the vessels were out of service.

Ten commenters recommended that the Coast Guard utilize the American Bureau of Shipping for drydock examinations in the same manner as the Coast Guard accepts ABS work products for plan review and vessel inspection on new construction. The agreements the Coast Guard has reached with the ABS concerning new construction have been established through Memoranda of Understanding and consequently, if the Coast Guard were to extend the agreements to cover drydock examinations, it would not be a regulatory change. At this time, the Coast Guard is not considering the use of the ABS for drydock examinations and reinspections of existing vessels.

Discussion of Changes

The scope of the rulemaking has changed. The ANPRM stated that the Coast Guard is considering revising the regulations governing drydock and tailshaft examination intervals for all vessels regulated under Title 46, Code of Federal Regulations. This is still true; however, the intervals for these examinations for Mobile Offshore Drilling Units (MODUs), regulated under 46 CFR Subchapter I–A, and for small passenger vessels, regulated under 46 CFR Subchapter T, will be addressed in separate rulemakings. Both of these subchapters are in the process of undergoing a regulatory rewrite and are docketed as follows: CGD 83–071a for Subchapter I–A, and CGD 85–080 for Subchapter T. Comments that are applicable to these vessels have been copied and placed in the respective dockets.

The Coast Guard is proposing to amend the regulations governing drydock and tailshaft examinations for those vessels regulated under Subchapter D—tank vessels, Subchapter H—passenger vessels, Subchapter I—cargo and miscellaneous vessels, Subchapter R—nautical school ships, and Subchapter U—oceanographic research vessels. In general, these proposals would extend the intervals between these examinations beyond those currently allowed, and accept alternate underwater examinations for certain vessels under specific conditions. These proposals are based on safety considerations, the comments received on the ANPRM, classification

society rules and current Coast Guard policy. While the Coast Guard believes that consistency between the proposed rules and classification society rules is important and responsive to the concerns of shipowners, comments on whether different inspection intervals should be implemented are specifically invited.

The following paragraphs detail the proposed changes.

1. Vessels in saltwater service will be required to undergo a drydock examination two times within a five year cycle with the interval between any two drydock examinations not to exceed three years. The cycle restarts after the second drydocking. Current regulations require these vessels to be drydocked once every two years. In specifying the drydock requirements in this manner, vessels owners will have more flexibility than they currently do in scheduling drydockings. These intervals are consistent with all major classification society rules, which was the overriding concern expressed in the comments received. These intervals will not apply to passenger vessels in international service which, in order to conform to the requirements of the Safety of Life at Sea Convention, as amended, will still be required to undergo annual drydock examinations.

2. Vessels in exclusive or partial fresh water service will be permitted to operate longer between drydockings. Hull deterioration for metal hulled vessels is reduced when operating in fresh water and there is no need to be drydocked as often. This is supported by the comments received; however, there was no consensus on what these extended intervals should be. The regulations allow for extended intervals based on the percentage of time a vessel operates in fresh water and this concept will be continued. The proposed regulations will require vessels operating exclusively in fresh water to be drydocked once every five years. Vessels that operate in fresh water more than six months out of any twelve month period will be required to be drydocked once every four years. Vessels that operate in salt water more than six months in any twelve month period will be required to be drydocked under the same schedule as a vessel that operates in salt water. These intervals are basically the same as currently allowed in the regulations except for tank vessels, which are currently limited to a maximum of three years between drydockings when in exclusive fresh water service, and sailing school vessels, which have no allowance for mixed fresh and salt water service but do have an interval of six years for exclusive fresh water service.

3. Wooden hull vessels will be required to be drydocked twice within a five year cycle with no more than three years between any two drydockings. This drydock schedule would lengthen the interval for most wooden hull vessels operating in salt water since the current drydock interval is two years. It would be a reduction for wooden vessels exclusively operating in fresh water since the current interval for most of these vessels is five years. The reduction for fresh water service is necessary because fresh water accelerates deterioration due to rot on wooden hull vessels. Exceptions to the above current drydock intervals are: (1) Wooden hull tank vessels which have a drydock interval of four years regardless of area of operation; and (2) sailing school vessels operating in fresh water, which have a drydock interval of six years.

4. Under these proposed regulations the Coast Guard would accept underwater surveys alternating with scheduled drydockings for all vessels except wooden hull vessels and double hull tank barges in inland service. Alternating underwater surveys will only be accepted for vessels that are less than fifteen years of age and that are equipped with effective hull protection. Effective hull protection includes impressed current systems, certain coatings, and sacrificial anodes. The Commandant (G–MVI) will make all decisions regarding the acceptability of underwater surveys for each vessel. Decisions of acceptability will be based on the condition of the vessel, the hull protection system, and the procedures that will be followed for performing the underwater survey. These decisions will, in many cases, require an on-site evaluation and may, in some instances, depend on quality of the survey results. For these reasons, no survey procedures or standards are included in the proposed regulations. The Coast Guard has published guidelines for underwater examinations, which, among other things, include requirements that rudder and bearing clearances must be obtained, suitable arrangements must be made to allow for the inspection of the sea valves from inside the vessel, the underwater body must be suitably marked, the vessel must be at light draft, and a minimum of seventy-five percent of the internals in way of the underwater body must be cleaned and made available for inspection. These guidelines are in Chapter 8, Volume II of the Marine Safety Manual.

Water conditions are of primary importance when considering the acceptability of an underwater survey. The Coast Guard has an experimental program whereby certain vessels have been allowed to substitute an underwater survey for a drydocking; fifteen vessels are participating. Experience from this program has indicated that it is unlikely that there are many ports within the U.S. that are suitable for underwater surveys, because of poor water quality (turbidity and current); however, there are locations outside the U.S. that are suitable. Once a vessel is accepted for alternate underwater examinations, the water conditions at the time of the survey must be suitable, with final judgment being made by the Officer in Charge, Marine Inspection (OCMI).

The proposed change is expected to provide the most benefit to vessels which must travel long distances to be drydocked, especially vessels with high operating costs, where lost time for transit is a significant portion of the drydock examination cost. It is not expected to aid vessels which can be readily drydocked. Experience from the experimental program has indicated that, when the survey is properly performed and water conditions are adequate, an underwater survey provides the necessary information to judge the condition of the vessel's underwater body. A properly performed underwater survey is at least as time consuming as a drydock examination, and with the costs associated for divers and the necessary video equipment, the Coast Guard does not believe an underwater survey would consistently be less costly than a drydock examination. In fact, if the underwater survey is not performed properly or if it shows the vessel requires repairs to the underwater hull, the vessel would then be required to be drydocked. This would result in the owner/operator having to spend more money than if the vessel had been initially drydocked for the examination.

5. The proposed regulations will retain the current provision that allows double hulled tank barges in inland service to undergo an internal examination of the spaces between the outer hull and the tank boundaries in lieu of alternate drydockings. Because of the proposed drydock schedule discussed above in paragraphs 1 and 2, the intervals between mandatory drydocking will be increased from four years (salt water) and six years (fresh water) to five years and ten years, respectively. Because of this extended time between mandatory drydocking, and to verify the integrity of

the cargo tank boundary, these proposed regulations require that all internal tanks be examined whenever the vessel is scheduled for a drydock examination. This includes alternate internal examinations for double hull tank barges and alternate underwater surveys for tank ships and single skin tank barges. This proposed requirement will apply to all tank vessels except those certificated to carry products regulated under 46 CFR Subchapter O, in which case internal tank examinations must be performed as specified in 46 CFR Part 151. Including this proposed requirement is not expected to impose a burden on the owners and operators of tank vessels. The internals of cargo tanks are required to be periodically examined and for economic reasons, they have usually been examined concurrently with the scheduled drydocking.

6. These proposed regulations will also provide that all extensions to the drydocking intervals must be approved by the Commandant (G–MVI). Under the current regulations, the Commandant has delegated the authority to grant six month extensions to the OCMIs. This delegation will be removed. The drydock examination intervals being proposed go a long way toward harmonizing the Coast Guard requirements with those specified by the classification societies. In addition, they provide vessel owners and operators the necessary flexibility to schedule drydock examinations without disrupting the vessel's schedule. These are the two biggest factors vessel onwers/operators currently cite when requesting drydock extensions. For these reasons the need for extensions should decrease significantly and the Coast Guard is of the opinion that extensions should only be granted in unusual circumstances. The Coast Guard considers that, for the sake of consistency in granting extensions, control should be maintained by the Commandant (G–MVI).

7. These regulations propose that each vessel that holds a Load Line Certificate must have on board a plan that shows the dimensions and location of the hull plating and framing. This plan is to be made available to the Coast Guard marine inspector whenever the vessel undergoes a drydock examination or, in lieu of a drydock examination, an underwater survey or internal examination. The purpose of this requirement is to insure that the information necessary for the Coast Guard marine inspector to determine the extent of the vessel's hull deterioration is readily available. This proposed requirement incorporates Recommendation No. 7 from the Coast Guard Marine Casualty Report on the capsizing and sinking of the SS MARINE ELECTRIC, O.N. 245675, Report No. 16732/0001 HQS 83.

8. With one exception, discussed below, these proposed regulations generally extend the interval between tailshaft examinations. In addition to the comments received, the basis for the proposed intervals is to harmonize the tailshaft examination intervals with the proposed drydocking intervals and the intervals specified by the classification societies. For water lubricated bearings the intervals proposed are as follows:

a. Tailshafts with no special provisions, i.e. continuous liner, corrosion resistant shafts, or stress reducing design, must be examined twice within a five year cycle with no more than three years elapsing between any two examinations. The cycle restarts after the second examination. This is an extension beyond the current requirement of an examination once every two years.

b. Tailshafts constructed of corrosion resistant materials or fitted with a continuous liner will be required to be examined once every three years for single shafted vessels and once every five years for multiple shafted vessels. These are the same intervals currently required except for multiple shafted vessels, which is four years.

c. Tailshafts made of corrosion resistant materials or fitted with a continuous liner and which have been designed to reduce stress or are equipped with a flanged propeller will be required to be examined once every five years. This is a change from the current requirement of once every four years.

The exception to lengthened tailshaft examination intervals concerns nautical school ships. Presently, nautical school ships are not subject to the same intervals as other vessels and have an interval of four years regardless of the construction features of the tailshaft. Under these proposed regulations, they will be subject to the same intervals as other vessels and consequently the interval will depend on the construction features of the tailshaft. The practical effect of these proposed regulations on existing nautical school ships is that the tailshaft examination interval will be lengthened to five years.

9. These regulations propose that tailshafts with oil lubricated bearings will not be required to be drawn at specified intervals for examination. At each drydocking or alternate underwater survey, bearing weardown readings must be taken. In addition, the propeller must be removed to permit the non-destructive testing of the forward ⅓ of the tapered section of the tailshaft every five years. Quarterly oil analysis must be done and made available to the OCMI. These tailshafts would be required to be drawn only if a problem was indicated by these methods. As indicated by the comments received, drawing a tailshaft with oil lubricated bearings often does more harm than good. These bearings have an excellent service record and drawing the shaft may only result in bearing damage. Monitoring the tailshaft through periodic bearing clearance-readings, non-destructive testing of the taper and key way, and oil analysis is just as effective. The American Bureau of Shipping has recently changed its rules to no longer require tailshafts with oil lubricated bearings to be drawn at specified intervals. Currently, the Coast Guard requires tailshafts with oil lubricated bearings to be drawn once every ten years.

10. These regulations propose that all extensions to the tailshaft examination intervals must be approved by the Commandant (G–MVI). Under the current regulations, OCMIs have the authority to grant six-month extensions for water lubricated bearings and up to two-year extensions for oil lubricated bearings. This authority will be removed. The tailshaft examination intervals being proposed go a long way towards being harmonized with the drydock intervals and with the intervals specified by the classification societies. In addition, they provide vessel owners and operators the necessary flexibility to schedule the tailshaft examination without disrupting the vessel's schedule. These are the biggest factors vessel owners/operators currently cite when requesting tailshaft extensions. For these reasons the need for extensions should decrease significantly and, in order to be consistent in granting extensions, control should be maintained by the Commandant (G–MVI).

Regulatory Evaluation

These proposed regulations are considered to be non-major under Executive Order 12291. They are considered significant under DOT regulatory policies and procedures (44 FR 11034; February 26, 1979) because of the possible safety implication of extending the drydock and tailshaft examination intervals. The Coast Guard has determined that these extended intervals will provide an adequate level of safety. This determination is based on

the improved hull coatings and corrosion prevention methods used on present day vessels. In addition, the Coast Guard has, under the present regulations, granted six month drydock extensions to give vessels flexibility in scheduling the examinations. There is no indication that these longer intervals have degraded safety. Accordingly, a draft regulatory evaluation has been prepared and placed in the rulemaking docket.

The basis for estimating the economic impact was the information received in response to the questions posed in the ANPRM concerning the costs for vessels to undergo a drydock and tailshaft examination. Most of the information received pertained to tankers above 30,000 DWT and tankbarges. While there was information received concerning drydocking and tailshaft examination costs for the other vessel types, there was not enough to establish general class costs. Consequently, the information received on tankers and tankbarges was adapted and used to determine the costs for all vessels. This has undoubtedly introduced some errors in the cost calculations. Persons interested in submitting information concerning the costs for other vessel types are invited to do so. This information will be used in preparing the final evaluation.

Based on this information, it is estimated that these proposed regulations would provide cost reductions to vessel owners through fewer examinations resulting in a savings of $295.4 million (present value in 1986 dollars). The annual savings is estimated to be $29.57 million, also in 1986 dollars. Savings will be realized by all vessels except wooden hull vessels in fresh water service, wooden hull tank vessels and sailing school vessels since the proposed regulations shorten the drydock intervals for these vessels. The Coast Guard has identified three small vessels from these categories. The increase in cost to these vessels is significantly less than $1000 per year and based on this, the Coast Guard has determined no further evaluation is necessary.

The draft regulatory evaluation may be inspected or copied at the location referred to in ADDRESSES. Copies may also be obtained by contacting LCDR Jeffrey G. Lantz at (202) 426-4431.

Environmental Assessment

The Coast Guard has assessed the environmental impacts of these regulations and has determined they will have no significant impact.

Paperwork Reduction Act

These proposed regulations contain information collection requirements in the following sections of 46 CFR:

§ 31.10-21	§ 31.10-34
§ 71.50-3	§ 71.50-6
§ 91.40-3	§ 91.40-6
§ 157.15-30	§ 157.15-35
§ 189.229	§ 189.233
§ 189.60-3	§ 189.60-5

They have been submitted to the Office of Management and Budget (OMB) for approval under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). Persons desiring to comment on these information collection requirements should submit their comments to: Office of Regulatory Policy, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, ATTN: Desk Officer, Coast Guard. Persons submitting comments to OMB are also requested to submit a copy of their comments to the Coast Guard as indicated under ADDRESSES.

Regulatory Flexibility Act

These proposed regulations would affect all companies that own or operate vessels within the scope of this rulemaking, some of which may be small entities. The proposed rules apply to all inspected vessels except small passenger vessels and mobile offshore drilling units. The proposed rules will provide an economic benefit to these vessels as the intervals between drydock and tailshaft examinations are being extended beyond the current requirements. The Coast Guard estimates the proposal could save those vessels which could be considered a small entity as much as $2,500 annually.

The Coast Guard does not consider this economic impact to be significant. Consequently the Coast Guard certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities.

List of Subjects

46 CFR Part 31

Coast Guard, Marine safety, Tank vessels, Tank barges, Law enforcement, Flammable materials

46 CFR Part 61

Coast Guard, Marine safety, Vessels, Tests and inspections

46 CFR Part 71

Coast Guard, Marine safety, Passenger vessels, Reporting requirements, Foreign trade, Law enforcement

46 CFR Part 91

Coast Guard, Marine safety, Cargo vessels, Law enforcement, Reporting requirements

46 CFR Part 167

Coast Guard, Marine safety, School vessels, Reporting requirements, Fire protection

46 CFR Part 189

Coast Guard, Marine safety, Oceanographic vessels.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Title 46 Code of Federal Regulations as follows:

PART 31—[AMENDED]

1. The authority citation for Part 31 is revised to read as follows and all other authority citations in the part are removed.

Authority: 46 U.S.C. 3306, 3703; 49 CFR 1.46(b).

2. By revising § 31.10-20 to read as follows:

§ 31.10-20 Drydock examinations, underwater surveys and internal examinations—TB/ALL.

(a) A drydock examination means hauling out a vessel or placing a vessel in a drydock or slipway for an examination of all accessible parts of the vessel's underwater body and all through-hull fittings, including sea chests, sea valves, and sea strainers. A drydock examination also includes a complete internal examination of all cargo and ballast tanks except if the vessel is certificated to carry cargoes regulated under 46 CFR Part 38 or 46 CFR Subchapter O, in which case cargo tank internal examinations must be accomplished as specified in 46 CFR Part 38 and 151, respectively.

(b) An underwater survey means the examination of a vessel, while afloat, of all accessible parts of the vessel's underwater body and all through-hull fittings, including sea chests, sea valves, and sea strainers and bilge injection valves. An underwater survey also includes a complete internal examination of all cargo and ballast tanks except if the vessel is certificated to carry cargoes regulated under 46 CFR Part 38 or 46 CFR Subchapter O, in which case cargo tank internal examinations must be accomplished as specified in 46 CFR Part 38 and 151, respectively.

(c) An internal examination of a double hulled tank barge (double sides, ends, and bottom) means an

examination of the barge while afloat with no cargo or ballast on board and consists of a complete examination of—

(1) The internal side of the barge's outer hull;

(2) The exterior side of the barge's cargo tank boundary;

(3) All interior spaces; and

(4) The internals of all ballast and cargo tanks except if the vessel is certificated to carry cargoes regulated under 46 CFR Part 38 or 46 CFR Subchapter O, in which case cargo tank internal examinations must be accomplished as specified in 46 CFR Part 38 and 151, respectively.

3. By adding a new § 31.10–23 to read as follows:

§ 31.10–23 Drydock examinations, underwater surveys and internal examination intervals—TB/ALL.

(a) Except as provided for in paragraphs (b) through (e) of this section, each tank vessel must undergo a drydock examination as follows:

(1) Vessels in salt water service must undergo two drydock examinations within a five year cycle. A new five year cycle begins upon completion of the second drydock examination in the previous five year cycle. No more than three years may elapse between any two drydock examinations.

(2) Vessels that operate in fresh water an aggregate of at least 6 months in every 12 month period since the last drydock examination must undergo a drydock examination at intervals not to exceed four years.

(3) Vessels that operate exclusively in fresh water must undergo a drydock examination at intervals not to exceed five years.

(b) Vessels with wooden hulls must undergo two drydock examinations within a five year cycle regardless of the type of water they operate in. A new five year cycle begins upon completion of the second drydock examination in the previous five year cycle. No more than three years may elapse between any two drydock examinations.

(c) An underwater survey may be done in lieu of alternate drydock examinations for all vessels, except wooden hull vessels and double hull tank barges in inland service, provided the vessel is less than 15 years of age and is fitted with an effective hull protection system. Vessel owners or operators must apply to the Commandant (G–MVI) for approval of underwater surveys in lieu of alternate drydock examinations for each vessel. The application must include the following information:

(1) The procedures to be followed in carrying out the underwater surveys;

(2) The location or locations where the underwater surveys will be accomplished;

(3) The method to be used to accurately determine the diver location relative to the hull;

(4) The means that will be provided for examining sea chests, sea valves and other through-hull fittings;

(5) The means that will be provided for taking shaft bearing clearances;

(6) The internal spaces in way of the vessel's underwater body that will be available for inspection; and

(7) The condition of the vessel, including the hull protection system used on the vessel and the anticipated draft of the vessel at the time of the survey.

(d) An internal examination may be done in lieu of drydock examinations on double hull tank barges in inland service.

(e) Each vessel, irrespective of service, which has not complied with the requirements of paragraphs (a) through (d) of this section, either because it was on a voyage or was laid up, must undergo a drydock examination upon completion of the voyage or before being placed in service.

(f) The Commandant (G–MVI) may authorize extensions to the drydock intervals specified in paragraphs (a) and (b) of this section.

4. By adding a new § 31.10–24 to read as follows:

§ 31.10–24 Notice and plans required.

(a) The master, owner, operator, or agent shall notify the Officer in Charge, Marine Inspection, whenever any vessel is to be drydocked regardless of the purpose.

(b) Each vessel that holds a Load Line Certificate must have on board a shell expansion plan showing the vessel's hull scantlings. This plan is to be made available to the Coast Guard marine inspector whenever the vessel undergoes a drydock examination, underwater survey, internal examination, or whenever repairs are made to the vessel's hull.

PART 61—[AMENDED]

5. The authority citation for Part 61 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; 49 CFR 1.46(b).

6. By revising § 61.20–17 to read as follows:

§ 61.20–17 Examination intervals.

(a) Except as provided in paragraphs (b) through (e) of this section, each tailshaft on a vessel must be examined twice within a five year cycle. A new five year cycle begins upon completion of the second tailshaft examination in the previous five year cycle. No more than three years may elapse between any two tailshaft examinations.

(b) Tailshafts fabricated of materials resistant to corrosion by sea water, or fitted with a continuous liner or a sealing gland which prevents sea water from contacting the shaft, must be examined at the following intervals:

(1) Once every three years for vessels with a single shaft; or

(2) Once every five years for vessels with multiple shafts.

(c) Tailshafts constructed or fitted as described in paragraph (b) of this section that are fitted with a taper, keyway, and propeller designed in accordance with American Bureau of Shipping standards to reduce stress concentration, or that are fitted with a flanged propeller, must be examined once every five years.

(d) Tailshafts with oil lubricated bearings are not required to be examined provided—

(1) Tailshaft bearing clearance readings are taken whenever the vessel undergoes a drydock examination or underwater survey;

(2) The propeller is removed and non-destructive testing of the taper and keyway is done at intervals not to exceed five years; and

(3) Analysis of the tailshaft bearing lubricating oil is performed quarterly.

(e) A tailshaft on a mobile offshore drilling unit is not subject to the examination intervals prescribed in paragraphs (a) through (c) of this section if it is:

(1) Examined during each regularly scheduled drydocking; or

(2) Regularly examined in a manner acceptable to the Commandant (G–MVI).

7. By revising § 61.20–18 to read as follows:

§ 61.20–18 Examination details.

(a) Each tailshaft must be drawn and visually inspected at each examination.

(b) On tailshafts with a taper, keyway, and propeller designed in accordance with American Bureau of Shipping standards to reduce stress concentration, in addition to a visual inspection of the entire shaft, the forward ⅓ of the shaft's taper section must be nondestructively tested.

(c) On tailshafts with a propeller fitted to the shaft by means of a coupling flange, in addition to a visual inspection of the entire shaft, the flange, the fillet at the propeller end, and each coupling bolt must be nondestructively tested.

8. By revising § 61.25–21 to read as follows:

§ 61.25–21 Extension of examination interval.

The Commandant (G–MVI) may authorize extensions to the interval between tailshaft examinations.

PART 71—[AMENDED]

9. The authority citation for Part 71 is revised to read as follows and all other authority citations in the part are removed.

Authority: 46 U.S.C. 2113, 3306; 49 CFR 1.46(b)

10. By revising § 71.50–1 to read as follows:

§ 71.50–1 Drydock examinations and underwater surveys.

(a) A drydock examination means hauling out a vessel or placing a vessel in a drydock or slipway for an examination of all accessible parts of the vessel's underwater body and all through-hull fittings, including sea chests, sea valves and sea strainers.

(b) An underwater survey means the examination of a vessel, while afloat, of all accessible parts of the vessel's underwater body and all through-hull fittings, including sea chests, sea valves, sea strainers and bilge injection valves.

11. By adding a new § 71.50–3 to read as follows:

§ 71.50–3 Drydock examination intervals.

(a) Each vessel making international voyages must undergo a drydock examination once every 12 months.

(b) Except as provided for in paragraphs (c) through (e) of this section, each vessel not making international voyages must undergo a drydock examination as follows:

(1) Vessels in salt water service must undergo two drydock examinations within a five year cycle. A new five year cycle begins upon completion of the second drydock examination in the previous five year cycle. No more than three years may elapse between any two drydock examinations.

(2) Vessels that operate in fresh water an aggregate of at least 6 months in every 12 month period since the last drydock examination must undergo a drydock examination at intervals not to exceed four years.

(3) Vessels that operate exclusively in fresh water must undergo a drydock examination at intervals not to exceed five years.

(c) Vessels with wooden hulls must undergo two drydock examinations within a five year cycle regardless of the type of water they operate in. A new five year cycle begins upon completion of the second drydock examination in the previous five year cycle. No more than three years may elapse between any two drydock examinations.

(d) An underwater survey may be done in lieu of alternate drydock examinations for all vessels, except wooden hulls and vessels making international voyages, provided the vessel is less than 15 years of age and is fitted with an effective hull protection system. Vessel owners or operators must apply to the Commandant (G–MVI) for approval of underwater surveys in lieu of alternate drydock examinations for each vessel. The application must include the following information:

(1) The procedures to be followed in carrying out the underwater surveys;

(2) The location or locations where the underwater surveys will be accomplished;

(3) The method to be used to accurately determine the diver location relative to the hull;

(4) The means that will be provided for examining sea chests, sea valves and other through-hull fittings;

(5) The means that will be provided for taking shaft bearing clearances;

(6) The internal spaces in way of the vessel's underwater body that will be made available for inspection; and

(7) The condition of the vessel, including the hull protection system used on the vessel and the anticipated draft of the vessel at the time of the survey.

(e) Each vessel, irrespective of service, which has not complied with the requirements of paragraphs (a) through (d) of this section, either because it was on a voyage or was laid up, must undergo a drydock examination upon completion of the voyage or before being placed in service.

(f) The Commandant (G–MVI) may authorize extensions to the drydock intervals specified in paragraphs (a) and (b) of this section.

12. By revising § 71.50–5 to read as follows:

§ 71.50–5 Notice and plans required.

(a) The master, owner, operator, or agent shall notify the Officer in Charge, Marine Inspection, whenever any vessel is to be drydocked regardless of the purpose.

(b) Each vessel that holds a Load Line Certificate must have onboard a shell expansion plan showing the vessel's hull scantlings. This plan is to be made available to the Coast Guard marine inspector whenever the vessel undergoes a drydock examination, underwater survey, or whenever repairs are made to the vessel's hull.

PART 91—[AMENDED]

13. The authority citation for Part 91 is revised to read as follows and all other authority citations in the part are removed.

Authority: 46 U.S.C. 3306, 3703; 49 CFR 1.46(b)

14. By revising § 91.40–1 to read as follows:

§ 91.40–1 Drydock examinations, underwater surveys and internal examinations.

(a) A drydock examination means hauling out a vessel or placing a vessel in a drydock or slipway for an examination of all accessible parts of the vessel's underwater body and all through hull-fittings, including sea chests, sea valves and sea strainers. For vessels certificated to carry cargoes regulated under 46 CFR Subchapter O, a drydock examination also includes a complete internal examination of all ballast tanks.

(b) An underwater survey means the examination of a vessel, while afloat, of all accessible parts of the vessel's underwater body and all through-hull fittings, including sea chests, sea valves, sea strainers and bilge injection valves. An underwater survey also includes a complete internal examination of all cargo and ballast tanks except if the vessel is certificated to carry cargoes regulated under 46 CFR Subchapter O, in which case cargo tank internal examinations must be accomplished as specified in 46 CFR Part 151.

(c) An internal examination of a double hulled tank barge (double sides, ends, and bottom) means an examination of the barge while afloat with no cargo or ballast on board and consists of a complete examination of—

(1) The internal side of the barge's outer hull;

(2) The exterior side of the barge's cargo tank boundary;

(3) All interior spaces; and

(4) The internals of all ballast and cargo tanks except if the vessel is certificated to carry cargoes regulated under 46 CFR Subchapter O, in which case cargo tank internal examinations must be accomplished as specified in 46 CFR Part 151.

15. By adding a new § 91.40–3 to read as follows:

§ 91.40–3 Drydock examination, underwater survey and internal examination intervals.

(a) Except as provided for in paragraphs (b) through (e) of this section, each vessel must undergo a drydock examination as follows:

(1) Vessels in salt water service must undergo two drydock examinations within a five year cycle. A new five year cycle begins upon completion of the second drydock examination in the previous five year cycle. No more than three years may elapse between any two drydock examinations.

(2) Vessels that operate in fresh water an aggregate of at least 6 months in every 12 month period since the last drydock examination must undergo a drydock examination at intervals not to exceed four years.

(3) Vessels that operate exclusively in fresh water must undergo a drydock examination at intervals not to exceed five years.

(b) Vessels with wooden hulls must undergo two drydock examinations within a five year cycle regardless of the type of water they operate in. A new five year cycle begins upon completion of the second drydock examination in the previous five year cycle. No more than three years may elapse between any two drydock examinations.

(c) An underwater survey may be done in lieu of alternative drydock examinations for all vessels, except wooden hull vessels and double hull tank barges in inland service, provided the vessel is less than 15 years of age and is fitted with an effective hull protection system. Vessel owners or operators must apply to the Commandant (G–MVI) for approval of underwater surveys in lieu of alternate drydock examinations for each vessel. The application must include the following information:

(1) The procedures to be followed in carrying out the underwater surveys;

(2) The location or locations where the underwater surveys will be accomplished;

(3) The method to be used to accurately determine the diver location relative to the hull;

(4) The means that will be provided for examining sea chests, sea valves and other through-hull fittings;

(5) The means that will be provided for taking shaft bearing clearances;

(6) The internal spaces in way of the vessel's underwater body that will be made available for inspection; and

(7) The condition of the vessel, including the hull protection system used on the vessel and the draft of the vessel at the time of the survey.

(d) An internal examination may be done in lieu of alternate drydock examinations on double hull tank barges in inland service.

(e) Each vessel, irrespective of service, which has not complied with the requirements of paragraphs (a) through (d), either because it was on a voyage or was laid up, must undergo a drydock examination upon completion of the voyage or before being placed in service.

(f) The Commandant (G–MVI) may authorize extensions of the drydock interval specified in paragraphs (a) and (b) of this section.

16. By revising § 91.40–5 to read as follows:

§ 91.40–5 Notice and plans required.

(a) The master, owner, operator, or agent shall notify the Officer in Charge, Marine Inspection, whenever any vessel is to be drydocked regardless of the purpose.

(b) Each vessel that holds a Load Line Certificate must have onboard a shell expansion plan showing the vessel's hull scantlings. This plan is to be made available to the Coast Guard marine inspector whenever the vessel undergoes a drydock examination, underwater survey, internal examination, or whenever repairs are made to the vessel's hull.

PART 167—[AMENDED]

17. The authority citation for Part 167 is revised to read as follows and all other authority citations in the part are removed.

Authority: 46 U.S.C. 3306, § 167.65–65 also issued under 46 U.S.C. 6101 and § 167.00–15 also issued under 46 U.S.C. 6105; 49 CFR 1.46.

18. By adding a new § 167.15–27 to read as follows:

§ 167.15–27 Drydock examinations and underwater surveys.

(a) A drydock examination means hauling out a vessel or placing a vessel in a drydock or slipway for an examination of all accessible parts of the vessel's underwater body and all through hull fittings including sea chests, sea valves and sea strainers.

(b) An underwater survey means the examination of a vessel, while afloat, of all accessible parts of the vessel's underwater body and all through-hull fittings, including sea chests, sea valves, sea strainers and bilge injection valves.

19. By revising § 167.15–30 to read as follows:

§ 167.15–30 Drydock examination intervals.

(a) Except as provided for in paragraphs (b) through (d) of this section, each vessel must undergo a drydock examination as follows:

(1) Vessels in salt water service must undergo two drydock examinations within a five year cycle. A new five year cycle begins upon completion of the second drydock examination in the previous five year cycle. No more than three years may elapse between any two drydock examinations.

(2) Vessels that operate in fresh water an aggregate of at least 6 months in every 12 month period since the last drydock examination must undergo a drydock examination at intervals not to exceed four years.

(3) Vessels that operate exclusively in fresh water must undergo a drydock examination at intervals not to exceed five years.

(b) Vessels with wooden hulls must undergo two drydock examinations within a five year cycle regardless of the type of water they operate in. A new five year cycle begins upon completion of the second drydock examination in the previous five year cycle. No more than three years may elapse between any two drydock examinations.

(c) An underwater survey may be done in lieu of alternate drydock examinations for all vessels, except vessels with wooden hulls, provided the vessel is less than 15 years of age and is fitted with an effective hull protection system. Vessel owners or operators must apply to the Commandant (G–MVI) for approval of underwater surveys in lieu of alternate drydock examinations for each vessel. The application must include the following information:

(1) The procedures to be followed in carrying out the underwater surveys;

(2) The location or locations where the underwater surveys will be accomplished;

(3) The method to be used to accurately determine the diver location relative to the hull;

(4) The means that will be provided for examining sea chests, sea valves and other through hull fittings;

(5) The means that will be provided for taking shaft bearing clearances;

(6) The internal spaces in way of the vessel's underwater body that will be made available for inspection; and

(7) The condition of the vessel, including the hull protection system used on the vessel and the anticipated draft of the vessel at the time of the survey.

(d) Each vessel, irrespective of service, which has not complied with

the requirements of paragraphs (a) through (c) of this section, either because it was on a voyage or was laid up, must undergo a drydock examination upon completion of the voyage or before being placed in service.

(e) The Commandant (G–MVI) may authorize extensions to the drydock intervals specified in paragraphs (a) and (b) of this section.

20. By adding a new § 167.15–35 to read as follows:

§ 167.15–35 Notice and plans required.

(a) The master, owner, operator, or agent shall notify the Officer in Charge, Marine Inspection, whenever any vessel is to be drydocked regardless of the purpose.

(b) Each vessel that holds a Load Line Certificate must have onboard a shell expansion plan showing the vessel's hull scantlings. This plan is to be made available to the Coast Guard marine inspector whenever the vessel undergoes a drydock examination, underwater survey, or whenever repairs are made to the vessel's hull.

21. By revising § 167.15–50 to read as follows:

§ 167.15–50 Tailshaft examinations.

Tailshaft examinations on nautical school ships shall conform to the standards in Part 61 of Subchapter F (Marine Engineering) of this chapter.

PART 169—[AMENDED]

22. The authority citation for Part 169 continues to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46(b).

23. By revising § 169.229 to read as follows:

§ 169.229 Drydock examination intervals.

(a) Except as provided for in paragraphs (b) through (d) of this section, each vessel must undergo a drydock examination as follows:

(1) Vessels in salt water service must undergo two drydock examinations within a five year cycle. A new five year cycle begins upon completion of the second drydock examination in the previous five year cycle. No more than three years may elapse between any two drydock examinations.

(2) Vessels that operate in fresh water an aggregate of at least 9 months in every 12 month period since the last drydock examination must undergo a drydock examination at intervals not to exceed four years.

(3) Vessels that operate exclusively in fresh water must undergo a drydock examination at intervals not to exceed five years.

(b) Vessels with wooden hulls must undergo drydock examinations within a five year cycle regardless of the type of water they operate in. A new five year cycle begins upon completion of the second drydock examination in the previous five year cycle. No more than three years may elapse between any two drydock examinations.

(c) An underwater survey may be done in lieu of alternate drydock examinations for all vessels, except vessels with wooden hulls, provided the vessel is less than 15 years of age and is fitted with an effective hull protection system. Vessel owners or operators must apply to the Commandant (G–MVI) for approval of underwater surveys in lieu of alternate drydock examinations for each vessel. The application must include the following information:

(1) The procedures to be followed in carrying out the underwater surveys;

(2) The location or locations where the underwater surveys will be accomplished;

(3) The method to be used to accurately determine the diver location relative to the hull;

(4) The means that will be provided for examining sea chests, sea valves and other through hull fittings;

(5) The means that will be provided for taking shaft bearing clearances;

(6) The internal spaces in way of the vessel's underwater body that will be made available for inspection; and

(7) The condition of the vessel, including the hull protection system used on the vessel and the anticipated draft of the vessel at the time of the survey.

(d) Each vessel, irrespective of service, which has not complied with the requirements of paragraphs (a) through (c) of this section, either because it was on a voyage or was laid up, must undergo a drydock examination upon completion of the voyage or before being placed in service.

(e) The Commandant (G–MVI) may authorize extensions to the drydock intervals specified in paragraphs (a) and (b) of this section.

24. By revising § 169.231 to read as follows:

§ 169.231 Drydock examinations and underwater surveys.

(a) A drydock examination means hauling out a vessel or placing a vessel in a drydock or slipway for an examination of all accessible parts of the vessel's underwater body and all through hull fittings including sea chests, sea valves and sea strainers.

(b) An underwater survey means the examination of a vessel, while afloat, of all accessible parts of the vessel's underwater body and all through-hull fittings, including sea chests, sea valves, sea strainers and bilge injection valves.

25. By revising § 169.233 to read as follows:

§ 169.233 Notice and plans required.

(a) The master, owner, operator, or agent shall notify the Officer in Charge, Marine Inspection, whenever any vessel is to be drydocked regardless of the purpose.

(b) Each vessel that holds a Load Line Certificate must have onboard a shell expansion plan showing the vessel's hull scantlings. This plan is to be made available to the Coast Guard marine inspector whenever the vessel undergoes a drydock examination, underwater survey, or whenever repairs are made to the vessel's hull.

PART 189—[AMENDED]

26. The authority citation for Part 189 is revised to read as follows and all other authority citations in the part are removed.

Authority: 46 U.S.C. 2113, 3306; 49 CFR 1.46.

27. By revising § 189.40–1 to read as follows:

§ 189.40–1 Drydock examinations and underwater surveys.

(a) A drydock examination means hauling out a vessel or placing a vessel in a drydock or slipway for an examination of all accessible parts of the vessel's underwater body and all through-hull fittings including sea chests, sea valves, sea strainers and bilge injection valves.

(b) An underwater survey means the examination of a vessel, while afloat, of all accessible parts of the vessel's underwater body and all through-hull fittings, including sea chests, sea valves and sea strainers.

28. By adding a new §189.40–3 to read as follows:

§189.40–3 Drydock examination intervals.

(a) Except as provided for in paragraphs (b) through (d) of this section, each vessel must undergo a drydock examination as follows:

(1) Vessels in salt water service must undergo two drydock examinations within a five year cycle. A new five year cycle begins upon completion of the second drydock examination in the previous five year cycle. No more than three years may elapse between any two drydock examinations.

(2) Vessels that operate in fresh water an aggregate of at least 6 months in every 12 month period since the last drydock examination must undergo a drydock examination at intervals not to exceed four years.

(3) Vessels that operate exclusively in fresh water must undergo a drydock examination at intervals not to exceed five years.

(b) Vessels with wooden hulls must undergo two drydock examinations within a five year cycle regardless of the type of water they operate in. A new five year cycle begins upon completion of the second drydock examination in the previous five year cycle. No more then three years may elapse between any two drydock examinations.

(c) An underwater survey may be done in lieu of alternate drydock examinations for all vessels, except vessels with wooden hulls, provided the vessel is less than 15 years of age and is fitted with an effective hull protection system. Vessel owners/operators must apply to the Commandant (G–MVI) for approval of underwater surveys in lieu of alternate drydock examinations for each vessel. The application must include the following information:

(1) The procedures to be followed in carrying out the underwater surveys;

(2) The location or locations where the underwater surveys will be accomplished;

(3) The method to be used to accurately determine the diver location relative to the hull;

(4) The means that will be provided for examining sea chests, sea valves and other through–hull fittings;

(5) The means that will be provided for taking shaft bearing clearances;

(6) The internal spaces in way of the vessel's underwater body that will be made available for inspection; and

(7) The condition of the vessel, including the hull protection system used on the vessel and the anticipated draft of the vessel at the time of the survey.

(d) Each vessel, irrespective of service, which has not complied with the requirements of paragraphs (a) through (c) of this section, either because it was on a voyage or was laid up, must undergo a drydock examination upon completion of the voyage or before being placed in service.

(e) The Commandant (G–MVI) may authorize extensions to the drydock intervals specified in paragraphs (a) and (b) of this section.

29. By revising §189.40–5 to read as follows:

§189.40–5 Notice and plans required.

(a) The master, owner, operator, or agent shall notify the Officer in Charge, Marine Inspection, whenever any vessel is to be drydocked regardless of the purpose.

(b) Each vessel that holds a Load Line Certificate must have onboard a shell expansion plan showing the vessel's hull scantlings. This plan is to be made available to the Coast Guard marine inspector whenever the vessel undergoes a drydock examination, alternate underwater survey, or whenever repairs are made to the vessel's hull.

Signed: May 22, 1986.

J.S. Gracey,

Admiral, U.S. Coast Guard Commandant.

Department of Health and Human Services

Health Care Financing Administration

Schedule of Limits on Home Health Agency Costs Per Visit for Cost Reporting Periods Beginning On or After July 1, 1986, But Before July 1, 1987; Notice

VOL 51 ISS 104 MAY 30 1986 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

[BERC-355-FN]

Medicare Program; Schedule of Limits on Home Health Agency Costs per Visit for Cost Reporting Periods Beginning on or After July 1, 1986 But Before July 1, 1987

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final notice.

SUMMARY: This notice sets forth a schedule of limits on home health agency (HHA) costs that may be reimbursed under the Medicare program. The schedule is an update of the limits to take into account the effects of inflation on HHA operating costs, and was developed using the HCFA wage index. This notice applies to HHA costs for entire cost reporting periods beginning on or after July 1, 1986 but before July 1, 1987.

EFFECTIVE DATE: The schedule of limits is effective for cost reporting periods beginning on or after July 1, 1986 and before July 1, 1987.

FOR FURTHER INFORMATION CONTACT: Steven R. Kirsh (301) 594-9465.

SUPPLEMENTARY INFORMATION:

I. General Information

Section 1861(v)(1) of the Social Security Act (the Act) authorizes the Secretary to set limits on allowable costs incurred by a provider of services that may be reimbursed under the Medicare program, based on estimates of the costs necessary for the efficient delivery of needed health services. The limits may be applied to direct or indirect overall costs or to the costs incurred for specific items or services furnished by the provider. This provision of the statute is implemented under regulations at 42 CFR 405.460.

Under this authority, we have maintained limits on home health agency (HHA) per visit costs since 1979. The schedule set forth below replaces the schedule that we published in the Federal Register on July 5, 1985 (50 FR 27734), which was applicable to cost reporting periods beginning on or after July 1, 1985 but before July 1, 1986. The July 5, 1985 notice established a three-year methodology to be used in calculating the limits. This three-year methodology provided for the limits to be set at 115 percent of the mean cost for cost reporting periods beginning on or after July 1, 1986 but before July 1, 1987, and at 112 percent of the mean cost for cost reporting periods beginning on or after July 1, 1987 but before July 1, 1988. The July 5, 1985 notice further provided that the updated schedules of limits, that would apply to cost reporting periods beginning July 1, 1986 and July 1, 1987 were to be based on the latest available cost data adjusted by the latest estimates in the market basket index (50 FR 27740).

On March 25, 1986 we published in the Federal Register (51 FR 10267) a proposed notice soliciting public comments on the use of the HCFA survey-based wage index in calculating the schedule of limits on home health agency per visit costs for cost reporting periods beginning on or after July 1, 1986. As we stated in the proposed notice, all other elements of the methodology used to determine HHA cost limits for cost reporting periods beginning on or after July 1, 1986 will remain as they were announced in the July 5, 1985 final notice.

II. Responses to Comments

We received comments on the proposed notice from 16 commenters. These commenters included HHAs, national and State HHAs associations, associations representing other providers and other interested parties. These comments and our responses to them are discussed below.

Comment: Several commenters suggested that the development of an HHA-specific wage index from the HHA cost report data would be preferable to either the BLS or HCFA hospital wage index.

Response: We would agree that, in theory, the use of an HHA industry-specific wage index could result in some increase in the accuracy of the limits. We included additional required schedules in the revised HHA cost report that was effective October 1, 1980 to capture the wage and employment data necessary to calculate such a wage index. Unfortunately, a large proportion of HHAs failed to report either the wage or the employment data, or both, making it impossible for us to do a meaningful analysis of the data. In addition, we wish to note that, of those HHAs that do report the data, a significant proportion are reporting data that is obviously erroneous. Using these data, we have calculated *annual* salary levels for skilled medical professionals and obtained a salary range between $3,000 to $500,000. Until all HHAs begin to report the required wage and employment data, and report it accurately, no further progress toward the development of an industry-specific wage index is possible.

Comment: Some commenters stated that we should have published two sets of limits in the March 25, 1986 proposed notice, one set using the BLS Wage Index and one set using the HCFA Wage Index. These commenters stated that they could not assess the actual effect of the change in wage indexes without knowing what effect the change had on the limit that would be applied to their agency.

Response: In the proposed notice, we stated that, with the exception of the change in wage indexes, "All other elements of the HHA limits methodology to be applied for cost reporting periods beginning on July 1, 1986 would remain as they were announced in the July 5, 1985 final notice." We also stated that the net effect of the change in wage indexes would be negligible because increased and decreased payments would offset each other. Therefore, it should have been clear that the change in wage indexes would have no significant effect on the base limit values (Tables I and II). This follows logically from the function of the wage index in the cost limits methodology, which is to eliminate the effect of geographic variations in prevailing wage levels on per visit cost. While the HCFA wage index, by accounting for part-time employment, results in a more accurate limit as applied to a given HHA, both the HCFA and BLS wage indexes normalized all per visit costs to the national average. Therefore, the use of either index in adjusting the labor-related portion of per visit cost will result in base limit values with no significant difference. Providers wishing to gauge the effect of the proposed change in wage indexes needed only to apply the HCFA wage index to the limits effective July 1, 1985. For example, substituting the HCFA wage index value for Dallas, TX, into the illustration shown in the July 5, 1985 publication (50 FR 27741, Column 2) would reflect the difference caused by the change in the wage index.

Comment: Some commenters were of the opinion that the BLS wage index, by virtue of being based on 1983 data, would be more accurate than the HCFA wage index, which is based on 1982 data.

Response: Since our first use of wage indexes to adjust cost limits, in 1979, our experience has been that year-to-year changes in the wage indexes based on BLS data have been minimal. Therefore, while the BLS index does reflect changes over time in the prevailing wage level for each area, relative to the national average, it continues to fail to account for the significant effect part-

time employment has on the index value for a particular area.

The HCFA wage index, while based on data one year older than the BLS data, does account for part-time employment. In doing this, the HCFA index presents a much more accurate measure of the true prevailing wage level in each area. We find that the increased accuracy resulting from accounting for the effect of part-time employment far outweighs the minimal increase in accuracy of using BLS data that is one year later.

Future schedules of HHA cost limits will utilize wage indexes based on the latest available data.

Comment: One commenter stated that the primary motivation in the change to the HCFA wage index was that it resulted in lower limit values.

Response: As we discussed above, the change from BLS to HCFA wage indexes had no effect on expenditures for home health services. Our sole concern in making this change was to assure that the limits applied to any HHA's per visit cost represented the most accurate possible estimate of the costs necessary in the efficient delivery of needed health services.

In comparing the base limits in Table I of this notice with those in Table I of the July 5, 1985 final notice, it should be noted that the actual and projected annual rates of inflation used in developing the limits in this notice are below those used to develop the previous schedule of limits. Therefore, HHAs with costs at or above the level of the limits effective July 1, 1985 have benefited from our overestimate of the rate of inflation in the cost of goods and services consumed by HHAs. For example, if the estimated rates of inflation for the years covered by the July 1, 1985 limits are determined to be greater than the actual rates of inflation by not more than 3/10 of one percentage point, no retroactive adjustment will be made. Retroactive adjustments will be made only if the projected rate of inflation exceeds the actual rate by more than 3/10 of one percentage point. In this case, HHAs with costs in excess of the limits will have benefited because they had the use of federal funds. The limits in this notice reflect later, and more accurate, actual and estimted rates of inflation in HHA costs.

Comment: We received a number of other comments concerning various elements of the methodology used in both this and previous schedules of limits.

Response: As has been true of all schedules of limits, the limits in this schedule represent our best estimate of the cost necessary in the efficient delivery of needed health services. The methodology used in this notice incorporates all feasible refinements to improve the accuracy of the limits. We intend to continue studying various aspects of the home health industry. As information that allows further refinements to the limits methodology becomes available, we will include these refinements as proposed changes to future schedules of limits.

III. Provisions of the Limits Effective July 1, 1986

With the exception of the use of the HCFA survey-based wage index, the methodology used to calculate the schedule of limits set forth in this final notice is the same as that explained in the July 5, 1985 notice (50 FR 27734–27751). The schedule of limits set forth below was calculated using 115 percent of mean cost and is based on the latest available cost data adjusted by the latest estimates in the market basket index.

The provisions of the new schedule of limits effective July 1, 1986 are summarized below.

A. A classification system based on whether an HHA is located within a metropolitan statistical area (MSA) or a New England County metropolitan area (NECMA) or a non-MSA area. (See Table III.A., below, for the listing of MSA/NECMA areas.)

B. The use of a single schedule of limits for hospital-based and freestanding agencies. This single limit is based on the cost experience of freestanding agencies. We have provided for an "add-on" adjustment of the freestanding HHA limit (which is equal to 10.7204 percent of the mean for the MSA group and 11.5237 percent for the non-MSA group) for each hospital-based discipline to account for the higher administrative and general (A & G) costs resulting from Medicare cost allocation requirements. That is, the labor-related portion of the add-on, adjusted by the appropriate wage index, plus the nonlabor portion, will be added to each freestanding limit to determine the per discipline limits for hospital-based agencies.

C. The use of the following market basket index developed from the price of goods and services purchased by HHAs to account for the impact of changing wage and price levels on HHA costs. The limit values contained in this schedule reflect the latest available actual and projected rates of inflation in HHA expenses. The categories used were identified through an analysis of 1977 Medicare cost reports and other available home health industry surveys. The categories of expenses are weighted according to the estimated proportion of HHA costs attributable to each category.

The categories used in the market basket contained in this schedule have not changed from those used for the July 1, 1985 schedule. However, the relative cost shares used change over time because of differences in the rate of increase in the various price variables. Categories with higher rates of price increases receive higher weights and vice versa.

In developing the market basket index, we obtained historical and projected rates of increase in the resource prices for each category. The price variables and the source of the forecast for calendar years 1986 through 1988 are identified in the third and fourth columns of the updated market basket included in this notice.

HOME HEALTH AGENCY INPUT PRICE INDEX: COST CATEGORIES, RELATIVE IMPORTANCE, FORECASTERS, AND PRICE VARIABLES USED

Cost Categories	Relative [1] importance 1987	Forecaster of [2] percent changes (1986–88)	Price variables used
Wages and salaries	86.46	DRI-CFS	Average hourly earnings of nonsupervisory private hospital workers (SIC 809) Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Employment and Earnings* (Monthly).
Employee benefits	8.39	DRI-TL	Supplements to wages and salaries per worker in non-agriculture establishments. Source: For supplements to wages and salaries—U.S. Dept. of Commerce, Bureau of Economic Analysis, *Survey of Current Business* (monthly). For total employment—U.S. Department of Labor, Bureau of Labor Statistics, *Employment and Earnings (monthly).*
Transportation	4.23	DRI-TL	Transportation component of Consumer Price Index, all urban. Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Monthly Labor Review.*
Office costs	2.90	DRI-TL	Services Component of Consumer Price Index, all urban. Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Monthly Labor Review.*
Medical nursing supplies and rental equipment.	2.47	HCFA-HHS	Medical equipment and supplies component of the Consumer Price Index, all urban. Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Monthly Labor Review.*

HOME HEALTH AGENCY INPUT PRICE INDEX: COST CATEGORIES, RELATIVE IMPORTANCE, FORECASTERS, AND PRICE VARIABLES USED—Continued

Cost Categories	Relative [1] Importance 1987	Forecaster of [2] percent changes (1988–89)	Price variables used
Rent	1.19	DRI-CFS	Residential rent component of Consumer Price Index, all urban. Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.
Nonrental space occupancy	1.10	DRI-TL	Composite Fuel and Other Utilities Index. Source: HHS-HCFA, Community Hospital Price Index.
Miscellaneous	6.39	DRI-TL	Consumer Price Index for all items, all urban. Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.
Contract services	6.87	HHS	Weighted mean of price variables for the preceding eight items.
Total	100.00		

[1] Relative cost weights for 1977 were derived from special studies by HCFA using primarily data from HCFA Medicare cost reports and data from the Council of Home Health Agencies and Community Health Services. A Laspeyres price index was constructed using 1977 weights and price variables indicated in this table. The relative importance values change over time in accordance with price changes for each price variable. Cost categories with relatively higher price increases get higher relative importance values and vice versa.

[2] DRI-TL refers to Data Resources, Inc., Transtlevy (TL 0466) 29 Hartwell Avenue, Lexington, Massachusetts 02173; DRI-CFS refers to Data Resources, Inc., Cost Forecasting Services (CFS-882), 1750 K Street NW., Washington, DC 20006.

D. An adjustment to the limits if the estimated market basket rate differs from the actual rate by more than ⅒ of one percentage point (that is, higher or lower).

E. The use of the HCFA survey-based gross wage index that was developed based on data obtained from a survey conducted by HCFA. The survey provided for the extraction of specific hospital salary and fringe benefit data from the Medicare cost report for hospital fiscal years ending in calendar year 1982, and for the extraction from hospital records of data on paid hours worked. A complete description of the survey, as well as the survey results, can be found in the following Federal Register publication:

- Proposed rule published on July 3, 1984 (49 FR 27439);
- Final rule published on August 31, 1984 (49 FR 34764);
- Proposed rule published on June 10, 1985 (50 FR 24375); and
- Final rule published on September 3, 1985 (50 FR 35846).

A description of the methodology used to compute the gross wage index (see tables III.A. and III.B.) was described in the March 25, 1986 proposed notice. Corrections of data for several areas were made subsequent to the publication of the proposed notice and have been incorporated in the wage indexes included in this final notice. The wage index is used to adjust the labor-related portion of the limits and the A & G add-on to reflect differing wage levels among the areas (MSA/NECMA and non-MSA) in which HHAs are located. The employee wage portion of the market basket index (86.48 percent) and the employee benefits portion (8.39 percent), plus a factor representing a proportionate share of contract services (5.52 percent), is used to determine the labor component (80.37 percent) of all HHA per visit costs used to set the limits.

If the Executive Office of Management and Budget (EOMB) announces changes in the MSA designations effective before July 1, 1986, we will recalculate the wage indexes for the affected areas and direct our intermediaries to use these revised indexes in determining the limits for HHAs they service.

F. Separate treatment of the labor-related and nonlabor components of per visit costs. The separate components of cost are calculated by obtaining actual HHA cost data for each agency and increasing those data by the actual and projected increases in the HHA market basket. We then separate each HHA's per visit costs into labor and nonlabor portions, and divide the labor portion by the wage index value for the agency's location to control for the effect of wage geographic variations in prevailing wage levels. Separate means are computed for the labor and nonlabor components of per visit costs. For each comparison group, the resulting amounts are shown in Table I.

G. The use of a cost of living adjustment to the nonlabor portion of the limits for HHAs in Alaska, Hawaii, Puerto Rico, and the Virgin Islands.

H. Limits that are applied to the per visit cost of each type of service: skilled nursing care, physical therapy, speech pathology, occupational therapy, medical social services, and home health aide.

IV. Methodology for Determining Cost per Visit Limits

A. Data

The limit values were determined by extracting actual cost per visit data from Medicare cost reports for periods ending on or before September 30, 1983. We then adjusted the data using the latest available market basket factors to reflect cost increases occurring between the cost reporting periods contained in our data base and December 31, 1986 (the midpoint of the first cost reporting period to which the limits will apply). The annual percentage increases used to compute the per visit costs are:

	Percent increase
Calendar Year:	
1982	[1] 10.0
1983	[1] 6.7
1984	[1] 5.3
1985	[1] 4.6
1986	[2] 3.4
1987	[2] 4.2

[1] Final rate.

[2] Forecasted increases. The projected rate of increase in the market basket index will be adjusted to the actual inflation rate if the actual rate of increase differs from the estimated rate by more than 3/10 of one percentage point. We will notify the Medicare intermediaries of the actual rate of increase and advise them to adjust each HHA's cost limit at the time of final settlement.

B. Deflation by Wage Index

After adjustment by the market basket index, we divided each HHA's per visit costs into labor and nonlabor portions. The labor portion of costs (80.37 percent) was determined by using the 74.85 percent employee wage and benefit factor from the market basket, plus 5.52 percent, which represents a proportionate share of the market basket relative importance for contract services. We then divided the labor portion of per visit costs by the wage index applicable to the HHA's location to arrive at an adjusted labor cost.

C. Adjustment for "Outliers"

We transformed all per visit cost data into their natural logarithms and grouped them by type of service and MSA and non-MSA locations, in order to determine the mean cost and standard deviation for each group. We then eliminated all "outlier" costs, retaining only those per visit costs within two standard deviations from the mean in each service.

D. Basic Service Limit

A basic service limit equal to 115 percent of the mean labor and nonlabor portions of the per visit costs of freestanding HHAs is calculated for each type of service. (See Table I.)

V. Computing the Adjusted Limit

A. Adjustment of Limits by Wage Index

To arrive at the adjusted limit, which is to be applied to each service furnished by an HHA, the Medicare fiscal intermediary first multiplies the labor-related component of the limit for the comparison group by the appropriate

wage index. (See Tables I, III.A. and III.B.) The adjusted limit applicable to an HHA is the sum of the nonlabor component plus the adjusted labor-related component.

Example—Calculation of Adjusted Occupational Therapy Limit for a Freestanding HHA in Dallas, TX

Labor component (Table I)	$41.57
Wage index (Table III.A.)	x 1.0723
Adjusted labor component	$44.60
Nonlabor component (Table I)	+11.36
Adjusted occupational therapy limit	$55.76

B. Adjustment for Reporting Year

If an HHA has a cost reporting period beginning on or after August 1, 1986, the adjusted per visit limit for each service is revised by a factor from Table IV that corresponds to the month and year in which the cost reporting period begins. Each factor represents the compounded rate of monthly increase derived from the projected annual increase in the market basket index, and is used to account for inflation in costs that will occur after the date on which the limits become effective.

For example, an HHA's cost reporting period begins January 1, 1987. As calculated in the example in section V.A. of this notice, the labor adjusted per visit limit for occupational therapy for this HHA's group is $55.76.

Computation of Revised Limit for Occupational Therapy

Adjusted per visit limit	$55.76
Adjustment factor from Table IV	x1.0210
Revised per visit limit	$56.93

In this example, the revised adjusted per visit limit for occupational therapy applicable to this HHA for the cost reporting period beginning January 1, 1987, is $56.93 per visit.

If an HHA uses a cost reporting period that is not 12 months in duration, a special calculation of the adjustment factor must be made. This results from the fact that projections are computed to the midpoint of a cost reporting period. For cost reporting periods of other than 12 months in duration, the calculation must be done specifically for the midpoint of the cost reporting period. In such cases, the intermediary for the HHA must obtain this adjustment factor from HCFA.

C. Adjustment for Hospital-Based Agencies

If an HHA participates in the Medicare program as part of a hospital that is required to file a HCFA–2552 cost report (see Provider Reimbursement Manual, HCFA Pub. 15–2, Chapters 12, 15 and 19), and qualifies as hospital-based in accordance with the requirements specified in the schedule of limits published June 5, 1980 (45 FR 38014), the HHA will be considered a hospital-based agency and will be entitled to an adjustment of the per visit limit to account for higher administrative and general costs resulting from the Medicare cost allocation requirements. The intermediary will compute the adjusted cost limit as described in the example following Table II.

VI. Schedule of Limits Effective July 1, 1986

The schedule of limits set forth below applies to cost reporting periods beginning on or after July 1, 1986 and before July 1, 1987. The intermediaries will compute the adjusted limits using the wage indexes published in Tables III.A. and III.B. and notify each HHA they service of its applicable limits.

The HHA costs that are subject to the limits include the cost of medical supplies routinely furnished in conjunction with patient care. Medical supplies that are not routinely furnished in conjunction with patient care visits and are directly identifiable as services to an individual patient (that is, medical supplies for which a separate charge is made, in addition to the per visit charge) are excluded from the per visit cost if they meet all of the following criteria—

- The common and established practice of comparable HHAs in the area is to charge separately for the items.
- The HHA follows a consistent charging practice for Medicare and non-Medicare patients receiving the item.
- Generally, the item is not frequently furnished to patients.
- The item is directly identifiable to an individual patient and its costs can be identified and accumulated in a separate cost center.
- The item is furnished at the direction of the patient's physician and is specifically identified in the plan of treatment.

This explanation of nonroutine medical supplies is consistent with instructions for reporting the cost of these supplies on the revised HHA cost report, forms HCFA–1728 and HCFA–2552K. The reasonable cost of durable medical equipment and supplies that are not routinely furnished in conjunction with patient care visits will be reimbursed without regard to the schedule of limits.

Before the limits are applied at cost settlement, the provider's actual costs will be reduced by the amount of individual items of cost (for example, administrative compensation or contract services) that are found to be excessive under Medicare principles of provider reimbursement. In this regard, the fiscal intermediaries will review the various reported costs against such screens as the cost guidelines for physical therapy under arrangements (see § 405.432) and against the limitation on costs that are substantially out of line with those of comparable agencies (see § 405.451).

TABLE I—PER VISIT LIMITS FOR HOME HEALTH AGENCIES [1]

Type of visit	Limit	Labor portion	Nonlabor portion
MSA (NECMA) location			
Skilled nursing care	$52.27	$41.31	$10.96
Physical therapy	50.14	39.61	10.53
Speech pathology	56.79	44.82	11.97
Occupational therapy	52.73	41.37	11.36
Medical social services	78.57	61.56	17.01
Home health aid	33.76	26.60	7.16
NON-MSA location			
Skilled nursing care	57.43	47.49	9.94
Physical therapy	59.52	49.34	10.18
Speech pathology	68.71	56.69	12.02
Occupational therapy	64.48	53.16	11.33
Medical social services	81.42	67.44	13.98
Home health aide	33.77	27.89	5.88

[1] Nonlabor component of limits for HHAs located in Alaska, Hawaii, Puerto Rico, and the Virgin Islands will be increased by multiplying them by the following cost-of-living adjustment factors:

Location	Adjustment factor
Alaska	1.250
Hawaii:	
Oahu	1.225
Kauai	1.175
Maui, Lanai, and Molokai	1.200
Hawaii (island)	1.150
Puerto Rico	1.100
Virgin Islands	1.125

TABLE II—ADD-ON AMOUNTS FOR HOSPITAL-BASED HOME HEALTH AGENCIES

	ABQ Add-On	Labor portion	Nonlabor portion
MSA (NECMA) location			
Skilled nursing care	$5.11	$4.78	$1.33
Physical therapy	5.16	4.00	1.16
Speech pathology	5.20	4.82	1.38
Occupational therapy	5.37	4.13	1.24
Medical social services	8.51	6.57	1.94
Home health aide	3.91	3.06	.85
NON-MSA location			
Skilled nursing care	6.36	5.25	1.11
Physical therapy	6.39	5.28	1.11
Speech pathology	8.31	6.83	1.48
Occupational therapy	6.20	5.15	1.05
Medical social services	11.85	9.80	2.05
Home health aide	4.09	3.38	.71

Example

A hospital-based agency in Orlando, FL has a wage index of 1.0188. It provides the following services:

Skilled Nursing
Physical Therapy
Home Health Aides

The published limits for that agency are:

	Limit		Add-On	
	Labor portion	Nonlabor portion	Labor portion	Nonlabor portion
SN	$41.31	$10.96	$4.76	$1.33
PT	39.61	10.53	4.00	1.16
HHA	28.69	7.16	3.06	.85

Calculation of Hospital-Based Limit With Add-On

	SN	PT	HHA
Limit labor portion	$41.31	$39.61	$28.69
Add-on labor portion	+4.76	+4.00	+3.06

TABLE IV.—COST REPORTING YEAR ADJUSTMENT FACTORS [1]

	The adjustment factor is—
If the HHA cost reporting period begins:	
Aug. 1, 1986	1.0085
Sept. 1, 1986	1.0070
Oct. 1, 1986	1.0104
Nov. 1, 1986	1.0140
Dec. 1, 1986	1.0174
Jan. 1, 1987	1.0210
Feb. 1, 1987	1.0256
Mar. 1, 1987	1.0280
Apr. 1, 1987	1.0345
May 1, 1987	1.0391
June 1, 1987	1.0436

[1] Based on compounded projected market basket inflation rates of 4.2 percent for 1987 and 5.5 percent for 1986. These adjustment factors are subject to change based on later estimates of cost increases.

VII. Regulatory Impact Statement and Regulatory Flexibility Analysis

A. Introduction

Executive Order 12291 (E. O. 12291) requires us to prepare and publish an initial regulatory impact analysis for any proposed regulations that are likely to meet criteria for a "major rule".

A major rule is one that would result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or any geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Since adopting the HCFA survey-based wage index, which is the only change in methodology being implemented by this notice, will not meet any of these criteria, this final notice is not a major rule under E.O. 12291, and a regulatory impact analysis is not required.

However, consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), we prepare and publish a regulatory flexibility analysis for a notice unless the Secretary certifies that the notice would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we consider all HHAs to be small entities. The changes contained in this final notice will result in a significant economic impact on a substantial number of HHAs, and we discussed this impact in an initial regulatory flexibility analysis included in the proposed notice published March 25, 1986. The following discussion, in combination with the rest of this notice, constitutes a final regulatory flexibility analysis.

B. Public Response to Initial Regulatory Flexibility Analysis

Several commenters criticized the initial regulatory flexibility analysis published March 25, 1986 as being inadequate.

Comment: One commenter stated that we had not performed a legally sufficient impact analysis.

Response: As noted above, E.O. 12291 specifies several criteria for identifying major rules for which a regulatory impact analysis must be prepared. In the proposed notice published March 25, 1986, we listed these criteria and explained that adopting the HCFA survey-based wage index would not meet any of these criteria. The commenter did not say which, if any, of these criteria he believed was not met. In preparing this final notice, we have reconsidered whether this should be considered a major rule and we again have concluded that it is not.

Comment: Another commenter stated that we had not met the requirements of the Regulatory Flexibility Act.

Response: Section 603(b) of the Regulatory Flexibility Act specifies that an initial regulatory flexibility analysis shall contain—

(1) A description of the reasons why action by the agency is being considered;

(2) A succinct statement of the objectives of, and legal basis for, the proposed rule;

(3) A description of and, where feasible, an estimate of the number of small entities to which the proposed rule will apply;

(4) A description of the projected reporting, recordkeeping and other compliance requirements of the proposed rule, including an estimate of the classes of small entities which will be subject to the requirement and the type of professional skills necessary for preparation of the report of record;

(5) An identification, to the extent practicable, of all relevant Federal rules which may duplicate, overlap or conflict with the proposed rule.

In addition, section 603(c) provides that:

"Each initial regulatory flexibility analysis shall also contain a description of any significant alternatives to the proposed rule which accomplish the stated objectives of applicable statutes and which minimize any significant economic impact of the proposed rule on small entities. Consistent with the stated objectives of applicable statutes, the analysis shall discuss significant alternatives such as—

(1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities;

(2) the clarification, consolidation, or simplification of compliance and reporting requirements under the rule for such small entities;

(3) the use of performance rather than design standards; and

(4) an exemption from coverage of the rule, or any part thereof, for such small entities."

The regulatory impact statement of the proposed notice, in combination with the rest of the notice, met these requirements.

Comment: Two commenters were critical of our statement that, although we estimated 36 percent of all agencies (2148 of 5964 total HHAs) would be disadvantaged and 48 percent (2865) advantaged, the net effect of the new wage index on total payments would be negligible. One commenter alleged that we were using this statement to dismiss the adverse impact on some agencies in view of the advantage to others. Another was critical that we had not

BEST COPY AVAILABLE

presented a more detailed analysis of individual and regional "winners" and "losers".

Response: The point we were making in the proposed notice, by pointing out the negligible budget impact, was that our objective was not budget savings, but accuracy. It is clear that the magnitude of disadvantages must be somewhat larger, in the aggregate, than the magnitude of advantages, in order for the offset to result in a negligible budget impact. However, we do not have data sufficiently precise and detailed to enable us either to model behavior changes or estimate effects on individual agencies. We stated that a large number of agencies could be adversely affected and published the index values that would enable individual agencies to assess the impact on their own behalf. It is clear from the comments received from individual HHAs that they were quite capable of assessing on their own whether they were advantaged or disadvantaged by the change.

C. Estimated Budget Effect

This is a technical notice setting forth the actual value of the cost limits applicable to HHA cost reporting periods beginning on or after July 1, 1986 and before July 1, 1987. The primary effects resulting from this notice were taken into account in last year's final notice published July 5, 1985 (50 FR 27734), which established a three-year cycle of HHA cost limits. The economic impact analysis prepared for that notice included a discussion of the effects of the methodology and limits being implemeted by this notice, except for the effects of the adoption of the HCFA gross wage index. The adoption of the new wage index will have a negligible effect on the savings estimated to result from these costs limits.

D. Effects of New Wage Index

There are about 5934 HHAs participating in Medicare throughout the country. Of these, 3603 are urban (that is, located in MSAs). Of the urban HHAs, 2924 are freestanding and 679 are hospital-based. Of the 2361 rural HHAs, 1780 are freestanding and 581 are hospital-based. Many HHAs have high Medicare utilization compared to other types of providers; a number exceed 75 percent Medicare utilization.

Adopting the HCFA survey-based gross wage index will affect the level of payment for a given HHA only if there is a significant change in the index value for the area in which it is located and if the change in wage index results in a change in the amount of an agency's costs in excess of the limits. Thus, whether or not an HHA in fact is advantaged by the change in wage index depends on whether:

- The agency would have had one or more disciplines over a limit using the BLS index;
- The applicable wage index value increased or decreased; and
- The revised limit, using the new index value, result in allowance of higher or lower costs for one or more disciplines.

Some agencies would be under all the limits, regardless of which wage index is used, and thus will be unaffected. Some HHAs that would be under all the per discipline limits using the BLS index could, as a result of a reduced wage index value, experience disallowances of the cost in excess of the limits for one or more disciplines. Conversely, some HHAs that would have costs in excess of these limits disallowed under the BLS index could, if their index values increased, experience smaller disallowances, possibly none.

Compared to the BLS wage index used in the July 5, 1985 final notice, the adoption of the HCFA survey-based gross wage index will result in increased wage index values for 163 MSAs and 27 State-wide rural areas, and decreased values for 159 MSAs and 23 rural areas. As we noted in the initial regulatory flexibility analysis, about 36 percent of all HHAs will be disadvantaged and 48 percent advantaged. Nonetheless, we estimate that the net effect of the new wage index on total annual payments to all HHAs will be negligible because in the aggregate, increased and decreased payments will offset each other.

E. Alternatives Considered

As we made clear in the notice published March 25, 1986, we considered few alternatives in developing these limits. However, as discussed in the July 5, 1985 notice, we had earlier considered particular changes to the methodology such as using a different percentage of the mean at which to set the limits. Some commenters recommended using the HCFA adjusted survey-based wage index, rather than the HCFA gross wage index. However, as we explained in the proposed notice, due to the problems of the reporting of data underlying that index, it was not as accurate as the gross wage index and was rejected.

We believe that much of the existing cost variation among HHAs is not attributable to factors related to costs necessary for the efficient delivery of needed health services. However, there are significant geographic variations in costs that we must recognize as accurately as possible. Thus, we have decided to use the HCFA survey-based gross wage index. Now that an alternative more accurate wage index is available to us, we believe that continued use of the BLS index would unnecessarily and unfairly disadvantage those HHAs that may have had their personnel costs underrepresented by that index.

F. Conclusion

We believe that the benefits of this notice will outweigh the costs because the HCFA survey-based gross wage index is a more accurate measure of the relative costs of the types of personnel utilized by HHAs than the BLS wage index. Although some HHAs will be advantaged and some disadvantaged by changes to the wage index, we believe the results generally will be equitable.

Some economizing measures adopted by HHAs in response to these limits, such as measures that could affect access to or quality of care, could be viewed as adverse consequences, or costs. However, we believe the limit levels are reasonable and we expect the majority of HHAs to be able to furnish services within them. Also, our regulation at 42 CFR 405.460(f) provided an exceptions process that allows for adjustment of a provider's limits under specific conditions.

VIII. Paperwork Burden

This notice does not impose information collection requirements. Consequently, it does not need to be reviewed by EOMB under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Department of Energy

Office of the Secretary

Amendment to Delegation Order for Approval of Power Marketing Administration Power and Transmission Rates; Notice

DEPARTMENT OF ENERGY

Office of the Secretary

Amendment to Delegation Order for Approval of Power Marketing Administration Power and Transmission Rates

AGENCY: Department of Energy.

ACTION: Notice of amendment to delegation order.

SUMMARY: Notice is hereby given of Amendment No. 1 to Delegation Order No. 0204-108 which amendment revises the delegation of authority to confirm, approve and place into effect on an interim basis power and transmission rates of the Alaska, Southeastern, Southwestern, and Western Area Power Administrations by delegating such authority to the Under Secretary of the Department of Energy rather than to the Deputy Secretary of the Department of Energy. The amendment also makes minor conforming changes to reflect the fact of that revision in delegation of authority and adds a provision that such revision is to have no effect upon rates which have been previously placed into effect by the Deputy Secretary. This Order is effective upon publication in the Federal Register.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Lawrence A. Gollomp, 252-0958.

SUPPLEMENTARY INFORMATION: Delegation Order No. 0204-108, 48 FR 55064, which became effective December 14, 1983, delegated to the Deputy Secretary of the Department of Energy on a non exclusive basis, among other things, the authority to confirm, approve, and place into effect on an interim basis, power and transmission rates for the Alaska, Southeastern, Southwestern and Western Area Power Administrations. The Secretary of the Department of Energy has determined that revisions in that Delegation Order are desirable at this time, which will delegate to the Under Secretary the authority which had been previously delegated to the Deputy Secretary. The principal reason for these revisions is to reflect revised organizational relationships within the Department.

Issued in Washington, DC, on May 28, 1986.

Harry L. Peebles,

Director of Administration.

Department of Energy, Amendment No. 1 to Delegation Order No. 0204-108, Delegation Order for Approval of Power Marketing Administration Power and Transmission Rates

Pursuant to the authority vested in me as Secretary of Energy and by sections 203(a), 301(b), 302(a), 402(e), 641, 642, 643 and 644, of the Department of Energy Organization Act (Pub. L. 95-91) there is hereby delegated to the Under Secretary of the Department of Energy all authority which was previously delegated to the Deputy Secretary of the Department of Energy in Department of Energy Delegation Order No. 0204-108, as published in the Federal Register, December 14, 1983 (48 FR 55064), and Department of Energy Delegation Order No. 0204-108 is hereby amended to reflect such revision to that delegation of authority and to reflect related changes so as to read and provide in its amended from or as follows:

1. There is hereby delegated to the respective Administrators of the Alaska, Southeastern, Southwestern, and Western Area Power Administrations on a non-exclusive basis the authority to develop power and transmission rates for their respective Power Administrations. Rates developed by an Administrator shall not become effective on a final basis unless and until such rate is confirmed and approved by the Federal Energy Regulatory Commission (Commission) acting under section 3 below. In submitting a rate the Administrator shall certify that the rate is consistent with applicable law and that it is the lowest possible rate to customers consistent with sound business principles.

2. There is hereby delegated to the Under Secretary of the Department of Energy on a non-exclusive basis the authority to confirm, approve, and place in effect on an interim basis power and transmission rates for the Alaska, Southeastern, Southwestern, and Western Area Power Administrations for such periods as he or she may provide.

3. There is hereby delegated to the Commission on an exclusive basis the authority to confirm, approve, and place in effect on a final basis, to remand, or to disapprove, rates developed by each Administrator under section 1. The Commission review will be limited to: (a) Whether the rates are the lowest possible to customers consistent with sound business principles; (b) whether the revenue levels generated by the rates are sufficient to recover the costs of producing and transmitting electric energy including the repayment, within the period of cost recovery permitted by law, of the capital investment allocated to power and costs assigned by Acts of Congress to power for repayment, and (c) the assumptions and projections used in developing the rate components that are subject to Commission review. The Commission may require the Administrator to provide any information relevant to the Commission's confirmation and review function.

The Commission shall not review policy judgments and interpretations of laws and regulations made by the power generating agencies (i.e., the Bureau of Reclamation, the Corps of Engineers, and the International Boundary and Water Commission). The Commission shall reject decisions of the Power Marketing Administrators only if the Commission finds them to be arbitrary, capricious, or in violation of the law. *Provided*, that the Commission may reject decisions that are not in accord with (a) the standards set forth in DOE Order No. RA 6120.2, or any revisions or modifications to such standards, adopted pursuant to the Administrative Procedure Act (5 U.S.C. 551 *et seq.*) and the Department of Energy Organization Act (42 U.S.C. 7191), and (b) the standards set forth in any interagency agreement between the Administrator and the power generating agency that is applicable. Should the Commission reject such decisions, the Power Marketing Administrator will have 30 days in which to seek rehearing.

4. In the event a rate developed by an Administrator is disapproved by the Commission, the Administrator shall, within 120 days or such additional time periods as the Commission may provide, submit to the Commission a substitute rate for action by the Commission under section 3 hereof.

A rate confirmed, approved and placed in effect by the Under Secretary on an interim basis that is disapproved by the Commission shall remain in effect, as provided by the Under Secretary until a substitute rate is confirmed and approved on a final basis; by the Commission, unless theoriginal interim rate has been superseded by a subsequent rate placed in effect on an interim basis *Provided*, that if the Administrator does not file a substitute rate within 120 days or such greater time as the Commission may provide, and if the rate has been disapproved because the Commission determined that it would result in total revenues in excess of those required by

law, the rate last previously confirmed and approved on a final basis will become effective on a date and for a period determined by the Commission, and revenues collected in excess of those generated by such rate during the interim period will be refunded with interest to the extent determined by the Commission. If a substitute rate confirmed and approved on a final basis by the Commission is lower than the rate in effect on an interim basis, any overpayment shall be refunded with interest as determined by the Commission. If a subetitute rate confirmed and approved on a final basis by the Commission is higher than the rate in effect on an interim basis, such rate, if no subsequent and higher rate has been put into effect by the Under Secretary shall become effective on a subsequent date set by the Commission. If at any time it is determined by the Commission that the administrative cost of a refund would exceed the amount to be refunded, no refund will be required.

5. Notwithstanding any other provisions of this delegation order, there is hereby delegated to each Administrator the authority to develop and place into effect on a final basis rates for short-term sales of capacity, energy or transmission service. Short-term sales are those sales that last no longer than one year.

6. For the Alaska Power Administration, the Southeastern Power Administration, the Southwestern Power Administration, and the Western Area Power Administration:

A. All rates placed into effect on a final basis pursuant to any authority delegated prior to this order shall remain in full force and effect.

B. Rates filed on or before the effective date of this order, and for which the Commission has issued any substantive orders, will be governed by the terms of Delegation Order No. 0204–33 until placed in effect by the Commission on a final basis.

C. Rates filed under previous delegation orders for which the Commission has not issued any substantive orders on or before the effective date of this order will be governed by the terms of this delegation order.

7. In exercising the authority delegated by this order, the delegates shall be governed by the rules and regulations of the Department of Energy and the policies and procedures prescribed by The Secretary or his delegates.

8. Nothing in this order shall preclude The Secretary from exercising any of the authority delegated to the Under Secretary, and the Administrators whenever in his judgment his exercise of such authority is necessary or appropriate to administer the functions vested in him.

9. For the Alaska Power Administration, the Southeastern Power Administration, the Southwestern Power Administration and the Western Area Power Administration:

A. All rates placed into effect on a final basis pursuant to any authority delegated pursuant to Delegation Order No. 0204–108 as such order existed prior to the effective date of Amendment No. 1 thereto shall remain in full force and effect.

B. All rates filed before the effective date of Amendment No. 1 to Delegation Order No. 0204–108 which rates, as of the effective date of said Amendment No. 1, are in effect but which have not been placed in effect on a final basis, shall continue in effect subject to the provisions of this Amended Delegation Order. In no event shall any rates which have been filed on or before the effective date of Amendment No. 1 to Delegation Order No. 0204–108 be invalidated solely by virtue of the change in the delegation of authority from the Deputy Secretary to the Under Secretary provided for in said Amendment and all actions heretofore taken by the Deputy Secretary pursuant to Delegation Order No. 0204–108 with respect to such rates are hereby confirmed and such rates shall not be subject to challenge on the ground that any such actions were taken by the Deputy Secretary rather than by the Under Secretary.

C. All rates filed on and after the effective date of Amendment No. 1 to Delegation Order No. 0204–108 shall be governed by that order as thus amended.

10. This amended order becomes effective upon publication in the Federal Register.

John S. Herrington.

Briefings on How To Use the Federal Register—
For information on briefings in Seattle, WA, and San Francisco, CA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

SEATTLE, WA

WHEN: July 22; at 1:30 pm.

WHERE: North Auditorium, Fourth Floor, Federal Building, 915 2nd Avenue, Seattle, WA.

Rules and Regulations

Federal Register
Vol. 51, No. 105
Monday, June 2, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 908

[Valencia Orange Regulation 365]

Valencia Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 365 establishes the quantity of such fruit that may be shipped to market during the period May 30–June 5, 1986. The regulation is needed to provide for orderly marketing of fresh Valencia oranges for the period specified due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: Regulation 365 (Section 908.665) is effective for the period May 30–June 5, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC, 20250, telephone: 202/447–5697.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act and rules issued thereunder are unique in that they are brought about through group action of essentially small entities for their own benefit. Thus, both statutes have small entity orientation and compatibility.

It is estimated that approximately 123 handlers of Valencia oranges are subject to regulation under the marketing order and that the great majority of these handlers may be classified as small entities. While regulations issued may impose some costs on affected handlers and the number of such firms may be substantial, the added burden on small entities, if present at all, is not significant.

The regulation is issued under Marketing Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendation and information submitted by the Valencia Orange Administrative Committee (VOAC) and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

The regulation is consistent with the marketing policy for 1985–86. The committee met publicly on May 27, 1986, to consider the current and prospective conditions of supply and demand and recommended the quantity of Valencia oranges deemed advisable to be handled during the specified week. The committee reports that the market for Valencia oranges is good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because there is insufficient time between the date when information upon which this regulation is based became available and the effective date necessary to effectuate the declared policy of the act. Interested persons were given opportunity to submit information and views on the regulation at an open meeting. To effectuate the declared policy of the act, it is necessary to make the regulatory provisions effective as specified, and handlers have been notified of the regulation and the effective date.

List of Subjects in 7 CFR Part 908

Agricultural Marketing Service, Marketing agreements and orders, California, Arizona, Oranges, Valencias.

PART 908—[AMENDED]

1. The authority citation for 7 CFR Part 908 continues to read:

Authority: (Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

2. Section 908.665 is added to read as follows:

§ 908.665 Valencia Orange Regulation 365.

The quantities of Valencia oranges grown in California and Arizona which may be handled during the period May 30, 1986, through June 5, 1986, are established as follows:

(a) District 1: 408,000 cartons;
(b) District 2: 442,000 cartons;
(c) District 3: Unlimited cartons.

Joseph A. Gribbin,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.
May 29, 1986.

7 CFR Parts 916 and 917

[Nectarine Reg. 14, Amdt. 6; Peach Reg. 14, Amdt. 6]

Nectarines, Pears, Plums, and Peaches Grown in California; Amendment of Size Requirements; Correction

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule issued April 1, 1986, amending both size requirements and weight count standards for certain varieties of fresh nectarines and peaches grown in California. The final rule failed to change the 16-pound sample count requirements in § 917.459(c)(3) for varieties of size "80" peaches to 73 peaches instead of 71 peaches. The rule only relaxed the sample count requirements in § 917.459(a)(4)(iii) for the commercially significant varieties of peaches. The peach commodity committee recommended the relaxation

for all varieties of peaches to assure more uniformly sized peaches, regardless of the type of pack. The relaxation for the varieties of peaches not produced in commercially significant quantities was inadvertently omitted. Also, the final rule should have changed the name of the "20 G 836" variety of nectarines in § 916.356(a)(4) to "Rio Red" but failed to do so. Rio Red is the name commonly used by the industry when referring to that variety of nectarines. The final rule was published in the Federal Register (51 FR 11900) on April 8, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, USDA, Washington, DC 20250 Telephone (202)-447-5697.

List of Subjects

7 CFR Part 916

Marketing agreements and orders, Nectarines, California.

7 CFR Part 917

Marketing agreements and orders, Pears, plums, and peaches, California.

1. The authority citation for 7 CFR Parts 916 and 917 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

The correction of the final rule is as follows:

PART 916—NECTARINES GROWN IN CALIFORNIA

2. The text of paragraph (a)(4) of § 916.356 (51 FR 11900) is correctly revised to read as follows:

§ 916.356 Nectarine Regulation 14.

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 85-CE-37-AD; Amdt. 39-5324]

Airworthiness Directives; Cessna Models U206G and TU206G Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to Cessna Models U206G and TU206G airplanes that have been modified with the installation of the Soloy Conversions, Ltd. Turbine Pac engine in accordance with Supplemental Type Certificate (STC) No. SA2353NM. This AD requires that the engine start system electrical circuit be isolated from other circuits by providing a separate circuit breaker for this function; and that the electrical system voltage regulator, which was a part of the Soloy installation, be replaced with an airworthy unit. Aircraft were initially modified by Soloy to use only one circuit breaker for both the engine start and auto-feather systems. Consequently, any fault in the auto-feather system that resulted in opening of the circuit breaker would also inadvertently result in the inability to restart the engine in flight. In addition, the voltage regulator supplied with the Soloy installation interferes with Automatic Direction Finder (ADF) radio operation by causing an audible interference, a degradation in reception sensitivity, and erroneous navigation indications to be displayed to the pilot. The actions prescribed in this AD will preclude both the loss of the in-flight engine restart capability and the display of erroneous navigation indications to the pilot.

EFFECTIVE DATE: July 4, 1986.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Soloy Service Bulletins (S/B) No. 04-763 dated March 29, 1985, and S/B No. 02-763 dated January 7, 1985, applicable to this AD may be obtained from Soloy Conversions, Ltd., 450 Pat Kennedy Way, SW., Olympia, Washington 98502. A copy of this information is also contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Terry Rees, Systems and Equipment Branch, ANM-130S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168; Telephone (206) 431-2941.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to add an AD requiring modification of the engine control and auto-feather circuit breaker systems and replacement of the voltage regulator on certain Soloy-modified Cessna 206 airplanes was published in the Federal Register on January 14, 1986 (51 FR 1515).

The Soloy Conversions Ltd. modification of Cessna Models U206G and TU206G airplanes, accomplished in accordance with Supplemental Type Certificate (STC) SA2353NM, installs the Soloy Turbine Pac engine in place of the original reciprocating engine. As a part of that conversion, in which pertinent parts of the airplane electrical system were revised to support the turbine engine installation, the "Engine Control" circuit breaker was configured to protect the circuit required for starting the engine as well as the circuit for the auto-feather system.

The proposal resulted from the FAA determining that the effect of this configuration, should the circuit breaker trip due to an auto-feather system malfunction, is to lose in-flight engine restart capability. Similarly, engine restart capability would also be lost as a consequence of the pilot following the Airplane Flight Manual (AFM), in which pulling this circuit breaker is specified as the remedial action.

In addition, a new voltage regulator was selected which subsequently was found to emit unacceptably high levels

of radio frequency interference (RFI). This RFI was not observed during project development or initial service history because ADF radio equipment, a type that is particularly susceptible to this type of RFI, did not happen to be installed in the airplane involved. The effect of the RFI on the ADF receivers is: audible interference in the lower portion of the receiver's tunable bandwidth, a reduced sensitivity to the reception of desired navigation signals and the display of erroneous navigation indications to the pilot. Navigation indications that were 10–15 degrees in error have been observed. This is a potentially hazardous condition that could lead a pilot many miles off course.

Since the condition described is likely to exist or develop in other Soloy modified Cessna Models U206G and TU206G airplanes of the same design, an AD was proposed which would require modification of the "Engine Control" and auto-feather circuit breaker systems and replacement of the voltage regulator.

The comment period for the proposal closed on March 18, 1986. Interested persons have been given an opportunity to participate in the making of this AD, however, no comments were received. Subsequent to the issuance of the proposal, the FAA determined that Soloy STC SA2353NM Kit with data plate number 763–008 was installed on a Cessna airplane with serial number U20605745. Accordingly, the airplane with serial number U20605745 and Soloy data plate number 763–008 was added to the applicability statement of the AD. Also, paragraphs (a) and (b) were modified to reflect this information. Therefore, except as mentioned above, the proposal is adopted without change.

The FAA has determined that there are approximately 15 airplanes affected by various portions of this AD. The cost of modifying the airplanes in accordance with the AD is estimated to be a maximum of $90 per airplane. The total cost is estimated to be $1,140 to the private sector. The cost is so small that compliance with the AD will not have a significant financial impact on any small entities owning affected airplanes.

Therefore, I certify that this action: (1) Is not a major rule under the provisions of Executive Order 12291, (2) is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and (3) wil not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aviation safety, Aircraft, safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FARs as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new AD:

CESSNA: Applies to the following Model U206G and TU206G airplanes modified with Soloy Turbine Pac installations in accordance with Supplemental Type Certificate (STC) number SA2353NM:

Cessna Serial No.	Soloy data plate No.
U20603689	763-013
U20604286	763-001
U20604287	763-003
U20604681	763-014
U20605232	763-005
U20605567	763-002
U20605584	763-015
U20605745	763-008
U20605836	763-006
U20606065	763-007
U20606227	763-004
U20606361	763-011
U20606629	763-010
U20606769	763-012
U20606810	763-009

Compliance: Required as indicated in the body of the AD unless previously accomplished.

To preclude loss of the in-flight engine restart capability and to correct a condition that could cause erroneous navigation displays to the pilot, accomplish the following:

(a) For the above listed airplanes modified by Soloy STC SA2353NM, within the next 100 hours time-in-service (TIS) after the effective date of this AD, remove and replace the voltage regulator in accordance with the instructions contained in Soloy Service Bulletin (S/B) 04–763 dated March 29, 1985.

(b) For serial numbered airplanes U20604286, U20604287, U20605232, U20605567, U20605745, U20605836, U20606065, and U20606227 modified with Soloy STC SA2353NM, within the next 200 hours TIS after the effective date of this AD, modify the electrical system circuit breaker installation in accordance with the instructions contained in Soloy S/B No. 02–763 dated January 7, 1985.

(c) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(d) An equivalent method of compliance with this AD may be used if approved by Manager, Seattle Aircraft Certification Office, Federal Aviation Administration, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

All persons affected by this directive may obtain copies of the document referred to herein upon request to Soloy Conversions, LTD., 450 Pat Kennedy Way, S.W., Olympia, Washington 98502 or FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment becomes effective on July 4, 1986.

Issued in Kansas City, Missouri, on May 20, 1986.

Jerold M. Chavkin,

Acting Director, Central Region.

[FR Doc. 86–12200 Filed 5–30–86; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 85–AWA–49]

Alteration of the Dallas-Fort Worth, TX, Terminal Control Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action alters the Dallas-Fort Worth Terminal Control Area (TCA) to fully contain large turbine-powered aircraft executing approaches to new Runway 13R and departures from new Runway 31L.

EFFECTIVE DATE: 0901 UTC, July 3, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Brent A. Fernald, Airspace and Air Traffic Rules Branch (ATO–230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8626.

SUPPLEMENTARY INFORMATION:

History

On April 3, 1986, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to modify Areas A, B, C and D of the Dallas-Fort Worth TCA by extending these areas to the northwest to fully contain all aircraft executing instrument landing system (ILS) and/or visual approaches to new Runway 13R and departures from new Runway 31L (51 FR 11454).

The new runway is scheduled to open in November 1986. However, construction is ahead of schedule and it is probable that the runway may be commissioned as early as September 1986. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal

were received. However, comments supporting the proposal were received from the Air Line Pilots Association (ALPA) and the Air Transport Association (ATA). The ATA also pointed out an error in the description and graphic of the proposed TCA. Those errors were typographical and are corrected in this rule. Except for the probability of advancing the new runway opening from November to September and editorial changes, this amendment is the same as that proposed in the notice. Section 71.401(a) of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment of Part 71 of the Federal Aviation Regulations modifies Areas A, B, C and D of the Dallas-Fort Worth TCA to the northwest to ensure that all large trubine-powered aircraft remain within the confines of the TCA while executing approach and departure procedures to new Runway 13R/31L, opening in September 1986.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Terminal control areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.401 [Amended]

2. § 71.401(a) is amended as follows:

Dallas-Fort Worth, TX [Amended]

In Area A, by removing the words "lat. 32°58'30"N., long. 97°06'45"W.; to lat. 32°55'30"N., long. 97°06'30"W." and by substituting the words "lat. 32°56'40"N., long. 97°10'12"W.; to lat. 32°52'00"N., long. 97°06'30"W."

In Area B, by removing the words "lat. 33°00'00"N., long. 97°10'15"W.; to lat. 32°58'30"N., long. 97°06'45"W." and by substituting the words "lat. 33°01'00"N., long. 97°09'10"W.; to lat. 33°01'45"N., long. 97°10'00"W.; thence counterclockwise along a 10-mile arc of the Dallas-Fort Worth Airport to lat. 32°58'12"N., long. 97°13'29"W.; to lat. 32°56'40"N., long. 97°10'12"W."

In Area C, after the words "lat. 33°11'30"N., long. 97°11'30"W.;" by inserting the words "lat. 33°06'25"N., long. 97°11'30"W.;" thence counterclockwise along a 15-mile arc of the Dallas-Fort Worth Airport to lat. 33°00'25"N., long. 97°18'15"W.; to lat. 32°57'15"N., long. 97°11'30"W.;"

In Area D, by removing the words "to the point of beginning." and by substituting the words "to the point of beginning; and that airspace beginning at lat. 33°06'25"N., long. 97°11'30"W.; to lat. 33°11'30"N., long. 97°11'30"W.; to lat. 33°11'20"N., long. 97°14'15"W.; thence counterclockwise along a 20-mile arc of the Dallas-Fort Worth Airport to lat. 33°02'45"N., long. 97°23'45"W.; to lat. 33°00'25"N., long. 97°18'15"W.; thence clockwise along a 15-mile arc of the Dallas-Fort Worth Airport to the point of beginning."

Issued in Washington, DC., on May 22, 1986.

Harold H. Downey,

Acting Manager, Airspace—Rules and Aeronautical Information Division.

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Part 361

Claims Pursuant to the Government Losses in Shipment Act

AGENCY: Bureau of the Public Debt, Fiscal Service, Treasury.

ACTION: Final rule.

SUMMARY: This amendment permits the delivery by means other than registered mail of registered securities issued by the Department of the Treasury on original issue transactions. Currently, these securities are sent by registered mail as provided by § 361.6 of the regulations pertaining to Advice of Shipment. In the case of registered securities certified mail would serve the same purpose as registered mail in establishing whether the addressee received the package and would permit significant savings in postage costs to the Bureau with little or no increased risk of loss in shipment. The current regulation does not permit shipment of registered securities by other than registered mail without a separate notice also being sent, if the shipment equals or exceeds $10,000 in value. The requirement of a separate notice would increase Bureau processing costs without a corresponding decrease in risk of loss. Even if lost, registered securities cannot be negotiated without a properly certified assignment. Because similar services providing essentially equivalent protection, which would be more advantageous to the Bureau, may be offered by the Postal Service in the future, the regulations should anticipate such a contingency by providing for the use of any means of delivery that provide such equivalent protection.

EFFECTIVE DATE: June 2, 1986.

FOR FURTHER INFORMATION CONTACT: Sandy Dyson, Attorney-Adviser, Office of the Chief Counsel, Bureau of the Public Debt, (202) 376-4320.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

Because this document relates to agency management it is not subject to Executive Order 12291. Accordingly, a

regulatory impact analysis is not required.

Paperwork Reduction Act

The Paperwork Reduction Act, Pub. L. 96–511, 94 Stat. 2812 (44 U.S.C. Chapter 35) does not apply to this rule because it does not contain information collection requirements which necessitate approval by the Office of Management and Budget.

Regulatory Flexibility Act

Because no notice of proposed rulemaking is required for this document it is not subject to the Regulatory Flexibility Act (5 U.S.C. 601).

Administrative Procedure Act

This regulation relates to agency management and is therefore not subject to the notice and public comment procedures and the delayed effective date requirements of the Administrative Procedure Act (5 U.S.C. 553(a)(2)).

The Department has determined that to maximize the savings which will be realized by using certified rather than registered mail for shipping securities the new rule should be instituted at the earliest possible date.

List of Subjects in 31 CFR Part 361

Claims pursuant to the Government Losses in Shipment Act.

PART 361—[AMENDED]

Accordingly, Part 361 is amended as follows:

1. The authority citation for amended Part 361 continues to read:

Authority: Sec. 6, 50 Stat. 480; 40 U.S.C. 728.

2. Part 361.6(a) is amended by revising the first sentence in paragraph (a) to read as follows:

§ 361.6 Advice of shipment.

(a) If the value of any one shipment to one consignee at one time by one consignor, except in the case of any intracity shipment or the shipment of registered securities by certified mail, or by another means providing the same protection as certified mail, equals or exceeds $10,000, immediate notice thereof shall be forwarded by the consignor to the consignee by separate mail. * * *

Gerald Murphy,

Fiscal Assistant Secretary.

[FR Doc. 86–12223 Filed 5–30–86; 8:45 am]

BILLING CODE 4810-16-M

Office of Foreign Assets Control

31 CFR Part 550

Libyan Sanctions Regulations

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Final rule.

SUMMARY: In Executive Order 12543 of January 7, 1986 (51 FR 875, January 9, 1986), the President declared a national emergency with respect to Libya, invoking the authority, *inter alia*, of the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*). In that Order, as supplemented by Executive Order 12544 of January 8, 1986 (51 FR 1235, January 10, 1986), the President ordered specified sanctions against Libya, and authorized the Secretary of the Treasury, in consultation with the Secretary of State, to take such actions, including the promulgation of rules and regulations, as might be necessary to carry out the purposes of those Orders. In implementation of those Orders, the Treasury Department issued the Libyan Sanctions Regulations (51 FR 1354, January 10, 1986, and 51 FR 2462, January 16, 1986). Executive Orders 12543 and 12544 and these Regulations prohibit, *inter alia*, (a) transactions by a U.S. person relating to transportation to or from Libya; (b) transactions by U.S. persons relating to travel by U.S. citizens and permanent resident aliens to Libya or their activities within Libya; (c) purchases by any U.S. person of goods for export from Libya to any country; (d) importation into the United States of Libyan goods; and (e) payments and transfers of any type to the Government of Libya, its agencies, instrumentalities, and controlled entities. As an exception to the foregoing prohibitions, the Treasury Department is amending the Regulations to authorize certain transactions related to travel to and from Libya and residence within Libya for United States citizens and permanent resident aliens who are immediate family members of Libyan nationals. The general license created by this amendment is subject to the requirement that eligible persons register their eligibility either with the Belgian Embassy in Tripoli, Libya, or with the Treasury Department, Office of Foreign Assets Control, in Washington, DC.

EFFECTIVE DATE: 8:06 p.m. Eastern Standard Time, January 7, 1986.

FOR FURTHER INFORMATION: Contact Marilyn L. Muench, Chief Counsel, Office of Foreign Assets Control, Department of the Treasury, Washington, DC 20220, Tel. (202) 376-0408.

SUPPLEMENTARY INFORMATION: The general license contained in this amendment to the Regulations formally implements a humanitarian policy announced on February 7, 1986, which is intended to avoid disruption or dislocation to family units that include United States citizens or permanent resident aliens and Libyan nationals. This policy has been implemented to date through the issuance of specific licenses by the Office of Foreign Assets Control. It is recognized that circumstances may hinder certain U.S. citizen or resident alien dependents of Libyan nationals from registering their eligibility under the general license as required. Reasonable explanations for failure to register by such dependents will be given full consideration under the enforcement policies adopted to assure compliance with the Regulations.

Since the Regulations involve a foreign affairs function, the provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* does not apply. Because the Regulations are issued with respect to a foreign affairs function of the United States, they are not subject to Executive Order 12291 of February 17, 1981, dealing with Federal regulations. The information collection requests contained in this document are being submitted to the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Notice of OMB action on these requests will be published in the Federal Register.

The general license set forth in § 550.560 is effective as of 8:06 p.m. Eastern Standard Time, January 7, 1986.

List of Subjects in 31 CFR Part 550

Libya, Imports, Reporting and recordkeeping requirements.

PART 550—LIBYAN SANCTIONS REGULATIONS

31 CFR Chapter V, Part 550, is amended as set forth below:

1. The "Authority" citation for Part 550 continues to read as follows:

Authority: 50 U.S.C. 1701 *et seq.*; E.O. 12543, 51 FR 875, January 9, 1986; E.O. 12544, 51 FR 1235, January 10, 1986.

2. The table of contents of Part 560 is amended by adding an entry for § 560.560 to Subpart E as follows:

* * * * *

Subpart E—Licenses, Authorizations, and Statements of Licensing Policy

* * * * *

Sec.

560.560 Transactions related to travel to, and residence within, Libya by immediate family members of Libyan nationals.

Subpart E—Licenses, Authorizations, and Statements of Licensing Policy

3. New § 560.560 is added to read as follows:

§ 560.560 Transactions related to travel to, and residence within, Libya by immediate family members of Libyan nationals.

(a) *General License.* Subject to compliance with the registration requirements set forth in paragraph (d) of this section, the following transactions are authorized in connection with travel to, from and within Libya and residence within Libya by U.S. citizens and permanent resident aliens who are immediate family members of Libyan nationals:

(1) All transportation-related transactions ordinarily incident to travel to, from and within Libya.

(2) All transactions ordinarily incident to residence within Libya, including payment of living expenses and the acquisition in Libya of goods for personal use or consumption there.

(3) All transactions incident to the processing and payment of checks, drafts, traveler's checks, and similar instruments negotiated in Libya by any person licensed under this section.

(4) The purchase within Libya and importation as accompanied baggage of items for noncommercial use, provided that the aggregate value of such purchases imported into the United States conforms to limitations established by the United States Customs Service.

(b) *Definition.* For purposes of this section, the term "immediate family member" means a spouse, child, parent, mother-in-law, father-in-law, son-in-law or daughter-in-law.

(c) *Specific Licenses.* Specific licenses authorizing the transactions set forth in paragraph (a) of this section may be issued in appropriate cases to persons similarly situated to the persons described in paragraph (b) of this section where such specific licenses are necessary to preserve the integrity of established family units.

(d) *Registration.* (1) The general license set forth in this section is available only to those U.S. citizens and permanent resident aliens who register their eligibility in writing with either of the following:

Embassy of Belgium, Ali Obeydah St., Ibn El jarah No. 1, Immeuble Chirlando, Tripoli, Libya, Telephone: 37797

or

Licensing Section, Office of Foreign Assets Control, Department of the Treasury, Washington, DC 20220, Telephone: (202) 376-0236.

Registration under this paragraph is deemed complete upon receipt at one of the above addresses of a letter, signed by or on behalf of each eligible U.S. citizen or permanent resident alien being registered, containing the following information:

(i) The name and the date and place of birth of the U.S. citizen(s) or permanent resident alien(s) registering (the "registrant"), including the name on which the registrant's most recent U.S. passport or Alien Registration Receipt Card was issued, if different;

(ii) If applicable, the place and date of the registrant's naturalization as a U.S. citizen, and the number of the registrant's naturalization certificate, *or*, for permanent resident aliens, the Alien Registration Number of the registrant's Alien Registration Receipt Card;

(iii) The name, relationship, and address of the Libyan national with whom the registrant resides as an immediate family member and whose relationship forms the basis for the registrants's eligibility under this general license; and

(iv) The number and issue date of the registrant's current U.S. passport, and the most recent date on which the passport was validated by the U.S. Department of State for travel to Libya; *or*, if the registrant does not hold a current U.S. passport, the country, issue date, and number of the registrant's current passport or other travel document, if any.

(2) The lack of validation of a registrant's U.S. passport for travel to Libya does not affect eligibility for the benefits of the general license set forth in this section for persons who otherwise qualify. Current information on travel document status as requested in paragraph (d)(1) of this section must, however, be furnished to register a registrant's eligibility for this license.

(e) *Other Requirements.* The general license set forth in this section shall not operate to relieve any person licensed hereunder from compliance with any other U.S. legal requirements applicable to the transactions authorized pursuant to paragraph (a) of this section.

Dated: May 27, 1986.

Dennis M. O'Connell,

Director, Office of Foreign Assets Control.

Approved: May 28, 1986.

Francis A. Keating II,

Assistant Secretary (Enforcement).

BILLING CODE 4810-25-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 110

[CCGD11-85-09]

Anchorage Regulations; San Diego Harbor, CA

AGENCY: Coast Guard, DOT

ACTION: Final rule.

SUMMARY: The San Diego Unified Port District (SDUPD) requested the Coast Guard amend the federal anchorage regulations for San Diego Bay to conform to the anchorage scheme proposed in their Comprehensive Baywide Small Craft Mooring and Anchorage Plan. This rule incorporates those aspects of the Plan which improve navigation safety in San Diego Bay and deletes existing regulations which are no longer needed. This rule designates the Laurel Street Roadstead, a small craft anchoring area developed by SDUPD, as a special anchorage area. 33 CFR 110.210(a) is revised by disestablishing all of San Diego Bay as an anchorage ground; however, those anchorage areas described elsewhere in § 110.210(a) remain unchanged. References to Commandant, Eleventh Naval District, which no longer exists, are changed to Commander, Naval Base San Diego. The intended effect of this rule is to provide safe mooring areas for a large number of recreational vessels, ensure unobstructed navigation lanes throughout San Diego Bay, and establish federal regulations consistent with port development plans.

EFFECTIVE DATE: These regulations become effective on July 2, 1986.

FOR FURTHER INFORMATION CONTACT: Lieutenant F.L. McClain USCG, Commander (mps), Eleventh Coast Guard District, 400 Oceangate, Suite 709, Long Beach, CA 90822-5399, (213) 590-2301.

SUPPLEMENTARY INFORMATION: On 13 March 1986, the Coast Guard published a notice of proposed rule making in the Federal Register for these regulations (49 FR 8967). A public hearing was held on 3 April 1986 at San Diego, CA, at which 19

persons presented oral testimony. Other interested persons were given until 8 May 1986 to submit comments.

Drafting Information

The principal persons involved in drafting this rule are Commander K.B. Allen, Lieutenant F.L. McClain and Ensign J.D. Czamanske, project officers, Eleventh Coast Guard District Marine Safety Division and Lieutenant Commander J.R. McFaul, project attorney, Eleventh Coast Guard District Legal Office.

Discussion of Comments

The majority of the comments received expressed opposition to or support of the San Diego Unified Port District's Comprehensive Baywide Small Craft Mooring and Anchorage Plan. The Coast Guard does not have the authority to approve or disapprove the SDUPD Plan. In this rule, the Coast Guard is simply designating an existing SDUPD maintained anchorage area as a Special Anchorage Area so the recreational boaters using the anchorage will be exempted from displaying anchor lights and dayshapes. This action does not constitute approval of the Plan. We will discuss only those comments received that are relevant to this regulatory package.

Two petitions were received which directly opposed the change to 33 CFR 110.210(a). In opposing the rule, they operated under a misperception that federal regulations totally control the regulated subject matter and that state and local regulations cannot "legally" be enacted. A proper state or local authority may enact concurrent laws which are not in conflict with federal statutes.

The petitions also were concerned that this rule would relinquish Coast Guard control "of anchoring regulations in San Diego Bay". In the existing regulations, all of San Diego Bay is an anchorage ground. This has proven to be impractical given the increased recreational vessel traffic transiting San Diego Bay. By enacting this rule, the Coast Guard has, in fact, reaffirmed its control over San Diego Bay anchorage areas.

Proponents of the rule stated that since the existing regulations designate all of San Diego Bay as an anchorage area, vessels anchor anywhere which creates navigational hazards to vessels transitting the area. They believe this rule would improve navigation safety in San Diego Bay by encouraging recreation vessels to use designated anchorage areas since vessels would not be required to show anchor lights and dayshapes while in the anchorage areas.

Two comments specifically addressed the deletion of the current nonanchorage area, 33 CFR 110.210(a)(3), as not being in the best interest of mariners because numerable electric power and telephone cables cross the bay in this area. Since this is a valid navigational concern, the Coast Guard will make this a regulated navigation area in a subsequent rulemaking procedure.

Economic Assessment and Certification

This regulation is considered to be non-major under Executive Order 12291 and non-significant under DOT Regulatory Policies and Procedure (44 FR 11304; February 26, 1979). The economic impact of this final rule has been found to be so minimal that further evaluation is unnecessary. The implementation of this final rule will have a minimal impact on maritime commerce and navigation as it will not impose any additional restrictions on mariners. It is outside of the Coast Guard's statutory authority to comment on any plan implementing or proposing the charging of fees for the use of conveniences or improvements that are the result of local fund expenditure. Since the impact of this rule is expected to be minimal, the Coast Guard certifies that it will not have significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 110

Anchorage grounds.

Regulations

In consideration of the preceding Part 110 of Chapter I, Subchapter I, Title 33 of the Code of Federal Regulations, are amended as follows:

PART 110—ANCHORAGE REGULATIONS

1. The authority citation for Part 110 is revised to read as follows:

Authority: 33 U.S.C. 471, 2030, 2035, and 2071; 49 CFR 1.46(c) and 33 CFR 1.05–1(g).

2. Section 110.90 is revised to read as follows:

§ 110.90 San Diego Harbor, California.

(a) *The special anchorage areas*—(1) *Area A–1.* In the Municipal Yacht Harbor, the water area enclosed by a line beginning at latitude 32°42'56.5" N., longitude 117°13'44" W.; thence southwest to latitude 32°42'54.4" N., longitude 117°13'48.2" W.; thence northwest to latitude 32°43'01.1" N., longitude 117°13'56" W.; thence northeast to latitude 32°43'02.4" N., longitude 117°13'52.4" W.; thence southeast to latitude 32°42'58.6" N., longitude 117°13'47.3" W.; thence to the point of beginning.

(2) *Area A–2.* In the Commercial Basin, the water area enclosed by a line beginning at latitude 32°43'13.9" N., longitude 117°13'21.0" W.; thence northeast to latitude 32°43'16.2" N., longitude 117°13'13.2" W.; thence northwest to latitude 32°43'22.1" N., longitude 117°13'23.7" W., thence west to latitude 32°43'22.0" N., longitude 117°13'26.8" W.; thence southwest to latitude 32°43'19.0" N., longitude 117°13'29.2" W.; thence southeast to the point of beginning.

(3) *Area A–3.* In North San Diego Bay, north of the "B" Street Merchant Vessel Anchorage, the water area enclosed by a line beginning at latitude 32°43'30.4" N., longitude 117°10'24.4" W., thence southwest to latitude 32°43'29.7" N., longitude 117°10'29.7" W., thence southwest to latitude 32°43'25.6" N., longitude 117°10'33.0" W., thence northwest to latitude 32°43'29.8" N., longitude 117°10'44.9" W., thence northeast to latitude 32°43'36.0" N., longitude 117°10'41.6" W., thence southeast along a line parallel to, and 200 feet bayward of, the shoreline of San Diego Bay adjoining Harbor Drive to the point of beginning.

(4) *Area A–5.* In Glorietta Bay, the water area enclosed by a line beginning at latitude 32°40'42.0" N., longitude 117°10'00.0" W.; thence southwest to latitude 32°40'40.0" N., longitude 117°10'03.5" W.; thence northwest to latitude 32°40'46.0" N., longitude 117°10'12.5" W.; thence northeast to latitude 32°40'46.5" N., longitude 117°10'11.0" W.; thence southeast to the point of beginning.

Note.—Mariners anchoring in San Diego Harbor should consult applicable local ordinances of the San Diego Unified Port District.

3. Section 110.210 is revised to read as follows:

§ 110.210 San Diego Harbor, California.

(a) *The anchorage grounds*—(1) *Special anchorage for U.S. Government vessels.* Shoreward of a line extending from Ballast Point Light approximately 351°30' to the shore end of the Quarantine Dock.

(2) *"B" Street Merchant Vessel Anchorage.* Due west from the southwest corner of the "B" Street pierhead to latitude 32°43'00", longitude 117°11'00"; thence northeasterly to latitude 32°43'20", longitude 117°10'51"; thence due east to the shoreline; thence following the shoreline and pier to the point of beginning.

(b) *The regulations.* (1) The special anchorage described in paragraph (a)(1)

of this section is reserved exclusively for the anchorage of vessels of the United States Government and of authorized harbor pilot boats. No other vessels shall anchor in this area except by special permission obtained in advance from the Commander, Naval Base, San Diego, California.

(2) The area described in paragraph (a)(2) of this section is reserved for the use of merchant vessels calling at the Port of San Diego while awaiting a berth.

(3) Vessels anchoring in San Diego Harbor shall leave a free passage for other craft and shall not unreasonably obstruct the approaches to the wharves in the harbor.

Note.—Mariners anchoring in San Diego Harbor should consult applicable local ordinances of the San Diego Unified Port District.

Dated: May 19, 1986.

A. B. Berne,

Rear Admiral (lower half), U.S. Coast Guard, Commander, Eleventh Coast Guard District.

[FR Doc. 86-12268 Filed 5-30-86; 8:45 am]

BILLING CODE 4910-14-M

---

33 CFR Part 117

[CGD7 86-16]

Temporary Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, SC

AGENCY: Coast Guard, DOT.

ACTION: Temporary rule.

SUMMARY: The Coast Guard is temporarily changing the regulations governing the Ben Sawyer Bridge across Sullivans Island Narrows by permitting the number of openings to be further limited during certain periods. This change is being made to ease severe weekend traffic congestion and to further evaluate proposed permanent regulations.

DATES: These temporary regulations become effective on May 24, 1986 and terminate on July 20, 1986. Comments must be received on or before June 19, 1986.

ADDRESSES: Comments should be mailed to Commander (oan), Seventh Coast Guard District, 51 SW. 1st Avenue, Miami, Florida 33130. The comments and other materials referenced in this notice will be available for inspection and copying at 51 SW. 1st Avenue, Room 816, Miami, Florida. Normal office hours are from 7:30 a.m. to 4 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Mr. Walt Paskowsky, (305) 536-4103.

SUPPLEMENTARY INFORMATION: On May 5, 1986 the Coast Guard published (51 FR 16568) a proposal to permanently revise these regulations. This temporary rule is identical to the proposed permanent rule and is being made effective in less than 30 days after Federal Register publication because following normal rulemaking procedures would be impractical. Prompt implementation is necessary to alleviate a severe vehicular traffic problem and to evaluate the proposed permanent rule.

Drafting Information

The drafters of these regulations are Mr. Walt Paskowsky, Bridge Administration Specialist, project officer, and Commander Ken Gray, project attorney.

Discussion of Temporary Regulations

The bridge presently opens on signal on Saturdays, Sundays, and federal holidays except from 2 p.m. to 6 p.m. when it need open only on the hour and half-hour. The temporary rule and the proposed final rule would extend this time period by six hours (9 a.m. to 7 p.m.) and limit routine openings to one per hour during this period. This change was temporarily implemented in the summer of 1985 for evaluation purposes (50 FR 31367) and generated no complaints from mariners. This change is intended to space draw openings and virtually eliminate "back to back" openings which can contribute significantly to vehicular traffic delays during these periods. Prompt implementation of this temporary rule has been requested by the mayors of Charleston and Mount Pleasant, SC.

List of Subjects in 33 CFR Part 117

Bridges.

Temporary Regulations

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is temporarily amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46 and 33 CFR 1.05-1(g).

2. Paragraph (c) of section 117.911 is revised to read as follows for the period May 24, 1986 through July 20, 1986. Because this is a temporary rule, this revision will not appear in the Code of Federal Regulations.

§ 117.911 Atlantic Intracoastal Waterway, Little River to Savannah River.

* * * * *

(c) *Ben Sawyer (SR 703) bridge across Sullivans Island Narrows, mile 462.2 between Sullivans Island and Mount Pleasant.* The draw shall open on signal; except that, the draw need not open from 7 a.m. to 9 a.m. and from 4 p.m. to 6 p.m. Monday through Friday except federal holidays. On Saturdays, Sundays, and federal holidays from 9 a.m. to 7 p.m. the draw need open only on the hour.

* * * * *

Dated: May 19, 1986.

R.P. Cueroni,

Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.

BILLING CODE 4910-14-M

Proposed Rules

Federal Register
Vol. 51, No. 105
Monday, June 2, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

9 CFR Part 381

[Docket No. 86-001E]

Addition of Great Britain to the List of Countries Eligible for Importation of Poultry Products into the United States

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Proposed rule; extension of comment period.

SUMMARY: On April 9, 1986, the Food Safety and Inspection Service (FSIS) published a proposed rule to amend the poultry products inspection regulations to add Great Britain to the list of countries from which poultry products of chickens, turkeys, ducks, geese and guineas are eligible to be imported into the United States. FSIS has received requests from the Georgia Poultry Federation, Inc., the National Broiler Council and the National Turkey Federation to extend the comment period to allow more time for reviewing and gathering information. In response, FSIS is extending the comment period for 30 days.

DATE: Comments must be received on or before July 9, 1986.

ADDRESSES: Written comments to: Policy Office, Attn: FSIS Hearing Clerk, Room 3803, South Agriculture Building, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Dr. William Havlik Director, Foreign Programs Division, International Programs, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-2644.

SUPPLEMENTARY INFORMATION: On April 9, 1986, FSIS published in the Federal Register (51 FR 12161) a proposed rule to amend the Federal poultry products inspection regulations to add Great Britain to the list of countries from which poultry products of chickens, turkeys, ducks, geese, and guineas are eligible to be imported into the United States. Reviews of Great Britain's laws, regulations and other materials, and onsite reviews of its inspection system indicate that poultry products from certified establishments in Great Britain should be made eligible for import into the United States. Interested persons were given until June 9, 1986, to comment on this proposed rule.

FSIS has received requests from the Georgia Poultry Federation, Inc., the National Broiler Council and the National Turkey Federation to extend the comment period on the proposed rule to allow more time to review and gather information on the proposal. FSIS is interested in receiving additional data, and therefore is extending the comment period for an additional 30 days, to July 9, 1986.

Done at Washington, DC, on May 27, 1986.

Donald L. Houston,

Administrator, Food Safety and Inspection Service.

BILLING CODE 3410-DM-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 71-CE-7-AD]

Airworthiness Directives; Cessna Turbocharged Models TU206 Series, TP206 Series, T207 Series and Models T210 Through T210N Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This Notice proposes to revise Airworthiness Directive (AD), 71-09-07 to make it applicable to Cessna Turbocharged Models TU206 Series, TP206 Series and T207 Series and Models T210 thru T210N airplanes. AD 71-09-07, presently applicable to Cessna Turbocharged Models TU206, TP206, T207 and T210 Series airplanes was issued to require pressure testing of the complete exhaust manifold in the cabin heat exchanger area to detect cracks or leakage. The manufacturer has subsequently introduced a design change in the engine installation beginning with the Cessna Model T210R airplanes which makes the requirements of AD 71-09-07 inapplicable to those airplanes. Accordingly, the proposed revision will incorporate an ending serial number for the T210 series airplanes.

DATES: Comments must be received on or before June 19, 1986.

ADDRESSES: Cessna Service Letter SE71-11, dated April 16, 1971, applicable to this AD may be obtained from Cessna Aircraft Company, Piston Aircraft Marketing Division, Post Office Box 1521, Wichita, Kansas 67201, or the Rules Docket at the address below. Send comments on the proposal in duplicate to Federal Aviation Administration, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 71-CE-7-AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Paul O. Pendleton, Aerospace Engineer, Aircraft Certification Office, ACE-140W, FAA, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 946-4427.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Director before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. Comments are specifically invited on the overall regulatory, economic, environmental and energy aspects of the proposed rule. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA public contact concerned with the

substance of this proposal will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 71-CE-7-AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Discussion

Airworthiness Directive 71-09-07, Amendment No. 39-1202, (36 FR 8209) effective May 4, 1971, requires pressure testing of the complete exhaust manifold in the cabin heat exchanger area of all turbocharged Cessna Models TU206, TP206, T207 and T210 series airplanes to detect cracks or leakage. Beginning with the 1985 Cessna Model T210R airplanes (S/N 21064866 and on) an engine installation design change was incorporated wherein the cabin heat source is supplied by bleed air from the compressor section of the turbocharger instead of the exhaust manifold heat exchanger. This design change makes compliance with AD 71-09-07 unnecessary for airplanes so modified. Therefore, the FAA proposes to revise AD 71-09-07 to eliminate the requirement for repetitive inspection on T210 series airplanes beginning with T210R Serial Number 21064866.

The cost of compliance with the proposed revised AD is so small that the expense of compliance will not have a significant financial impact on any small entities operating these airplanes. Therefore, I certify that (1) this action is not a major rule under the provisions of Executive Order 12291, (2) is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and (3) if promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A draft regulatory/evaluation has been prepared and has been placed in the public docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Air transportation, Aviation safety, Aircraft, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By revising and reissuing AD 71-09-07 (Amendment 39-1202) in its entirety as follows:

Cessna: Applies to turbocharged Models TU206 series, TP206 series, T207 series (all Serial Numbers), and Models T210 thru T210N (Serial Number T210-0001 through T210-0454 and 21059200 through 21064867) airplanes certificated in any category.

Compliance: Required as indicated in the body of the AD.

To prevent exhaust gases from entering the cabin, accomplish the following:

(a) Within the next 25 hours time-in-service (TIS) after the effective date of this AD, unless already accomplished within the last 25 hours TIS, and thereafter at intervals not to exceed 50 hours TIS since the last inspection per this AD prior to its revision, inspect the exhaust manifold heat exchanger in accordance with the following:

(1) Test the complete exhaust manifold in the cabin heat exchanger area for cracks in accordance with the following procedures, or the more detailed procedures, outlined in the Cessna Service Manuals for the specified airplanes.

(i) Remove the heater shroud so that all surfaces of the exhaust manifold heat exchanger are exposed.

(ii) Attach the pressure side of an industrial vaccum cleaner to the tailpipe opening, using a rubber plug to effect a seal as required.

(iii) With vaccum cleaner operating, check the complete exhaust manifold in the heat exchanger area manually by feel or by using a soap solution and watching for bubbles. The exhaust manifold in the heat exchanger area must be free of air leaks.

(2) If cracks, breaks, or any leakage along the exhaust manifold cabin heat exchanger are found during the pressure test required by paragraph (a)(1) of this AD, prior to further flight replace the defective part with an airworthy part.

Note.—Cessna Service Letter SE71-11, dated April 16, 1971, covers this same subject.

(b) An equivalent means of compliance with this AD may be used if approved by the Manager, Wichita Aircraft Certification Office, FAA, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209.

All persons affected by this directive may obtain copies of the documents referred to herein upon request to the Cessna Aircraft Company, Piston Aircraft Marketing Division, Post Office Box 1521, Wichita, Kansas 67201 or the FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on May 20, 1986.

Jerold M. Chavkin,
Acting Director, Central Region.

[FR Doc. 86-12206 Filed 5-30-86; 8:45 am]
BILLING CODE 4910-13-M

Coast Guard

33 CFR Part 117

[CGD 1-86-9R]

Drawbridge Operation Regulations; Kennebec River, ME

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the Maine Department of Transportation (MDOT), the Coast Guard is considering a change to the drawbridge regulations governing the drawbridge across the Kennebec River between the Towns of Richmond and Dresden, Maine, by requiring that advance notice of opening be given during the times of decreased water traffic. This proposal is being made because of a steady decrease in requests for opening the draw. This action should relieve the bridge owner of the burden of having a person constantly available to open the draw and should still provide for the reasonable needs of navigation.

DATE: Comments must be received on or before July 17, 1986.

ADDRESSES: Comments should be mailed to Commander (obr), First Coast Guard District, 408, Atlantic Avenue, Boston, MA, 02210-2209. The comments and other materials referenced in this notice will be available for inspection and copying at the Coast Guard Bridge Branch, Room 628, at the address given above. Normal office hours are between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: William J. Naulty, Chief, Bridge Branch, First Coast Guard District, Boston, MA 02210—2209, Telepone (617) 223-8347.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, comments, data or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal.

The Commander, First Guard District, will evaluate all communications received and determine a course of fina action on this proposal. The proposed

regulations may be changed in light of comments received.

Drafting Information

The drafters of this notice are: William J. Naulty, Chief, Bridge Branch, First Coast Guard District, and Lieutenant Dana J. St. James, United States Coast Guard, Assistant Legal Officer, First Coast Guard District, Project Attorney.

Discussion of Proposed Regulations

Existing regulations were promulgated at a time when traffic volumes on the Kennebec River consisted of commercial and recreational vessels. Today there is no commercial traffic passing through the Richmond/Dresden Bridge, and recreational vessels operate mostly during the daylight hours. Nighttime openings of the drawspan are infrequent. Consequently, the proposed amendment should provide for the reasonable needs of navigation.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and non-significant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal is expected to be so mininal that a full regulatory evaluation is unnecessary. Traffic on the river consists almost exclusively of recreational vessels during daylight hours. There is little, if any, nighttime vessel movement. Recreational vessels operate only during the boating season. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations as follows:

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.525(b) is revised to read as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

§ 117.525 Kennebec River.

* * * * *

(b) (1) The draw of the Maine Department of Transportation highway bridge, mile 27.1, between Richmond and Dresden, shall be opened promptly, on signal, for the passage of vessels between the hours of 9 a.m. and 5 p.m. from June 1 through September 30. At other hours during this period the draw need not be opened for the passage of vessels except on advance notice given to the draw tender or duty between the hours of 9 a.m. and 5 p.m.

(2) At times other than those specified above, the draw need not be opened for passage of vessels except when 24 hours notice is given in person, in writing, or by telephone to the Maine Department of Transportation Division Office, at Rockland.

Dated: May 19, 1986.

R.I. Rybacki,

Captain, U.S. Coast Guard, Acting Commander, First Coast Guard District.

BILLING CODE 4910-14-M

POSTAL SERVICE

39 CFR Part 111

Revocation of Permits To Mail Without Affixing Postage

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: This proposal would amend the Domestic Mail Manual (DMM) to clarify that failure to pay an assessed postage deficiency is grounds for revoking permits to mail without affixing postage.

DATES: Comments must be received on or before July 2, 1986.

ADDRESSES: Written comments should be mailed or delivered to the Director, Office of Classification and Rates Administration, Rates and Classification Department, U.S. Postal Service, 475 L'Enfant Plaza West SW., Washington, DC 20260–5360. Copies of all written comments will be available for inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, in Room 8430, 475 L'Enfant Plaza West SW., Washington, DC 20260–5360.

FOR FURTHER INFORMATION CONTACT: Kenneth H. Young (202) 268–5321.

SUPPLEMENTARY INFORMATION: Postal regulations generally require that postage be fully prepaid at the time matter is mailed. DMM 146.11. Proof of payment can be shown by affixing stamps, by affixing postage meter strips, by imprinting the appropriate postage meter indicia directly on the pieces, or by permit imprints. For matter bearing permit imprints, postage is required to be prepaid in full from an advance deposit account. For permit imprint mailings, the Postal Service calculates the amount of postage due from figures provided by the mailer on the appropriate mailing statement, PS Form 3602, *Statements of Mailing with Permit Imprints*, or PS Form 3605, *Statements of Mailing-Bulk Zone Rates*, and deducts that amount from the advance deposit account.

Mailing statements submitted by mailers using permit imprints are subject to audit by the Postal Service. On the basis of an audit or other evidence which later comes to the Postal Service's attention, it may be determined that the amount of postage paid at the time of mailing was incorrect. If the mailer paid too much postage, the Postal Service refunds the excess amount. If the mailer paid too little postage, the Postage Service notifies the mailer of the deficiency and pursues collection of the amount due. A mailer is entitled to appeal any decision assessing a revenue deficiency to a higher administrative level. See DMM 140.

Unfortunately, in a sufficient number of cases to cause concern, a mailer refuses to pay a postage deficiency after the deficiency assessment has been appealed to a higher administrative level and determined to be proper. In such cases, collection of funds owed to the Postal Service is unreasonably delayed, and the Postal Service incurs additional administrative expense. In some instances, the Postal Service must resort to litigation to collect amounts due.

DMM 145.221 provides, among other things, that permits to mail without affixing postage can be revoked "for any noncompliance with the regulations governing the use of permit imprints." The Postal Service has found that many mailers are not aware that failure to pay the full amount of postage due is an act of noncompliance that falls within the intent of DMM 145.221. Indeed, the Postal Service has only infrequently used the revocation of permits as a means of protecting its revenues.

Accordingly, the Postal Service proposes to amend its regulations to make clear that it is authorized to withdraw from non-paying mailers the privilege of mailing matter without affixing postage, i.e., the privilege of using a permit imprint for bulk or presorted mailings. Such a revocation would not preclude such mailers from using any class or subclass of mail for which they are eligible, but would

require them to affix postage in the proper amount to each mailing piece.

Nothing in this proposed change would affect the right of a mailer to appeal the assessment of a revenue deficiency, DMM 148.2. A final agency decision concerning a revenue deficiency under DMM 148.2, however, will not be subject to reconsideration during a mailer's appeal of a permit revocation under DMM 145.220.

Although exempt by 39 U.S.C. 410(a) from the requirements of the Administrative Procedure Act regarding proposed rulemaking, 5 U.S.C. 553 (b), (c), the Postal Service invites public comments on the following proposed revisions of Part 145 of the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 111.1.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority citation for 39 CFR Part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 404, 407, 408, 3001–3011, 3201–3219, 3403–3405, 3621, 5001; 42 U.S.C. 1973cc–13, 1973cc–14.

PART 145—PERMIT IMPRINTS

2. In Part 145, revise .221 and .220, renumber .66 as .67, and add new .66 to read as follows:

145.2 Permit.

* * * * *

.22 Revocation

.221 The permit will be revoked if used in operating any unlawful scheme or enterprise, for nonuse during any 12-month period, or for any noncompliance with the regulations governing the use of permit imprints, including, but not limited to, any failure to pay the Postal Service any postage or fees that are due.

* * * * *

.220 The permit holder may appeal the Postmaster's decision to the General Manager, Domestic Mail Classification Division, Office of Mail Classification, USPS Headquarters, Washington, D.C. 20260. The appeal must be submitted in writing to the Postmaster, who will forward the appeal to the General Manager, Domestic Mail Classification Division, who will make the final agency decision. The General Manager will not review or reconsider any final agency decision regarding a postage deficiency previously made under DMM 148.2.

* * * * *

145.6 Mailings With Permit Imprints

* * * * *

.66 Payments In Advance of Dispatch. Postage must be fully prepaid before mailings are dispatched. Payments must be made through an advance deposit account established at the post office of mailing. The post office will issue receipts for advance deposit account payments. In circumstances where the Postal Service has made a final agency decision on a revenue deficiency, and the mailer has failed to pay additional postage or fees that are due, postage will not be considered fully prepaid and mailings by or on behalf of the mailer will not be accepted under the permit imprint system until the deficiency has been paid.

PART 148—REVENUE DEFICIENCY

3. In part 148, revise .2 to read as follows:

.2 Appeal of Ruling. A mailer may appeal any ruling assessing a revenue deficiency, by filing within 15 days of receipt of the revenue deficiency ruling an appeal to the Director, Office of Mail Classification, Rates and Classification Department, or to the Assistant Postmaster General, Rates and Classification Department, USPS Headquarters, Washington, DC 20260–5300, if the deficiency was assessed initially by the Director, Office of Mail Classification. The mailer may be required to furnish additional information or documents to support its appeal. Failure to furnish requested information or documents within thirty (30) days of notification will be grounds for denying an appeal. A final agency decision will be rendered as soon as practicable after receipt of the appeal and necessary supporting documents.

An appropriate amendment to 39 CFR 111 to reflect these changes will be published if the proposal is adopted.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

39 CFR Part 111

Revocation of Second-Class Mailing Privileges

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: This proposal would amend the Domestic Mail Manual (DMM) to clarify that failure to pay an assessed postage deficiency is grounds for revocation of second-class mailing privileges.

DATE: Comments must be received on or before July 2, 1986.

ADDRESSES: Written comments should be mailed or delivered to the Director, Office of Classification and Rates Administration, Rates and Classification Department, U.S. Postal Service, 475 L'Enfant Plaza West SW., Washington, DC 20260–5360. Copies of all written comments will be available for inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, in Room 8430, 475 L'Enfant Plaza West SW., Washington, DC 20260–5360.

FOR FURTHER INFORMATION CONTACT: Kenneth H. Young (202) 268–5321.

SUPPLEMENTARY INFORMATION: Postal regulations require that postage be fully prepaid before second-class mailings are dispatched. Domestic Mail Manual (DMM) 481. Payment must be made through an advance deposit account established at the post office of mailing. Second-class postage is computed on PS Form 3541, *Statement of Mailing Second-Class Publications*, or PS Form 3541–A, *Statement of Mailing Second-Class (Requester) Publications.* Typically, the postal employee who accepts the mailing examines the mailing statement, and allows the mail to be dispatched if the mailing statement appears to be correct and the publisher has sufficient funds in its advance deposit account to pay the cost of postage on the mailing.

Mailing statements submitted with second-class mailings are subject to later audit by the Postal Service. *See, generally,* DMM 447. On the basis of an audit, or other information which later comes to the attention of the Postal Service, it may determined that the postage paid on a particular mailing or mailings was incorrect. If the postage paid on a mailing exceeded the amount due, the Postal Service will refund the excess amount, or credit it to the publisher's advance deposit account. If the postage paid on a mailing was insufficient, the Postal Service will assess a revenue deficiency against the publisher and pursue collection of the amount due.

Under the applicable regulations, DMM 148, the publisher is given the opportunity to appeal an assessed revenue deficiency to higher levels of Postal Service management. In reviewing such an appeal, postal authorities examine the pertinent records to determine whether the postage paid on a disputed mailing was actually insufficient, and whether the correct amount of additional postage has been assessed. The publisher is considered to be liable for the correct

amount of postage due on every mailing; and the publisher is not excused from paying a deficiency which appears to have resulted from a postal employee's acceptance of a mailer's check supported by insufficient funds, failure to discover an incorrect entry on a mailing statement, miscalculation of the postage on a mailing, or erroneous advice to a publisher. *See*, DMM 111.3. In all cases, the burden rests with the publisher to demonstrate that the proper amount of postage has been paid.

From time to time, disputes have arisen regarding the obligation of a publisher to maintain sufficient funds in its advance deposit account to cover not only the postage on current mailings, but any revenue deficiencies which have been determined to be due and payable after the exhaustion of the mailer's appeal rights under DMM 148. The Postal Service proposes to amend its regulations to make clear that a publisher's failure to pay an assessed revenue deficiency, after the exhaustion of appeal rights under DMM 148, is considered grounds for the revocation or suspension of a publication's second-class mailing privileges under DMM 441.5. In such a case, the publisher's advance deposit account is in arrears, postage on current mailings of a publication cannot reasonably be considered to be fully prepaid under DMM 481, and the publisher has accordingly failed to comply with the requirements of chapter 4 of the Domestic Mail Manual, concerning second-class mailing requirements.

Accordingly, although exempted by 39 U.S.C. 410(a) from the notice and comment requirements of the Administrative Procedure Act, 5 U.S.C. 553(b), (c), regarding proposed rulemaking, the Postal Service invites public comment on the following proposed amendment to the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See, 39 CFR 111.1.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority citation for 39 CFR Part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 404, 407, 408, 3001–3011, 3201–3219, 3403–3405, 3621, 5001; 42 U.S.C. 1973cc–13, 1973cc–14.

441.5—Revocation or Suspension of Second-Class Privileges

* * * * *

2. In § 441.5, change 441.51 to read as follows:

.51 General. The Postal Service will revoke or suspend the entry of a publication as second-class mail whenever it finds, after a hearing, that the publication is no longer entitled to be entered as second-class mail. A second-class permit may be revoked or suspended for failure to pay the Postal Service any postage or fees that are determined to be due as a revenue deficiency under DMM 148, after the publisher has exhausted his right of appeal under that section, or the time for appeal has expired.

An appropriate amendment to 39 CFR 111 to reflect these changes will be published if the proposal is adopted.

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Part 401

[CGD 86–020]

Great Lakes Pilotage Rates

AGENCY: Coast Guard, DOT.

ACTION: Notice of public hearing and extension of comment period.

SUMMARY: On May 22, 1986, the Coast Guard published a Notice of Proposed Rulemaking regarding Great Lakes Pilotage Rates (51 FR 18806). At that time the Coast Guard stated that no public hearings were planned, but that they may be held if written requests for a hearing were received and it was determined that the opportunity to make oral presentations would aid the rulemaking process. The Coast Guard has received a request for a public hearing from one of the pilot organizations. Since they are directly affected by the proposed rules, the Coast Guard has determined that a hearing is desirable. Attendance is open to the public. Persons wishing to present oral statements at the hearing should notify the Executive Secretary, Marine Safety Council, no later than two days prior to the hearing. To permit a reasonable two week period for written comment on the oral presentations received by the Coast Guard at this public hearing, the comment period on this proposal is being extended extended to July 2, 1986.

DATES: The Coast Guard will hold the public hearing on June 18, 1986. It will begin at 10 a.m. and end at 4 p.m. or sooner if all speakers have been heard. Comments on this proposed rulemaking must be received by July 2, 1986.

ADDRESSES: The public hearing will be held at: The Hollenden House, East Ballroom, 610 Superior Avenue, Cleveland, Ohio.

FOR FURTHER INFORMATION CONTACT: The Executive Secretary, Marine Safety Council (G–CMC), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593, (202) 426–1477.

Dated: May 28, 1986.

W.J. Ecker,

Captain, U.S. Coast Guard, Acting Chief, Office of Merchant Marine Safety.

BILLING CODE 4910–14–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposal To Reclassify the Legal Status of the American Alligator Throughout the Remainder of Its Range to Threatened Due to Similarity of Appearance

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to reclassify the American alligator (*Alligator mississippiensis*) throughout the remainder of its range, where the species is presently classified as endangered or threatened, to threatened due to similarity of appearance under provisions of the Endangered Species Act of 1973, as amended. The Service is also proposing to amend the special rule on American alligators to reflect species-wide reclassification to threatened due to similarity of appearance. This proposed rule is based on evidence that the species is no longer biologically endangered or threatened. Alligator populations in Texas, Louisiana, and Florida have already been reclassified. This proposal deals with alligator populations in Alabama, Arkansas, Georgia, Mississippi, North Carolina, Oklahoma, and South Carolina. Alligator populations in these seven states are relatively stable and the alligator's distribution throughout these seven states is limited largely by habitat suitability. Reclassification would reduce restrictions on States for future management and research. Any proposed harvests would have to comply with the Service's special rule on American alligators and existing State statutes and regulations. The Service is requesting comments and information pertaining to this proposed reclassification of the alligator throughout its range, and proposed amendments to the special rule.

DATES: Comments from all interested parties must be received by August 1, 1986. Public hearing requests must be received by July 17, 1986.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Endangered Species Field Office, U.S. Fish and Wildlife Service, Jackson Mall Office Center, Suite 316, 300 Woodrow Wilson Avenue, Jackson, Mississippi 39213. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Dennis B. Jordan (See ADDRESSES section) (601/960-4900 or FTS 490-4900).

SUPPLEMENTARY INFORMATION:

Background

The American alligator (*Alligator mississippiensis*) is a large reptile that inhabits wetland areas in all or parts of the following States: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, and Texas. The alligator is a member of the Crocodilia, a group of reptiles that has remained relatively unchanged since it evolved some 180–200 million years ago (Murphy 1982). It is one of only two extant species (Chinese alligator and American alligator) of the genus *Alligator*, and it has significant scientific and commercial value. The American alligator's historic and present range are similar (Murphy 1982), although current populations are probably more disjunct due to habitat modification.

Management of alligators has improved markedly in recent years through the activities of Federal agencies, States, and private groups. Major contributions to the species recovery were made by the Florida Game and Fresh Water Fish Commission, the Louisiana Department of Wildlife and Fisheries, the North Carolina Wildlife Resource Commission, the South Carolina Department of Wildlife and Marine Resources, and the Texas Department of Parks and Wildlife. Many State and private institutions and organizations have also made significant contributions. Because of these activities, the American alligator is no longer biologically endangered or threatened.

The alligator was first classified as endangered throughout its range in 1967 due to concern over poorly regulated or unregulated harvests. Subsequently, the alligator recovered rapidly in many parts of its range due to response to Federal and State protection, enabling the Service to undertake the following reclassification actions: (1) Reclassification to threatened due to similarity of appearance in three coastal parishes of Louisiana, reflecting complete recovery (September 26, 1975—40 FR 44412); (2) reclassification to threatened, reflecting partial recovery in all of Florida and certain coastal areas of South Carolina, Georgia, Louisiana, and Texas (January 10, 1977–42 FR 2071); (3) reclassification to threatened due to similarity of appearance, reflecting complete recovery in nine additional parishes of Louisiana (June 25, 1979–44 FR 37130); (4) reclassification to threatened due to similarity of appearance in 52 parishes in Louisiana, reflecting complete recovery (August 10, 1981–46 FR 40664); (5) reclassification to threatened due to similarty of appearance in Texas, reflecting complete recovery (October 12, 1983–48 FR 46332); (6) reclassification to threatened due to similarity of appearance in Florida, reflecting complete recovery (June 20, 1985–50 FR 25672).

Presently, the species is classified as threatened due to similarity of appearance in Florida, Louisiana, and Texas. These three States contain the majority of American alligator habitat; approximately 12,000,000 acres (4,858,299 hectares) or 83 percent of the total for the species. Alligators are classified as threatened or endangered in Georgia and South Carolina, and endangered in Alabama, Arkansas, Mississippi, North Caolina, and Oklahoma.

The Service was petitioned by the State of South Carolina on July 27, 1984, to reclassify the American alligator in South Carolina, to a category of threatened due to similarity of appearance. Data submitted in support of the petition indicate that alligator populations in South Carolina are disjunct, but stable. Studies in Georgia (Ruckel 1984a, 1984b, and 1984c), North Carolina (Doerr 1983), Mississippi (Lewis 1984), and Alabama (Chabreck 1980, 1984) indicate similar population characteristics to those in South Carolina; populations are stable, disjunct, and limited to areas with suitable habitat. Comprehensive data are not available for Arkansas and Oklahoma, although population characteristics should be similar to peripheral populations in other States. These data, in addition to findings in Florida (46 FR 40664), Texas (42 FR 2071), and parts of Louisiana (44 FR 37130), indicate that the alligator is neither endangered nor likely to become endangered within the foreseeable future. Therefore, the Service proposes to reclassify populations currently listed as endangered or threatened, into the category of threatened due to similarity of appearance. This action would result in a rangewide designation of the American alligator as threatened due to similarity of appearance. Specifically, the change will affect the alligator's status in Alabama, Arkansas, Georgia, Mississippi, North Carolina, Oklahoma, and South Carolina, States which contain approximately 17 percent of the species' total habitat. This action

formally recognizes that the American alligator is no longer biologically threatened or endangered, but supports a need for continued Federal controls on taking and commerce to insure against excessive taking and to continue necessary protections to the American crocodile (*Crocodylus acutus*) in the U.S. and foreign countries, and other endangered crocodilians in foreign countries.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (50 CFR Part 424) set forth five factors to be used in determining whether to add, reclassify, or remove a species from the list of endangered and threatened species. These factors and their application to the American alligator (*Alligator mississippiensis*) in Arkansas, Alabama, Georgia, Mississippi, North Carolina, South Carolina, and Oklahoma are as follows:

A. The present or threatened destruction, modification, or curtailment of its habitant or range. Albemarle Sound in North Carolina is the approximate northern limit for alligators (Doerr 1983). From this point and south through the State of South Carolina, the principal habitat for the species is coastal marsh, with greatest densities in fresh marsh, brackish marsh, and natural and artificial impoundments. Of occupied habitats in Georgia, about 60 percent are coastal and inland marshes, with the remaining 40 percent in perennial swamps and reservoirs. Alligator habitat in Alabama and Mississippi is similar to that in Georgia, with large populations in marsh and swampland areas along the coast and disjunct populations located inland. Arkansas has a few peripheral populations in the south central part of the State associated with lakes and streams. Oklahoma has a few peripheral individuals located on the periphery of the Little River drainage in the southeastern part of the State.

Wetlands throughout the alligator's range have been reduced. Productive marsh habitats have been and continue to be lost due to a variety of causes, and residential development on and near wetlands increases the probability of conflict between humans and alligators. However, the Service believes that habitat losses are insignificant when compared to the total amount of alligator habitat. Overall, the alligator occupies some 14 million acres (5,668,016 hectares) of various wetland types. Previously cited references involving reclassification of the alligator indicate that habitat in Louisiana, Texas, and Florida will remain abundant in the foreseeable future. Furthermore, Federal and State agencies manage and protect large amounts of alligator habitat.

State agencies have applied different combinations of planning strategies which have improved the biological status of the alligator throughout a majority of suitable habitat in the Southeast. Some of these strategies have included (1) greater penalties for illegal harvest, (2) assigning personnel to handle nuisance complaints and to relocate problem alligators, (3) prohibiting harvest on state lands, (4) restricting and controlling harvest on state lands based on survey and population data, (5) purchasing and/or protecting wetland habitats, (6) educating private land owners on the economic and social benefits of maintaining and enhancing alligators and their habitats, and (7) continual monitoring and research of alligator populations.

B. Overutilization for commercial, recreational, scientific, or educational purposes. Overharvest due to commercial demand for alligator products was responsible for population declines in accessible habitats during the 1950's and 1960's. This problem was reserved primarily through a more effective protective mechanism brought about by the Lacey Act Amendment of 1969 which prohibited interstate commerce in illegally taken reptiles and their parts and products. This law provided Federal authority for dealing effectively with illegal activities in the market system. The endangered Species Act of 1973 added heavy penalties which further enhanced the control of illegal taking. Additionally, vigorous enforcement by State and Federal authorities has been effective in controlling the illegal taking of alligators. Because of these actions, the number of alligators generally increased during the late 1970's and 1980's (Table 1).

TABLE 1.—RESULTS OF SOUTHEASTERN COOPERATIVE ALLIGATOR SURVEY FOR ALABAMA, ARKANSAS, GEORGIA, MISSISSIPPI, AND SOUTH CAROLINA. DATA FROM CHABRECK (1984)

Year	Total alligators observed	Average number alligators seen/mile
1972	2,584	3.95
1973	1,492	3.59
1974	875	2.25
1975	1,308	3.48
1976	1,164	2.37

TABLE 1.—RESULTS OF SOUTHEASTERN COOPERATIVE ALLIGATOR SURVEY FOR ALABAMA, ARKANSAS, GEORGIA, MISSISSIPPI, AND SOUTH CAROLINA. DATA FROM, CHABRECK (1984)—Continued

Year	Total alligators observed	Average number alligators seen/mile
1977	1,130	4.29
1978	1,275	4.64
1979	2,356	8.75
1980	2,582	4.30
1981	3,361	8.63
1982	3,797	9.54

A comparison between 1972–1976 and 1977–82 of the average number of alligators observed per mile indicates a 210 percent increase (3.18 vs. 6.69, respectively).

Variation in results presented in Table 1 (e.g., drop in the average number of alligators seen/mile during one year after a steady increase) probably reflects behavioral responses of alligators (e.g., reduced activity) to environmental conditions rather than decreases in the number of alligators at a given site (see Woodward and Marion 1978, for factors affecting night counts).

The number of large (in excess of six feet) alligators also increased dramatically after 1977 (Table 2).

TABLE 2.—A COMPARISON OF LARGE ALLIGATORS/MILE BEFORE 1977 AND 1977–82. DATA FROM CHABRECK (1984)

State	1972–77	1977–82	Percent change
AL	.21	2.25	+1,000
AR	.36	.39	+.02
GA	.84	1.58	+88
MS	.29	.24	−24
SC	.12	1.98	+1,633

In addition to night surveys associated with the Southeastern Cooperative Alligator Survey, many additional night surveys have been conducted in North Carolina, South Carolina, and Georgia. Some nest surveys have also been done in South Carolina and Georgia. All of this work indicates stable or increasing alligator populations in these States. For example, Murphy and Coker (1983a and b) showed an overall increasing trend in South Carolina alligator populations from 1978 through 1983. Furthermore, data show healthy rates of nesting, hatching survival, and recruitment in South Carolina (Murphy and Wilkinson 1982), North Carolina (Doerr 1983), Georgia (Ruckel 1981a and 1984a), and Alabama (Chabreck 1980).

Since alligators will continue to be classified as threatened due to similarity of appearance, future taking for

BEST COPY AVAILABLE

whatever purpose will continue to be regulated by controls established in the Endangered Species Act. Further, the commercial harvest and taking of alligators is regulated by the Service's special rule on American alligators (50 CFR 17.42(a)).

Based on the combined experiences in sustained yield and nuisance control harvests in Louisiana, Florida, and Texas, methods are now available to design harvests so that alligator populations are not negatively affected (Taylor and Neal 1984).

C. Disease or predation. Like most wildlife, alligators are susceptible to various types of disease and predation, but these factors do not appear to threaten the species.

D. The inadequacy of existing regulatory mechanisms. Existing regulations governing take and commerce have successfully dealt with the original basis for listing the American alligator as endangered. The same framework of controls which now governs take and commerce in Florida, Louisiana, and Texas would operate in the remainder of the species' range, if this proposal is made final. The following laws and regulations deal specifically with taking, commerce, and export: (1) The 1969 Amendment to the Lacey Act, which extended enforcement authority to interstate movement of reptiles and their parts; (2) the Endangered Species Act of 1973 which authorizes the special rules for alligators classified as threatened due to similarity of appearance governs taking and commerce in alligators; (3) the annual findings of the Scientific and Management Authorities of the Service, which govern export of species, including the American alligator, which is listed on Appendix II of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES).

States may not authorize take of alligators or the commercial use of alligator parts except in accordance with conditions set forth in the special rule on American alligators (50 CFR 17.42(a)). Further, the annual findings of the Scientific and Management Authorities under CITES for export of Appendix II species are conditioned by a determination on a State's management and regulatory framework with regard to management and conservation of such species.

Although this reclassification would remove the American alligator from an endangered or threatened status, federally enforced laws and regulations would remain in place. These would require that any harvest options by States meet certain minimum conditions to insure against a recurrence of the original problem which prompted listing, i.e., excessive take.

E. Other natural or manmade factor affecting its continued existence. Although factors such as nest flooding or drought may affect alligators, none of these natural factors are known to limit populations on a large scale and they are not expected to pose a threat to the species in the future.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to reclassify the American alligator in the remainder of its range to threatened due to similarity of appearance. Criteria for reclassification of a threatened or endangered species are found at 50 CFR 424.11(d). They include extinction, recovery of the species, and original data for classification in error. This proposal is based upon evidence that the species is not biologically threatened.

Similarity of Appearance

Section 4(e) of the Endangered Species Act authorizes the treatment of a species as an endangered or threatened species even though it is not otherwise listed as endangered or threatened, if it is found: (a) that the species so closely resembles in appearance an endangered or threatened species that enforcement personnel would have substantial difficulty in differentiating between listed and unlisted species; (b) that the effect of this substantial difficulty is an additional threat to the endangered or threatened species; and (c) that such treatment of an unlisted species will substantially facilitate the enforcement and further the policy of the Act.

Although biologists can readily distinguish live alligators from other crocodilians that are listed under the Act, enforcement personnel could have considerable difficulty in make correct species identification, which could hamper enforcement efforts. In addition, small parts and products of processed crocodilian leather are nearly impossible to distinguish when made into goods, thus hampering the identification of legal alligator products from those of endangered or threatened crocodilians. Problems with identification could increase illegal trade in endangered crocodilian products, further jeopardizing these species.

By listing the American alligator under the similarity of appearance provisions of the Act, coupled with the special rules for American alligators as specified in § 17.42, the Service believes that enforcement problems can be minimized while at the same time the conservation of listed populations of crocodilians can be ensured. The similarity of appearance provisions of the Act have proven effective in Florida, Louisiana, and Texas.

Critical Habitat

Critical habitat for the American alligator was not designated at the time of listing and has not been since designated. Therefore, this proposed rule, if finalized, will have no effect on critical habitat for this species.

Effects of Rule

This proposal, if made final, would change the alligator throughout the remainder of its range from its current status of endangered or threatened to a status of threatened due to similarity of appearance. It would be a formal recognition by the Service that the American alligator is biologically secure throughout its range. A final rule would result in removal of Federal agency responsibilities under Section 7 of the Endangered Species Act.

No significant adverse effects on the status of the species are expected to occur from this removal.

A final rule from this proposal would make available to States the option of expanding harvests of alligators to additional areas. If a State elects to expand its harvests, these harvests could be expected to increase at a level commensurate with development and implementation of the State research and management program. All taking and commerce in alligators and their parts and products would be regulated by the Service's special rule on American alligators (50 CFR 17.42(a)), as well as other applicable controls such as the Lacey Act (18 U.S.C. 42), which prohibits interstate commerce in illegally taken wildlife or their products.

Increased harvest of alligators would be expected to result in an increased volume of alligator exports, although the magnitude of this increase cannot be predicted at this time. The Service has previously expressed its concern about the effects of increased exports on other endangered crocodilians found in international trade. International trade in alligator products is presently subject to the restrictions of CITES, the Service's implementing regulations (50 CFR Part 23) and general wildlife exportation requirements (50 CFR Part 14). Previous determinations by the Service's Scientific and Management

Authorities have concluded that export of alligators taken in Louisiana and Florida would not be detrimental to the survival of the alligator or other endangered crocodilians. The Service would continue to review any possible impact and would take appropriate action if evidence indicates that restrictions are warranted. This proposed action, if completed, would not be an irreversible commitment on the part of the Service. The action is reversible and relisting is possible if the status of the species changes or if States materially change their plans or actions in a way that may threaten the species. The Service would continue to monitor and review the States' management programs.

Public Comments Solicited

The Service intends that any final rule adopted be as accurate and effective as possible. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, private interests, or any other interested party concerning any aspect of this proposed rule and proposed ammendments to the special rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial, or other relevant data concerning any threat (or lack thereof) to the American alligator; and

(2) Additional information concerning the range and distribution of this species.

Final promulgation of regulations on the American alligator throughout the remainder of its range will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of the proposal. Such requests should be made in writing and addressed to the Service's Jackson Endangered Species Field Station (see **ADDRESSES** section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined by the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to Section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Regulation Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, as set forth below:

1. The authority citation for Part 17 continues to read as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531 *et seq.*).

2. It is proposed to amend § 17.11(h) by revising listing of the American alligator under "Reptiles" in the List of Endangered and Threatened Wildlife as follows:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Species: Common name	Species: Scientific name	Historic range	Vertebrate population: population where endangered or threatened	Status	When listed	Critical habitat	Special rules
Reptiles							
Alligator, American	*Alligator mississippiensis*	Southeastern U.S.A.	Wherever found (in wild or captivity)	T(S/A)	1,11,20 47,51,80 113,134	NA	17.42(a)

3. Revise § 17.42(a)(1) definitions to read as follows:

§ 17.42 Special rules—reptiles.

(a) * * *

(1) *Definitions. For purposes of this paragraph (a):*

"American alligator" shall mean any member of the species *Alligator mississippiensis*, whether alive or dead, and any part, product, egg, or offspring thereof wherever found in captivity or the wild.

"Buyer" shall mean a person engaged in buying a raw, green, salted, crusted or otherwise untanned hide of an American alligator, its meat, meat products, and skeleton (including teeth, claws and skulls).

"Tanner" shall mean a person engaged in processing a raw, green, salted, or crusted hide of an American alligator into leather.

* * * * *

4. Revise § 1742(a)(2)(i)(A)(4) to read as follows:

§ 17.42 Special rules-reptiles.

(a) * * *

(2) * * *

(i) * * *

(A) * * *

(4) Remove a specimen which constitutes a demonstrable but non-immediate threat to human safety. The taking must be done in a humane manner, and may involve killing or injuring only if it has not been reasonably possible to eliminate such threat by live-capturing and releasing the specimen unharmed in a remote area.

* * * * *

5. Revise § 17.42(a)(1)(iv)(A) to read as follows:

§ 17.42 Special rules-reptiles.

(a) * * *

(2) * * *

(iv) * * *

(A) A fully tanned hide which bears the noncorrodible, service-approved serially numbered tag attached by the State where the taking occurs and a manufactured product of a lawfully taken American alligator may be delivered, received, carried, transported, or shipped in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity, and may be sold or offered for sale in interstate or foreign commerce.

* * * * *

6. Remove § 17.42(a)(3)(ii).

7. Redesignate § 17.42(a)(3)(iii) as § 17.42(a)(3)(ii).

8. In new § 17.42(a)(3)(ii), revise § 17.42(a)(3)(ii)(A)(*2*)(*vi*) to read as follows:

§ 17.42 Special rules—reptiles.

(a) * * *

(3) * * *

(ii) * * *

(A) * * *

(*2*) * * *

(*vi*) The location where inventories of American alligator hides, meat, meat products, skeletal parts (including claws, teeth, and skulls), and hides, meat, or skeletal parts of any other species of the Order Crocodilia will be stored, and

* * * * *

9. In new § 17.42(a)(3)(ii), revise § 17.42(a)(3)(ii)(A)(*3*) to read as follows:

§ 17.42 Special rules—reptiles.

(a) * * *

(3) * * *

(ii) * * *

(A) * * *

(*3*) A description, including samples, of the applicant's present or proposed system of inventory control and bookeeping capable of insuring accurate accounting for the following items:

(*i*) All American alligator hides, meat, meat products, skeletal parts (including claws, teeth, and skulls), and

(*ii*) All hides, meat, meat products, skeletal parts (including claws, teeth, and skulls) of any other species of the Order Crocodilia;

* * * * *

10. In new § 17.42(a)(3)(ii), revise § 17.42(a)(3)(ii)(C)(*1*) and (a)(3)(ii)(C)(*2*) to read as follows:

§ 17.42 Special rules—reptiles.

(a) * * *

(3) * * *

(ii) * * *

(C) * * *

(*1*) A permittee may not buy American alligator hides, meat, meat products, skeletal parts (including claws, teeth, and skulls), process meat or skeletal parts, or tan any American alligator hide except one which was imported, exported, taken, sold, offered for sale, delivered, carried, transported, or shipped in accordance with paragraph (a)(2) of this section;

(*2*) A permittee may sell, offer for sale, deliver, carry, transport, or ship a raw, green, salted, or otherwise untanned American alligator hide or bulk American alligator meat, or unfinished skeletal parts (including claws, teeth, and skulls) only to a holder of a valid Federal permit issued under paragraph (a)(3)(ii) of this section;

* * * * *

11. In new § 17.42(a)(3)(ii), revise § 17.42(a)(3)(ii)(C)(*5*) and (a)(3)(ii)(C)(*6*) to read as follows:

§ 17.42 Special rules-reptiles.

(a) * * *

(3) * * *

(ii) * * *

(C) * * *

(*5*) A permittee must file a written report in English with the Director by March 31 of each year concerning all transactions during the preceding calendar year ending December 31 involving American alligators and other species of the Order Crocodilia listed as "Appendix I" in § 23.23 of this chapter. This report shall include the pounds of meat, the number of hides, parts (including skeletal parts of claws, teeth, and skulls), and products by species, the supplier's name and address, and the

country where taken from the wild, if known.

(6) A permittee may not transport or ship any American alligator hide unless legally tagged in accordance with § 17.42(a)(2)(i)(C), or transport or ship any American alligator meat, meat product, skeletal parts (including claws, teeth, and skulls) unless in compliance with the conditions of § 17.42(a)(2)(i)(C)(2) and (4).

Dated: May 6, 1986.

Susan Recce,

Acting Assistant Secretary for Fish and Wildlife and Parks.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

Cotton Storage Agreement Contract Fees

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of 1986–87 Contract Year Fees.

SUMMARY: The purpose of this notice is to publish the 1986–87 contract fees to be paid to Commodity Credit Corporation by certain warehousemen requesting renewal of an existing Cotton Storage Agreement (CSA) or requesting initial approval of a CSA in accordance with the regulations governing the Standards for Approval of Warehouses for Cotton or Cotton Linters (7 CFR 1427.1081 *et seq.*). The fees will partially defray the costs of examinations of cotton warehouses operated by such warehousemen who do not have a Federal warehouse license or State warehouse license issued by a State having a cooperative agreement with CCC for warehouse examination services.

EFFECTIVE DATE: July 1, 1986.

FOR FURTHER INFORMATION CONTACT: Steven Closson, Chief, Storage Contract Branch, Warehouse Division, ASCS, USDA, Room 5768—South Building, P.O. Box 2415, Washington, DC 20013, (202) 447–5847.

SUPPLEMENTARY INFORMATION: This final notice has been reviewed in conformity with Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "not major." This action has been classified "not major" since implementation of this notice will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local governments, or geographical regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, the environment, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is required.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice.

The Commodity Credit Corporation Charter Act (15 U.S.C. 714) authorizes CCC to conduct various activities to stabilize, support, and protect farm income prices. CCC is authorized to carry out such activities as making price supports available with respect to various agricultural commodities, removing and disposing of surplus agricultural commodities, exporting or aiding in the exporation of agricultural commodities, and procuring agricultural commodities for sale both in the domestic market and abroad.

Section 4(h) of the CCC Charter Act provides that CCC shall not acquire real property in order to provide storage facilities for agricultural commodities unless CCC determines that private facilities for the storage of such commodities are inadequate. Further, Section 5 of the CCC Charter Act provides that, in carrying out the CCC's purchasing and selling operations, and in the warehousing, transporting, processing, or handling of agricultural commodities, CCC is directed to use, to the maximum extent practicable, the usual and customary channels, facilities, and arrangements of trade and commerce. Pursuant to these provisions, CCC enters into CSAs with private warehousemen which provide for the storage of commodities owned by CCC or pledged as security to CCC for a price support loan.

CCC examines all warehouses which are the subject of a CSA, or for which a warehouseman has requested approval for a new CSA, to determine whether the warehouseman is complying with the terms and conditions of the CSA and the standards for approval or has the ability to do so.

The regulations at 7 CFR 1427.1088 provide that each warehouseman who does not have a Federal warehouse license or State warehouse license issued by a State having a cooperative agreement with CCC for warehouse examination service must pay a contract fee to CCC for each such warehouse for which the warehouseman requests renewal of an existing CSA or approval of a new CSA. The regulation also provides that the amount of the contract fee shall be determined and announced annually in the Federal Register. The contract fee is designed to reimburse CCC for approximately 50 percent of the cost of the warehouse examinations.

Contract fees were not charged for the 1985–86 contract year since appropriated funds were made available for that purpose.

The purpose of this notice is to announce the schedule of contract fees for the 1986–87 contract year.

In determining the fees, CCC considered the following factors:

(1) The fixed cost associated with conducting examinations;

(2) The cost of counting bales that are actually in the warehouse at the time of examination;

(3) Whether the volume of cotton handled at the warehouse shoud be taken into consideration in the establishment of the fee;

(4) Whether the fee should be based on the time spent by the inspector at each warehouse; and

(5) Whether the fee would adversely affect the domestic and export price for marketing cotton.

After a review of these factors, it was determined that the fee should be based only upon fixed costs associated with examinations and upon an estimate as to the costs incurred by CCC in counting bales during an examination. It is determined that the volume of cotton handled at the warehouse does not have a major effect on the amount of time an examiner spends completing an examination. CCC also determined that

the fee should not be based upon the time spent by an examiner in a particular warehouse, because such a calculation might discourage examiners from taking whatever time is necessary to conduct a complete examination. Finally, it was determined that the fee is not large enough to have any adverse effects on the domestic and export prices for marketing cotton.

The fees for the 1986–87 contract year shall be determined as follows:

(1) A fee of $100 for each warehouse examined to help offset certain fixed costs associated with examinations which do not tend to vary according to storage activity, such as travel and staff hours devoted to discussions with warehouse personnel concerning general warehouse procedures; and

(2) A charge of ¾ cent times the average number of bales in storage in the warehouse at the end of each month during the 12 months of the calendar year preceding assessment of the fee to partially offset the cost of the counting of bales that actually are in the warehouse at the time of the examination.

A fee of 10 cents per bale will also be charged a warehouseman whenever CCC conducts a tag check of the warehouse. The tag check is not a part of the standard warehouse examination. Tag checks are conducted by CCC whenever the examiner's bale count is not within ½ of 1% of the total number of bales which should be in the warehouse as determined by outstanding warehouse receipts and all other storage and non-storage obligations or whenever CCC determines that other conditions at the warehouse indicate that a tag check may be necessary. If the tag check reveals that the examiner's original bale count was in error, the inventory and storage obligations are in balance, and the erroneous count was not due to stacking or housekeeping problems which prevented an accurate count, CCC will not access the 10 cents per bale tag check fee.

Accordingly, the following fees will be applicable for the 1986–87 contract year.

Determination

A. There shall be charged and collected from warehousemen who do not have a Federal warehouse license or a State warehouse license issued by a State having a cooperative agreement with CCC for warehouse examination services for each cotton warehouse for which the warehouseman requests the renewal of an existing CSA or approval of a new CSA, a contract fee, equal to the total of:

1. A charge of $100 plus

2. A charge of ¾ cent times the average number of bales in storage in the warehouse during the preceding calendar year (computed from month-end inventories).

This fee shall be assessed in advance of the annual contract renewal date or, in the case of a warehouseman who is seeking approval of a new CSA, prior to the time that the CSA is approved by CCC. Failure of a warehouseman to pay such fee at that time shall be grounds for termination of a CSA or for rejection of approval of a new CSA.

B. If CCC determines that a tag check of the bales stored in an approved warehouse is warranted, CCC will charge the warehouseman an additional tag check fee of 10 cents per bale checked. A tag check shall be deemed to be warranted whenever the examiner's bale count is not within ½ of 1 percent of the total number of bales which should be in the warehouse, as indicated by outstanding warehouse receipts and all other storage and non-storage obligations or whenever CCC determines that other conditions at the warehouse indicate that a tab check may be necessary. If the tag check reveals that the examiner's original bale count was in error (which error was not caused by stacking or housekeeping deficiencies which prevented an accurate count) and the warehouseman does have sufficient cotton in storage to cover all storage and nonstorage obligations, the 10 cents per bale charge will not be assessed.

Signed at Washington, DC on May 27, 1986.

Milton J. Hertz,

Acting Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410–05–M

Uniform Grain and Rice Storage Agreement Contract Fees

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of 1986–87 Contract Year Fees.

SUMMARY: The purpose of this notice is to publish a schedule of 1986–87 contract fees to be paid to Commodity Credit Corporation (CCC) by certain grain and rice warehousemen requesting renewal of an existing storage agreement or requesting initial approval of a storage agreement in accordance with the regulations governing the Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed (7 CFR 1421.5551 *et seq.*). The fees are charged by CCC to defray the costs of examination of warehouses operated by such warehousemen who do not have a Federal warehouse license or State warehouse license issued by a State having a cooperative agreement with CCC for warehouse examination services.

EFFECTIVE DATE: July 1, 1986.

FOR FURTHER INFORMATION CONTACT: Steven Closson, Chief, Storage Contract Branch, Warehouse Division, ASCS, USDA, Room 5768—South Building, P.O. Box 2415, Washington, DC 20013, (202) 447–5647.

SUPPLEMENTARY INFORMATION: This notice has been reviewed in conformity with Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "not major." This action has been classified "not major" since implementation will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, the environment or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is required.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice.

The Commodity Credit Corporation Charter Act (15 U.S.C. 714) provides authority for CCC to conduct a number of operations to stabilize, support, and protect farm income and prices. CCC is authorized to carry out such activities as making price support available with respect to various agricultural commodities, removing and disposing of surplus agricultural commodities, exporting or aiding in the exportation of agricultural commodities, and procuring

agricultural commodities for sale both in the domestic market and abroad.

Section 4(h) of the CCC Charter Act provides that CCC shall not acquire real property in order to provide storage facilities for agricultural commodities unless CCC determines that private facilities for the storage of such commodities are inadequate. Further, Section 5 of the CCC Charter Act provides that in carrying out CCC's purchasing and selling operations, and in the warehousing, transporting, or handling of agricultural commodities, CCC is directed to use, to the maximum extent practicable, the usual and customary channels, facilities, and arrangement of trade and commerce.

Pursuant to these provisions, CCC enters into storage agreements with private grain and rice warehousemen which provide for the storage of commodities owned by CCC or pledged as security to CCC for price support loans. CCC examines all grain and rice warehouses which are the subject of a storage agreement, or for which a warehouseman has requested approval of a new storage agreement, to determine whether the warehouseman is complying with the terms and conditions of the storage agreement and the standards of approval or has the ability to do so.

The regulations found at 7 CFR 1421.5558 provide that each warehouseman who has a non-federally licensed grain or rice warehouse in States that do not have a cooperative agreement with CCC for warehouse examinations must pay an annual contract fee to CCC for each such warehouse which is approved by CCC or for which CCC approval is sought. A grain or rice warehouseman who has entered into a storage agreement with CCC must pay the annual contract fee in advance of the renewal date of the agreement. A grain or rice warehouseman who is seeking to enter into a storage agreement with CCC must pay the annual contract fee for each warehouse for which CCC approval is sought prior to the time that the agreement is approved by CCC. Section 1421.5558 also provides that the amount of the contract fee shall be determined and announced annually in the Federal Register. The contract fee is designed to reimburse CCC for approximately 50 percent of the cost of the warehouse examinations.

A review of the 1985–86 contract fees indicates that they generated sufficient revenues to cover approximately 50 percent of the cost of the warehouse examinations for the 1985–86 contract year. Projections of program costs for the 1986–87 contract year indicate that CCC's expenditures for the examination of grain and rice warehouses should remain relatively stable. Accordingly, the fees for the 1986–87 contract year are unchanged from those fees which were applicable to the 1985–86 contract year.

Accordingly, the following schedule of fees and method of determining such fees will be applicable for the 1986–87 contract year.

Determination

The fees set forth in the following schedule will be collected for the 1986–87 contract year by the Commodity Credit Corporation (CCC) from warehousemen who have entered into a Uniform Rice Storage Agreement (URSA) or a Uniform Grain Storage Agreement (UGSA) with CCC or who are seeking to enter into a URSA or UGSA with CCC but who do not have a Federal warehouse license or a State warehouse license issued by a State having a cooperative agreement with CCC for warehouse examination services.

TWELVE MONTH CONTRACT FEE SCHEDULE

Location capacity (bushels)	Contract fees (dollars)
1 to 150,000	$100
150,001 to 250,000	200
250,001 to 500,000	300
500,001 to 750,000	400
750,001 to 1,000,000	500
1,000,001 to 1,200,000	600
1,200,001 to 1,500,000	700
1,500,001 to 2,000,000	800
2,000,001 to 2,500,000	900
2,500,001 to 5,000,000	1,000
5,000,001 to 7,500,000	1,100
7,500,001 to 10,000,000	1,200
10,000,001 +	$1,200 plus $30 per million bushels of capacity above 10 million or fraction thereof.

The location capacity of the warehouse shall be determined by the Secretary of Agriculture and shall be the capacity of a fully functional facility operated as a public warehouse or functional unit of a group of warehouses usually within the same town or freight tariff point. A functional facility is one which could operate independently if it was separated from other facilities that may be included in a merged warehouse code. Any outlying unit which is not a fully functional facility would have its capacity included as part of the combined capacity of the nearest fully functional operating location.

The contract fee shall be the sum total of the fees for all functional units within the warehouse code and shall be assessed and must be paid in advance of the annual contract renewal date or, in the case of a warehouseman who is seeking approval of a new URSA or UGSA, prior to the time that the agreement is approved by CCC. The failure of a warehouseman to pay such fee at that time shall be grounds for termination of an existing URSA or UGSA or for rejection of approval of a new URSA and UGSA.

Signed at Washington, DC on May 27, 1986.

Milton J. Hertz,

Acting Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

Federal Grain Inspection Service

Designation Renewal of Erie Grain Inspection Service (OH)

AGENCY: Federal Grain Inspection Service (FGIS), USDA.

ACTION: Notice.

SUMMARY: This notice announces the designation renewal of Erie Grain Inspection Service (Erie) as an official agency responsible for providing official services under the U.S. Grain Standards Act, as Amended (Act).

EFFECTIVE DATE: July 1, 1986.

ADDRESS: James R. Conrad, Chief, Review Branch, Compliance Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Room 1647 South Building, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447–8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not be to a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

FGIS announced that Erie's designation terminates on June 30, 1986, and requested applications for official agency designation to provide official services within a specified geographic area in the December 27, 1985, Federal Register (50 FR 52975), and as corrected, January 6, 1986 (51 FR 421). Applications were to be postmarked by January 27, 1986. Erie was the only applicant for its designation and applied for designation renewal in the area currently assigned to that agency.

FGIS announced the applicant name and requested comments on the same in the March 3, 1986, Federal Register (51 FR 7301). Comments were to be postmarked by April 17, 1986. No

comments were received regarding Erie's designation renewal.

FGIS evaluated all available information regarding the designation criteria in Section 7(f)(1)(A) of the Act, and in accordance with Section 7(f)(1)(B), determined that Erie is able to provide official services in the geographic area for which FGIS is renewing its designation. Effective July 1, 1986, and terminating June 30, 1989, Erie will provide official inspection services in its specified geographic areas, which is the entire area previously described in the December 27 Federal Register.

A specified service point, for the purpose of this notice, is a city, town, or other location specified by an agency for the performance of official inspection or Class X or Class Y weighing services and where the agency and one or more of its inspectors or weighers is located. In addition to the specified service points within the assigned geographic area, an agency will provide offical services not requiring an inspector or weigher to all locations within its geographic area.

Interested persons may contact the Review Branch, specified in the address section of this notices, to obtain a list of an agency's specified service points. Interested persons also may obtain a list of the specified service points by contacting the agency at the following address:

Erie Grain Inspection Service, 301 North Street, P.O. Box 98, Bellevue, OH 44811.

(Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*))

Dated: May 19, 1986.

J.T. Abshier,

Director, Compliance Division.

BILLING CODE 3410-EN-M

Request for Comments on Designation Applicants in the Geographic Area Currently Assigned to Fostoria Grain Inspection (OH), Louisiana Department of Agriculture (LA), and North Carolina Department of Agriculture (NC)

AGENCY: Federal Grain Inspection Service (FGIS), USDA.

ACTION: Notice.

SUMMARY: This notice requests comments from interested parties on the applicants for official agency designation in the geographic area currently assigned to Fostoria Grain Inspection (Fostoria), Louisiana Department of Agriculture (Louisiana), and North Carolina Department of Agriculture (North Carolina).

DATE: Comments to be postmarked on or before July 17, 1986.

ADDRESS: Comments must be submitted, in writing, to Lewis Lebakken, Jr., Information Resources Staff, Resources Management Division, Federal Grain Inspection Service, U.S. Department of Agriculture, Room 1661 South Building, 1400 Independence Avenue, SW., Washington, DC 20250. All comments received will be made available for public inspection at the above address during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., telephone (202) 382-1738.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

FGIS requested applications for official agency designation to provide official services within specified geographic areas in the April 1, 1986, Federal Register (51 FR 11084), and as corrected, April 9, 1986 (51 FR 12188). Applications were to be postmarked by May 1, 1986. Fostoria, Louisiana, and North Carolina were the only applicants for their respective designations and applied for designation renewal in the area currently assigned to those agencies.

This notice provides interested persons the opportunity to present their comments concerning the designation applicants. All comments must be submitted to the Information Resources Staff, Resources Management Division, specified in the address section of this notice.

Comments and other available information will be considered in making a final decision. Notice of the final decision will be published in the Federal Register, and the applicants will be informed of the decision in writing.

(Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

Dated: May 19, 1986.

BILLING CODE 3410-EN-M

Request for Designation Applicants To Provide Official Services in the Geographic Area Currently Assigned to Amarillo Grain Exchange, Inc. (TX), and Wisconsin Department of Agriculture, Trade and Consumer Protection (WI)

AGENCY: Federal Grain Inspection Service (FGIS), USDA.

ACTION: Notice.

SUMMARY: Pursuant to the provisions of the U.S. Grain Standards Act, as Amended (Act), official agency designations shall terminate not later than triennially and may be renewed according to the criteria and procedures prescribed in the Act. This notice announces that the designation of two agencies will terminate, in accordance with the Act, and requests applications from parties, including the agencies currently designated, interested in being designated as the official agency to provide official services in the geographic area currently assigned to the specified agencies. The official agencies are Amarillo Grain Exchange, Inc., and Wisconsin Department of Agriculture, Trade and Consumer Protection.

DATE: Applications to be postmarked on or before July 2, 1986.

ADDRESS: Applications must be submitted to James R. Conrad, Chief, Review Branch, Compliance Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Room 1647 South Building, Washington, DC 20250. All applications received will be made available for public inspection at the above address during regular business hours.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447-8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

Section 7(f)(1) of the Act specifies that the Administrator of FGIS is authorized, upon application by any qualified agency or person, to designate such agency or person to provide official services after a determination is made that the applicant is better able than any other applicant to provide official services in an assigned geographic area.

Amarillo Grain Exchange, Inc. (Amarillo), 1300 South Johnson Street,

Amarillo, TX 79101, was designated under the Act as an official agency to provide inspection functions on December 1, 1983. Wisconsin Department of Agriculture, Trade and Consumer Protection [Wisconsin], 801 West Badger Road, Madison, WI 53713, was designated on that date to provide inspection and weighing functions.

Each official agency's designation terminates on November 30, 1986. Section 7(g)(1) of the Act states that official agencies' designations shall terminate not later than triennially and may be renewed according to the criteria and procedures prescribed in the Act.

The geographic area presently assigned to Amarillo, in the States of Oklahoma and Texas, pursuant to Section 7(f)(2) of the Act, which may be assigned to the applicant selected for designation, is as follows:

The area in Texas is the following:

Bounded on the North by the Texas-Oklahoma State line;

Bounded on the East by the eastern Red River County line; the southern Red River and Lamar County lines; the eastern, southern, and western Hunt County lines; the southern Collin County line; the eastern Dallas, Ellis, Hill, Limestone, Falls, and Milam County lines;

Bounded on the South by the southern Williamson County line; the western Bell and McLennan County lines; the southern Bosque; Hamilton, Comanche, and Brown County lines; the southern and western Coleman County line; the southern Taylor, Nolan, Mitchell, Howard, Martin, and Andrews County lines;

Bounded on the West by the western Andrews; Gaines, Yoakum, and Cochran County lines; the northern Cochran County line; the northern Hockley County line east to FM 303; FM 303 north to U.S Route 84; U.S. Route 84 (including Sudan), southeast to FM 37; FM 37 east to FM 179; FM 179 north to FM 1914; FM 1914 east (not including Hale Center), to FM 400; FM 400 south to FM 37; FM east to the Hale County line; the eastern Hale County line; the northern Crosby and Dickens County lines; the western Cottle and Childress County lines north to U.S. Route 287; U.S. Route 287 northwest to Donley County; the southern Donley and Armstrong County lines west to Prairie Dog Town Fork of the Red River; Prairie Dog Town Fork of the Red River northwest to State Route 217; State Route 217 west to FM 1062; FM 1062 west to U.S. Route 385; U.S. Route 385 north to Oldham County; the southern Oldham County line; the western Oldham, Hartley, and Dallam County lines.

In addition, the area icludes El Paso County.

The area in Oklahoma is the following: Beaver, Cimarron, and Texas Counties.

The geographic area presently assigned to Wisconsin, pursuant to Section 7(f)(2) of the Act, and which is the area that may be assigned to the applicant selected for designation, is the entire State of Wisconsin, except those export port locations within the State.

Interested parties, including Amarillo and Wisconsin, are hereby given opportunity to apply for official agency designation to provide the official services in each geographic area, as specific above, under the provisions of Section 7(f) of the Act and section 800.196(d) of the regulations issued thereunder. Designation in each specified geographic area is for the period beginning December 1, 1986, and ending November 30, 1989. Parties wishing to apply for designation should contact the Review Branch, Compliance, Division, at the address listed above for forms and information.

Applications and other available information will be considered in determining which applicant will be designated to provide official services in a geographic area.

(Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

Dated: May 19, 1986.

BILLING CODE 3410-EN-M

Designation of Enid Grain Inspection Company, Inc. (OK)

AGENCY: Federal Grain Inspection Service (FGIS), USDA.

ACTION: Notice.

SUMMARY: This notice announces the designation of Enid Grain Inspection Company, Inc., as an official agency responsible for providing official services under the U.S. Grain Standards Act, as Amended (Act).

EFFECTIVE DATE: July 1, 1986.

ADDRESS: James R. Conrad, Chief, Review Branch, Compliance Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Room 1647 South Building, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447-8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

FGIS announced that Enid Grain Inspection Company, Inc., requested cancellation of its designation on January 1, 1986, and requested applications for official agency designation to provide official services within a specified geographic area in the December 27, 1985, Federal Register (50 FR 52975), and as corrected, January 6, 1986 (51 FR 421). Applications were to be postmarked by January 27, 1986. Barry L. Hibbets, Enid, Oklahoma, who proposed to continue the business as Enid Grain Inspection Company, Inc. (Hibbets), was the only applicant for designation; he applied for the entire area available for assignment. Hibets has been providing official inspection service in the area on an interim basis since January 1, 1986.

FGIS announced the applicant name and requested comments on the same in the March 3, 1986, Federal Register (51 FR 7302). Comments were to be postmarked by April 17, 1986. Two favorable comments were received regarding the designation of Hibbets in the available geographic area.

FGI evaluated all available information regarding the designation criteria in section 7(f)(1)(A) of the Act, and in accordance with Section 7(f)(1)(B), determined that Hibbets is able to provide official services in the geographic area for which FGIS is designating it. Effective July 1, 1986, and terminating June 30, 1989, Hibbets will provide official inspection services in the specific geographic area, which is the entire area previously described in the December 27 Federal Register.

A specified service point, for the purpose of this notice, is a city, town, or other location specified by an agency for the performance of official inspection or Class X or Class Y weighing services ands where the agency and one or more of its inspectors or weighers is located. In addition to the specified service points within the assigned geographic area, an agency will provide official services not requiring an inspector or weigher to all locations within its geographic area.

Interested persons may contact the Review Branch, specified in the address section of this notice, to obtain a list of an agency's specified service points. Interested persons also may obtain a list of the specified service points by

contacting the agency at the following address:

Enid Grain Inspection Company, Inc., 2205 N. 10th Street, P.O. Box 229, Enid, OK 73701.

(Pub. L. 94–582, 90 Stat. 2867, as amended (7 U.S.C. *et seq.*))

Dated: May 19, 1986

BILLING CODE 3410-EN-M

Request for Comments on Designation Applicants in the Battle Creek, Michigan, Geographic Area (MI)

AGENCY: Federal Grain Inspection Service (FGIS), USDA.

ACTION: Notice.

SUMMARY: This notice requests comments from interested parties on the applicants for official agency designation in the Battle Creek, Michigan, geographic area.

DATE: Comments to be postmarked on or before July 12, 1986.

ADDRESS: Comments must be submitted, in writing, to Lewis Lebakken, Jr., Information Resources Staff, Resources Management Division, Federal Grain Inspection Service, U.S. Department of Agriculture, Room 1661 South Building, 1400 Independence Avenue, SW., Washington, DC 20250. All comments received will be made available for public inspection at the above address during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., telephone (202) 382–1738.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

FGIS announced that the designation of Grain Inspection Services, Inc., Battle Creek, Michigan, would not be renewed on May 1, 1986, and requested applications for official agency designation to provide official services within a specified geographic area in the April 1, 1986, Federal Register (51 FR 11083). Applications were to be postmarked by May 1, 1986. There were five applicants for the available geographic area, as follows:

1. East Indiana Grain Inspection, Inc., Muncie, Indiana, which applied only for the following County in Ohio: Williams.

2. Erie Grain Inspection Service, Bellevue, Ohio, which applied for the entire geographic area available for assignment.

3. Lima Grain Inspection Service, Inc., Lima, Ohio, which applied only for the following County in Ohio: Williams.

4. Michigan Grain Inspection Services, Reese, Michigan, which applied for the entire geographic area available for assignment.

5. Schneider Inspection Service, Inc., Lowell, Indiana, which applied only for the following Counties in Michigan: Berrien, Cass, St. Joseph, Branch, and Hillsdale.

This notice provides interested persons the opportunity to present their comments concerning the designation applicants. All comments must be submitted to the Information Resources Staff, Resources Management Division, specified in the address section of this notice.

Comments and other available information will be considered in making a final decision. Notice of the final decision will be published in the Federal Register, and the applicants will be informed of the decision in writing.

Persons or firms located in this geographic area requiring official inspection service should contact the FGIS Saginaw Field Office at (517) 753–2482 to obtain such service until such time as an applicant is designated to perform official services.

(Pub. L. 94–582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

Dated: May 19, 1986.

BILLING CODE 3410-EN-M

Request for Comments on Designation Applicants in the Ft. Smith-Van Buren, AR, Geographic Area (AR)

AGENCY: Federal Grain Inspection Service (FGIS), USDA.

ACTION: Notice.

SUMMARY: This notice requests comments from interested parties on the applicants for official agency designation in the Ft. Smith-Van Buren, Arkansas, Geographic area.

DATE: Comments to be postmarked on or before June 17, 1986.

ADDRESS: Comments must be submitted, in writing, to Lewis Lebakken, Jr., Information Resources Staff, Resources Management Division, Federal Grain Inspection Service, U.S. Department of Agriculture, Room 1661 South Building, 1400 Independence Avenue, SW., Washington, DC 20250. All comments received will be made available for public inspection at the above address during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., telephone (202) 382–1738.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

FGIS announced the cancellation of designation of Ft. Smith-Van Buren Grain Inspection Service, effective April 17, 1986, and requested applications for official agency designation to provide official services within a specified geographic area in the April 1, 1986, Federal Register (51 FR 11086). Applications were to be postmarked by May 1, 1986. There were two applicants for the available geographic area, as follows: 1. Enid Grain Inspection Company, Inc., Enid, Oklahoma; and 2. Little Rock Grain Exchange Trust, Little Rock, Arkansas. Both applicants applied for the entire geographic area available for assignment.

This notice provides interested persons the opportunity to present their comments concerning the designation applicants. All comments must be submitted to the Information Resources Staff, Resources Management Division, specified in the address section of this notice.

Comments and other available information will be considered in making a final decision. Notice of the final decision will be published in the Federal Register, and the applicants will be informed of the decision in writing.

Persons or firms located in this geographic area requiring official inspection service should contact the FGIS Stuttgart Field Office at (501) 673–2508 to obtain such service until such time as an applicant is designated to perform official services.

BILLING CODE 3410-EN-M

DEPARTMENT OF AGRICULTURE

Forest Service

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

National Forest Land and Resource Management Planning and Public Land and Resources; Planning, Programming, and Budgeting

AGENCIES: Forest Service, USDA and Bureau of Land Management, Interior.

ACTION: Joint notification of land and resource management planning schedules.

SUMMARY: Land and resource management plans of the Forest Service and the Bureau of Land Management frequently cover adjoining areas which share common resource issues and management concerns requiring continuous and close interagency coordination. Therefore, the USDA Forest Service and the USDI Bureau of Land Management have again elected to jointly announce land management planning schedules for lands which each agency administers. The purpose of publishing joint planning schedules is to provide agencies and the public with the opportunity to study the relationships between the agencies' current and projected planning activities.

The Forest Service and the Bureau of Land Management's planning systems are authorized and administered under different laws and regulations. Consequently, this notice is organized into two parts (Part A—Forest Service and Part B—Bureau of Land Management).

Comments on the schedules should be directed to the appropriate agency (see **ADDRESS**, Part A and Part B).

Part B—Bureau of Land Management

Regulations governing resource management planning for the Bureau of Land Management administered lands (43 CFR Parts 1601 and 1610) were published in the Federal Register on May 5, 1983. They became effective on July 5, 1983. Those regulations (43 CFR 1610.2(b)) require that the Bureau publish a planning schedule for the current and three succeeding fiscal years. The schedule below fulfills that requirement.

The formal start of the planning process begins with the publication of a Notice of Intent to initiate a plan. The projected planning starts are shown on the schedule for Fiscal Years 1986 and 1987. Where an environmental assessment (EA) is indicated on the schedule, the EA will be made available to the public and will be revised to respond to public comments, as appropriate.

A key to the abbreviations used is provided after the schedule.

DATES: Comments on the schedule will be accepted July 2, 1986.

ADDRESS: Comments should be sent to Director (760), Bureau of Land Management, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Ann Loose, (202) 653–8824.

EA—Environmental assessment
FEIS—Final environmental impact statement
MFP–A—Management framework plan amendment
ORV—Off road vehicles
PA—planning analysis
PFEIS—Preliminary final environmental impact statement (wilderness only)
RMP—Resource management plan
ROW—Rights-of-way

Dated: March 27, 1986.

James M. Parker,

Acting Director, Bureau of Land Management.

Part A—Forest Service

The National Forest Management Act of 1976 directed the Secretary of Agriculture to attempt to complete land and resource management plans for each "administrative unit" (e.g., National Forest) of the National Forest System by September 30, 1985. Regulations to guide this effort were initially developed in 1979, and revised in 1982 at the direction of the Presidential Task Force on Regulatory Relief (Vol. 47, No. 190 of the Federal Register, September 30, 1982).

Additional revision to the rules was necessary to respond to a court decision that the 1979 Roadless Area Review and Evaluation (RARE II) environmental statement and associated procedures were inadequate under the National Environmental Policy Act (NEPA).

The NFMA regulations require integrated planning for all resources of

the National Forest System—recreation, fish and wildlife, water, timber, range, and wilderness. The rules set forth a process for developing and revising the land and resource management plans as required by the Forest and Rangeland Renewable Resources Planning Act of 1974 (RPA), as amended by the The National Forest Management Act of 1976 (NFMA). These rules require development of Regional Guides and Forest Plans. Each will include all management planning for resources and be supported by an environmental impact statement.

Draft and final Regional Guides and Forest Plans and associated environmental impact statements will be filed with the Environmental Protection Agency and made available to the public for comment. All Forest plans are scheduled to be published in draft by the end of September 1986.

A planning schedule is included below showing the fiscal year which draft and final documents have been or will be filed. Also given are the addresses of the Forest Service's Regional Offices and National Forest headquarters in each Region for which plans are to be prepared.

Readers interested in the progress and status of a particular Regional Guide or Forest Plan should contact the appropriate Regional Forest of Forest Supervisor.

DATE: Comments on the schedule will be accepted July 2, 1986.

ADDRESS: Comments should be sent to: Chief, Forest Service, USDA, P.O. Box 2417, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Joyce P. Parker, Land Management Planning, P.O. Box 2417, Washington, DC 20013, (202) 447-6697.

Dated: May 23, 1986.

F. Dale Robertson,

Associate Chief.

COMMISSION ON CIVIL RIGHTS

Arkansas Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Arkansas Advisory Committee to the Commission will convene at 1:00 p.m. and adjourn at 5:00 p.m. on June 26, 1986, at the Arkansas Bar Center, Board Room, 400 W. Markham, Little Rock, Arkansas. The purpose of the meeting is to discuss the Committee's planned project on discrimination in juvenile justice and monitoring of higher education desegregation in response to the *Adams* case.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Alan Patteson or J. Richard Avena, Director of the Southwestern Regional Office at (512) 229-5570, (TDD 512/229-5580). Hearing impaired persons who will attend the meeting and require the services of a

sign language interpreter, should contact the Regional Office at least five(5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, May 28, 1986.

Yvonne E. Schumacher,

Program Specialist for Regional Programs.

New York Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the New York Advisory Committee to the Commission will convene at 4:00 p.m. and adjourn at 6:00 p.m. on June 23, 1986, at the Summit Hotel, 51st Street and Lexington Avenue, New York, New York. The purpose of the meeting is to hold a briefing session in preparation for the community forum.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Archer Puddington or Ruth Cubero, Director of the Eastern Regional Office at (212) 264-0400, (TDD 212/264-0400). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Office at least five(5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, May 28, 1986.

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census.

Title: 1986 Post-Enumeration Survey Follow-up of Los Angeles, California.

Form Number: Agency—DC-1301U; OMB—N/A.

Type of Request: New collection.

Burden: 400 respondents; 400 reporting hours.

Needs and Uses: This follow-up survey will be used to determine whether people were counted in the 1986 Census of Los Angeles.

Affected Public: Individuals or households.

Frequency: One time only.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Timothy Sprehe 395-4814.

Agency: Bureau of the Census.

Title: Housing Vacancy Survey.

Form Number: Agency—HVS—1 (Attachment F); OMB—0607-0179.

Type of Request: Extension of a currently approved collection.

Burden: 5,200 respondents; 3,200 reporting hours.

Needs and Uses: This survey provides quarterly estimates of national, regional, and state vacancy rates by various characteristics. The data are used by researchers to gauge the housing inventory overtime.

Affected Public: Individuals or households.

Frequency: Monthly.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Timothy Sprehe 395-4814.

Agency: Bureau of the Census.

Title: 1987 Test Census—Advance Post Office Check.

Form Number: Agency—DF-700A; OMB—N/A.

Type of Request: New collection.

Burden: 500 respondents; 17 reporting hours.

Needs and Uses: This test census will be used to evaluate various methods of address list compilation and improvements to be used in the 1990 Decennial Census.

Affected Public: Individuals or households.

Frequency: One time only.

Respondent's Obligation: Mandatory

OMB Desk Officer: Timothy Sprehe 395-4814.

Agency: Bureau of the Census.

Title: October 1986 School Enrollment Supplements.

Form Number: Agency—CPS-1; Omb—0607-0464.

Type of Request: Reinstatement of a previously approved collection.

Burden: 57,000 respondents; 3,200 reporting hours.

Needs and Uses: These supplements provide basic school enrollment data for persons 3 years old or older who are enrolled in elementary school, high school, college, and special schools, as well as for children enrolled in nursery schools or kindergarten.

Affected Public: Individuals or households.

Frequency: Annually.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Timothy Sprehe 395-4814.

Copies of the above information collection proposals can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-4217, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collections should be sent to Timothy Sprehe, OMB Desk Officer, Room 3235, New Executive Office Building, Washington, D.C. 20503.

Dated: May 22, 1986.

Edward Michals,

Departmental Clearance Officer, Information Management Division, Office of Information Resources Management.

BILLING CODE 3510-07-M

International Trade Administration

Export Control Policy Forum on Reexport Controls

AGENCY: Export Administration, International Trade Administration, Commerce.

ACTION: Notice of forum on reexport controls.

SUMMARY: Consistent with the U.S. Department of Commerce's commitment to solicit and use industry support in carrying out export control programs, there will be an Export Control Policy Forum on Reexport controls sponsored by Commerce in co-operation with the Militarily Critical Technology List (MCTL) Implementation Technical Advisory Committee (TAC) and the U.S. Chamber of Commerce, to be held at 9:00 a.m. on June 23, 1986 at the U.S. Chamber of Commerce, Herman Lay Room, 1615 H Street, NW., Washington, DC. The Forum is open to the public with registration starting at 8:00 a.m.

Commerce is conducting a study of the reexport control policies (Ref. Part 374 of the Export Administration Regulations) with an emphasis on the purpose, basis, impact and effectiveness of those policies. The scope of the study is outlined in the Supplementary Information included in this notice. Commerce is soliciting from industry suggestions that may lead toward an acceptable relaxation of these controls while continuing to address overriding national security and foreign policy concerns.

Interested industry members are encouraged to orally present views in a consolidated manner at this joint industry/government Forum to an 8-member panel representing Commerce, State, Defense, the Subcommittee on Export Administration of the President's Export Council, and the MCTL TAC. Each speaker will be allowed no more than 20 minutes and comments must be directly related to reexport controls. Speakers must submit their position papers prior to June 16 with 10 copies to the listed contact. Presenters will be contacted by June 16 to arrange presentation times. Speakers and attendees will be on a first come first serve basis. If you desire to distribute copies of your paper to the public, please bring sufficient copies to the Forum on June 23.

FOR FURTHER INFORMATION CONTACT: Connie White, Office of Technology and Policy Analysis, Room 1631, U.S. Department of Commerce, P.O. Box 273, Washington, DC (Telephone (202) 377-4275).

SUPPLEMENTARY INFORMATION:

A. Statement of Purpose

Export Administration is examining the reexport control provisions of the EAR (Part 374) to determine the following:

1. Effectiveness of U.S. reexport controls in preventing U.S. goods and technology from being diverted;
2. Consistency with their original objectives;
3. Specific extraterritorial implications;
4. The degree of consistency in USG's application of reexport controls across the board; and
5. Consistency of current regulations with international agreements and existing business practices; and,
6. Options for amending the regulations, if any.

B. Purpose of Controls

The USG maintains the policy of requiring authorization for any reexport of a U.S. commodity that would require a license for export from the U.S. to the new destination. This regulation applies to COCOM and non-COCOM members alike, with limited exceptions that are stated in § 374.2 and 374.3(e). Applications for reexport authorization are considered on a case-by-case basis. The rationale for such a reexport policy is to prevent diversion of U.S. origin goods to proscribed (controlled) destinations. In addition, the USG considers the control of reexports a fundamental element of the overall COCOM security efforts.

Today, U.S. reexport controls raise international concerns of extraterritoriality and allegations that they act to undermine U.S. competitiveness in the international market.

C. Basis for Controls

U.S. Export Administration Regulations (specifically § 374.1) state that commodities exported from the United States to a foreign destination cannot be reexported to another country without prior authorization from Export Administration. Section 374.2 relieves the reexporter of that responsibility in most instances in which the same product could be shipped from the U.S. to the new destination under a general license, and certain other situations. The statutory bases most often quoted for imposing U.S. reexport controls are subsections 3(2) and 5(a)(3) of the Export Administration Act of 1979, as amended.

There are three ways that reexport authorization may be obtained. They are as follows:

1. *License Application Form ITA–622P.* If at the time the U.S. export license application is submitted to Export Administration, the U.S. exporter or foreign consignee expects that the commodities will be reexported (section 374.3(a)(1)).

2. *Amendments to License.* If prior to export from the United States, the exporter learns of an end use for the commodities other than that authorized by the license (section 374.3(a)(2)) a Form ITA–685P may be submitted to amend the license.

3. *Specific Reexport Authorization.* In those cases of shipment to specified destinations where the reexport was not foreseen nor included in the license or amendments, the U.S. exporter or the foreign consignee is required to obtain reexport authorization by filing form ITA–699P, or a letter if the form is not readily available overseas (section 374.3(b)).

D. Notes on Current Implementation

Generally, applications for export or reexport to most free world destinations are considered favorably on a case-by-case basis unless there is a significant risk that commodities will be used or diverted contrary to the objectives of specific U.S. export controls.

Under the new G–COM regulations, reexport authorization is not necessary for transfers of "Country Groups Q, W and Y Advisory Note" level commodities into COCOM countries.

In the case of reexports of U.S. origin goods from COCOM countries to proscribed destinations, U.S. reexport authorization is necessary for all licensable exports *except* COCOM general exceptions items, pursuant to COCOM clearance by the reexporting country (§374.3(e)).

Reexport controls apply as well to commodities controlled for foreign policy purposes. Foreign policy controls have been a sensitive issue, because U.S. reexport authorization is required even though the country of reexport does not have comparable controls in place.

E. Industry Suggestions

Industry comments on current reexport regulations are solicited to assist the U.S. Government in identifying and assessing the available range of options.

Walter J. Olsen,

Deputy Assistant Secretary for Export Administration.

BILLING CODE 3510-DT-M

Consolidated Decision on Applications For Duty-Free Entry of Mass Spectrometers; Research Triangle Institute

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th & Constitution Avenue, NW., Washington, DC.

Docket number: 85–283. Applicant: Research Triangle Institute, Research Triangle Park, NC 27709. Intended Use: See notice at 50 FR 41350.

Docket number: 86–023. Applicant: University of California, Los Angeles, Los Angeles, CA 90024. Intended use: See notice at 50 FR 46805.

Article: Mass Spectrometer.

Manufacturer: VG Analytical Instruments Ltd., United Kingdom.

Advice submitted by: National Institutes of Health: April 3, 1986.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as each is intended to be used, is being manufactured in the United States.

Reasons: Each foreign instrument to which the foregoing applications relate provides a mass range of 1 to 8,000 atomic mass units at an accelerating potential of 10,000 volts in the FAB mode. The National Institutes of Health advises in its respectively cited memoranda that (1) this capability is pertinent to each applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to any of the foreign instruments.

BILLING CODE 3510-DS-M

University of California, Berkeley; Decision on Application For Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket number: 86–014. Applicant: University of California, Berkeley, Berkeley, CA 94720. Instrument: Cryotrans System for ISI–DS130 S.E.M., Model Polaron E7300. Manufacturer: Hexland Limited, United Kingdom. Intended use: See notice at 50 FR 46807.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. Reasons: This is a compatible accessory for an instrument previously imported for the use of the applicant. The National Institutes of Health advises in its memorandum dated April 3, 1986 that the accessory is pertinent to the intended uses and that it knows of no comparable domestic accessory.

We know of no domestic accessory which can be readily adapted to the instrument.

U.S. Geological Survey; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number 85–275. Applicant: U.S. Geological Survey, Hartford, CT 06103. Instrument: VLF Resistivity Meter. Manufacturer: Geonics Limited, Canada. Intended Use: See notice at 50 FR 38563.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. Reasons: The foreign instrument is capable of measuring the quad-phase as well as the in-phase secondary field. This capability is pertinent to the applicant's intended purpose. We know of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Request for Extension of Approval of Information Collection Requirements; Children's Sleepwear Standards

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for extension of approval through June 30, 1989, of information collection requirements in the flammability standards for children's sleepwear and enforcement rules, codified at 16 CFR Parts 1615 and 1616. These standards and enforcement rules are applicable to children's sleepwear garments in sizes 0 through 14, and fabrics used in the production of such garments. The standards and enforcement rules require manufacturers and importers of children's sleepwear garments and fabrics to perform periodic testing from representative samples to assure that children's sleepwear items meet the performance requirements of the standards. The enforcement rules also require manufacturers and importers to compile and maintain records of such testing, and to make those records available to Commission investigators upon request.

Additional Details About the Request for Extension of Approval of Information Collection Requirements

Agency address

Consumer Product Safety Commission, 1111 18th Street, NW., Washington, DC 20207.

Title of information collection

Standard for the Flammability of Children's Sleepwear: Sizes 0 Through 6X (16 CFR Part 1615); and Standard for the Flammability of Children's Sleepwear: Sizes 7 Through 14 (16 CFR Part 1616).

Type of request

Extension of approval.

Frequency of collection

Varies by number of styles of items produced or imported and by number of items of each style manufactured or imported each year.

General description of respondents

Manufacturers and importers of children's sleepwear garments and fabrics used for production of children's sleepwear.

Estimated number of respondents

300.

Estimated average number of hours per respondent

437.5 per year.

Comments: Comments on this request for extension of approval of information collection requirements should be addressed to Andy Velez-Rivera, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; telephone (202) 395-7340. Copies of the request for extension of approval of information collection requirements are available from Francine Shacter, Office of Budget, Program Planning, and Evaluation, Consumer Product Safety Commission, Washington, DC 20207; telephone (301) 492-6429.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: May 28, 1986.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

[FR Doc. 86-12257 Filed 5-30-86; 8:45 am]

BILLING CODE 6355-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Department of Defense Retirement Board of Actuaries; Meeting

AGENCY: Department of Defense Retirement Board of Actuaries, DoD.

ACTION: Notice of meeting.

SUMMARY: A meeting of the Board has been scheduled to execute the provisions of Chapter 95, title 10, United States Code. The Board shall review DoD actuarial methods and assumptions to be used in the implementation and valuation of the military retirement system. Persons desiring to (1) attend the DoD Retirement Board of Actuaries meeting or (2) make an oral presentation or submit a written statement for consideration at the meeting must notify Ms. Kathy Greenstreet at 696-6336 by August 23, 1986. Notice of this meeting is required under the Federal Advisory Committee Act.

DATE: September 16, 1986, 8:30 am to 4:30 pm.

ADDRESS: Room 3E752, the Pentagon.

FOR FURTHER INFORMATION CONTACT: Toni Hustead, Executive Secretary, DoD Office of the Actuary, 4th floor, 1600 Wilson Boulevard, Arlington, VA 22209-2593, (202) 696-5660.

BILLING CODE 3910-01-M

DEPARTMENT OF EDUCATION

Chapter 1, Education Consolidation and Improvement Act of 1981; Intent to Repay to the Arizona State Department of Education Funds Recovered as a Result of Final Audit Determinations

AGENCY: Department of Education.

ACTION: Notice of intent to award grantback funds.

SUMMARY: Notice is given that, under section 456 of the General Education Provisions Act (GEPA), the U.S. Secretary of Education (Secretary) intends to repay under a grantback arrangement to the Arizona State Department of Education an amount equal to 75 percent of the funds recovered by the U.S. Department of Education (Department) as a result of final audit determinations. This notice describes the State educational agency's (SEA's) plan for the use of the grantback funds and the terms and conditions under which the Secretary intends to make these funds available.

DATES: All written comments must be received on or before July 2, 1986.

ADDRESS: All written comments should be submitted to Dr. James Spillane, Director, Division of Program Support, Compensatory Education Programs, U.S. Department of Education, 400 Maryland Avenue, SW., (Room 5004, ROB-3-Mail Stop 3580), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Dr. James Spillane. Telephone: (202) 245-9845.

SUPPLEMENTAL INFORMATION:

A. Background

Based on audits issued in fiscal years 1971 and 1978 by the former Department of Health, Education, and Welfare Audit Agency (HEWAA), the Office of Education (now Department of Education) issued final audit determinations finding that the Arizona SEA had misspent migrant program funds and local educational agency (LEA) basic grant funds that were awarded under Title I of the Elementary and Secondary Education Act (Title I).

Migrant Program Funds

Title I funds were awarded annually to the SEA to support projects that were designed to meet the special educational needs of migratory children of migratory agricultural workers. In fiscal year 1976, the HEWAA issued an audit of the SEA's use of migrant program funds for the period July 1, 1970, through June 30, 1974. The final audit report questioned two major areas of expenditures. These were (1) the SEA's use of migrant funds to pay its own migrant-related administrative expenses, and (2) the use of funds by LEAs to provide educational services to ineligible children.

In response to the audit report, the Deputy Commissioner (now Assistant Secretary) for Elementary and Secondary Education issued final audit determination letters on October 31, 1977, and June 22, 1978, alleging that the SEA had misspent $230,723 in its operation of the migrant education program during fiscal years 1974 and 1975. The SEA challenged these determinations in applications for review filed with the Title I Audit Hearing Board (now the Education Appeal Board (EAB)) on November 5, 1977, and July 28, 1978.

LEA Basic Grant Program Funds

The LEAs received Title I basic grant funds to support compensatory education projects that were designed to meet the special educational needs of educationally deprived children who resided in areas with high concentrations of low-income families. In fiscal year 1971, the HEWAA issued an audit report on the operation and administration of the Title I basic grant program in the Tucson, Phoenix, and Roosevelt Elementary School Districts, and in six Arizona county administrative units for the period September 1, 1965, through August 31, 1969, the first years of the Title I program.

In his September 3, 1971 letter, the Acting Associate Commissioner (now Assistant Secretary) of Elementary and Secondary Education issued a final determination that $1,417,374 of Title I funds had allegedly been misspent by the SEA. In response to the SEA's request for reconsideration of that determination, another final determination letter was issued on January 28, 1972, reducing the claim of misspent funds to $762,023. Those claims included $480,849 spent improperly for general aid, $127,540 for Title I funds that LEAs purportedly used to supplant State and local resources, $82,661 for unallowable administrative costs, and $71,173 for other miscellaneous expenditures allegedly made in violation of Title I requirements.

The SEA challenged the final determinations in an application for review filed with the Title I Audit Hearing Board (now EAB) in April, 1973.

Settlement of Outstanding Claims

While the SEA's application for review of the final audit determinations for the migrant program and the LEA basic grant program were pending, the parties in these cases negotiated a successful settlement of the outstanding claims. Under this agreement executed by the SEA and the Department on December 9, 1982, and January 4, 1983, respectively, the SEA agreed to pay the Department an amount of $102,420. Upon receipt of the SEA's payment, the Assistant Secretary agreed to relinquish any further claims relating to the final audit determinations for the migrant program funds and the LEA basic grant funds.

On December 15, 1982, the SEA remitted payment of $102,420 to the Department along with the executed settlement agreement. Based on the request of both parties, the EAB dismissed the SEA's appeals on January 12, 1983, pursuant to the approved settlement.

B. Authority for Awarding a Grantback

Section 456(a) of GEPA (20 U.S.C. 1234e(a)) provides that whenever the Secretary has recovered funds following a final audit determination with respect to an applicable program, the Secretary may consider those funds to be additional funds available to that program and may arrange to repay to the SEA or LEA affected by that determination an amount not to exceed 75 percent of the recovered funds. The Secretary may enter into this "grantback" arrangement if the Secretary determines that—

(1) The practices and procedures of the SEA or LEA that resulted in the audit determinations have been corrected, and that the SEA or LEA is in all other respects in compliance with the requirements of the applicable program;

(2) The SEA has submitted to the Secretary a plan for the use of the funds to be awarded under the grantback arrangement which meets the requirements of the applicable program and, to the extent possible, benefits the population that was affected by the misexpenditures that resulted in the audit exceptions; and

BEST COPY AVAILABLE

(3) The funds to be awarded under the grantback arrangement, if used in accordance with the SEA's plan, would serve to achieve the purposes of the program under which the funds were originally granted.

C. Request for Repayment of Funds Awarded Under a Grantback Arrangement

On December 15, 1982, the SEA submitted a formal written request for repayment of $76,815 (75 percent of the $102,420 returned to the Department as a result of final audit determinations) under a grantback arrangement. The Department was notified in early 1983 of the SEA's wish to amend its plan for the use of the grantback funds and thus no further action on the December 15, 1982 request was taken. On March 25, 1986, a revised plan was received from the SEA. With its request for grantback funds, the SEA provided assurances that the practices and procedures of the SEA and the LEAs that had resulted in the final audit determinations have been corrected and that the SEA and LEAs are in all other respects in compliance with the requirements of Chapter 1 of the Education Consolidation and Improvement Act of 1981 (Chapter 1). Also included with the SEA's request were detailed budgets relating to two LEA's expenditures of basic grant funds and the SEA's expenditure of migrant education program funds to be awarded under the grantback arrangement.

D. Plan for Use of Funds Awarded Under a Grantback Arrangement

In accordance with section 456(a)(2) of GEPA, the SEA submitted a plan for use of basic grant funds, made available under the grantback, to serve educationally deprived children enrolled in the Roosevelt Elementary School District and the Tucson Unified School District. The LEAs, which were subjects of the underlying audit of Arizona's use of Title I basic grant funds, would separately administer the projects to be funded. The SEA plan also proposed the use of migrant education funds made available under the grantback for services for migratory children that the SEA would provide directly, since the Chapter 1 program for migratory children is a State-operated program.

The SEA's plan proposes to use the funds to be repaid under the grantback arrangement to meet the special educational needs of educationally deprived children, and children of migratory workers in programs administered under Chapter 1. While the final audit determinations against the SEA resulted from improper expenditures of Title I funds, Chapter 1 supersedes Title I. The SEA's proposal reflects adherence to the requirements in Chapter 1, which, like Title I, is designed to serve (1) educationally deprived children in low-income areas, and (2) children of migratory agricultural workers. Following are descriptions of how the grantback funds will be used.

Migrant Program Funds

In the summer of 1986, the *Arizona Migrant Education Summer Term Program* will provide educational services to approximately 2,510 migratory students attending school in Arizona school districts. With the availability of these grantback funds, approximately 245 migratory students in the Somerton School District, a highly migrant-impacted school district, will participate in the summer project. Grantback funds in the amount of $21,892 will be used to hire additional instructional personnel and to purchase supplementary instructional materials for use with the migratory students. Private school students eligible for project services will be included in this program ensuring that such children will be equitably served. This program was developed through a comprehensive needs assessment and evaluation process.

Basic Grant Funds

The *Roosevelt Elementary School District* will expand grantback funds in the amount of $14,923 to augment instructional activities of a planned summer term project limited to selected Chapter 1 eligible students in grades 1–8. This project will continue for five weeks in the summer of 1986 for 975 students under the instruction of 65 teachers. The grantback funds will be used to hire 8.1 teachers and provide summer project instructional service to approximately 121 students who would not be served without these funds. Private school students eligible for project services will be included in this program ensuring that such children will be equitably served.

The *Tucson Unified School District* will expend grantback funds in the amount of $40,000 to augment instructional activities of a planned 1986 summer term project for five-year-olds. This project will be implemented at two eligible elementary schools. This Pre-Kindergarten and Parent and Child Education (PACE) program will provide three-and-a-half weeks of instructional activities for children and parents; teachers will follow a daily schedule of home visits. The grantback funds will be used to hire five teachers, five instructional aides, two site coordinators, and to purchase materials, supplies, and space of the program. This project is planned at two inner city centers for 75 children and will have at least one parent or parent surrogate for each child. These children will benefit directly from these funds. Participating children will be attending neighborhood public or private schools in the fall. Private school children eligible for project services will be included in this program ensuring that such children will be equitably served.

E. The Secretary's Determinations

Based upon a thorough review of the SEA's request for the repayment of funds under section 456 of the GEPA, including the SEA's discharge of its payment obligations to the Department in December 1982, the SEA's assurances described in Part C of this notice, and the SEA's plan and the budgets describing the use of funds, the Secretary makes the following determinations:

(1) The SEA and the LEAs have corrected the practices and procedures that resulted in the final audit determinations, and they are in all other respects in compliance with the requirements of the Chapter 1 program;

(2) The SEA has submitted a plan on behalf of the LEAs and its own migrant education program for the use of the funds to be awarded under the grantback arrangement that meets the requirements of the Chapter 1 program and, to the extent possible, benefits the Chapter 1 children who were affected by the misexpenditures that resulted in the audit exceptions; and

(3) The funds to be awarded under the grantback arrangement, if used in accordance with the SEA's plan, would serve to achieve the purposes of the Chapter 1 program.

These determinations are based upon the best information available to the Secretary at the present time. If this information is not accurate or complete, the Secretary is not precluded from taking appropriate administrative action.

F. Notice of the Secretary's Intent to Enter Into a Grantback Arrangement

Section 456(d) of GEPA requires, at least 30 days prior to entering into an arrangement to award funds under a grantback, that the Secretary publish in the **Federal Register** a notice of his intent to do so, and the terms and conditions under which the payment will be made.

In accordance with this requirement, notice is given that the Secretary intends to make available under a grantback arrangement to the SEA an

amount equal to 75 percent of the funds the Department has recovered as a result of the final audit determinations. The Secretary bases his intention to enter into a grantback arrangement under Section 456 of GEPA on the following factors: His determinations outlined in Part E of this notice, the payment by the SEA of all funds owed to the Department in accordance with the settlement agreement, and the cooperative efforts of the SEA and the LEAs to resolve this matter.

G. Terms and Conditions Under Which Payment Under the Grantback Arrangement Will Be Made

Section 456(b) of GEPA provides that any payments made under a grantback arrangement shall be subject to the terms and conditions that the Secretary deems necessary to accomplish the purposes of the affected program. The SEA agrees to comply with the following terms and conditions under which payment under the grantback arrangement will be made:

(1) Funds awarded under the grantback will be spent in accordance with—

(a) All applicable statutory and regulatory requirements;

(b) The plan that the SEA submitted and any amendments to that plan that are approved by the Secretary; and

(c) The budgets that were submitted with the plan and any amendments to those budgets that are approved by the Secretary.

(2) In accordance with section 456(c) of GEPA and the SEA's plan, all funds received under the grantback arrangement will be obligated by September 30, 1986.

(3) The SEA must, not later than January 1, 1987, submit a report to the Secretary which indicates that the funds awarded under the grantback have been spent in accordance with the SEA's proposed plan and budgets.

(4) Separate accounting records will be maintained documenting the expenditures of different program funds awarded under the grantback arrangement.

Invitation to Comment

The Secretary invites public comments on this notice of intent to award funds under a grantback arrangement to the Arizona State Department of Education. Interested persons may send written comments to Dr. James Spillane at the address at the beginning of this notice. All comments must be received on or before July 2, 1986.

(Catalog of Federal Domestic Assistance No.: 84.010, Educationally Deprived Children—Local Educational Agencies)

Dated: May 28, 1986.

William J. Bennett,

Secretary of Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Nuclear Waste Policy Act of 1982; Nomination of Five Sites for the First High-Level Nuclear Waste Repository, and Availability of Accompanying Environmental Assessments

AGENCY: Office of Civilian Radioactive Waste Management, DOE.

ACTION: Notice of Nomination of Five Sites for the First High-Level Nuclear Waste Repository and Availability of Accompanying Environmental Assessments (EAs).

SUMMARY: The Secretary of Energy (Secretary) herein nominates the following five (5) sites for the first repository for the permanent disposal of spent nuclear fuel and high-level radioactive waste:

Mississippi

Richton Dome, Perry County

Nevada

Yucca Mountain, Nye County

Texas

Deaf Smith County

Utah

Davis Canyon, San Juan County

Washington

Hanford, Benton County and Franklin County

In accordance with the requirements of the Nuclear Waste Policy Act, DOE is announcing, by this notice, availability of the EA's which accompany the Secretary's nominations.

FOR FURTHER INFORMATION CONTACT:

1. (a) For the Richton Dome, Deaf Smith County, and Davis Canyon EAs—Jefferson O. Neff, Program Manager, Salt Repository Project Office, Chicago Operations Office, 505 King Avenue, Columbus, Ohio 43201. Phone: (614) 424-8918.

(b) For the Yucca Mountain EA—Donald Vieth, Director, Waste Management Project Office, Nevada Nuclear Waste Storage Investigations, Nevada Operations Office, U.S. Department of Energy, P.O. Box 14100, Las Vegas, Nevada 89109. Phone: (702) 295-3601.

(c) For the Hanford EA—O. Lee Olson, Project Manager, Basalt Waste Isolation Project, Richland Operations Office, U.S. Department of Energy, P.O. Box 550, Richland, Washington 99352. Phone: (509) 376-7334.

2. Ellison S. Burton, Director, Siting Division, Office of Geologic Repositories, Office of Civilian Radioactive Waste Management, U.S. Department of Energy, Washington, DC 20585. Phone: (202) 252-1116.

3. Robert Mussler, Esq., Deputy Assistant General Counsel for Environment, Office of General Counsel, U.S. Department of Energy, Washington, DC 20585. Phone: (202) 252-6947.

SUPPLEMENTARY INFORMATION:

I. Previous Notice of Availability

DOE published a Notice of Availability (49 FR 49540) on December 20, 1984, regarding the availability of the draft EAs for public review and comment, and announcement of public information meetings and hearings, and solicitation of comments.

II. Background

By the end of this century, the United States plans to begin operation of a geologic repository for the permanent disposal of commercial spent nuclear fuel and high-level radioactive waste. Pub. L. 97-425, the Nuclear Waste Policy Act of 1982 (the Act), specifies the process for selecting repository sites and assigns to DOE the responsibility for locating, constructing, operating, closing, and decommissioning the repositories.

Before the Act was passed, the site screening conducted by DOE evaluated and compared progressively smaller land units according to various criteria (e.g. geologic, engineering, environmental, socioeconomic). This process led to the identification of potentially acceptable sites considered for the first repository. Draft EA's were prepared for the nine sites, found in three different host rocks (basalt, salt, and tuff). Preferred sites were designated in each of the geohydrologic settings.

III. Siting Guidelines

In accordance with the Act, DOE issued general guidelines for the recommendation of sites for nuclear waste repositories on December 6, 1984 (49 FR 47714). The guidelines establish performance objectives for a geologic repository system, define the basic technical requirements that candidate sites must meet, and specify how the DOE will implement its site selection process.

IV. Nomination and Recommendation

The Act requires the Secretary of Energy to nominate at least five sites which he determines suitable for site characterization for the first repository based. Each nomination of a site is required to be accompanied by an Environmental Assessment, prepared in accordance with the requirements of the Act. As further specified by the Act, the Secretary will then recommend three of the nominated sites to the President as candidate sites for site characterization.

V. Site Characterization

Once the President approves the three recommended sites for site characterization, several years of intensive field studies will begin at each site. As part of the site characterization program, DOE intends to construct one or more exploratory shafts at each of the approved sites to the depth of the proposed repository. Tests will be conducted at that depth to determine whether subsurface conditions will allow construction of a repository that will safely isolate radioactive wastes.

After characterization is completed, DOE will again apply the siting guidelines to evaluate each site and prepare an environmental impact statement (EIS). The Secretary will recommend one site to the President for the location of the first repository. The President may then recommend the site to Congress.

At this point, the host State may issue a notice of disapproval that can be overridden only by a resolution of both Houses of Congress. If the notice of disapproval is not overridden, the President must submit another repository site recommendation within 12 months. If no notice of disapproval is submitted, or if the notice of disapproval is overridden, then, as prescribed by the Act, the site designation is effective, and DOE will proceed to file an application with the Nuclear Regulatory Commission (NRC) to obtain a construction authorization for a repository at that site.

VI. Preparation of EAs

A. Review Process

The Department of Energy held a ninety day public comment period for nine draft EAs. Fifty-two public information meetings on the draft EAs were conducted in cities throughout the affected States: Louisiana; Mississippi; Nevada; Texas; Utah; Washington; and Washington, DC. These briefings were held to answer questions and to facilitate public review and comment on the draft EAs.

In addition, DOE held a series of nineteen public hearings in February and March, 1985. The hearings took place in: Louisiana; Mississippi; Nevada; Texas; Utah; Washington; and Oregon. The purpose of the hearings was to receive oral and written testimony on the draft EA's.

Copies of the draft EA's were distributed to Federal, State, and local agencies as well as to organizations and individuals who requested information about the nuclear waste repository siting process. More than 20,000 comments were received. DOE reviewed and considered all comments in preparation of the five documents issued today. Included with the EAs are appendices which respond to the reviewers' comments.

B. Availability of EAs

Copies of the EAs are available upon request. Requests should include identification of the EA of interest from the above list of locations, and the requestor's name, address, and zip code. Send written requests to: U.S. Department of Energy, ATTN: EA, 1000 Independence Avenue, SW., Washington, DC 20585.

Copies of all five EAs are available for public inspection at the following DOE Public Reading Rooms at the indicated times Monday through Friday, except Federal holidays where noted below:

- DOE Public Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, 9:00 a.m. to 4:00 p.m.
- Albuquerque Operations Office, Kirtland Air Force Base, National Atomic Museum Library, Public Reading Room, Albuquerque, New Mexico 87115, (505) 844–8443, 9:00 a.m. to 5:00 p.m.
- Chicago Operations Office, 9800 South Cass Avenue, Argonne, Illinois 60439, 8:00 a.m. to 5:00 p.m.
- Idaho Operations Office, 550 2nd Street, Headquarters 198, Idaho Falls, Idaho 83401, (208) 526–0271, 8:00 a.m. to 5:00 p.m.
- Nevada Operations Office, Public Docket Room 2753 S. Highland, Las Vegas, Nevada 89114, (702) 734–3521, 8:00 a.m. to 4:30 p.m.
- Oak Ridge Operations Office, 200 Administration Road, Room G208, Federal Building, Oak Ridge, Tennessee 37830, (615) 576–1216, 8:00 a.m. to 4:30 p.m.
- Richland Operations Office, Hanford Science Center-Rockwell Hanford Operations, 825 Jadwin Avenue, Federal Building, Richland, Washington 99352, (509) 376–8273, Sunday 1:00 p.m. to 8:00 p.m., Monday through Saturday 9:00 to 5:00 p.m.
- San Francisco Operations Office, 1333 Broadway, Wells Fargo Building, Reading Room, Room 240, Oakland, California 94612, (415) 273–4358, 8:30 a.m. to 4:00 p.m.
- Savannah River Operations Office, 211 York Street, N.E., Federal Building, Aiken, South Carolina 29801, (803) 725–3267, 8:30 a.m. to 4:00 p.m.

Issued in Washington, DC, May 27, 1986.

John S. Herrington,
Secretary of Energy.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket No. CP86–483–000]

ANR Pipeline Co.; Application

May 23, 1986.

Take notice that on April 29, 1986, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP86–483–000 an application pursuant to Section 7(c) of the Natural Gas Act for a Certificate of public convenience and necessity authorizing an interruptible gas transportation service for Standard Oil Production Company (Standard Oil), all as more fully set fourth in the application on file with the Commission and open to public inspection.

ANR proposes to transport, pursuant to a February 3, 1986, transportation agreement, up to 140,000 dt equivalent per day of natural gas Standard Oil is developing from lands and lease-holds underlying East Breaks Area Block 165, offshore Texas (Block 165), and other nearby leaseholds in the East Breaks Area and High Island Area Blocks A–587, A–588 and A–589 (Near Leases). ANR indicates that Standard Oil would construct facilities from its production platform in Block 165 to proposed facilities of High Island Offshore System (HIOS) in High Island Block A–582. Of the proposed volumes, it is stated that up to 50,000 dt equivalent per day would be transported by ANR on an exclusive basis with the balance subject to alternative, multiple transportation. ANR requests authority to transport the volumes within its dedicated capacity in HIOS and its own facilities and to deliver the volumes for Standard Oil's account to various recipients, set forth in Schedule "A" (see below) attached to the transportation agreement, at the interconnection of the facilities of ANR and the various recipients in the states

of Louisiana, Texas, Kansas, Oklahoma, Arkansas, Mississippi and Ohio. As consideration for the service ANR proposes to charge Standard Oil 17.6 cents per dt delivered in the States of Louisiana, Kansas, Oklahoma and Texas; 23.1 cents per dt delivered in the State of Arkansas; 24.6 cents per dt delivered in the State of Mississippi; and 41.7 cents per dt delivered in the State of Ohio.

Any person desiring to be head or to make any protest with reference to said application should on or before June 16, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for ANR to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

Schedule A

Recipient(s) and Delivery Point

Acadian Gas Pipeline System, Bridgeline Gas Distribution Company, Columbia Gulf Transmission Company, Consolidated Gas Supply Corporation, Louisiana Intrastate Gas Corporation, Riverway Gas Pipeline Company, Southern Natural Gas Company, Texas Gas Transmission Corporation, Trunkline Gas Company, United Gas Pipe Line Company—St. Mary Parish, LA.

Florida Gas Transmission Company, Monterey Pipeline Company, National Fuel Gas Supply Corporation, Texas Eastern Gas Pipeline Company—St. Landry Parish, LA.

Consolidated Gas Transmission Corporation, National Fuel Gas Supply Corporation, Texas Gas Transmission Corporation, Transcontinental Gas Pipe Line Corporation—Acadia Parish, LA.

Consolidated Gas Transmission Corporation, Louisiana Resources Company, National Fuel Gas Supply Corporation, Natural Gas Pipeline Company of America, Tennessee Gas Transmission Company, Tenngasco Corporation, Texas Gas Transmission Corporation, Transcontinental Gas Pipe Line Corporation, Trunkline Gas Company-Cameron Parish, LA.

Transwestern Pipeline Company—Roberts, County, TX.

BILLING CODE 6717-01-M

[Docket No. RE81-35-002]

Boston Edison Co.; Application for Exemption

May 27, 1986.

Take notice that Boston Edison Company (BEC) filed an application on April 30, 1986, for exemption from certain requirements of Part 290 of the Federal Energy Regulatory Commission's (FERC) regulations concerning collection and reporting of cost of service information under section 133 of the Public Utility Regulatory Policies Act (PURPA), Order No. 48 (44 FR 58667, October 11, 1979). Exemption is sought from the requirement to file on or prior to June 30, 1986 and biennially thereafter, information on the costs of providing electric service as specified in Subparts B, C, D, and E of Part 290.

In its application for exemption BEC states, in part, that it should not be required to file the specified data for the following reasons:

Most of the data filed is available to any interested party in other filings. The PURPA materials required by Subparts B, C, D, and E are listed on Attachment A of the application with the document or proceeding where such data is already available.

The Massachusetts Department of Public Utilities (MDPU) rulings require rates to be based upon marginal costs. Rates were so designed for a test year ending June 1985 and an extensive marginal cost study was recently filed with BEC's rate filing in December 1985 (Docket DPU-85-271). To provide data based upon a calendar year ending December 31, 1985 is valueless and not needed for marginal cost rate design. Exhibit BE-305 of the MDPU 85-271 proceeding is a detailed marginal cost study.

"Extensive load research data has been utilized to allocate costs hourly in the MDPU 85-271 proceeding mentioned above to each of the 8760 hours of the year using a probability of dispatch allocator. Again, no purpose would be served by providing data in somewhat different format for an overlapping period."

"The state regulatory authorities and the public do not need to rely on the section 133 information for rate design. BEC maintains extensive load research, marginal cost and accounting data tailored to state ratemaking purposes."

"The cost of gathering and publishing the information requested is considerable with no value to the final result. Costs of ratepayers would be lower if the report were discontinued."

"Continuing to file would not be in the spirit of the PURPA regulations at this point in time."

Copies of the application for exemption are on file with FERC and are available for public inspection. FERC's regulations require that said utility also apply to any state regulatory authority having jurisdiction over it to have the application published in any official state publication in which electric rate change applications are usually noticed, and that the utility publish a summary of the application in newpapers of general circulation in the affected jurisdiction.

Any person desiring to present written views, arguments, or other comments on the application for exemption should file such information with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, on or before 45 days following the date this notice is published in the Federal Register. Within that 45 day period, such person must also serve a copy of such comments on: Mr. Wayne Frigard, Senior Counsel, Boston Edison Company, 800 Boylston Street, Boston, Massachusetts 02199.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-12232 Filed 5-30-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RE80-60-004]

Central Maine Power Co.; Application for Exemption

May 27, 1986.

Take notice that Central Maine Power Company (CMPC) filed an application on April 28, 1986, for exemption from

certain requirements of Part 290 of the Federal Energy Regulatory Commission's (FERC) regulations concerning collection and reporting of cost of service information under section 133 of the Public Utility Regulatory Policies Act (PURPA), Order No. 48 (44 FR 58887, October 11, 1979). Exemption is sought from the requirement to file on or prior to June 30, 1986 and biennially thereafter, information on the costs of providing electric service as specified in Subparts B, C, D, and E of part 290.

In its application for exemption CMPC states, in part, that it should not be required to file the specified data for the following reasons:

"The purposes of section 133 of PURPA have been and will continue to be served by the review and consideration of voluminous cost and load data filed with the Maine Public Utilities Commission (MPUC) by CMPC in its pending rate design case."

Copies of the application for exemption are on file with FERC and are available for public inspection. FERC's regulations require that said utility also apply to any state regulatory authority having jurisdiction over it to have the application published in any official state publication in which electric rate change applications are usually noticed, and that the utility publish a summary of the application in newspapers of general circulation in the affected jurisdiction.

Any person desiring to present written views, arguments, or other comments on the application for exemption should file such information with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, on or before 45 days following the date this notice is published in the Federal Register. Within that 45 day period, such person must also serve a copy of such comments on: Mr. Arthur W. Adelberg, Senior Counsel, Central Maine Power Company, Edison Drive, Augusta, Maine 04336.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-12233 Filed 5-30-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. GP86-12-000 and GP86-13-000]

Conoco Inc.; Petitions of Conoco Inc. for an Order of Exemption

May 23, 1986.

Take notice that on December 6, 1985, Conoco Inc. (Conoco) of P.O. Box 2197, Houston, Texas 77252, filed petitions pursuant to section 5(f)(2) of the Outer Continental Shelf Lands Act, as amended (the Act), 43 U.S.C. 1334(f)(2), for an Order exempting certain facilities jointly owned by Conoco and others from the requirements of section 5(f)(1) of the Act.

Section 5(f)(2) of the Act provides as follows:

The Federal Energy Regulatory Commission may, by order or regulation, exempt from any or all of the requirements of paragraph (1) of this subsection any pipeline or class of pipelines which feeds into a facility where oil and gas are first collected or separated, dehydrated, or otherwise processed.

In Docket No. GP86-12-000, Conoco states that it, jointly with ARCO Oil and Gas Company, Cities Service Oil and Gas Corporation and Texaco Producing Company, (CATC) owns a crude oil gathering system, operated by Conoco, which serves the Grand Isle Block 47 Field, Gulf of Mexico. The system consists of a 12-inch Nominal gathering line from Grand Isle Block 47A platform to the CATC Grand Isle Separation Station at Grand Isle, Louisiana. The system transports a mixed stream of oil, water and low pressure gas to the Grand Isle Separation Station. At the Grand Isle Separation Station, the mixed products from the 12-inch gathering line are first separated and treated.

In Docket No. GP86-13-000, Conoco states that it, jointly with ARCO Oil and Gas Company, Texaco Producing Company and Cities Service Oil and Gas Corporation (CATC) owns a crude oil gathering system, operated by Conoco, which serves the Grand Isle Blocks 40 and 43 Fields, Gulf of Mexico. The gathering line system consists of a 12-inch Nominal gathering line that extends from the Block 40B platform to Grand Isle Block 43AA platform and a 16-inch Nominal gathering line from Grand Isle Block 43AA platform to Grand Isle Separation Station, Grand Isle, Louisiana. The system transports a mixed stream of oil, water and low pressure gas from Grand Isle Block 40B platform to Grand Isle Block 43AA complex and transports a similar mixed stream including production from both Grand Isle Blocks 40 and 43 fields from that point to the CATC Separation Station at Grand Isle, Louisiana. At Grand Isle Separation Station the products of the 16-inch gathering line are first separated and treated.

These Petitions are being submitted because a number of the producing wells served by the gathering systems are nearing depletion. The capacities of the gathering lines are required for transporting the produced water to shore for disposal. Any change in the gathering systems that would necessitate offshore disposal of this water could result in a significant reduction in the economically recoverable reserves of the Grand Isle Block 47, Block 40 and Block 43 fields.

Any person desiring to be heard or to make any protests with reference to said applications should on or before June 4, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-12241 Filed 5-30-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CI63-1202-000 and CI85-1246-000]

Diamond Shamrock Exploration Co.; Application

May 23, 1986.

Take notice that on March 5, 1986, Diamond Shamrock Exploration Company (DSEC) of LTV Center Suite 1500, 2001 Ross Avenue, Dallas, Texas 75201, filed an application pursuant to §§ 157.23, *et seq.*, of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 157.23, *et seq.* (1985), requesting the Commission to amend its certificate authorizations in Docket Nos. CI63-1202 and CI85-1246 to consolidate them, add a delivery point and delete production from one well, which is on file with the Commission and open to public inspection.

On June 27, 1963, a rollover contract was executed between DSEC's predecessors and Western Gas Interstate Company (Western) incorporating both sales contracts under DSEC's Rate Schedule Nos. 19 and 22. This rollover contract was filed with the Commission under both rate schedules. Since sales of gas from acreage previously covered by both the certificate in Docket No. CI63-1202 and in Docket No. CI85-1246 are now covered by one contract, DSEC requests that the two certificates be consolidated with Docket No. CI63-1202 and Rate Schedule No. 19 being the surviving

certificate and Rate Schedule. In order to facilitate this consolidation, DSEC requests that the Commission delete all the acreage, certificated in Docket No. CI65–1246 (Rate Schedule No. 22) and amend the certificate in Docket No. CI63–1202 (Rate Schedule No. 19) to add to the acreage deleted from Docket No. CI65–1246.

On May 23, 1984, DSEC and Western entered into an amendment to the June 1963 gas contract to add a delivery point. DSEC filed the Agreement with the Commission as an amendment to both Rate Schedule Nos. 19 and 22 on July 2, 1984. The filings are still pending before the Commission. DSEC has discovered that it should have filed an application to amend the certificates to reflect the addition of a delivery point to the 1963 contract. Accordingly, DSEC requests that the Commission amend Docket No. CI63–1202 (as the surviving certificate after consolidation) to add the delivery point described in the May 1984 Amendatory Agreement.

Before the June 1963 rollover contract was executed, production from the well on Lease No. ML–3650 (Cleveland Formation, Perforation 6759' to 6797', section 58, Block 23) terminated and the well was plugged and abandoned on February 17, 1983. This lease was originally covered by the March 1963 contract under DSEC Rate Schedule No. 19. However, since the well was no longer productive when the rollover contract was executed, the well was not reflected in the leases subject to the June 1963 rollover contract. Accordingly, DSEC requests that the Commission amend the consolidated certificate in Docket No. CI63–1202 to delete production from this well.

Any person desiring to be heard or to make any protest with reference to said application should, on or before June 4, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86–12239 Filed 5–30–86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CI86–403–000]

Sonat Exploration Co.; Application

May 23, 1986.

Take notice that on May 2, 1986, Sonat Exploration Company (Sonat) of P.O. Box 1513, Houston, Texas 77251–1513, filed an application pursuant to sections 4 and 7 of the Natural Gas Act (NGA),[1] Parts 154 and 157 of the Commission's Regulations [2] and Sections 2.77 [3] and 375.307 [4] of the Commission's Regulations.

Sonat requests partial, limited-term, blanket authorization to abandon certain certificated sales of natural gas not presently being taken by interstate pipeline companies (Pipelines) to the extent Sonat obtains a contract release of such gas and a limited-term, blanket certificate of public convenience and necessity authorizing sales of natural gas in interstate commerce for resale with blanket, pre-granted abandonment authorization. The subject sales are listed in Appendix A hereto. Sonat seeks this authorization with respect to all categories of gas under the Natural Gas Policy Act of 1978 (NGPA) for the term of the Pipelines' releases. Sonat requests such abandonment and certification authorization for gas owned exclusively by Sonat and for gas owned jointly by Sonat and others produced from the same well and reservoir.[5] Sonat states that the gas for which it seeks abandonment is substantially shut-in resulting in harm to Sonat and the general public. Sonat has advised that it is not receiving payment for gas not taken. Sonat indicates that much of the shut-in gas is NGPA Section 104 gas and the remainder is NGPA Sections 102(d), 103(c) and 109 gas. Sonat states that in return for Pipelines' release of gas Sonat agrees to provide take-or-pay relief to the extent gas released is sold to another purchaser.

Any person desiring to be heard or to make any protest with reference to said application should, on or before 15 days after the date of publication of this notice in the **Federal Register**, file with the Federal Energy Regulatory Commission, Washington, DC 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP86-467-000]

Southern Natural Gas Co.; Request Under Blanket Authorization

May 23, 1986.

Take notice that on May 6, 1986, Southern Natural Gas Company (Southern), Post Office Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP86-467-000, a request pursuant to §§ 157.205 and 157.216 of the Regulations under the Natural Gas for Act authorization to abandon a certain metering facility designated as Tommy Littlepage Oil Properties (TLOP) Metering Station and related piping under authorization issued in Docket No. CP82-401-000, all as more fully set forth in the request on file with the Commission and open to public inspection.

Southern states that it sold and delivered natural gas to TLOP for use in pumping crude oil at TLOP's facilities in Jasper County, Mississippi. Southern asserts the TLOP requested Southern to cancel the underlying gas sales agreement due to the sale of TLOP's properties to Crosscreek Properties Inc. (Crosscreek). Southern further states that the engines on the oil property were converted to utilize No. 2 fuel oil and that Crosscreek informed Southern that it does not intend to resume the use of natural gas on its newly acquired properties.

Southern states that the facilities it proposes to abandon and remove include a measuring station, approximately 60 feet of 1-inch tap line and related appurtenant facilities located on Southern's South 18-inch Main Line and 24-inch Main Loop Line in Jasper County, Mississippi. Southern further states that these facilities were constructed by Southern as "budget-type" facilities pursuant to the Commission's order issued on January 6, 1970, in Docket No. CP70-04. Southern states that such construction of facilities was reported to the Commission on February 1, 1971.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. CI86-172-000 et al.]

Sun Exploration and Production Co.; Applications For Abandonment of Service

May 22, 1986.

Take notice that each of the applicants listed herein has filed an application pursuant to Section 7 of the Natural Gas Act for authorization to abandon service as described herein.

The circumstances presented in the applications meet the criteria for consideration on an expedited basis, pursuant to § 2.77 of the Commission's rules as promulgated by Order Nos. 436 and 436-A issued October 9, and December 12, 1985, respectively, in Docket No. RM85-1-000, all as more fully described in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should be on or before 15 days after the date of publication of this notice in the Federal Register, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceedings. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Kenneth F. Plumb,
Secretary.

Filing Code: A—Initial Service; B—Abandonment; C—Amendment to add acreage; D—Amendment to delete acreage; E—Total Succession; F—Partial Succession.

[1] Additional information received May 8, 1986.

[2] Applicant requests authorization to abandon the sale of surplus gas for a two-year period to Texas Gas from the W. Hebert Well No. 1 and the Bendel Heirs Well No. 2 authorized in Docket No. C86-172 and covered under Applicant's FERC Gas Rate Schedule No. 434. Applicant states that it projects that Texas Gas' takes in the first year will represent less than 10% of deliverability and takes during the second year will represent less than 15% of deliverability, however the gas will remain subject to recall by Texas Gas. Applicant states that the latest deliverability test rate for the wells was 7,650 Mcf per day and that both wells qualify for the NGPA section 104 replacement or recompletion rate. Applicant states that it is subject to substantially reduced takes without payment. Applicant states that it will sell the gas to TXG Gas Marketing Company or other purchasers.

[3] Additional material filed May 8, 1986.

[4] Applicant, a small producer certificate holder in Docket No. CS74-147, requests authorization to abandon its sales to United under an expired contract dated March 1, 1981, from the C.J. Coulon No. 6-D well and the C.J. Coulon No. 8 well. Applicant states both wells qualify under the NGPA section 108. Applicant estimates production for the next five years would amount to 456 MMcf and states that it is subject to substantially reduced takes without payment. Applicant desires to conduct production enhancement which would result in estimated production of approximately 1,032 MMcf. Applicant states it proposes to sell the gas to Entrade Corporation, which has indicated to Applicant that it is willing to commence meaningful takes of gas and to pay a production enhancement price for the gas so qualifying.

[5] Applicant, a small producer certificate holder in Docket No. CS78-27, requests authorization to abandon the sale of gas to United for a two and one-half year period from the LaTerre Co., Inc. No. 2 well, which Applicant states produces NGPA section 104-post 1974 gas. Applicant states that the contract expired on July 16, 1985, and that Applicant is subject to substantially reduced takes without payment. Applicant states that total deliveries from the well averaged 350 Mcf per day for the last six months. However, only 14.24% (50 Mcf per day) is dedicated to United. Applicant states that it desires to seek other markets for this gas.

[FR Doc. 86-12085 Filed 5-30-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA86-2-49-002]

Williston Basin Interstate Pipeline Co.; Tariff Change

May 22, 1986.

Take notice that on May 15, 1986, Williston Basin Interstate Pipeline Company (Williston Basin), Suite 200, 304 East Rosser Avenue, Bismarck, North Dakota 58501, submitted the following tariff sheets for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, Original Volume No. 1-A, and Original Volume No. 2:

First Revised Volume No. 1

Fourth Substitute Original Sheet No. 10
Second Substitute Original Sheet No. 91
Second Substitute Original Sheet No. 96
Second Substitute Original Sheet No. 97
Original Sheet No. 98A

Original Volume No. 1-A

Original Sheet No. 275A
Original Sheet No. 275B
Substitute First Revised Sheet No. 276
Substitute First Revised Sheet No. 277

Original Volume No. 2

Fifth Substitute Third Revised Sheet No. 10
Fifth Substitute Third Revised Sheet No. 11
Third Revised Sheet No. 12

These tariff sheets were submitted in compliance with the Commission's Order in *Williston Basin Interstate Pipeline Company*, 35 FERC ¶ 61,133 (1986).

In addition, the Third Revised Sheet No. 12 of Original Volume No. 2, had previously inadvertently been omitted from the original filing in this docket. This sheet shows that the projected incremental pricing surcharges are zero for all purchasers for the period May, 1986 through October, 1986.

The effect for this compliance filing is to reduce the cumulative gas cost adjustment by 1.365 cents per Dkt and increase the surcharge adjustment by 0.06 cents per Dkt from the PGA as filed on March 31, 1986. The net change is a decrease of 1.305 cents per Dkt from the original filing.

Williston Basin requests that the proposed effective date for these tariff sheets be May 2, 1986, to coincide with the effective date provided for in the Commission's Order in this docket.

Pursuant to § 375.307(j) of the Commission's Regulations, Williston Basin respectfully requests waiver of section 4(d) of the Natural Gas Act and Commission's Regulations thereunder, so that the attached tariff sheets may become effective on May 2, 1986, as proposed herein.

Any person desiring to be heard or to make any protest with reference to said filing should, on or before May 29, 1986, file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 9044-000 9160-000]

Fredrick Earl Pickering and Glenwood Springs Power Co.; Availability of Environmental Assessment and Finding of no Significant Impact

May 27, 1986.

In accordance with the National Environmental Policy Act of 1969, the Office of Hydropower Licensing, Federal Energy Regulatory Commission (Commission), has reviewed the applications for major and minor licenses (or exemptions) listed below and has assessed the environmental impacts of the proposed developments.

Project No.	Project name	State	Water body	Nearest town	Applicant
			Exemptions		
9044-000	Bigg's Creek	WA	Bigg's Creek	Yacolt	Fredrick Earl, Pickering.
9160-000	Twin Tunnels	CO	No Name Creek	City of Glenwood Springs	Glenwood Springs Power Company.

Environmental assessments (EA's) were prepared for the above proposed projects. Based on independent analyses of the above actions as set forth in the EA's, the Commission's staff concludes that these projects would not have significant effects on the quality of the human environment. Therefore, environmental impact statements for these projects will not be prepared. Copies of the EA's are available for review in the Commission's Division of

Public Information, Room 1000, 825 North Capitol Street NE., Washington, DC 20426.

BILLING CODE 6717-01-M

[Project Nos. 8725-000 et al.]

Hydroelectric Applications (Elektra Power Corp. et al.); Applications Filed With the Commission

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1 a. Type of Application: Major License.

b. Project No.: 8725-001.

c. Date Filed: May 28, 1985.

d. Applicant: Elektra Power Corporation.

e. Name of Project: North Fork Battle Creek Water Power Project.

f. Location: On North Fork Battle Creek, near town of Manton, in Shasta County, California (In sections 19, 20, 21, 29, and 30 of T30N, R1E, MDB&M; in section 25 of T30N, R1W, MDB&M).

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Contact Person: Mr. D. Dixon Collins, Elektra Power Corporation, 744 San Antonio Road, Palo Alto, CA 94303.

i. Comment Date: June 26, 1986.

j. Competing Application: Project No. 8724-001, Date Filed: June 7, 1985, Due Date: May 30, 1986.

k. Description of Project: The proposed project would consist of: (1) An 8-foot-high, 48-foot-long diversion dam at elevation 1,860 feet: (2) a 66-inch-diameter, 13,100-foot-long diversion pipeline; (3) a 66-inch-diameter, 900-foot-long steel penstock; (4) a powerhouse containing one generating unit with an installed capacity of 4.96 MW operating under a head of 401 feet; and (5) a 1.5-mile-long, 12-kV transmission line to connect to an existing Pacific Gas and Electric Company's (PG&E) line. The estimated annual generation of 20 million kWh will be sold to PG&E. The project cost is estimated at $8.0 million. The Applicant does not propose any recreational facilities within the project area.

l. This notice also consists of the following standard paragraphs: A4, B, C, and D1.

2a. Type of Application: Conduit Exemption.

b. Project No: 9902-000.

c. Date Filed: October 15, 1985.

d. Applicant: Costa Real Municipal Water District.

e. Name of Project: Squires Dam.

f. Location: On the Applicant's domestic water supply conduit which delivers water from the San Diego County Water Authority connection No. 3 on the Tri-Agencies Pipeline to the Squires Dam Reservoir, near Carlsbad, in San Diego County, California.

g. Filed Pursuant to: Section 30 of the Federal Power Act, 16 U.S.C. 823(a).

h. Contact Person: Mr. William Meadows, General Manager, Costa Real Municipal Water District, 5950 El Camino Real, Carlsbad, CA 92008, (619) 436-2722.

i. Comment Date: June 30, 1986.

j. Description of Project: The proposed project would utilize the Applicant's existing conduit which feeds the Squires Dam Reservoir and would consist of a powerhouse containing a single turbine-generator unit with a rated capacity of 40 kW operating under a head of 325 feet. A 0.2-kV, 75-foot-long transmission line would connect the project to an existing radio transmitter. The project's estimated average annual generation of 182,000 kWh would be used by a local commerical radio station and the Applicant's Squires Dam caretaker residence.

k. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D3b.

Standard Paragraphs:

A3. Development Application—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted in response to this notice.

A4. Development Application—Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, any

competing development applications or notices of intent to file competing development applications, must be filed in response to and in compliance with the public notice of the initial development application. No competing applications or notices of intent may be filed in response to this notice.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to: Mr. Fred E. Springer, Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203–RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the applicant specified in the particular application.

D1. *Agency Comments*—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in section 30 of the Federal Power Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State,and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: May 27, 1986.

[redacted] F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. QF86–721–000]

J.A. Jones Construction Co.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

May 23, 1986.

On May 8, 1986, J.A. Jones Construction Co. (Applicant), of One South Executive Park, 6060 St. Albans Street, Charlotte, North Carolina 28287, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located at the Fort Drum Army Base in Fort Drum, New York. The facility will consist of three coal and wood chip fired circulating fluidized bed steam generators, and an extraction/condensing turbine generator. A portion of the extracted steam will be utilized for high temperature water production, for sale to the Fort Drum Army Base for its domestic uses. The net electric power production capacity of the facility will be approximately 44.9 MW. The installatin of this facility will begin approximately in November 1986.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CF86-726-000]

Prime Energy Limited Partnership; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

May 20, 1986.

On May 2, 1986, Prime Energy Limited Partnership (Applicant), of 95 Madison Avenue, Morristown, New Jersey 07960, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located at Marcal Paper Mills, Inc. in Elmwood Park, New Jersey. The facility will consist of a combustion turbine generator, a waste heat recovery steam generator (HRSG) and an automatic extraction/condensing steam turbine generator. The steam from HRSG will be utilized by Marcal Paper Mills, Inc. in the manufacturing of paper products. The primary energy source will be natural gas. The maximum electric power production capacity of the facility will be 70 MW. Construction of the facility is expected to begin in December 1986.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[Docket No. CF86-725-000]

Stone & Webster Development Corp.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

May 27, 1986.

On May 8, 1986, Stone & Webster Development Corporation (Applicant), of P.O. Box 2325, Boston, Massachusetts 02107, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located at Groton, Connecticut and will consist of two combustion turbine generating units and one or more waste heat recovery steam generators. Thermal energy recovered in the form of steam will be used within a chemical plant for process and heating purposes. The electric power production of the facility will be approximately 78 MW. The installation of the facility is scheduled to begin February 1986.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket Nos. ER86-497-000 et al.]

Arizona Public Service Co. et al.; Electric Rate and Corporate Regulation Filings

Take notice that the following filings have been made with the Commission:

1. Arizona Public Service Company

[Docket No. ER86-497-000]

May 23, 1986.

Take notice that Arizona Public Service Company (APS) on May 19, 1986, tendered for filing a Wholesale Power Agreement and a Wheeling and Administrative Service Agreement between Arizona Public Service Company (APS) and Electrical District No. 7 (ED-7).

It is intended that these new Agreements supersede the terms and conditions for service presently being rendered under a Letter Agreement (FERC Rate Schedule No. 124) scheduled to terminate on June 21, 1986. The rates for services to be rendered remain unchanged from those presently in effect.

APS requests an effective date of June 21, 1986.

Copies of this filing have been served upon and the Arizona Corporation Commission, ED-7 and legal counsel for ED-7.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. Central Power and Light Company

[Docket No. ER86-495-000]

Take notice that on May 19, 1986, Central Power and Light Company ("CPL") tendered for filing a letter agreement dated May 15, 1986, between the Public Utilities Board of the City of Brownsville, Texas ("PUB") and CPL. The Letter Agreement provides for the sale by CPL to PUB of capacity and energy, or energy, when Oklaunion Unit No. 1 (to be jointly owned by CPL, PUB and others) is not in service for other than economic reasons. The Letter Agreement will constitute an integral part of the coordination and interchange agreement currently in effect between CPL and PUB. CPL asks that the Letter Agreement be made effective as of the commercial operation date of Oklaunion Unit No. 1, now anticipated to occur in December 1986, and, accordingly, CPL requests waiver of the notice requirements under the Federal Power Act. Copies of the filing have been served on PUB and the Public Utility Commission of Texas.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this document.

3. Cliffs Electric Service Company

[Docket No. ER86-491-000]

Take notice that on May 19, 1986,

Cliffs Electric Service Company ("Service Company") submitted for filing an Interconnection and Energy Agreement with the Board of Light and Power City of Marquette, Michigan. The agreement supersedes an earlier agreement and adds several new coordination services.

Service Company requests that the filing be permitted to become effective on April 1, 1986.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

4. Consumers Power Company

[Docket No. ER86-493-000]

Take notice that Consumers Power Company ("Consumers") on May 19, 1986 tendered for filing annual redetermination of two revisions to annual charges due Consumers Power Company under interconnection facilities agreements. One of the revised charges is provided for in subsection 2.4 of the Blendon Interconnection Facilities Agreement (designated as Supplement 3 to Consumers Power Company Electric Rate Schedule FERC No. 53) between Consumers and Wolverine Power Supply Cooperative, Inc. ("Wolverine"). The other revised charge is provided for in subsection 1.043 of the Barton Lake—Batavia Interconnection Facilities Agreement (designated as Consumers Power Company Electric Rate Schedule FERC No. 44) between Consumers and Northern Indiana Public Service Company ("Northern").

Both redeterminations were performed using year-end 1985 data with the new annual charges effective May 1, 1986. As a result of the redeterminations, the monthly charges to be paid by Wolverine were reduced from $7,857 to $7,278, and the monthly charges to be paid by Northern were reduced from $22,007 to $20,388.

Consumers requests an effective date of May 1, 1986, and therefore requests waiver of the Commission's notice requirements.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

5. Consumers Power Company

[Docket No. ER86-494-000]

Take notice that Consumers Power Company ("Consumers") on May 19, 1986 tendered for filing Amendment No. 30, dated April 1, 1986, to the Operating Agreement, dated March 1, 1966, among Consumers Power Company, The Detroit Edison Company sometimes collectively referred to as the "Michigan Companies", and Indiana & Michigan Electric Company. The Commission has previously designated the 1966 Agreement as Consumers' Rate Schedule FPC No. 23, Detroit's Rate Schedule FPC No. 12 and Indiana Company's Rate Schedule FPC No. 68.

Amendment No. 30 provides for an extension of the term of Service Schedule J—Experimental Off-Peak Transmission Service. The extension is for a period of nine months (until December 31, 1986).

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

6. CP National Corporation and Nevada Power Company

[Docket No. ER86-30-000]

Take notice that on May 19, 1986, CP National Corporation ("CP National") and Nevada Power Company ("Nevada Power") filed a joint application pursuant to Section 203 of the Federal Power Act for authorization for CP National to sell, and Nevada Power to buy, CP National's electric distribution system located in Clark County, Nevada.

CP National, incorporated in the State of California, provides electric, telephone, and natural gas distribution services in Arizona, California, Nevada, New Mexico, Oregon, Texas and Utah. Nevada Power, incorporated in the State of Nevada, is an operating public utility engaged in the electric utility business in the City of Las Vegas and vicinity in Southern Nevada.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of third notice.

7. Florida Power Corporation

[Docket No ER86-396-000]

Take notice that on May 19, 1986, Florida Power Corporation (Florida Power) tendered for filing information intended to supplement its April 9, 1986, filing at the above docket. The information consists of supplemental testimony explaining the derivation of the excess demand rate.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

8. Florida Power Corporation

[Docket No. ER 86-489-000]

Take notice that on May 15, 1986, Flordia Power Corporation (Florida Power) tendered for filing a Letter of Commitment dated April 28, 1986 providing for a commitment of 18MW of firm interchange service from Florida Power to the City of St. Cloud, Florida. Florida Power states that the Letter of Commitment is executed pursuant to Service Schedule D of the Contract for Interchange Service dated December 1, 1981 between Florida Power and the City of St. Cloud. The contract is designated as Florida Power's Rate Schedule FERC No. 95. The Letter for Commitment, which supersedes and replaces a letter of commitment dated January 18, 1985, is submitted for inclusion as a supplement to Service Schedule D.

Florida Power requests that the Letter of Commitment be permitted to become effective May 1, 1986, and therefore, requests waiver of the sixty day notice requirement. Copies of this filing have been served upon the City of St. Cloud and the Florida Public Service Commission.

Comment date: June 5, 1986, in acordance with Standard Paragraph E at the end of this notice.

9. Idaho Power Company

[Docket No. ER86-487-000]

Take notice that on May 15, 1986, the Idaho Power Company tendered for filing in compliance with the Federal Energy Regulatory Commission's Order of October 7, 1978, a summary of sales made under the Company's 1st Revised FERC Electric Tariff, volume No. 1 (Supersedes Original Volume No 1) during March 1986, along with cost justification for the rate charged. This filing includes the following supplements:

Utah Power & Light Company—Supplement No 52
Montana Power Company—Supplement No 40
Pacific Power & Light Company—Supplement No 17
Sierra Pacific Power Company—Supplement No 49
Portland General Electric Company—Supplement No 45
Puget Sound Power & Light Company—Supplement No 21

Comment date: June 5, 1986, in accordance with Standard Paragraph H at the end of this notice.

10. Iowa-Illinois Gas and Electric Company

[Docket No. ER86-492-000]

Take notice that Iowa-Illinois Gas and Electric Company, Davenport, Iowa (Iowa-Illinois) on May 19, 1986, tendered for filing Transmission Service Schedule No. 3 (Hills Substation-345-161 kV transformer), a superseding Service Schedule D addendum, dated April 15, 1986, under the Interconnection Agreement dated June 13, 1983 with Central Iowa Power Cooperative, Cedar Rapids, Iowa (Cooperative).

Transmission Service Schedule No. 3 is stated to be occasioned by, and proposed to be effective as of, the December 13, 1985 completion and relocation of certain facilities of Iowa

Electric Light and Power Company, under separate arrangements with Iowa-Illinois, and waiver of the notice requirements is sought accordingly. (It is explained that Cooperative no longer requires transformation services through the same transformer heretofore provided by Iowa-Illinois for other purposes, so that Transmission Service Schedule No. 2, dated June 13, 1983 would be superseded.) Iowa-Illinois states Transmission Service Schedule No. 3 provides for 345–161 kV transformation only to maintain, through other of Iowa-Illinois facilities, a transmission path for continued viability of arrangements in place under the Interconnection Agreement in respect of a 69 kV terminating bay provided by Iowa-Illinois for Cooperative's use.

Iowa-Illinois states a complete copy of the filing has been mailed to Cooperative, the Iowa State Commerce Commission, and the Illinois Commerce Commission.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

11. Monongahela Power Company

[Docket No. ER86-379-000]

Take notice that Monongahela Power Company, on April 24 and May 20, 1986, tendered amendments to its filing of proposed changes in its FERC Electric Tariff, Original Volume No. 1, originally tendered for filing on March 28, 1986.

The amendments are for the purpose of responding to concerns raised in the Commission's letter of April 24, 1986.

Copies of the filing were served upon the jurisdictional customers and the West Virginia Public Service Commission.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

12. Ohio Power Company

[Docket No. ER86-489-000]

Take notice that American Electric Power Service Corporation (AEP) on May 20, 1986, tendered for filing on behalf of its affiliate Ohio Power Company (OPCO) Supplement No. 10 dated May 1, 1986 to the Agreement dated April 1, 1974 between American Municipal Power-Ohio, Inc. (AMPO) and OPCO. OPCO and AMPO are sometimes collectively referred to as the Parties. The Commission has previously designated this Agreement as OPCO Rate Schedule FERC No. 74 and AMPO Rate Schedule FERC No. 1.

Supplement No. 10 adds a new Service Schedule E—Interchange Power to the 1974 Agreement, which contains provision for the sale of Economy Energy and Non-displacement Energy. Furthermore, this Supplement increases OPCO's transmission demand rate for Emergency Energy to 2.75 mills/kWH. In addition, this Supplement revises the Parties' Short Term Power Service Schedule by adding provisions for a rate of "up to" the Parties' respective generation demand and energy rates and establish a lower limit of total revenue realization for any transaction as 110% of OPC, which represents OPCO's currently approved rate for Non-Displacement Energy transactions. OPCO's proposed Emergency, Interchange Power, and Short Term Power rates contained in Supplement No. 10 have previously been accepted for filing by the Federal Energy Regulatory Commission in various other OPCO filings.

AEP has requested the Commission to waive any requirements not already complied with under § 35.13 of the Commission's Regulations and permit this Supplement to become effective immediately.

Copies of this filing were served upon the Public Utilities Commission of Ohio and AMPO.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

13. Pacific Gas and Electric Company

[Docket No. ER86-488-000]

Take notice that on May 15, 1986, Pacific Gas and Electric Company (PGandE) tendered for filing an initial rate schedule for metering services provided under Article 28 of Contract 14–06–200–2948A (Contract 2948A) between Pacific Gas and Electric Company and the Western Area Power Administration (Western).

Contract 2948A is on file with the Commission. Article 28(b) of Contract 2948A includes a mechanism whereby PGandE performs metering service for Western at various Western customer sites. This filing establishes an initial rate for metering charges at customer sites not included in previously filed letter agreements, and establishes the sites to be metered during the five-year period beginning April 1, 1986.

The parties have recently concluded the negotiations for the rates and meter sites contained herein. Therefore, pursuant to § 35.11 of the Commission's Regulations, PGandE respectfully requests waiver of the Commission's notice requirements so as to permit an effective date of March 1, 1982. No customer under any other rate schedules will be affected if such waiver is granted.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

14. Pacific Gas and Electric Company

[Docket No. ER86-490-000]

Take notice that on May 20, 1986, Pacific Gas and Electric Company (PGandE) tendered for filing changes to rate schedules covering services rendered by PGandE under two agreements, the "Interconnection Agreement Between Pacific Gas and Electric Company and the City of Santa Clara" (Santa Clara Interconnection Agreement) and the "Interconnection Agreement Between Pacific Gas and Electric Company and the Northern California Power Agency, City of Alameda, City of Biggs, City of Gridley, City of Healdsburg, City of Lodi, City of Lompoc, City of Palo Alto, City of Roseville, City of Ukiah and Plumas Sierra Rural Electric Cooperative" (NCPA Interconnection Agreement) (together referred to as Interconnection Agreements). The Santa Clara Interconnection Agreement was filed initially under Docket No. ER81-6-000 and was assigned FERC Rate Schedule No. 85. The NCPA Interconnection Agreement was filed initially under Docket No. ER83-683-000 and was assigned FERC Rate Schedule No. 84.

The Interconnection Agreements provide for firm transmission service between Points of Receipt and Points of Delivery. The City of Santa Clara (Santa Clara) wishes to include new Points of Receipt and Delivery at PGandE's—Tesla Substation (Tesla), and to increase the Contract Coincident Rate of Delivery and the Maximum Rate of Delivery at Santa Clara. The Northern California Power Agency (NCPA) wishes to include new Points of Receipt and Delivery at Tesla. The new Points of Receipt and Delivery at Tesla will allow Santa Clara and NCPA to import power over the existing Pacific Northwest-Southwest Intertie pursuant to an assignment between the Sacramento Municipal Utility District (SMUD) and Santa Clara, acting for itself and agent for NCPA, for transmission service on the Intertie (SMUD-Santa Clara Assignment). In order for Santa Clara and NCPA to fully utilize this service PGandE requests an effective date of May 9, 1986.

In accordance with the SMUD-Santa Clara Assignment, PGandE requests that the Points of Receipt and Delivery at Tesla for both Santa Clara and NCPA be effective only until the earliest of the following:

(1) January 1, 1998;

(2) The date when the California-Oregon Transmission Project (Project) becomes operational;

(3) The date when the participation of PGandE, Southern California Edison Company (SCE) and San Diego Gas and Electric Company (SDGandE) in the Project is terminated because the approvals under Section 11.4 of the Project's Memorandum of Understanding dated December 18, 1984 cannot be obtained or because those approvals are unsatisfactory to PGandE, SCE, and SDGandE; or

(4) The date when the Project is terminated prior to its operation, such termination to be deemed to have occurred on January 1, 1993 if no work has been done on the Project for three years prior to that date.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

15. Pacific Power & Light Company, an Assumed Business Name of PacifiCorp

[Docket No. ER86-490-000]

Take Notice that Pacific Power & Light Company (Pacific), an assumed business name of PacifiCorp, on May 19, 1986, tendered for filing a Revised Exhibit B, dated October 1, 1985, to Pacific's Rate Schedule FERC No. 213. Rate Schedule FERC No. 213 provides for the transfer of Deseret Generation & Transmission Co-operative (Deseret) power and energy to Bridger Valley Electric Association, Inc. (Bridger Valley) Blacksfork Substation by Pacific.

Each year a Revised Exhibit B is submitted by Deseret and Bridger Valley to Pacific in accordance with Article 12(ii) of the May 29, 1961 Transmission Agreement.

Copies of the filing were supplied to Deseret, Bridger Valley, and the Wyoming Public Service Commission.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

16. Southern California Edison Company

[Docket No. ER86-490-000]

Take notice that, on May 15, 1986, Southern California Edison Company ("Edison") tendered for filing an agreement entitled "Edison-Citizens Short-Term Service Agreement", which has been executed by Edison and the Citizens Utilities Company ("Citizens").

Under the terms and conditions of the Agreement, Edison will make available to Citizens Firm System Capacity and Associated Energy for the period May 15, 1986, through September 30, 1986.

The Agreement is proposed to become effective when executed by the Parties and on the later of May 15, 1986 or the date of acceptance for filing by the Commission.

Copies of this filing were served upon the Public Utilities Commission of the State of California and the Citizens Utilities Company.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

H. Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, on or before the comment date. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

9849-000	Augusta	CO	Lake Fork of the Gunnison River	Lake City	John C. Stevens

Environmental assessments (EA's) were prepared for the above proposed projects. Based on independent analyses of the above actions as set forth in the EA's, the Commission's staff concludes that these projects would not have significant effects on the quality of the human environment. Therefore, environmental impact statements for these projects will not be prepared.

Copies of the EA's are available for review in the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, DC 20426.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-010945.

Title: Philadelphia Port Corporation Terminal Agreement.

Parties:

Philadelphia Port Corporation (Lessor).

Lavino Shipping Company (Lavino).

Delaware Operating Company (DOC).

Synopsis: The proposed agreement will assign to DOC all of Lavino's rights, titles and interest in, to and under the leases between the Lessor and Lavino. Lavino will remain fully liable to the Lessor in respect to all covenants and obligations to be kept and performed by Lavino under the leases. The parties have requested a shortened review period.

Agreement No.: 224-010946.

Title: Brazos River Harbor Navigation District of Brazoria County, Texas and American Rice, Inc. Ground Lease and Definitive Agreement.

Parties:

Brazos River Harbor Navigation District of Brazoria County, Texas (Lessor).

American Rice, Inc. (Lessee).

Synopsis: The proposed agreement would permit the Lessor to purchase, construct, enlarge, extend, repair, maintain, operate, and develop wharves, docks, appurtenant facilities, and all other facilities or aids incidental to or useful in the operation and development of Lessor's ports and waterways and to prescribe and collect fees and charges for the use of Lessor's land, improvements, and facilities. The initial term of this lease shall be for a period of thirty-five years. At the option of Lessee, the lease may be extended for seven (7) additional terms of five (5) years each. The parties have requested a shortened review period.

Agreement No.: 224-010946-001.

Title: Brazos River Harbor Navigation District of Brazoria County, Texas and American Rice, Inc. Ground Lease and Definitive Agreement.

Parties:

Brazos River Harbor Navigation District of Brazoria County, Texas.

American Rice, Inc.

Synopsis: The proposed amendment would modify the Mortgage and Estoppel Affidavit provisions of the lease, with all other terms and conditions remaining in force. The parties have requested a shortened review period.

Agreement No.: 224-010947.

Title: Los Angeles Terminal Agreement.

Parties:

The City of Los Angeles.

Korea Shipping Corporation (KSC).

Synopsis: The proposed agreement would permit the relocation of KSC From Berths 87-90 in the Port of Los Angeles to Berths 127-131. KSC would have preferential use of Berths 127 and 128, the secondary right to use Berths 129-131 and non-exclusive use of 29.2 acres of backland. The proposed agreement would supersede Agreement No. 224-010845.

Agreement No.: 224-010948.

Title: The City of Los Angeles Crane Assignment Agreement.

Parties:

City of Los Angeles (City).

Korea Shipping Line Corp. (Assignee).

Synopsis: The proposed agreement would establish a nonexclusive preferential assignment whereby the City would allow the Assignee the preferential right to use Crane Nos. 2 and 11 and the secondary right to use Crane No. 1. The Assignee agrees to pay Tariff No. 3 charges for Crane No. 1, a fixed monthly payment of $23,067 for Crane No. 2 and a fixed monthly payment of $27,390 for Crane No. 11. Assignee would pay the City for all maintenance and electrical costs associated with Crane Nos. 2 and 11.

By Order of the Federal Maritime Commission.

Dated: May 27, 1986.

Tony P. Kominoth,

Assistant Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

First Rainsville Bancshares, Inc.; Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such

as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 18, 1986.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *First Rainsville Bancshares, Inc.*, Rainsville, Alabama; to engage directly in the sale of credit life, accident and health, and unemployment insurance directly related to the extensions of credit, pursuant to § 225.25(b)(8) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, May 27, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Hartford National Corp. et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than June 20, 1986.

A. Federal Reserve Bank of Boston (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Hartford National Corporation*, Hartford, Connecticut; to acquire 100 percent of the voting shares of First/Martha's Vineyard Bancorporation, Vineyard Haven, Massachusetts, and thereby indirectly acquire First Bank, Chelmsford, Massachusetts.

B. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *First Vernon Bancshares, Inc.*, Vernon, Alabama; to become a bank holding company by acquiring 80 percent of the voting shares of The Bank of Vernon, Vernon, Alabama.

2. *Hibernia Corporation*, New Orleans, Louisiana; to merge with South Louisiana Financial Corporation, Houma, Louisiana; and thereby indirectly acquire South Louisiana Bank, Houma, Louisiana.

Hibernia Corporation, New Orleans, Louisiana has also applied to acquire 25 percent of the voting shares of South Louisiana Financial Corporation, Houma, Louisiana. Comments on these applications must be received not later than June 23, 1986.

C. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *National City Bancshares, Inc.*, Evansville, Indiana; to acquire 100 percent of the voting shares of Chandler State Bank, Chandler, Indiana.

Board of Governors of the Federal Reserve System, May 27, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 4310-84-M

Vermilion Cliffs Plan Amendment; ACEC and RNA Proposed; Kane County, UT

AGENCY: Bureau of Land Management, Interior.

ACTION: Plan amendment notice; proposed Area of Critical Environmental Concern and Research Natural Area.

SUMMARY: The Cedar City District of the Bureau of Land Management proposes to amend the Vermilion Cliffs Management Framework Plan (1979). The original plan did not call for

environmental protection for the Water Canyon/South Fork Indian Canyon as an ACEC or for protection for No Man's Mesa as a Research Natural Area. A nomination for ACEC and RNA was received from The Nature Conservancy. The Bureau reviewed the proposals and applied the evaluation criteria and concluded that the proposals have merit. Because these proposals do not conform to the existing plan, it is proposed that the plan be amended by environmental assessment. This constitutes notice that a draft plan amendment and environmental assessment is available for review at the offices listed below. The public may comment on the amendment and designations for 30 days following publication of this notice.

The proposed ACEC will be called the Water Canyon/South Fork Indian Canyon ACEC. The proposed ACEC is located in portions of sections 17, 20, 21, 29, 30, and 32 of Township 43 South, Range 7 West, Salt Lake Base and Meridian (SLB&M). The proposed ACEC would cover 285 acres of Bureau administered public lands and has unique vegetative values. Within its boundaries, the proposed ACEC has a municipal water source for the town of Fredonia, Arizona. Proposed management calls for withdrawal of public lands within the area from mineral location under the 1872 Mining Law, and continuation of the present off-road vehicle limitation to existing roads and trails. Future oil and gas leases in the area will be in a no surface occupancy leasing category. Additionally, no actions would be allowed that would alter the existing vegetation and water resources.

The proposed No Man's Mesa RNA would encompass 1,335 acres of public land administered by the Bureau of Land Management. The RNA is located in sections 9, 10, 14, 15, 22, 23, 26 and 27 of Township 40 South and Range 3 West, Salt Lake Base and Meridian (SLB&M). The proposed RNA is an isolated mesa three miles in length. The area is valuable as a scientific reference point for its "relict" plant communities. Future management calls for restrictions on 180 acres under no surface occupany oil and gas leasing category. This restriction would bring the entire area under the no surface occupancy oil and gas leasing category. Ten acres of off road vehicle restrictions, limited to existing roads and trails, would be added to place the entire RNA under this restriction. The area will also be withdrawn from mineral location under the 1872 Mining Law.

The environmental assessment and plan amendment are available at the Kanab Resource Area at 320 North 100 East, Kanab, Utah and at the Cedar City District Office at 1579 North Main Street, Cedar City, Utah. The environmental assessment and plan amendment was prepared and reviewed by an interdisciplinary team of minerals, vegetation, wildlife, recreation, soils, and watershed specialists.

DATE: The comment period will be open for 60 days following the publication of this notice. At the end of the comment period, a decision notice will be issued subject to a 30 day protest period.

FOR FURTHER INFORMATION CONTACT: Ken Knowles, Assistant Area Manager at the Kanab Resource Area Office.

Dated: May 23, 1986.

Morgan S. Jensen,

District Manager.

BILLING CODE 4310-DQ-M

California; Proposed Reinstatement of Terminated Oil and Gas Lease

Under the provisions of Pub. L. 97-451, a petition for reinstatement of oil and gas lease CA 10613 for lands in Kern County, California, was timely filed and was accompanied by all required rentals and royalties accruing from January 1, 1986, the date of termination.

No valid lease has been issued affecting the lands. The Lessee has agreed to new lease terms for rentals and royalties at rates of $5.00 per acre and 16⅔%, respectively. Payment of a $500.00 administrative fee has been made.

Having met all the requirements for reinstatement of the lease as set out in section 31(d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease effective January 1, 1986, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above, and the reinbursement for cost of publication of this notice.

Dated: May 22, 1986.

Joan B. Russell,

Chief, Leasable Minerals Section, Branch of Lands & Minerals Operations.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

[Amdt. No. 6]

Pacific Inland Tariff Bureau-Agreement; Section 5a Application No. 22 [1]

AGENCY: Interstate Commerce Commission.

ACTION: Notice of decision and request for comment.

SUMMARY: Pacific Inland Tariff Bureau (PITB) has filed, pursuant to section 14(e) of the Motor Carrier Act of 1980 (MCA), an application for approval of its ratemaking agreement under 49 U.S.C. 10706(b). Since some modifications are required before the agreement receives final approval, and because new and complex questions are involved in determining whether the agreement is consistent with the MCA, the Commission solicits public comment on its interpretation and application of specific rate bureau provisions. Copies of PITB's proposed amended agreement are available for public inspection and copying at the Office of the Secretary, Interstate Commerce Commission, 12th St. and Constitution Ave., NW., Washington, DC 20423, and from PITB's representatives:

Bryce Rea, Jr., Patrick McEligot, Rea, Cross & Auchincloss, 700 World Center Building, 918—16th Street, NW., Washington, DC 20006;

John R. Campbell, Executive Director, Pacific Inland Tariff Bureau, 1732 NW Quimby Street, Portland, OR 97209.

Copies of the complete Commission decision are available for inspection and copying at the Interstate Commerce Commission, or may be purchased from TS Infosystems, Inc., Room 2229, Interstate Commerce Commission Building, 12th St. and Constitution Ave., NW., Washington, DC 20423; or call toll free (800) 424–5403, or (202) 289–4357 in the Washington, DC metropolitan area.

DATES: Comments from interested persons are due on July 2, 1986. Replies are due on July 17, 1986.

ADDRESS: An original and 10 copies, if possible, of comments should be sent to: Section 5a Application No. 55, Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

Paul Markoff (202) 275–7925;

or

Louis E. Gitomer (202) 275–7691.

SUPPLEMENTARY INFORMATION: Pacific Inland Tariff Bureau (PITB) has filed an application for approval of its proposed amended collective ratemaking agreement as required by section 14(e) of the Motor Carrier Act of 1980, Pub. L. 96–296 (1980) (MCA). Since filing its application, PITB has been obligated to observe the requirements of the MCA and the standards set forth in our decision implementing section 14, found in Ex Parte No. 297 (Sub-No. 5), *Motor Carrier Rate Bureaus—Implementation of Pub. L. 96–296*, 364 I.C.C. 464 (1980), and 634 I.C.C. 921 (1981).

We have provisionally approved PITB's agreement as consistent with 49 U.S.C. 10706(b) and Ex Parte No. 297 (Sub-No. 5), *supra*, subject to certain modifications including the following subject areas: Identification and description of member carriers; right of independent action; employee docketing; open meeting; proxy voting; final disposition of cases; single-line rates; general increases and decreases; and zone of rate freedom and released rates. We have also offered comments and imposed requirements concerning the agreement generally. PITB has been directed to file a revised agreement conforming to the imposed conditions within 120 days of service of the decision provisionally approving the agreement.

In light of the complexity of interpretation involved in determining whether the agreement is consistent with the MCA and Ex Parte No. 297 (Sub-No. 5), *supra*, we request applicant and other interested parties to comment on our interpretation of the controlling statutory administrative criteria generally, and their application to PITB's agreement in particular.

A copy of any comments filed with the Commission shall also be served on PITB, which shall have 15 days from the expiration of the comment period to reply. These comments will be considered in conjunction with our review of the modifications that PITB must submit to the Commission as a condition to final approval of its agreement.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

This notice and accompanying decision are issued pursuant to 49 U.S.C. 10321 and 10706 and 5 U.S.C. 553.

Decided: May 23, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioner Sterrett, Andre, and Lamboley.

James H. Bayne,
Secretary.

Lodging of Consent Decree Pursuant to the Clean Air Act; Lehigh Portland Cement Co.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby

given that on May 19, 1986, a proposed Consent Decree in *United States* v. *Lehigh Portland Cement Co.*, Civil Action No. 2C 84-3030, was lodged with the United States District Court for the Northern District of Iowa. The proposed Consent Decree concerns emissions of dust from nonpoint sources, and the opacity of emissions from a cement kiln, at the defendant's Mason City, Iowa cement plant. The proposed Consent Decree requires the defendant to take certain measures to ensure compliance with Iowa Admin. Code Rule 23(2)(c)(2), which prohibits emissions of dust from nonpoint sources unless reasonable precautions to prevent such emissions are taken, and 40 CFR 60.62(a)(2), which prohibits emissions of greater than 20% opacity from cement kilns.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Lehigh Portland Cement Co.*, D.J. Ref. 90-5-2-1-664.

The proposed Consent Decree may be examined at the office of the United States Attorney, Northern District of Iowa, 101 First Street SE., Federal Building and Old Post Office, Cedar Rapids, Iowa 52401 and at the Region VII Office of the Environmental Protection Agency, 726 Minnesota Avenue, Kansas City, Kansas 66101. Copies of the Consent Decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.80 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

F. Henry Habicht II,
Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Bureau of Justice Statistics

Cooperative Agreement; National Conference on Punishment for Criminal Offenses

ACTION: Extension of deadline for receipt of proposals.

SUMMARY: In the **Federal Register** Vol. 51, No. 63 dated Wednesday, April 2, 1986 on pages 11363 to 11364 the Bureau of Justice Statistics (BJS) solicited proposals from non-profit organizations to enter into a cooperative agreement with BJS for the purpose of organizing and running a national conference on punishment for criminal offenses in the United States. The conference would provide a forum for policymakers, practitioners, and scholars to present original papers on punishment in America using BJS data as a starting point.

A number of educational institutions who are interested in applying have indicated that they would like more time to prepare their proposals.

DATES: Due date for receipt of these proposals has been extended to 5:00 pm EDST on June 30, 1986.

ADDRESSES: Seven (7) copies of a full proposal should be sent to: Director, Bureau of Justice Statistics, U.S. Department of Justice, 633 Indiana Avenue, NW., Washington, DC 20531.

FOR FURTHER INFORMATION CONTACT: To obtain further information contact Joseph Bessette, Deputy Director for Data Analysis, at the address given above (telephone 202-724-7765).

Dated: May 23, 1986.

Joseph M. Bessette,
Deputy Director for Data Analysis, Bureau of Justice Statistics.

BILLING CODE 4410-18-M

Office of Justice Programs

President's Child Safety Partnership; Hearings

AGENCY: Office for victims of crime, Justice.

ACTION: Notice of Hearings.

SUMMARY: The Office for Victims of Crime announces the fourth in a series of public hearings to be held by the President's Child Safety Partnership.

SUPPLEMENTARY INFORMATION: The President's Child Safety Partnership (hereafter referred to as the Partnership) will hold a series of six public hearings on the issue of child safety. The Partnership, which was announced by the President on April 29, 1985, and which held its initial meeting on January 16, 1986, consists of 26 members from the public, private (both corporate and nonprofit), state and local, and Federal sectors, and includes a wide range of expertise in fields related to child safety. It's first, second and third public hearings were held on April 15-16, in New York City; May 1, in Chicago, Illinois; and May 20, in Austin, Texas, respectively. The Partnership functions solely as an advisory committee in full compliance with the provisions of the Federal Advisory Committee Act.

The Partnership members recognize the magnitude and complexity of the child safety problem, and realize that the only way to effectively address it is through the help and support of a wide group of organizations, agencies, and individuals, with the focus being on the private sector. Consequently, the Partnership will seek the input of these groups on a broad range of issues. The input received through both written and oral testimony will be used by the Partnership to make recommendations to the President on ways in which we can both prevent the victimization of our country's children and more fully involve the private sector in responding to the problem.

The scope of the Partnership inquiry and the recommendations the Partnership will make will cover a broad range of offenses against children, specifically: Child physical abuse and neglect; child sexual abuse and molestation; theft, assault, robbery, and murder of children; parental and stranger abduction of children; exploitation of children (prostitution, pornography), runaway children (recognizing the extreme vulnerability of runaways to victimization); and drug abuse.

The hearing will seek to examine child safety initiatives involving or supported by the private sector and to identify specific issues of child safety requiring priority attention. The hearing will also examine model program approaches to prevent and respond to child victimization as well as legislative and Federal coordination issues.

Oral and written testimony will be solicited from the public. The testimony will be used as a basis for making recommendations to the President.

Location/Dates

The fourth public hearing of the Partnership will be held:
Date: Tuesday, June 17, 1986
Place: Denver Children's Museum, 2121 Crescent Drive, Denver, Colorado 80211
Time: 9:00 a.m.-6:00 p.m.

BEST COPY AVAILABLE

Seats available to the public: 100

The hearing will be held from 9:00 a.m. to approximately 6:00 p.m.

The fifth Partnership hearing will be held in Seattle, Washington (July 14, 1986). The specific location for this hearing will be announced in a subsequent Federal Register Notice. The sixth hearing will be held in Florida on a date yet to be determined.

Procedure

The Partnership invites all interested parties to submit written testimony or program information regarding any of the aforementioned aspects of child safety. Persons interested in providing written testimony should submit it to: Lois Haight Herrington, Assistant Attorney General, Office of Justice Programs, 633 Indiana Avenue, NW., Washington, DC 20531. If possible, all written testimony should be typed and submitted in duplicate. All written testimony is due not later than September 30, 1986, but should be submitted as soon as possible for maximum consideration.

Persons interested in providing oral testimony at the hearing in Denver should notify Assistant Attorney General Herrington in writing (same address as above), as soon as possible, and in no event later than June 10, 1986. The Partnership will make the final determinations as to what persons/organizations will be invited to provide oral testimony.

Conduct of Hearings

The hearings, which will be open to the public, will begin at 9:00 a.m. The Chairman of the Partnership, or his designee, will preside at the hearings. Other members of the Partnership will join the Chairman. These will not be judicial or evidentiary-type hearings and there will not be any cross-examination. However, clarifying questions and discussion by Partnership members may follow each presentation. There will be time set aside at the conclusion of the hearing for brief comments by members of the public.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding official.

A transcript of the hearing will be made. The entire record of the hearings, including transcript, will be retained by the Partnership, and will be available to the public. Any person may purchase a copy of the transcript from the transcribing organization.

For further general information on the Partnership hearings contact: Mr. William Modzeleski, President's Child Safety Partnership, 633 Indiana Avenue, NW., Washington, DC 20531. Phone: (202) 272-8500.

Dated: May 28, 1986.

Lois Haight Herrington,

Assistant Attorney General, Office of Justice Programs.

Advisory Committee on Reactor Safeguards, Subcommittee on Reactor Operations; Meeting Revised

The Federal Register published on May 16, 1986 (51 FR 18053) contained notice of a meeting of the ACRS Subcommittee to be held on Tuesday, June 3, 1986, 8:30 A.M.—12:00 Noon, Room 1046, 1717 H Street NW., Washington, DC. To the extent practical, the meeting will be open to public attendance. However, a portion of the meeting may be closed to discuss elements of the Palo Verde Security Plan. All other items regarding this meeting remain the same as previously announced.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefore can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Herman Alderman (telephone: 202/634-1413) between 8:15 A.M. and 5:00 P.M. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: May 28, 1986.

[Docket No. 50-352]

Philadelphia Electric Co., Limerick Generating Station, Unit 1, Receipt of Petition for Director's Decision

Notice is hereby given that the Director of Nuclear Reactor Regulation is considering as a request for action under 10 CFR 2.206 a letter dated March 5, 1986, from Robert L. Anthony. Mr. Anthony contends, on the basis of the licensee's applications to the Delaware River Basin Commission (DRBC) concerning the withdrawal of cooling water from the Schuylkill River, that the plant has been operated in violation of the plant's Environmental Protection Plan. Mr. Anthony further contends that on this basis the operating license for Unit 1 should be suspended. A decision will be made on Mr. Anthony's request within a reasonable time. A copy of the letter is available for public inspection in the Commission's Public Document Room at 1717 H Street NW., Washington, DC 20555, and in the local public document room at the Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania 19464.

Dated at Bethesda, Maryland this 27th day of May.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Acting Director, Office of Nuclear Reactor Regulation.

OFFICE OF PERSONNEL MANAGEMENT

Proposed Extension of a Form Submitted to OMB for Clearance

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980, this notice announces the proposed extension of a form which collects information from the public. Optional Form 300, Qualifications Analysis and Appraisal of Candidates for Supervisory Positions, is completed by employers and/or co-workers of applicants for supervisory positions throughout the Federal Government. The qualification standard for supervisory positions in General Schedule occupations (GS-15 and below) contained in OPM Handbook X-118, Qualification Standards for Positions Under the General Schedule, recommends the use of this form to facilitate the collection of information used in evaluating candidates. For copies of the proposal, call James M. Farron, Agency Clearance Officer, on (202) 632-7714.

DATES: Comments on this extension should be received within 10 working days from date of publication.

ADDRESSES: Send or deliver comments to—

James M. Farron, Agency Clearance Officer, Office of Personnel Management, 1900 E Street NW., Room 6410, Washington, DC 20415, and

Katie Lewin, Information Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3235, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Helene Rosenheim, (202) 632-0790.

Notice of Proposed Information Collection for OMB Review

AGENCY: Office of Personnel Management.

ACTION: Notice of proposed information collection, CG Form 25-7, "Survivor Annuity Certification."

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (Title 44, U.S.C., Chapter 35), we are providing notice of a proposed extension of an information collection from the public. CG Form 25-7 will be used by widows, widowers, and former spouses who have not yet reached age 55 and are receiving a survivor annuity. If an employee or retiree dies, a survivor annuity is payable provided the survivor is otherwise eligible and does not remarry before reaching age 55. This form will be used to verify whether the survivors have remarried and thereby lost their eligibility to receive a survivor benefit (section 8341, Title 5, U.S. Code). For copies of this proposal call James M. Farron, Agency Clearance Officer, on (202) 632-7714.

ADDRESSES: Send or deliver comments within 10 working days from the date of publication to—

James M. Farron, Agency Clearance Officer, U.S. Office of Personnel Management, 1900 E Street NW., Room 6410, Washington, DC 20415, and

Katie Lewin, Information Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3235, New Executive Office Building, NW., Washington, DC 20503

FOR FURTHER INFORMATION CONTACT: James L. Bryson, (202) 632-5472.

BILLING CODE 0000-00-M

SECURITIES AND EXCHANGE

COMMISSION

[Release No. 34-23268; File No. SR-OCC-86-9]

Self-Regulatory Organizations; Options Clearing Corp.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change

On May 1, 1986, the Options Clearing Corporation ("OCC") filed with the Commission a proposed rule change under section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"). OCC's proposed rule change would add to OCC Rule 604 Interpretation and Policy .08 (the "Interpretation"). That Interpretation would provide that a letter of credit could be issued by a foreign branch of a U.S. bank or trust company (the "Institution") provided that: (1) The Institution conforms with OCC Rule 604 and the Interpretations and Policies thereunder (i.e., OCC has approved the Institution as a letter of credit issuer),[1] and (2) the letter of credit is payable at a United States office of such institution. The proposal clarifies that OCC Rule 604 and its Interpretations and Policies permit foreign branches of U.S. Institutions to issue letters of credit for OCC margin purposes. Previously, only certain U.S. Institutions or foreign banks and trust companies with a U.S. branch or agency could be OCC-approved letters of credit issuers.

OCC believes that the proposal is needed to accommodate increased business activity anticipated from OCC's planned London-Philadelphia Stock Exchange foreign currency options link [2] and the prospect of greater direct OCC membership of foreign broker-dealers.[3]

OCC believes that the proposed rule change is consistent with Section 17A of the Act in that it will promote the prompt and accurate clearance and settlement of transactions by enabling clearing members to finance their positions more efficiently.

This rule change has become effective, pursuant to Section 19(b)(3)(A) of the Act and Rule 19b-4. The Commission may summarily abrogate the rule change at any time within 60 days of its filing if it appears to the Commission that abrogation is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

To submit written comments on the proposal, please file six copies of your comments with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, with accompanying exhibits, and all written comments, except for material that may be withheld from the public under 5 U.S.C. 552 are available for inspection and copying at the principal office of OCC. All submissions should refer to File No. SR-OCC-86-9 and should be submitted by June 23, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 23, 1986.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 86-12290 Filed 5-30-86; 8:45 am]

BILLING CODE 8010-01-M

[1] OCC Rule 604(c) governs clearing member use of letters of credit for OCC margin purposes and its Interpretations and Policies spell out OCC's standards for letter of credit issuers. Among other things, those provisions require an "approved" U.S. institution to be a bank or trust company that: (a) Is organized under the laws of the United States or a state thereof and is regulated or examined by federal or state authorities having regulatory authority over banks and trust companies, and (b) has shareholders' equity of $100,000,000 or more. *See* OCC Rule 604, Policy and Interpretation .01(a).

[2] *See* File No. SR-OCC-85-13, published for comment in Securities Exchange Act Release No. 22847 (January 30, 1986), 51 FR 4551 (February 5, 1986).

[3] *See* Securities Exchange Act Release No. 22123 (June 6, 1985), 50 FR 24853 (June 13, 1985), approving File No. SR-OCC-85-02, which enables foreign broker-dealers to become direct OCC Clearing Members.

DEPARTMENT OF STATE

[Public Notice 987]

Agency Forms Submitted for OMB Review

AGENCY: Department of State.

ACTION: In accordance with the provisions of the Paperwork Reduction Act of 1980, the Department has submitted a proposed collection of information to the Office of Management and Budget for review.

SUMMARY: The following summarizes the information collection proposal submitted to OMB:

Title of information collection—Application for Department of State Building Pass.

Type of request—New.

Frequency—On occasion.

Respondents—Press corps, maintenance personnel, visitors.

Estimated number of responses—8,000.

Estimated number of hours needed to respond—667.

Section 3504(h) of Pub. L. 96-511 does not apply.

Additional Information or Comments

Copies of the proposed forms and supporting documents may be obtained from Gail J. Cook (202) 647-3538. Comments and questions should be directed to (OMB) Francine Picoult (202) 395-7231.

Dated: May 20, 1986.

Coast Guard

[CGD 86-039]

Lower Mississippi River Waterway Safety Advisory Committee; Meeting

Pursuant to section 10(a) of the Federal Advisory Committee Act (Pub. L. 92-403; 5 U.S.C. App I) notice is hereby given of the ninth meeting of the Lower Mississippi River Waterway Safety Advisory Committee. The meeting will be held on Tuesday, June 24, 1986, in the Ambassadeur Room of the Plimsoll Club, on the 30th floor of the World Trade Center, 2 Canal Street, New Orleans, LA, at 9:00 a.m. The agenda for the meeting consists of the following items:

1. Call to Order.
2. Introduction of Rear Admiral Peter J. Rots, Commander, Eighth Coast Guard District, Committee Sponsor.
3. Minutes of the 11 March 1986 Meeting.
4. Report of the ad hoc communications improvement study group.
5. Discussion of the report of the communications improvement study group.
6. Discussion of bridge lighting rule changes.
7. Call for items of interest for discussion at next meeting.
8. Presentation of information concerning the "tracking box" technology.
9. Adjournment.

The purpose of this Advisory Committee is to provide consultation and advice to the Commander, Eighth Coast Guard District on all areas of maritime safety affecting this waterway.

Attendance is open to the public. Members of the public may present written or oral statements at the meeting.

Additional information may be obtained from Commander D. F. Withee, USCG, Executive Secretary, Lower

Mississippi River Waterway Safety Advisory Committee, c/o Commander, Eighth Coast Guard District (mps), Room 1341, Hale Boggs Federal Building, 500 Camp Street, New Orleans, LA 70130-3396, telephone number (504) 589-6901.

Dated: May 19, 1986.

Peter J. Rots,

Rear Admiral, U.S. Coast Guard, Commander, Eighth Coast Guard District.

BILLING CODE 4910-14-M

[CGD3 86-08]

New York Harbor Traffic Management Advisory Committee; Meeting

AGENCY: Coast Guard, DOT.

ACTION: Notice of Meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I), notice is hereby given of a meeting of the New York Harbor Traffic Management Advisory Committee to be held on July 16, 1986, in the Conference Room, second floor, U.S. Coast Guard Marine Inspection Office, Battery Park, New York, New York, beginning at 10:00 a.m.

The agenda for this meeting of the New York Harbor Traffic Management Advisory Committee is as follows:

1. Introduction of Committee Sponsor, Committee members, and Coast Guard officers.
2. Election by popular vote of Committee Vice Chairperson.
3. Presentation by Captain Heym on operation and scope of Vessel Traffic Service.
4. Presentation by Captain Henn on role of Vessel Traffic Service regarding port security and harbor defense in other than peace-time.
5. Other topics which might arise and the committee agrees should be addressed at the time.
6. Discussion of agenda items for next meeting.
7. Selection of date for next meeting.

The New York Harbor Traffic Management Advisory Committee has been established by Commander, Third Coast Guard District to provide information, consultation, and advice with regard to port development, maritime trade, port traffic, and other maritime interests in the harbor. Members of the Committee serve voluntarily without compensation from the Federal Government.

Attendance is open to the interested public. With advance notice to the Chairperson, members of the public may make oral statements at the meeting. Persons wishing to present oral statements should so notify the Executive Director no later than the day before the meeting. Any member of the public may present a written statement to the Committee at any time.

FOR FURTHER INFORMATION CONTACT: Captain R.J. Heym, USCG, Executive Secretary, N.Y. Harbor Traffic Management Advisory Committee, New York Vessel Traffic Service, Governors Island, New York, NY 10004; or by calling (212) 668-7954.

Dated: May 20, 1986.

P.A. Yost,

Vice Admiral, United States Coast Guard, Commander, Third Coast Guard District.

Federal Aviation Administration

Advisory Circular 20-88A, Guidelines on the Marking of Aircraft Powerplant Instruments (Displays)

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of issuance of advisory circular.

SUMMARY: This Notice announces the issuance of Advisory Circular (AC) 20-88A, Guidelines on the Marking of Aircraft Powerplant Instruments (Displays). Advisory Circular 20-88A provides revised guidelines on the marking of aircraft powerplant instruments and electronic displays (cathode ray tubes, etc.). These guidelines offer acceptable, but not exclusive, methods of compliance with the powerplant instrument color marking requirements.

DATE: Advisory Circular 20-88A was issued by the Office of Airworthiness in Washington, DC, on September 30, 1985.

How to Obtain Copies

A copy of AC 20-88A may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or from any of the Government Printing Office bookstores located in major cities through the United States. Identify the publication as AC 20-88A, Guidelines on the Marking of Aircraft Powerplant Instruments (Displays), Stock Number 050-007-00683-7. The cost of AC 20-88A is $1.50. Send check or money order with your request, made payable to the Superintendent of Documents. Orders for mailing to foreign countries should include an additional 25 percent of the total price to cover handling. No c.o.d. orders are accepted.

Issued in Seattle, Washington, on May 21, 1986.

Leroy A. Keith,

Manager, Aircraft Certification Division, Northwest Mountain Region.

BILLING CODE 4910-13-M

Receipt of Noise Compatibility Program and Request for Review, St. Louis Regional Airport

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces that it is reviewing a proposed noise compatibility program that was submitted for St. Louis Regional Airport under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) (hereinafter referred to as "the Act") and 14 CFR Part 150 by the St. Louis Regional Airport Authority. This program was submitted subsequent to a determination by FAA that associated noise exposure maps submitted under 14 CFR Part 150 for St. Louis Regional Airport were in compliance with applicable requirements effective October 7, 1985. The proposed noise compatibility program will be approved or disapproved on or before November 13, 1986.

EFFECTIVE DATE: The effective date of the start of FAA's review of the noise compatibility program is May 16, 1986. The public comment period ends July 1, 1986.

FOR FURTHER INFORMATION CONTACT: Henry A. Lamberts, AGL-610, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018.

Comments on the proposed noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA is reviewing a proposed noise compatibility program for St. Louis Regional Airport which will be approved or disapproved on or before November 13, 1986. This notice also announces the availability of this program for public review and comment.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations, Part 150, promulgated pursuant to Title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or

proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The FAA has formally received the noise compatibility program for St. Louis Regional Airport, effective on May 16, 1986. It was requested that the FAA review this material, and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under Section 104(b) of the Act.

Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before November 13, 1986.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR Part 150, subparagraph 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the noise exposure maps, the FAA's evaluation of the maps, and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, 800 Independence Avenue, SW., Room 617, Washington, DC 20591

Federal Aviation Administration, Great Lakes Regional Office, AGL-600, 2300 East Devon Avenue, Des Plaines, Illinois 60018

Federal Aviation Administration, Chicago Airports District Office, 2300 East Devon Avenue, Des Plaines, Illinois 60018

St. Louis Regional Airport, 8 Terminal Drive, Suite 1, East Alton, Illinois 62024

Bethalto Village Library, 321 S. Prairie, Bethalto, Illinois 62010

East Alton Public Library, Third and Washington, East Alton, Illinois 62024

Hayner Public Library, 326 Belle Street, Alton, Illinois 62002

Wood River Public Library, 326 E. Ferguson, Wood River, Illinois 62095

Questions may be directed to the individual named above under the heading, FOR FURTHER INFORMATION CONTACT.

Issued in Des Plaines, Illinois, May 16, 1986.

Monte R. Belger,

Manager, Airports Division, Great Lakes Region.

BILLING CODE 4910-13-M

Federal Highway Administration

Commercial Motor Vehicle Safety Regulatory Review Panel; Public Meeting

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of public meeting.

SUMMARY: The FHWA announces that the Commercial Motor Vehicle Safety Regulatory Review Panel will hold a meeting on July 1 and 2, 1986, beginning at 8:30 a.m., in Washington, DC, at the Department of Transportation's Headquarters Building, 400 Seventh Street, SW., Washington, DC, Room 2230. The meeting is open to the public.

The agenda includes the following topics: Status briefing on contractor efforts to organize and abstract State motor carrier safety laws and Regulations, discussion of schedule of future activities and milestones for the panel's accomplishments, briefing on the status of repromulgation of the Federal Motor Carrier Safety Regulations, and briefing on the status of the future plans for the Motor Carrier Safety Assistance Program.

FOR FURTHER INFORMATION CONTACT: Mr. David R. Lukens, Executive Director, Commercial Motor Vehicle Safety Regulatory Review Panel, Federal Highway Administration, HOA-1, Room 4218, 400 Seventh Street, SW., Washington, DC 20590 (202) 426-0390. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

Issued on: May 23, 1986.

R. A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

BILLING CODE 4810-25-M

Office of the Secretary and Internal Revenue Service

Privacy Act of 1974; System of Records

AGENCY: Department of the Treasury.

ACTION: Advance notice of proposed new routine uses to be added to two existing systems of records, and a correction to the category of individuals covered in one of the systems.

SUMMARY: The Department of the Treasury, proposes to add several routine uses to the Privacy Act system of records, Treasury/OS .002—Treasury Payroll Information System, last published at 49 FR 46233 (November 23, 1984). This notice also corrects item (1) of the Categories of Individuals covered by the system to include all Treasury employees as previously shown in "Treasury Payroll/Personnel Information System, Treasury/OS .002" at 46 FR 16404 (March 12, 1981)

General Personnel and Payroll Records System, last published at 50 FR 49493 (December 2, 1985).

SUPPLEMENTARY INFORMATION:

Part I: Proposed Routine Uses—General.

The Treasury Payroll Information system notice (Treasury/OS .002) is being revised to add several compatible disclosures to the routine uses. These include disclosures to:

(1) The Office of Personnel Management, Merit Systems Protection Board, Equal Employment Opportunity Commission, and General Accounting Office for the purpose of properly administering Federal Personnel systems or other agencies' systems in accordance with applicable laws, Executive Orders, and applicable regulations.

(2) A court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to opposing Counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations, in response to a subpoena, or in connection with criminal law proceedings.

(3) Another agency, such as the Department of Labor or Social Security Administration, for Wage and Separation information as required by law for payroll purposes.

(4) A Federal, State, or local agency so that the agency may adjudicate an individual's eligibility for a benefit, such as a state unemployment compensation board, housing administration agency and Social Security Administration.

(5) Appropriate Federal, State, local, or foreign agencies responsible for investigating or prosecuting the violations of, or for implementing a statute, rule, regulation, order or license, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

Disclosures under these proposed routine uses are compatible with the Department's personnel management responsibility of employee integrity.

Part II: Routine Use to Permit Computer Matching

The Department of the Treasury in connection with direction set by the President's Council on Integrity and Efficiency (PCIE) Long Range Computer Matching Group, has determined that it is prudent to identify current or former Treasury Department employees who have improperly received compensation under Federal agency, non-Federal entity, or Treasury benefit programs, and to prevent illegal payment of these benefits. The Department of the Treasury, therefore, proposes to undertake or to participate in efforts to eliminate this problem by disclosing certain Treasury employee information or information of other users of TPIS in connection with computer matching operations conducted by the Department, or the requesting Federal agencies or non-Federal entities, as determined through written agreements. The matches will be conducted in accordance with the Office of Management and Budget's Revised Supplemental Guidelines for Conducting Matching Programs (47 FR 21656, May 19, 1982). The Department of the Treasury or a constituent unit or other user of TPIS will obtain a signed agreement from the Federal agency or non-Federal entity specifying that the information disclosed by the Department will be used for purposes of the computer match and for no other purposes, specifying that the information will be safeguarded against unauthorized disclosure.

The Department of the Treasury is proposing a new routine use in connection with plans to participate with Federal agencies and non-Federal entities in efforts to enhance the integrity of benefit programs whether sponsored by those agencies and non-Federal entities or by the Department of the Treasury or a constituent unit of the Department. The Department plans to provide to Federal agencies and non-Federal entities certain Treasury employee information required in connection with efforts to prevent illegal payments under the benefit programs. Disclosures may be made either upon the request of the Federal agency or non-Federal entity, or by the Department of the Treasury on its own initiative under a cooperative agreement. This routine use, once in effect, will permit the discretionary disclosure of data from the Department of the Treasury's Payroll Information system files and Internal Revenue Service's General Personnel and Payroll Records system when disclosure is necessary for the Department of the Treasury or any constituent unit of the Department, the Federal agency or non-Federal entity to take appropriate action to improve the integrity of the benefit programs.

These benefit programs include, but are not limited to, the Food Stamp Program, Aid to Families with Dependent Children, Medicaid, Supplemental Security Income, unemployment compensation, state supplementary income assistance, workers compensation, sick leave, education and home loan programs, etc.

Department of the Treasury payroll files (Treasury Payroll Information System Treasury/OS .002 and General Personnel & Payroll Records Treasury/IRS 36.003) contain general payroll information including name, social security number, salary, benefit deductions, leave data, addresses, records of attendance and other relevant payroll information. Under a computer matching arrangement, the Department of the Treasury will disclose only information on "matched" employees which is necessary to make a thorough analysis for determining the recipient's status as to eligibility for compensation under the benefit program in question. The Department of the Treasury retains the authority under the proposed routine use to withhold specific data elements if it is believed that the particular elements are not germane to the purpose of the analysis. This analysis, to be conducted by the involved Federal agency or non-Federal entity, or by the Department of the Treasury or other user of TPIS, is an essential element of the project. The mere existence of an individual's match between a benefit program file and the Treasury Department Payroll System file will not of itself, or without the individual's prior opportunity to respond, be the cause of any benefit reduction or legal collection action.

Disclosure under the proposed routine use is compatible with the Department of Treasury's personnel management responsibility for oversight of its employees' conduct, particularly with regard to the requirement that these individuals comport themselves in a

proper manner and not obtain financial benefits in a fraudulent manner.

The Department of the Treasury shall observe the following limitations with respect to disclosing the categories of records previously described:

(1) All Treasury employees and other users of TPIS shall be governed by OMB's "Guidelines for Conducting Computerized Matching Programs".

(2) Information will not be used for purposes other than those specifically agreed upon.

(3) Information which has been derived wholly or in part by relying on information of the type described above shall not be used by any person without the Department of the Treasury's specific permission.

(4) The file will not be used to extract information concerning "non-matching" individuals for any purpose.

A match either between the Department of the Treasury's Payroll Information System File or the Internal Revenue Service General Personnel and Payroll Records and the Federal agency or non-Federal entity benefit program file is not an indication that any illegality has occurred; the match will alert the participating parties, however, that further study is warranted to see if there is any impropriety.

The TPIS system is being published in its entirety. The IRS General Personnel & Payroll records system reflects only the data elements changed. The last publication of the entire system was December 2, 1985 (50 FR 49623).

DATE: The proposed new routine uses will become effective, without further notice, 30 days from the date of this publication unless comments dictate otherwise.

ADDRESS: Comments may be sent to: Chief, Disclosure Branch, Room 5423, Department of the Treasury, 1500 Pennsylvania Avenue NW., Washington, D.C. 20220.

FOR FURTHER INFORMATION CONTACT: Phyllis De Piazza, 1500 Pennsylvania Avenue NW., Room 5423, Washington, D.C. 20220, (202) 566-2782.

Dated: May 13, 1986.

John F.W. Rogers,

Assistant Secretary of the Treasury (Management).

Treasury/OS .002

SYSTEM NAME:

Treasury Payroll Information System.

SYSTEM LOCATION:

ICC Building, 1201 Constitution Avenue NW., Room 7329, Washington, DC 20220 and a contractor data processing facility, Johnstown Computing Resources Inc., located at 99 Lulay Street, Johnstown, PA 15904

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

(1) Current and former personnel data on all employees of the Treasury, payroll data on all Treasury employees except IRS; (2) Executive Offices of the President; (3) Federal Emergency Management Agency; (4) Federal Trade Commission; (5) National Gallery of Art; (6) National Labor Relations Board; (7) Farm Credit Administration; (8) Commodities Futures Trading Commission.

CATEGORIES OF RECORDS IN THE SYSTEM:

There are two basic components to the system, a personnel component (PERMITS Application) and a payroll component (Treasury Payroll Information System), which provide current, year-to-date and historical data on the individuals covered by the system. The separate files in the system consist of payroll records, personnel records and time and attendance records. Information contained in these records, includes such data as:

(1) Employee identification and status data such as name, social security number, date of birth, sex, race and national origin designator, awards received, suggestions, work schedule, type of appointment, education, training courses attended, veterans preference, and military service.

(2) Employee data data such as service computation date for leave, date probationary period began, date of performance rating, and date of within-grade increases.

(3) Position and pay data such as position identification number, pay plan, grade, step, salary and pay basis, occupational series, position skill codes, organization location and accounting classification codes.

(4) Payroll data such as earnings, e.g., overtime and night differential; deductions, e.g., Federal, State and local taxes, bonds and allotments; and time and attendance data.

(5) Tables of data for editing, reporting and processing any or all personnel pay actions. These include nature of action codes, civil service authority codes, standard remarks, signature table, position title table, financial organization table and salary table.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Office of Personnel Management Manual, 50 U.S.C. App. 1705–1707; 31 U.S.C. and Departmental Circulars 145 and 930. The Department of the Treasury, Fiscal Requirement Manual; 5 U.S.C. 301; FPM Letter 298–16, Office of Personnel Management; Federal Personnel Manual (Chapter 713 Subchapter 3A).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSE OF SUCH USES:

These records and information in these records may be used:

(1) To furnish the Internal Revenue Service and other jurisdictions which are authorized to tax the employee's compensation with wage and tax information in accordance with a withholding agreement with the Department of Treasury pursuant to U.S.C. 5516, 5217, and 5520.

(2) To provide records to the Office of Personnel Management, Merit Systems Protection Board, Equal Employment Opportunity Commission, and General Accounting Office for the purpose of properly administering Federal Personnel systems or other agencies' systems in accordance with applicable laws, Executive Orders, and applicable regulations.

(3) To furnish another federal agency information to effect interagency salary offset; to furnish another federal agency information to effect interagency administrative offset, except that addresses obtained from the Internal Revenue Service shall not be disclosed to other agencies; to furnish a consumer reporting agency information to obtain commercial credit reports; and to furnish a debt collection agency information for debt collection services. Current mailing addresses acquired from the Internal Revenue Service are routinely released to consumer reporting agencies to obtain credit reports and to debt collection agencies for collection services.

(4) To disclose information to a Federal, State, or local agency, maintaining civil, criminal or other relevant enforcement information or other pertinent information, which has requested information relevant to or necessary to the requesting agency's or the bureaus' hiring or retention of an employee, or issuance of a security clearance, license, contract, grant, or other benefit.

(5) To disclose information to a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to opposing Counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations in response to a subpoena, or in connection with criminal law proceedings.

(6) To disclose information to foreign governments in accordance with formal or informal international agreements.

(7) To provide information to a congressional office in response to an inquiry made at the request of the individual to whom the record pertains.

(8) To provide information to the news media in accordance with guidelines contained in 28 CFR 50.2 which relate to civil and criminal proceedings.

(9) To provide information to unions recognized as exclusive bargaining representatives under the Civil Service Reform Act of 1978, 5 U.S.C. 7111 and 7114.

(10) To provide information to third parties during the course of an investigation to the extent necessary to obtain information pertinent to the investigation.

(11) To provide wage and separation information to another agency such as the Department of Labor or Social Security Administration as required by law for payroll purposes.

(12) To provide information to a Federal, State, or local agency so that the agency may adjudicate an individual's eligibility for a benefit, such as a state unemployment compensation board, housing administration agency and Social Security Administration.

(13) To disclose pertinent information to appropriate Federal, State, local, or foreign agencies responsible for investigating or prosecuting the violations of, or for implementing, a statute, regulation, order, or license, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

(14) Disclosure of information about particular Treasury employees may be made to requesting Federal agencies or non-Federal entities under approved computer matching efforts, limited to only those data elements considered relevant to making a determination of eligibility under particular benefit programs administered by those agencies or entities or by the Department of Treasury or any constituent unit of the Department, to improve program integrity, and to collect debts and other monies owed under those programs (i.e., matching for delinquent loans or other indebtedness to the government).

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a (b)(12) and section 3 of the Debt Collection Act of 1982; Debt information concerning a Government claim against an individual is also furnished, in accordance with 5 U.S.C. 552a(b)(12) and section 3 of the Debt Collection Act of 1982 (Pub. L. 97–365), to consumer reporting agencies to encourage repayment of an overdue debt.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic media, microfiche and hard copy print out. Disbursement records are stored at Federal Records Center.

RETRIEVABILITY:

Records are retrieved generally by social security number or position identification number within a bureau and region. Secondary identities are used to assure accuracy of data accessed, such as name and date of birth.

SAFEGUARDS:

Entrance to data center is restricted to only those employees whose work requires them to be there for the system to operate. ID cards are verified to insure that only authorized personnel are present. Disclosure of information through remote terminals is restricted through the use of passwords and sign on protocols which are periodically changed. Reports produced from the remote printers are in the custody of personnel officers and are subject to the same privacy controls as other personnel documents of like sensitivity.

RETENTION AND DISPOSAL:

The Treasury Payroll Information System master file is kept on magnetic tape. Hard copies of reports are kept for a period of up to 3 years. Additional payroll data is maintained on microfiche. Employee records are retained in automated form as long as the employee is active on the system (separated employee records are maintained in an "inactive" status within PERMITS for five years). The master file is purged of inactive payroll records on a yearly basis. Files are purged in accordance with Treasury Directives Manual TD 80–05.5 "Records Disposition Schedule".

SYSTEM MANAGER AND ADDRESS:

Director of Personnel, Department of the Treasury, Room 7115, 1201 Constitution Avenue N.W., Washington, D.C. 20220.

NOTIFICATION PROCEDURE:

Individuals wishing to be notified if they are identified in this system or gain access to records maintained in the system must submit a request containing the following elements: (1) Identify the record system; (2) Identify the category and types of records sought; (3) Provide at least two items of secondary identification (date of birth), employee identification number and date of employment or similar information. Address inquiries to Chief, Disclosure Branch (see access below).

RECORD ACCESS PROCEDURE:

Chief, Disclosure Branch, Department of the Treasury, Room 5423 Main Treasury, 1500 Pennsylvania Avenue NW., Washington, D.C. 20220.

CONTESTING RECORD PROCEDURE:

(See access above).

RECORD SOURCE CATEGORIES:

The information contained in these records is provided by or verified by the subject of the record, supervisors, and non-Federal sources such as private employers.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Treasury/IRS 36.003

SYSTEM NAME:

General Personnel and Payroll Records—Treasury/IRS.

Customs Service

Application for Recordation of Trade Name: "The Baltimore Luggage Company"

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of Application for Recordation of Trade Name.

SUMMARY: Application has been filed pursuant to § 133.12, Customs Regulations (19 CFR 133.12), for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name "THE BALTIMORE LUGGAGE COMPANY" used by The Baltimore Luggage Company, a corporation organized under the laws of the State of Rhode Island, located at 1919 Annapolis Road, Baltimore, Maryland 21230.

The application states that the trade name is used in connection with the following merchandise manufactured in Taiwan: vinyl luggage; nylon luggage; vinyl attaches; leather attaches; jute luggage; attaches; and luggage carts.

Before final action is taken on the application, consideration will be given to any relevant data, views, or arguments submitted in writing by any person in opposition to the recordation of this trade name. Notice of the action take on the application for recordation of this trade name will be published in the Federal Register.

DATE: Comments must be received on or August 1, 1986.

ADDRESS: Written comments should be addressed to the Commissioner of Customs, Attention: Entry, Licensing and Restricted Merchandise Branch, 1301 Constitution Avenue, NW., Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Beatrice Moore, Entry, Licensing and Restricted Merchandise Branch, 1301 Constitution Avenue, NW., Washington, DC 20229 (202-566-5765).

Dated: May 27, 1986.

Marilyn G. Morrison,

Acting Director, Entry Procedures and Penalties Division.

BILLING CODE 4820-02-M

Internal Revenue Service

Inspection and Copying of Public Comments on Proposed Tax Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of change of procedure.

SUMMARY: Written comments from the public in response to proposed tax regulations may be inspected and copied in the Freedom of Information Reading Room, Internal Revenue Service National Office. The comment files were moved to the Reading Room from room 4429, Internal Revenue Service National Office, on May 12, 1986, for easier accessibility by the public.

FOR FURTHER INFORMATION CONTACT: B. Faye Easley, Carroll Yue or Sheila Page of the Legislation and Regulations Division; Office of the Chief Counsel, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention: CC:LR:T). Telephone 202-566-3935 (not a toll-free number).

SUPPLEMENTARY INFORMATION: When published in the Federal Register, every proposed tax regulation is accompanied by an invitation to the public to submit written comments to the Internal Revenue Service with respect to the proposed provisions. These comment letters are available to the public for inspection and copying in their entirety. Until May 12, 1986, the comment files were maintained in room 4429 of the Internal Revenue Service National Office. They have now been relocated to the Freedom of Information Reading Room where they are available to the public for inspection and copying. No part of any comment file may be removed from the Reading Room except by Service personnel.

Depending on the availability of shelf space, the comment file for each published proposed tax regulation will remain in the Reading Room until the proposal is adopted as a final regulation or is officially withdrawn. Requests for copies of written comments on regulations projects that are closed, either because final regulations were issued or the proposal was withdrawn, should be submitted to the Internal Revenue Service, Attention: CC:LR:T, Room 4429, Washington, DC 20224, or may be left with Reading Room personnel for forwarding to CC:LR:T.

The Statement of Procedural Rules (26 CFR Part 601) is in the process of being revised to reflect the new procedure.

Peter K. Scott,

Associate Chief Counsel (Technical).

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of June 2, 1986:

A closed meeting will be held on Tuesday, June 3, 1986, at 10:00 a.m. An open meeting will be held on Tuesday, June 3, 1986, at 2:00 p.m., in Room 1C30.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b (c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Fleischman, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Tuesday, June 3, 1986, at 10:00 a.m., will be:

Institution of injunctive actions.
Settlement of injunctive action.
Settlement of administrative proceeding of an enforcement nature.

The subject matter of the open meeting scheduled for Tuesday, June 3, 1986, at 2:00 p.m., will be:

Discussion with invited representatives of the accounting profession, reporting companies, and other interested parties. Issues to be addressed include, but will not be limited to, differences in expectations of financial reporting and the independent auditor's role, and recent private sector and legislative initiatives concerning financial disclosures and independent auditors. The discussion of these initiatives is expected to focus on the merits of these proposals and any cost benefit considerations. For further information, please contact Robert Kueppers at (202) 272-2130.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Gerald Laport at (202) 272-3065.

Shirley E. Hollis,

Acting Secretary.

May 27, 1986.

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of June 2, 1986:

A closed meeting will be held on Tuesday, June 3, 1986, at 10:00 a.m. Open meetings will be held on Tuesday, June 3, 1986, at 1:00 p.m. and on Thursday, June 5, 1986, at 10:00 a.m., in Room 1C30.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Fleischman, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Tuesday, June 3, 1986, at 10:00 a.m., will be:

Institution of injunctive actions.
Settlement of injunctive action.
Settlement of administrative proceeding of an enforcement nature.

The subject matter of the open meeting scheduled for Tuesday, June 3, 1986, at 1:00 p.m., will be:

Discussion with invited representatives of the accounting profession, reporting companies, and other interested parties. Issues to be addressed include, but will not be limited to, differences in expectations of financial reporting and the independent auditor's role, and recent private sector and legislative initiatives concerning financial disclosures and independent auditors. The discussion of these initiatives is expected to focus on the merits of these proposals and any cost benefit considerations. For further information, please contact Robert Kueppers at (202) 272-2130.

The subject matter of the open meeting scheduled for Thursday, June 5, 1986, at 10:00 a.m., will be:

1. Consideration of whether to publish a release proposing revisions to Form D, the notice of sales requirement under Regulation D of the Securities Act of 1933, to eliminate some of the current informational requirements required by the Form, revise other parts of the Form and, further, to structure the Form so that it can be used as a uniform notification form to be filed with the Commission and, to the extent provided by individual state laws, with the states, when certain exempt offerings are made. The Commission will also consider whether to publish for comment a proposal to amend Regulation D to remove the requirement to

file periodic updates of Form D every six months. For further information, please contact Karen M. O'Brien at (202) 272–2644.

2. Consideration of issues relating to program or arbitrage trading strategies involving index options that have been associated with stock market volatility, particularly on Expiration Fridays. For further information, please contact Sharon Lawson at (202) 272–3115.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Gerald Laporte at (202) 272–3065.

Shirley E. Hollis,

Acting Secretary.

May 23, 1986.

Part II

Veterans Administration

38 CFR Part 17

Charges for Care or Medical Services; Proposed Regulations

VETERANS ADMINISTRATION

38 CFR 17

Charges for Care of Medical Services

AGENCY: Veterans Administration.

ACTION: Proposed regulations.

SUMMARY: In order to conform VA regulations to the requirements of Pub. L. 99-272, the Consolidated Omnibus Budget Reconciliation Act of 1985, the Veterans Administration is proposing to amend its medical regulations (38 CFR 17) to recover the cost of medical care funished to nonservice-connected veterans from third party health insurance policies carried by those veterans. No attempt will be made by the VA to collect deductibles or coinsurance payments from the veteran.

DATES: Written comments must be received on or before July 16, 1986. It is proposed to make these changes effective on April 7, 1986, the effective date of the law which they implement.

ADDRESSES: Interested persons are invited to submit written comments, suggestions or objections regarding this proposed regulations to: Administrator of Veterans Affairs (217A), 810 Vermont Avenue, NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Services Unit, Room 132, of the above address, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays) until July 23, 1986.

FOR FURTHER INFORMATION CONTACT: Karen Walters, Chief, Policies and Procedures Division, Medical Administration Service, (202) 389-2337.

SUPPLEMENTARY INFORMATION: The VA now routinely bills for medical care provided veterans in tort feasor, worker's compensation, automobile accident reparations insurance, and crimes of personal violence cases. It is authorized to do so by the Federal Medical Care Recovery Act and the Veterans' Health Care, Training and Small Business Loan Act of 1981.

Although many nonservice-connected veterans are covered by private medical care insurance, most health insurance policies contain exclusionary clauses that prohibit payment for medical care provided in Federal hospitals. In 1981, legislation was enacted that provided statutory authority to recover medical care costs under worker's compensation, automobile accident reparations insurance, and crimes of personal violence statutes. However, the provision to eliminate exclusionary clauses in private medical care insurance plans and programs was deleted during that legislative process.

In May 1985, the VA submitted legislation to the 99th Congress that would amend Title 38, U.S.C., to allow the VA to recover the costs of medical care furnished to nonservice-connected veterans from third party health insurance policies carried by those veterans.

This similar measure has been enacted as Section 19013 of Pub. L. 99-272 amending 38 U.S.C. 629. These proposed regulatory changes implement this amendment. Under section 629 as amended, the VA will seek recovery for the cost of medical care and services rendered by the VA to otherwise eligible veterans who have no service-connected disabilities and who also are covered by a third party health insurance policy or plan. The VA will prepare bills to the third party insurance carriers for VA medical care and services rendered to such nonservice-connected veterans using the Uniform Bill, UB-82. In all circumstances, the VA will complete those data elements and codes identified by the National Uniform Billing Committee as required entries for submission of bills to commercial third party carriers. As required by 38 U.S.C. 629(h), as amended, VA health care facilities will, when requested, make the VA health care record of individual nonservice-connected veterans, for whose care the VA is seeking recovery of costs, available for inspection and review by representatives of the third party carrier covering the veteran's medical care; those will be done solely for the purposes of permitting the carrier to verify (1) that the care for which recovery of costs is sought by the VA was furnished, and (2) that the provision of such care to the veteran meets criteria generally applicable under the health-plan contract involved.

No deductible and/or coinsurance charge prescribed by any such policy, contract, membership or agreement shall be required by the VA.

The VA proposes to make these changes retroactively effective to April 7, 1986, the effective date of section 19013 of Pub. L. 99-272, the law which they implement. These changes repeat and implement requirements of that law. The VA finds that there is good cause to make these changes retroactively effective since a delayed effective date would be contrary to statutory design, could be inequitable, and would complicate administration of this provision of law.

The VA has met with representatives of the General Accounting Office (GAO) to discuss provisions of this new legislation and implementing regulations.

Although cost recoveries from all third party carriers are expected to be in excess of $100 million per year in future years, since these are cost recoveries, the impact on the economy as a whole will not be in excess of the E.O. 12291 criterion for a major rule. These proposed regulations, as distinguished from the law which requires them, will result in no significant increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions. They will have no adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States based enterprises to compete with foreign based enterprises in domestic or export markets. They also will impose no regulatory, paperwork, or administrative burdens on small entities.

For the above reasons, the Administrator certifies that these regulations will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601-612.

The Catalog of Federal Domestic Assistance numbers are 64.009, 64.010, 64.011.

List of Subjects in 38 CFR Part 17

Alcoholism, Claims, Dental Health, Drug abuse, Foreign relations, Government Contracts, Grants programs, health, Health care, Health facilities, Health professions, Medical devices, Medical research, Mental health programs, Nursing homes, Philippines, Veterans.

Approved: May 30, 1986.

Thomas K. Turnage,

Administrator.

PART 17—[AMENDED]

38 CFR Part 17, MEDICAL, is amended as follows:

1. In § 17.48, paragraph (d) is revised to read as follows:

§ 17.48 Considerations applicable in determining eligibility for hospital, nursing home or domiciliary care.

* * * * *

(d)(1) Persons hospitalized who have no service-connected disabilities pursuant to § 17.47, and/or persons receiving outpatient medical services pursuant to paragraphs (e), (f), (i), (j), and/or (k) of § 17.80 who have no service-connected disabilities who it is believed may be entitled to hospital care and/or medical services, or

reimbursement for the expenses of care or services for all or part of the cost thereof by reason of the following:

(i) Membership in a union, fraternal or other organization; or

(ii) Coverage under an insurance policy, or contract, medical, or hospital service agreement, membership, or subscription contract or similar arrangement under which health services for individuals are provided or the expenses of such services are paid;

will not be furnished hospital care or medical services without charge therefor to the extent of the amount for which such parties referred to in paragraphs (g)(1)(i) or (g)(1)(ii) of this section, are, or will become liable. Persons seeking hospital or medical care under (g)(1) shall provide such information relating to membership or affiliation referred to in paragraphs (g)(1)(i) or (g)(1)(ii), as the Administrator may require. Provisions of this subparagraph are effective as of April 7, 1986, except that in the case of a health care policy or contract that was entered into before that date, the effective date shall be the day after the plan was modified or renewed or on which there was any change in premium or coverage and will apply only to care and services provided by the VA after the date the plan was modified, renewed, or on which there was any change in premium or coverage. (38 U.S.C. 629; sec. 19013, Pub. L. 99–272).

(2) Persons hospitalized for the treatment of nonservice-connected disabilities pursuant to § 17.47, or persons receiving outpatient medical services pursuant to paragraph (e), (f), (h), (i), (j), or (k) of § 17.60, and who it is believed may be entitled to hospital care and/or medical services or to reimbursement for all or part of the cost thereof from any one or more of the following parties:

(i) "Workers' Compensation" or employer's liability statutes, State or Federal;

(ii) By reason of statutory or other relationships with third parties, including those liable for damages because of negligence or other legal wrong;

(iii) By reason of a statute in a State, or political subdivision of a State, (A) which requires automobile accident reparations, (B) which provides compensation or payment for medical care to victims suffering personal injuries as the result of a crime of personal violence;

(iv) Right to maintenance and cure in admiralty;

will not be furnished hospital care or medical services without charge therefor to the extent of the amount for which such parties are, or will become, liable. Persons believed entitled to care under circumstances described in paragraph (g)(2)(ii) of this section will be required to provide such information as the Administrator may require. Notice of this assignment will be mailed promptly to the party or parties believed to be liable. When the amount of charges is ascertained, a bill therefor will be mailed to such party or parties. Persons believed entitled to care under circumstances described in paragraph (g)(2)(i) or (g)(2)(iii) of this section will be required to provide such information as the Administrator may require. (38 U.S.C. 629; sec. 19013, Pub. L. 99–272.)

* * * * *

2. In § 17.62, paragraph (h) is revised to read as follows:

§ 17.62 Charges for care or services.

* * * * *

(h) *Furnished for nonservice-connected disabilities.*

(1) Charges at rates prescribed by the Administrator shall be made for inpatient or outpatient care and services rendered a veteran for nonservice-connected disabilities.

(i) Incident to the veteran's employment and the disability is covered under a workers' compensation law or plan that provides reimbursement or indemnification for the cost of such care and services,

(ii) As the result of a motor vehicle accident in a State which required automobile accident reparations insurance, or

(iii) As the result of a crime of personal violence that occurred in a State, or a political subdivision of a State, in which a person so injured is entitled to receive health care and services for that injury at the expense of the State or subdivision.

Authority: 38 U.S.C. 629; sec. 19013, Pub. L. 99–272.

(2) Charges at rates prescribed by the Administrator shall be made for inpatient or outpatient care and services rendered to a veteran who has no service-connected disabilities and who is entitled to care, or reimbursement for the expenses of care, under an insurance policy, or contract, medical, or hospital service agreement, membership, or subscription contract, or similar agreement for the purpose of providing, paying for, or reimbursing expenses for health services.

(i) No deductible and/or coinsurance charge prescribed by any such policy, contract, membership or agreement shall be required by the VA.

(ii) VA medical records shall be made available for inspection and review by the parties to any kind of agreement referred to in paragraph (h) (1) and (2) of this section with respect to which recovery or collection is sought by the VA for the purpose of verifying that services for which recovery or collection is sought were furnished and that the provision of such services meets criteria generally applicable under the health-plan contract involved.

Authority: 38 U.S.C. 629 (h)(1); Pub. L. 99–272.

(3) The method for computing the charges for medical care and services is based on the Cost Distribution Report, which sets forth the actual basic costs and per diem rates by type of inpatient care and outpatient visit. Factors for depreciation of buildings and equipment and Central Office overhead are added, based on accounting manual instructions. Additional factors are added for interest on capital investment and for standard fringe benefit costs covering government employee retirement and disability costs. The current year billing rates are projected on prior year actual rates by applying the budgeted percentage increase. (38 U.S.C. 629; sec. 19013, Pub. L. 99–272.)

(4) The reasonable cost of care or services sought to be recovered or collected from a third party liable under a health-plan contract may not exceed the amount that such third party demonstrates to the satisfaction of the Administrator it would pay for the care or services in accordance with the prevailing rates at which the third party makes payments under comparable health-plan contracts with facilities (other than facilities of departments or agencies of the United States) in the same geographic area. (38 U.S.C. 629; sec. 19013, Pub. L. 99–272.)

(5) Any contract or agreement into which the Administrator enters with a person under 31 U.S.C. 3718 for collection services to recover indebtedness owed the United States under this section shall provide, with respect to such services, that such person is subject to 38 U.S.C. 3301 and 4132. (38 U.S.C. 629; sec. 19013, Pub. L. 99–272.)

(6) Amounts collected or recovered on behalf of the United States under this section shall be deposited into the Treasury as miscellaneous receipts. (38 U.S.C. 629; sec. 19013, Pub. L. 99–272.)

LIST OF PUBLIC LAWS

Last List May 30, 1986

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

H.R. 4382/Pub. L. 99-325

To require the Architect of the Capitol to place a plaque at the original site of Providence Hospital. (May 28, 1986; 100 Stat. 501; 2 pages) Price: $1.00

H.J. Res. 492/Pub. L. 99-326

To designate the week beginning on June 1, 1986, as "National Neighborhood Housing Services Week." (May 28, 1986; 100 Stat. 503; 1 page) Price: $1.00

H.J. Res. 526/Pub. L. 99-327

To designate the week of May 25, 1986, through May 31, 1986, as "Critical Care Week." (May 28, 1986; 100 Stat. 504; 1 page) Price: $1.00

H.J. Res. 613/Pub. L. 99-328

Allowing qualified persons representing all the States to be naturalized on Ellis Island on July 3 or 4, 1986. (May 28, 1986; 100 Stat. 505; 2 page) Price: $1.00

S.J. Res. 271/Pub. L. 99-329

Designating "Baltic Freedom Day." (May 28, 1986; 100 Stat. 507; 2 pages) Price: $1.00

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily Federal Register as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $595.00 domestic, $148.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

[1] No amendments to this volume were promulgated during the period Apr. 1, 1980 to March 31, 1985. The CFR volume issued as of Apr. 1, 1980, should be retained.

[2] No amendments to this volume were promulgated during the period Apr. 1, 1984 to March 31, 1985. The CFR volume issued as of Apr. 1, 1984, should be retained.

[3] No amendments to this volume were promulgated during the period July 1, 1984 to June 30, 1985. The CFR volume issued as of July 1, 1984, should be retained.

[4] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[5] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[6] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

TABLE OF EFFECTIVE DATES AND TIME PERIODS—JUNE 1986

This table is used by the Office of the Federal Register to compute certain dates, such as effective dates and comment deadlines, which appear in agency documents. In computing these dates, the day after publication is counted as the first day.

When a date falls on a weekend or holiday, the next Federal business day is used. (See 1 CFR 18.17)

A new table will be published in the first issue of each month.

DATE OF FR PUBLICATION	15 DAYS AFTER PUBLICATION	30 DAYS AFTER PUBLICATION	45 DAYS AFTER PUBLICATION	60 DAYS AFTER PUBLICATION	90 DAYS AFTER PUBLICATION
June 2	June 17	July 2	July 17	August 1	September 2
June 3	June 18	July 3	July 18	August 4	September 2

Briefings on How To Use the Federal Register—
For information on briefings in Seattle, WA, and
San Francisco, CA, see announcement on the inside cover
of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, [not] published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

SEATTLE, WA

WHEN: July 22; at 1:30 pm.

WHERE: North Auditorium,
Fourth Floor, Federal Building,
915 2nd Avenue, Seattle, WA.

RESERVATIONS: Call the Portland Federal Information Center on the following local numbers:
Seattle 206-442-0570

The President

Proclamation 5406 of May 30, 1986

National Neighborhood Housing Services Week, 1986

By the President of the United States of America

A Proclamation

America's neighborhoods are made up of families representing a great variety of ethnic, social, and economic backgrounds. From this rich mix of cultures and experiences, a strong sense of cooperation and commitment has emerged that enhances our sense of the Nation as a larger family of people caring for one another. As we complete our preparations for the national celebration of the centennial of the Statue of Liberty this July 4, we are made even more aware of the special blessings, the strengths, and the virtues that flow from our long heritage of welcoming and drawing on the experiences of people from diverse backgrounds to make our free society ever more dynamic, cohesive, and productive.

When any neighborhood suffers from decline due to loss of business or other factors, all of its residents feel the pinch, but the elderly and the poor suffer most. Homes decline in value, economic growth stops, businesses relocate, and residents face real hardships. The Nation as a whole suffers, since thriving neighborhoods are the living cells of our national life. That is why it is so important to arrest the deterioration and revive the strength and vigor of America's neighborhoods.

Traditionally, Americans have recognized such problems and have worked together to develop practical solutions at the grass-roots level. Neighborhood Housing Services programs, which are partnerships made up of local residents, business leaders, and government officials, reflect this spirit and give scope to the ingenuity of the American people. Throughout the United States, Neighborhood Housing Services programs are working to revitalize more than 200 neighborhoods. Already, they have generated more than three billion dollars in reinvestment funds. Rather than looking to the Federal government for assistance, these programs have relied primarily on local and private resources and the help of hundreds of volunteers. These volunteers have contributed countless hours of work to help rebuild and revitalize neighborhoods.

The efforts and accomplishments of Neighborhood Housing Services programs have earned the respect and gratitude of all who recognize that local initiatives and self-reliance will always be the major factor in solving local problems. It is fitting and appropriate that their efforts be recognized by all Americans.

The Congress, by House Joint Resolution 492, has designated the week beginning June 1, 1986, as "National Neighborhood Housing Services Week" and authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning June 1, 1986, as National Neighborhood Housing Services Week. I call upon local and State jurisdictions, appropriate Federal agencies, and the people of the United States to observe this week with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of May, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Ronald Reagan

Presidential Documents

Proclamation 5497 of May 30, 1986

National Theatre Week, 1986

By the President of the United States of America

A Proclamation

Theatre is an ancient and honored art form with a recorded history spanning 2,500 years. Some have speculated that its roots go so deep in human nature and human experience that it may well be the wellspring of all the arts. We do know that poetry, story-telling, dance, music, masks, costumes, and sets all have a place in what we have come to call "theatre." These elements can be found in the performances of primitive tribes and the most sophisticated modern productions. In fact we see the impulse to theatre in every child who has ever played "let's pretend" or "make believe."

Theatre lets us stand apart from the flow of life: to feel pity and understanding and empathy; to smile at human foibles and to weep at human tragedies. Theatre is an art form for all seasons and all moods. It can refresh our spirits with comic hijinks, dazzle us with the splendor of pageantry, and impart rich insights into human relationships. It can convulse us into gales of laughter, wring our hearts with pathos, and dramatize eternal moral truths. In the works of such giants as Shakespeare, Goethe, Moliere, and O'Neill it can do all these things.

In one respect theatre is an art of the present moment—once performed it is gone, save in the memory of the audience. Yet new productions and performances give it a kind of ever-renewed immortality. It can put us in touch with the culture, conditions, and viewpoints of many civilizations. Indeed, theatre is at once a reminder and an affirmation of the continuity of civilization and the fundamental unity of all mankind.

That continuity is manifested not only in performances of plays of the past, but also in the attempts of modern artists to give voice to the conditions and experiences of our own time. These efforts, in turn, will enrich the legacy we will leave to future generations.

Today, theatre exists not only in the traditional cultural centers of our country but all across the land. Theatre at all levels—professional, community, and school—has sprung up in every region of our country. There is no greater testimony to mankind's need for theatre than this. Today we are experiencing a renaissance of the living theatre, with great gains in artistic excellence, in aesthetic variety and diversity of cultural voices—and in growing and loyal audiences throughout America.

In recognition of the importance of theatre in the lives of all Americans, the Congress, by Senate Joint Resolution 247, has authorized the President to proclaim the week of June 1 through June 7, 1986, as "National Theatre Week."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning June 1, 1986, as National Theatre Week. I encourage the people of the United States to observe this month with appropriate ceremonies, performances, programs, and activities.

VOL 51 ISS 106 JE 3 1986 UMI

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of May, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Rules and Regulations

Federal Register
Vol. 51, No. 106
Tuesday, June 3, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1136

Milk in the Great Basin Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action continues a prior suspension of the provisions of the Great Basin milk order that limit the amount of milk not needed for fluid (bottling) use that may be moved directly from farms to nonpool manufacturing plants and still be priced under the order. Also continued is a suspension of the requirement that 6 days' production of each producer whose milk is diverted to nonpool plants be received at pool plants in order for the diverted milk to be priced and pooled under the order. The continuing action was requested by Western General Dairies, Inc., a cooperative association representing most of the producers supplying the market.

The suspension is based on information received at a public hearing held on March 18–20, 1986, in Salt Lake City, Utah. The hearing was held to consider a proposal to merge the Great Basin and Lake Mead milk orders. Provisions of the proposed merged order would alleviate the pooling problems experienced by the cooperative for approximately the past year. A further suspension of the order's diversion limits and "touch-base" requirement is warranted until the hearing proceeding has been completed.

Such interim action is needed to provide a continuation of the orderly and efficient handling of the supplies of milk surplus to the fluid needs of the market while the proceeding is under consideration.

EFFECTIVE DATE: June 3, 1986.

FOR FURTHER INFORMATION CONTACT: Constance M. Brenner, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447–7311.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:.

Notice of Hearing: Issued February 6, 1986; published February 11, 1986 (51 FR 5070).

The Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and of the order regulating the handling of milk in the Great Basin marketing area.

It is hereby found and determined that the suspension, which applied to milk marketed through the end of April, should be extended and continued until the hearing proceeding on a proposed merger of the Great Basin and Lake Mead orders has been completed and that the following provisions of the current order do not tend to effectuate the declared policy of the Act:

(1) Section 1136.13(c)(2).

(2) In § 1136.13(c)(3), the language "*Provided*, That the total quantity of milk so diverted that exceeds 25 percent of the milk physically received at all pool plants from member producers in any month of March through August, and that exceeds 20 percent of such receipts in any month of September through February, shall not be producer milk;", and

(3) In § 1136.13(c)(4), the language "*Provided*, That the total quantity of milk so diverted that exceeds 25 percent of the milk physically received at such plant from producers who are not members of a cooperative association in any month of March through August, and that exceeds 20 percent of such receipts in any month of September through February, shall not be producer milk;".

Statement of Consideration

This action is based on the record of a public hearing held on March 18–20, 1986, at Salt Lake City, Utah, to consider a proposed merger of the Great Basin and Lake Mead orders. The Great Basin order now provides that a cooperative association may divert up to 25 percent of its producer milk physically received at pool plants in any month of March through August, and up to 20 percent of its member milk physically received at pool plants in any month of September through February. Similarly, the operator of a pool plant may divert up to 25 percent of its receipts of producer milk (for which the operator of such plant is the handler during the month) during the months of March through August, and 20 percent during the months of September through February. The order also requires that at least 6 days' production of each producer whose milk is diverted to nonpool plants be received at pool plants in order for the diverted milk to be priced and pooled under the order. The limit on the percentage of allowable diversions has been suspended since January 1985, and the 6-day "touch-base" requirement has been suspended since July 1985.

Continuation of the suspension was requested by Western General Dairies, Inc., at the March 18–20 hearing. Western General operates pool distributing plants and manufacturing plants in the Great Basin marketing area. The cooperative also supplies most of the market's fluid milk needs and handles most of the market's reserve milk supplies.

At the March hearing, witnesses for Western General testified that the order's present diversion limits and "touch-base" requirements are too restrictive to allow the cooperative to maintain the pool status of its members without the use of unnecessary and inefficient hauling practices. In order to operate within the order's diversion limits, some of the milk of the cooperative's member producers who regularly have supplied the fluid market would have to be moved, uneconomically, first to pool plants and then to nonpool manufacturing plants in order to achieve pool status for such milk. In addition, milk would have to be

moved uneconomically from distant production areas in order to meet the 6-day delivery requirement, only to displace milk produced at locations nearer the pool plants. The close-in milk must then be moved, uneconomically, to distant nonpool plants for manufacturing.

Data introduced at the hearing show that producer milk pooled under the Great Basin order in 1985 increased by 33 percent over 1984. At the same time, Class I sales by Great Basin handlers increased by only 8 percent over the same period. As a result, the volume of producer milk used in manufactured Class I and Class III products in 1985 was 61 percent greater than in 1984. The percentage of producer milk used in Class I in 1985 was 48.39 percent, as compared with 59.34 percent in 1984. Testimony received at the hearing indicated that there are many manufacturing grade dairy farmers in the area who are likely to convert their operations to Grade A status in the near future, and that many of the present Grade A producers are likely to increase production. These factors are expected to result in increasing volumes of milk production eligible for pooling under the Great Basin order in spite of the effects of the whole-herd buyout program. Given these conditions, it is very likely that some producer milk will fail to qualify for pooling or that handlers will be forced to resort to unnecessary and uneconomic hauling practices in order to maintain the producer status of their milk supply if only 20 percent of a handler's milk supply is allowed to be delivered directly to nonpool manufacturing plants.

Two pooled proprietary handlers with nonmember milk supplies testified that the current order provisions would cause them to undertake unnecessary and uneconomic hauling and handling of their producer milk supplies in order to maintain pool status for their producers. The handlers also stated that the order's present restrictive diversion limits and producer delivery requirements would make it impossible for them to maintain a large enough milk supply to be able to bid for and acquire new accounts, and thereby increase their business.

Although the diversion limits contained in Western General's proposed merged order would not be any more generous than those contained in the current Great Basin order, Western General's proposal does include in the pool plant definition a cooperative-owned manufacturing plant located in the marketing area. Adoption of this provision would allow all of Western General's milk supplies delivered to its own manufacturing plant to be considered deliveries to pool plants, and therefore not be counted as diversions. Because most of Western General's member milk that is surplus to the fluid needs of the market is delivered to Western General's manufacturing facilities, adoption of this proposed provision would allow the cooperative to maintain pool status for the milk of all of its member producers. Western General's proposed order would reduce the number of days of a producer's production that would be required to be received at pool plants from 6 to 1. Proposals supported at the hearing by the proprietary handlers would relax the present limits on the amount of a handler's milk that may be diverted to nonpool plants.

An extension of the current suspension is warranted on the basis of the foregoing information. The extension will enable Western General and other handlers to handle their reserve milk supplies efficiently and assure that the milk of dairy farmers who supply the fluid needs of the market will continue to be pooled until such time as the hearing proceeding is completed.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to assure the orderly marketing of milk in the marketing area;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) The marketing problems that provide the basis for this action were fully explored at a public hearing held on March 18–20, 1986, where all interested parties had an opportunity to testify concerning the proposals.

Therefore, good cause exists for making this order effective upon publication in the Federal Register.

List of Subjects in 7 CFR Part 1136

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, that the following language in § 1136.13(c) of the Great Basin milk order is hereby suspended for the month of May 1986 and continuing until the rulemaking proceeding relating to the merger of the Great Basin and Lake Mead Federal milk orders has been completed:

PART 1136—MILK IN THE GREAT BASIN MARKETING AREA

1. The authority citation for 7 CFR Part 1136 continues to read as follows:

Authority: Sec. 1–19, 48 Stat. 31, as amended, 7 U.S.C. 601–674.

§ 1136.13 (Amended)

2. Section 1136.13(c)(2) is suspended.

3. Section 1136.13(c)(3), the language "*Provided*, That the total quantity of milk so diverted that exceeds 25 percent of the milk physically received at all pool plants from member producers in any month of March through August, and that exceeds 20 percent of such receipts in any month of September through February, shall not be producer milk;" is suspended, and

4. In § 1136.13(c)(4), the language "*Provided*, That the total quantity of milk so diverted that exceeds 25 percent of the milk physically received at such plant from producers who are not members of a cooperative association in any month of March through August, and that exceeds 20 percent of such receipts in any month of September through February, shall not be producer milk;" is suspended.

Effective date: Upon publication in the Federal Register.

Signed at Washington, D.C. on May 28, 1986.

Karen K. Darling,

Deputy Assistant Secretary, Marketing & Inspection Services.

[FR Doc. 86-12269 Filed 6-2-86; 8:45 am]

BILLING CODE 3410-02-M

Rural Electrification Administration

7 CFR Part 1772

[REA Bulletin 345-80]

REA Specification for Totally Filled Fiber Optic Cable, PE-80

AGENCY: Rural Electrification Administration, Department of Agriculture.

ACTION: Final rule.

SUMMARY: The Rural Electrification Administration (REA) hereby amends 7 CFR 1772.97, Incorporation by Reference of Telephone Standards and Specifications, by issuing a new Bulletin 345-80, REA Specification for Totally Filled Fiber Optic Cable, PE-80. This action permits REA borrowers to routinely employ fiber optic cable, one of the most recent advances in communications technology, as an alternative to conventional cables utilizing copper conductors. With this alternative available, REA borrowers may utilize the latest technology in bringing the best, most cost-effective telecommunications to rural America. All manufacturers of

telecommunications cables as well as all REA borrowers may be impacted to some degree.

EFFECTIVE DATE: The incorporation by reference of the publication listed in this regulation is approved by the Director of the Federal Register as of May 28, 1986.

FOR FURTHER INFORMATION CONTACT: M. Wilson Magruder, Director, Telecommunications Engineering and Standards Division, Rural Electrification Administration, Room 2835, South Building, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 382-8663. The Impact Analysis describing the options considered in developing this rule and the impact of implementing each option is available on request from the above office.

SUPPLEMENTARY INFORMATION: Pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), REA hereby amends 7 CFR 1772.97, Incorporation by Reference of Telephone Standards and Specifications, by incorporating by reference a new Bulletin 345-90, REA Specification for Totally Filled Fiber Optic Cable, PE-90. Copies of the bulletin are available upon request from the address stated above. It is also available for inspection at the Office of the Federal Register, Room 8401, 1101 L Street, NW., Washington, DC 20408. These materials are incorporated as they existed on the date of the approval and a notice of any change in these materials will be published in the Federal Register. The action will not (1) have an annual effect on the economy of $100 million or more; (2) result in a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; (3) result in significant adverse effects on competition, employment, investment or productivity, innovations, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets and therefore has been determined to be "not major". This action does not fall within the scope of the Regulatory Flexibility Act. REA has concluded that promulgation of this rule would not represent a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.* (1976)) and, therefore, does not require an environmental impact statement or an environmental assessment. This program is listed in the Catalog of Federal Domestic Assistance under No. 10.851, Rural Telephone Loans and Loan Guarantees and 10.852, Rural Telephone Bank Loans. For the reasons set forth in the Final rule related Notice to 7 CFR Part 3015, Subpart V (48 FR 54317, December 1, 1983), this program is excluded form the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Copies of the document are available upon request from the address indicated above.

Background

REA has issued a series of publications entitled "bulletins" which serve to implement the policy, procedures and requirements for administering its loans and loan guarantee programs and the security instruments which provide for and secure REA financing. In the bulletin series REA issues standards and specifications for the construction of telephone facilities financed with REA loan funds. REA presently has no specification for fiber optic cables, so their use on the systems of REA borrowers is severely restricted. This new specification PE-90, establishes the minimum requirements for fiber optic cables that are used for direct burial, underground and aerial applications on REA-financed systems. The conductors are solid glass waveguides consisting of a cylindrical core surrounded by protective coverings. The cables are used as the transport media for transmission of voice, data, pictures and signals between telephone subscribers. Fiber optic cables have lower attenuation loss and increased bandwidth when compared to copper pairs in conventional telephone cable. This allows for high capacity transmission systems at lower cost to meet initial requirements and at the same time provide for future growth in an economical manner. The specification also requires properties which will assure that the fiber optic cables are capable of withstanding the rigors of conventional installation methods and providing reliable long-term service. Neither manufacturing techniques nor purchase price will be adversely affected by this action.

A Notice of Proposed Rulemaking was published in the Federal Register on October 7, 1985, Volume 50, No. 194, page 40865. The following four comments were received concerning the proposal:

1. The core ellipticity should be increased from 2 percent to 6 percent which would still be within the core diameter specification of 50±3 micrometers.

2. The numerical aperture (NA) of .20±.02 should be expanded to .24±.02 or to .22±.02 because computerized lathes allow improved bandwidths with a larger NA.

3. The compound flow test parameters should be rewritten to remove any ambiguity.

4. The limit of 0.1 dB/km following temperature and humidity exposure should be expanded to allow a change of 0.2 dB/km because of measurement uncertainty.

REA's response to these comments is summarized as follows:

1. From a strictly dimensional consideration of individual fibers a 6 percent ellipticity requirement would be reasonable but REA must look beyond the single fiber to consider the ramifications of joining two dimensionally unmatched fibers at a splice point. To effect maximum light transfer through a splice in either direction the cores should be perfectly matched. Since a zero variance would be near impossible with present fiber manufacturing technology, REA has chosen to allow the core area mismatched by ellipticity (2 percent) to be no greater than the possible core area mismatch allowed by the diameter extremes (±3 microns).

2. The goal of REA in writing PE-90 with the NA requirement of .20±.02 is to standardize realistic properties of optical fibers that are available and will yield a quality product sufficient to meet the transmission needs of rural telecommunication companies. The .20±.02 NA meets this goal of standardization of optical properties, is available from most optical fibers manufacturers and yields an acceptable bandwidth. A compromise to another NA value would contribute nothing additional to the standardization goal of REA.

3. The compound flow test of Paragraph 18 is being rewritten to prevent any misinterpretation. Paragraph 18.1 is not altered but Paragraph 18.2 is revised to allow cable specimens to be prepared extraordinarily long or to be capped to simulate the vacuum and capillary effects of inservice cable. Also a dish now must be placed immediately below the vertically suspended cable specimen. A paragraph defining failure was added: "18.3 Evidence that either the filling or flooding compound flowed or dripped from any of the suspended cable specimens shall constitute failure."

4. The limit of 0.1 dB/km following temperature and humidity exposure is necessary to reveal any flaws that may

be inherent in a fiber optic cable design submitted to REA for acceptance and listing in the REA Bulletin 344-2. The uncertainty of the measurements introduced by equipment limitation and operator repeatability is outweighed by the net benefit to the manufacturer and to REA by the 0.1 dB/km requirement compared to the 0.2 dB/km request. REA elects to keep the 0.1 dB/km requirement in the specification for qualification of totally filled fiber optic cable.

List of Subjects in 7 CFR Part 1772

Loan programs-communications, Telecommunications, Telephone, Incorporation by reference.

PART 1772—[AMENDED]

In view of the above, REA hereby amends 7 CFR Part 1772 by issuing a new Bulletin 345-50.

1. The authority cited for 7 CFR Part 1772 is revised to read as follows:

Authority: 7 U.S.C. 901 et seq., 7 U.S.C. 1921 et seq.

2. The table in § 1772.97 is amended by adding the entry 345-50 to read as follows:

§ 1772.97 Incorporation by reference of telephone standards and specifications.

* * * * *

345-50	PE-50	REA specification for totally filled fiber optic cable.

* * * * *

Dated: May 28, 1986.

Harold V. Hunter,

Administrator.

BILLING CODE 3410-15-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Parts 100 and 103

Organization Changes; Powers and Duties of Service Officers and Availability of Service Records

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule amends the Immigration and Naturalization Service regulations to reflect a recent organization change approved by the Attorney General. The change combines the Offices of Field Inspections and Audit with Evaluation to form the new Office of Program Inspection. This change is made to improve the management, direction and control of Service programs and enhance overall efficiency of the Service.

EFFECTIVE DATE: February 18, 1986.

FOR FURTHER INFORMATION CONTACT:

For General Information: Loretta J. Shogren, Director, Policy Directives and Instructions, Immigration and Naturalization Service, 425 I Street, NW., Washington, DC 20536, Telephone: (202) 633-3048

For Specific Information: Robert A. Anderson, Director, Office of Program Inspection, Immigration and Naturalization Service, 425 I Street, NW., Washington, DC 20536, Telephone: (202) 633-4097.

SUPPLEMENTARY INFORMATION: On October 4, 1985, the proposed reorganization of the Office of the Commissioner of the Immigration and Naturalization Service was approved by the Attorney General. Notification of the Service's reorganization was then sent to the Office of Management and Budget, and finally, to the Congress for their approval. This reorganization allows the Office of Evaluation to combine functions with the Office of Field Inspections and Audit to form a new unit titled the Office of Program Inspection. The combination of these offices will aid the Service in achieving the goal of improving performance and effectiveness of INS programs.

Compliance with 5 U.S.C. 553 as to notice of proposed rulemaking and delayed effective date is unnecessary as this rule relates solely to agency organization and management.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that this rule does not have a significant impact on a substantial number of small entities. This rule is not a rule as defined in section 1(a) of E.O. 12291 as it relates to agency organization and management.

List of Subjects in 8 CFR Parts 100 and 103

Administrative practice and procedure, Authority delegation, Organization and functions.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 100—STATEMENT OF ORGANIZATION

1. The authority citation for Part 100 continues to read as follows:

Authority: Sec. 103 of the Immigration and Nationality Act, as amended; (8 U.S.C. 1103).

2. In § 100.2, paragraphs (a)(4) and (b)(2) are revised to read as follows:

§ 100.2 Organization and functions.

(a) * * *

(4) *Office of Program Inspection.* Headed by the Director for Program Inspection who is subject to the general supervision and direction of the Comissioner and who supervises, directs, and coordinates the Field Inspections and Program Audit and the Evaluation and Productivity Improvement Programs.

(b) * * *

(2) *Office of Management.* Headed by the associate Commissioner for Management who is responsible for planning, developing, directing, coordinating, and reporting on Service management programs and activities and participating in formulating Service management policies. The Associate Commissioner for Management directly supervises:

(i) Office of the Comptroller,

(ii) Personnel and Training Division,

(iii) Administration Division, and

(iv) Office of Equal Employment Opportunity.

* * * * *

PART 103—POWERS AND DUTIES OF SERVICE OFFICER; AVAILABILITY OF SERVICE RECORDS

3. The authority citation for Part 103 continues to read as follows:

Authority: Sec. 103 of the Immigration and Nationality Act, as amended; (8 U.S.C. 1103).

4. In § 103.1, paragraphs (d) and (j) are revised to read as follows:

§ 103.1 Delegations of Authority.

* * * * *

(d) *Associate Commissioner for Management.* Under the direction of the Deputy Commissioner, the Associate Commissioner for Management is delegated authority and responsibility for program planning, development, coordination, counseling, and staff direction of the Comptroller, Personnel and Training, Administration, Equal Employment Opportunity programs and general direction to and supervision of:

(1) Comptroller,

(2) Assistant Commissioner for Personnel and Training,

(3) Assistant Commissioner for Administration, and

(4) Director for Equal Employment Opportunity.

* * * * *

(j) *Director for Program Inspection.* Under the direction of the Commissioner, the Director for Program Inspection is delegated the responsibility for program planning, development, coordination, and execution of field inspections and program audits; program evaluation and productivity improvements; the decision memo process; and executive video reports. The Director reports to the Commissioner, in a timely manner, the results and recommendation of all completed studies and reports.

* * * * *

Dated: May 29, 1988.

Alan C. Nelson,

Commissioner, Immigration and Naturalization Service.

BILLING CODE 4410-10-M

FEDERAL RESERVE SYSTEM

12 CFR Part 265

[Docket No. R-0574]

Rules for Delegations of Authority; Change in Bank Control Act

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Amendment of final rule.

SUMMARY: On October 21, 1982, the Board published in the Federal Register (47 FR 46838 (1982)) an amendment to a final rule which expanded the delegated authority of the General Counsel to include authority to revoke acceptance of and return a notice filed pursuant to the Change in Bank Control Act, or to extend the time during which action must be taken on such a notice where the General Counsel has determined, with the concurrence of the Board's Director of Banking Supervision and Regulation, that the notice is materially incomplete or contains material information that is substantially inaccurate. The effective date was October 21, 1982. This amendment was designated as paragraph (b)(10). Paragraph (b)(10) was then inadvertently removed from the Code of Federal Regulations when the Board published on February 14, 1984, a new paragraph (b)(10), relating to public meetings concerning any application or notice filed with the Board (49 FR 5805 (1984)). This, the current paragraph (b)(10), should have been published as a new paragraph (b)(11). The Board is now publishing an amendment to reinsert the original paragraph (b)(10), and to redesignate the current paragraph (b)(10) as paragraph (b)(11).

EFFECTIVE DATE: June 3, 1988.

FOR FURTHER INFORMATION CONTACT: J. Virgil Mattingly, Deputy General Counsel (202/452-3430), or Scott G. Alvarez, Senior Attorney (202/452-3583), Legal Division, or for users of the Telecommunications Device for the Deaf (TDD), Earnestine Hill or Dorothea Thompson (202/452-3544), Board of Governors of the Federal Reserve System, Washington, DC 20551.

List of Subjects in 12 CFR Part 265

Authority, delegations (Government agencies), Banks, banking, Federal Reserve System.

PART 265—RULES REGARDING DELEGATION OF AUTHORITY

For the reasons set forth in the preamble, Title 12, Part 265 of the Code of Federal Regulations, is amended as follows:

1. The authority citation for 12 CFR Part 265 continues to read as follows:

Authority: Sec. 11(k), 38 Stat. 261 and 80 Stat. 1314; 12 U.S.C. 248(k).

2. Section 265.2 is amended by redesignating the current paragraph (b)(10) as paragraph (b)(11) and by adding a new paragraph (b)(10) to read as follows:

§ 265.2 Specific functions delegated to Board employees and to Federal Reserve Banks.

* * * * *

(b) * * *

(10) To revoke acceptance of and return as incomplete a notice filed pursuant to the Change in Bank Control Act (12 U.S.C. 1817(j)) or to extend the time during which action must be taken on a notice where the General Counsel determines, with the concurrence of the Board's Director of Banking Supervision and Regulation, that the notice is materially incomplete under the Change in Bank Control Act or the Board's regulation promulgated thereunder or contains material information that is substantially inaccurate.

* * * * *

By order of the Board of Governors of the Federal Reserve System, May 29, 1988.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 88-AWP-10]

Amendment of Tustin MCAS H, California, And Santa Ana Orange County, CA, Control Zones

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the description of the Tustin MCAS H, California, and Santa Ana Orange, County, California, control zones. These amendments are editorial only and will provide a complete and accurate description of the control zones.

EFFECTIVE DATE: 0901 UTC, August 25, 1988.

FOR FURTHER INFORMATION CONTACT: Frank T. Torikai, Airspace Specialist, Airspace Branch, AWP-520, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90260; telephone (213) 297-1649

The Rule

These amendments to Part 71 of the Federal Aviation Regulations are editorial in nature only and will correct the descriptions of the Tustin MCAS H, California, and Santa Ana Orange County, California, control zones. I find that notice and public procedure under 5 U.S.C. 553(b) are unnecessary because these actions are minor amendment in which the public would not be particularly interested.

Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1988.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities

under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety/control zones.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1302(a); 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. Section 71.171 is amended as follows:

Santa Ana Orange County Airport, CA—[AMENDED].

Remove "MCAS Santa Ana (lat. 33 °42 '22 " N., 117 °49 '35 " W.)" and substitute "Tustin MCAS (lat. 33 °42 '22 " N., long. 117 °49 '35 " W.)."

Tustin MCAS H, CA—[AMENDED.

Add the following sentence to the end of the present control zone description: "However, at other times, the control zone is under control jurisdiction of Santa Ana Orange County."

Issued in Los Angeles, California, on May 21, 1986.

Wayne C. Nesemb,

Manager, Air Traffic Division.

BILLING CODE 4910-13-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 510

[Docket No. 79F-0197]

New Animal Drug Requirements for Medicated Free-Choice Feeds

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the new animal drug regulations covering requirements for approval of applications for medicated free-choice feed products. The regulations will allow for an optional method of submitting data to FDA within the framework of existing requirements. This action is being taken based on a citizen petition filed jointly by the American Feed Manufacturers Association (AFMA) and the Animal Health Institute (AHI) and the agency's evaluation of current regulatory requirements. In a document published elsewhere in this issue of the Federal Register, the agency is announcing the availability of two draft guidelines, one covering the evaluation of effectiveness of new animal drugs for use in free-choice feeds and the other covering current good manufacturing practice concerning such products. These guidelines are intended to replace the existing "Cattle Medicated Block Guidelines."

EFFECTIVE DATE: July 3, 1986.

FOR FURTHER INFORMATION CONTACT: Richard P. Lehmann, Center for Veterinary Medicine (HFV-120), Food and Drug Administration, 5600 Fishers Lane, Rockville MD 20857, 301-443-3134.

SUPPLEMENTARY INFORMATION:

Background

In the Federal Register of November 19, 1984 (49 FR 45593), FDA published a proposal to amend § 510.455 *New animal drug requirements for medicated blocks* (21 CFR 510.455) of the new animal drug regulations.

The proposal was based on FDA's evaluation of current regulatory requirements in light of a citizen petition that was filed jointly by AFMA and AHI on June 6, 1979. They requested in the petition that FDA regulate medicated blocks and similar articles as medicated feeds rather than as new animal drugs. They asked FDA to recognize that medicated blocks, liquid feed supplements, and similar "free-choice" articles are, under the provisions of the Federal Food, Drug, and Cosmetic Act (the act), "animal feeds bearing or containing new animal drugs" rather than "new animal drugs" and thus should be regulated as medicated feeds.

The petition recognized that use of medicated free-choice feeds posed questions not posed by other medicated feeds with regard to composition of the feed, stability, and consumption of the drug product. The petition contended that the information necessary to respond to these questions could be submitted in medicated feed applications and that drug sponsors and feed manufacturers are willing to provide those data. The petition stated that the drug manufacturer and the medicated feed applicant would each supply part of the data demonstrating that a safe and effective dose of the drug would be provided by a particular free-choice product. The petition suggested submission of data in master files to permit each manufacturer to retain the confidentiality of its data.

FDA evaluated the petition and concluded that the revisions suggested would simplify the approval process in a manner consistent with the act and regulations. FDA proposed to grant in substance the relief sought.

Comments

The proposal provided for a comment period of 60 days. The agency received four comments on the proposal. These comments were from an animal drug manufacturer, a manufacturer of feed blocks, an agricultural consultant, and one joint comment from two trade associations.

The agency has carefully evaluated the comments received and, in response to these comments, has modified certain aspects of the proposed regulations.

1. Comments contended that the definition of medicated blocks in proposed § 510.455(a) should indicate that medicated blocks can be produced from agglomerated feed rendered into a solid mass. This provides for production of blocks by means other than compression as stated in the proposal.

The agency concurs with the addition of "or rendered" in the definition of medicated blocks because blocks may be produced by procedures other than compression.

2. Comments contended that the term "mineral mixes" is inadequate and suggested use of the term "loose self-limiting mixtures." The comments suggested this change because free-choice supplements may contain considerably less than 50 percent mineral content by weight.

The agency does not concur with the substitution of terms because the term "mineral mixes" is used in the feed industry and has a recognized meaning as a free-choice source of minerals. Such products may also contain vitamins but do not contain significant amounts of energy, protein, or fat. The term "mineral mixes" is preferred because the suggested term "loose self-limiting mixtures" is new and has no generally recognized definition or history of use.

3. One comment suggested that terms be defined in the final regulation.

The agency does not concur because the terminology used is familiar to users of free-choice products and the regulated industry and adequately conveys the intent of the agency. The "Guidelines for Evaluation of Effectiveness of New Animal Drugs for Use in Free-Choice Products," which is the subject of a notice published elsewhere in this issue of the Federal Register, as discussed above, has "Definition," "Research Model," and "Administrative Procedures" sections.

which expand on the practical interpretation of the regulation.

4. One comment stated that the proposed regulation failed to stress the need for validation of effectiveness by formulation and by the specific final feed manufacturing form.

The agency does not believe it is necessary for this regulation to have the emphasis suggested by the comment. Section 512 of the act (21 U.S.C. 360b) and 21 CFR Part 514 require the submission of data demonstrating effectiveness for products containing new animal drugs. The submission of data in master files does not reduce the amount of data needed to establish safety and effectiveness for products.

5. Comments stated that the proposed regulation made several references to "specific free-choice feeds" and similar wording. The comments stated that the references appeared to rule out any flexibility by the manufacturer of free-choice medicated feeds.

The agency believes that formula flexibility is necessary and that a formula type or formula matrix should be established in the master file. Firms submitting medicated feed applications would then certify that each free-choice feed was manufactured in accordance with the formula matrix established in the master file for such products. This would provide needed flexibility yet assure that such medicated feeds are within the consumption and stability patterns demonstrated.

6. The comments included proposed wording for § 510.455(e) to introduce a new term "formula matrix" and to use this term to assure flexibility for products to be approved under a medicated feed application.

The agency agrees that formula flexibility is necessary for free-choice feeds. The final regulation does not prohibit the testing of a variable product. If data submitted in the appropriate new animal drug application or master file provide for ranges of ingredients, the medicated feed applications may request approval of products formulated within the ranges of ingredients approved. Existing free-choice feed approvals are permitted to vary ingredients based on a batch formula, which may have ranges for each ingredient. The agency believes that there is no need to introduce new terms because the relief sought is already provided for.

7. Comments stated that data necessary to establish the effectiveness and safety of medicated free-choice feeds should be described by the agency. The comments requested the agency to recognize that, once the effectiveness of a new animal drug in one form and type of free-choice feed has been established for an animal class, the animal drug would then be deemed effective when provided to that animal class in another feed form if the drug is stable in the feed and consumed at efficacious levels.

The agency concurs and the guidelines referred to above address such data collection processes for medicated free-choice feeds.

8. Comments suggested that the agency allow free-choice feed manufacturers to interchange some feed ingredients without submission of a supplemental application containing additional consumption and stability data. This would permit the manufacturer to adjust the formulation according to ingredient cost. The formulation adjustments would be within ranges that would maintain product nutrient levels and would be limited to changes that would not alter the palatability of the free-choice feeds or drug stability.

The agency agrees that there is a need for flexibility in the manufacture of free-choice feeds to reflect market changes in ingredient availability and cost. The agency will allow flexibility in the level of ingredients as provided for in approved batch formulations. A medicated free-choice product may also be manufactured using interchangeable nutrients as provided for in approved batch formulations. The agency also agrees that a free-choice product may interchange nutrients where such interchange has been demonstrated to be acceptable and still be considered a "specific free-choice feed."

Conclusion

The agency has reviewed and evaluated the comments received and has revised proposed § 510.455(e) to include medicated blocks that are produced by being rendered into a solid mass. The agency has also considered the matter of free-choice products regulated as dosage form products under 21 CFR Part 520 and has concluded that products currently covered by regulations in Part 520 will for the present time remain in that part.

This final rule has further been revised to be consistent and in accord with revisions to the medicated feed regulations published in the Federal Register of March 3, 1986 (51 FR 7382). The nomenclature included in revised § 558.3 *Definitions and general considerations applicable to this part* has been adopted. Because medicated free-choice feeds pose questions not posed by other medicated feeds, the exemption from the requirement of an approved medicated feed application provided in § 558.4 does not apply to any medicated free-choice feed.

Environmental Impact

The November 19, 1984, proposal discussed the environmental impact of the proposal and concluded that neither an environmental assessment nor an environmental impact statement was required. The proposal also considered the proposed action in accordance with Executive Order 12291 and determined that the proposal rule was not a major rule as defined by that Order.

Regulatory Flexibility Act

The proposal also considered the action in accordance with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354) and concluded that the effect of the proposal would be to reduce regulatory burdens currently affecting both large and small business. FDA certified in accordance with section 605(b) of the Regulatory Flexibility Act that no significant impact on a substantial number of small entities will derive from this action.

Paperwork Reduction Act of 1980

Section 510.455(e) of this final rule contains collection of information requirements that was submitted for review and approval to the Director of the Office of Management and Budget (OMB), as required by section 3507 of the Paperwork Reduction Act of 1980. The requirements were approved and assigned OMB control number 0910-0205.

List of Subjects in 21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 510 is amended as follows:

PART 510—NEW ANIMAL DRUGS

1. The authority citation for 21 CFR Part 510 continues to read as follows:

Authority: Secs. 512, 701(a), 52 Stat. 1055, 82 Stat. 343–351 (21 U.S.C. 360b, 371(a)); 21 CFR 5.10 and 5.83.

2. By revising § 510.455 to read as follows:

§ 510.455 New animal drug requirements regarding free-choice administration in feeds.

(a) For the purpose of this section, free-choice administration of animal drugs in feeds involves feeds that are

placed in feeding or grazing areas and are not intended to be consumed fully at a single feeding or to constitute the entire diet of the animal. Such methods of administering drugs include, but are not limited to, medicated blocks (agglomerated feed compressed or rendered into a solid mass and cohesive enough to hold its form), mineral mixes, and liquid feed tank supplements ("lick tank" supplements) containing one or more animal drugs. The manufacture of medicated free-choice feeds is subject to the current good manufacturing practice regulations for medicated feeds.

(b) The Food and Drug Administration has concluded that there are questions about the safety and effectiveness of drugs when administered in free-choice feeds. Therefore, such methods of administration cause the drugs so administered to be new animal drugs, for which approved new animal drug applications (NADA's) are required. (See § 510.3(i)). In addition, the exemption from the requirement of an approved medicated feed application provided in § 558.4 of this chapter does not apply to any free-choice medicated feed.

(c) An NADA or supplemental NADA for products for free-choice feeding submitted for approval under section 512(b) of the act shall provide for:

(1) The manufacture of a finished product for the free-choice administration of a new animal drug. Such an approval will not provide a basis upon which an application can be approved under section 512(m) of the act; or

(2) The manufacture of a Type A medicated article for use in the subsequent manufacture of a free-choice medicated feed. The approved NADA will provide a basis upon which an application can be approved under section 512(m) of the act. Data for a specific free-choice product may, if desired, be generated and submitted to the Food and Drug Administration by the manufacturer of the free-choice feed in the form of a master file which can be referenced in the NADA or supplemental NADA submitted by the new animal drug sponsor.

(d) Approval of the NADA or supplemental NADA submitted under paragraph (c) of this section will be reflected in a regulation in Part 558 of this chapter published under section 512(i) of the act. The regulation will either state the formulation of the approved free-choice product or specify the specific free-choice administration products in which the drug is approved for use. If the approval is for a Type A medicated article, the regulation in Part 558 of this chapter will indicate that each use of the Type A medicated article in a free-choice product must be the subject of an approved supplemental NADA.

(e) An application submitted under section 512(m) of the act to provide for manufacture of a specific free-choice feed from an approved Type A medicated article will be approved if, in addition to the information required by the medicated feed application, it includes a reference to the exact formula of the product to be manufactured as follows:

(1) The formula is the same as the one published in the new animal drug regulations; or

(2) The data in a master file have been referenced in an NADA or supplemental NADA; and

(3) Use of the Type A medicated article in the specific formulation has been approved on the basis that:

(i) The formula is the same as the one for which acceptable data have been submitted in a master file by the medicated feed applicant; or

(ii) The medicated feed applicant has written authority to reference a master file that has acceptable data for the formula in question.

(Collection of information requirements were approved by the Office of Management and Budget (OMB) and assigned OMB control number 0910-0305.)

Dated: May 13, 1986.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 86-12346 Filed 6-2-86; 8:45 am]

BILLING CODE 4160-01-M

---

21 CFR Parts 510 and 558

New Animal Drugs for Use in Animal Feeds; Tylosin and Sulfamethazine

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the new animal drug regulations to reflect approval of a new animal drug application (NADA) filed for Agri-Basics, ConAgra-Westfeeds, providing for the making of Type A medicated articles containing 5, 10, 20, or 40 grams per pound each of tylosin and sulfamethazine. The Type A medicated articles are for making Type C medicated feeds for use in swine. Additionally, the list of sponsors of approved applications in the regulations is amended by adding the applicant.

EFFECTIVE DATE: June 3, 1986.

FOR FURTHER INFORMATION CONTACT: Benjamin A. Puyot, Center for Veterinary Medicine (HFV-135), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1414.

SUPPLEMENTARY INFORMATION: Agri-Basics, ConAgra-Westfeeds, 1420 Minnesota Ave., Billings, MT 59101, is the sponsor of NADA 140-530 submitted on its behalf by Elanco Products Co. The NADA provides for the manufacture of Type A medicated articles containing 5, 10, 20, or 40 grams per pound each of tylosin (as tylosin phosphate) and sulfamethazine. The Type A medicated articles are to make Type C medicated feeds for use in swine for maintaining weight gains and feed efficiency in the presence of atrophic rhinitis, lowering the incidence and severity of *Bordetella bronchiseptica* rhinitis, prevention of swine dysentery (vibrionic), and control of swine pneumonias caused by bacterial pathogens (*Pasteurella multocida* and/or *Corynebacterium pyogenes*). The NADA is approved and the regulations are amended to reflect the approval. Additionally, the regulations are amended to add Agri-Basics, ConAgra-Westfeeds to the list of sponsors of approved applications. The basis for approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(1)(i) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects

21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Parts 510 and 558 are amended as follows:

PART 510—NEW ANIMAL DRUGS

1. The authority citation for 21 CFR Part 510 continues to read as follows:

Authority: Secs. 512, 701(a), 82 Stat. 1055, 82 Stat. 343–351 (21 U.S.C. 360b, 371(a)); 21 CFR 5.10 and 5.83.

2. Section 510.600 is amended in paragraph (c)(1) by adding a new sponsor entry alphabetically and in paragraph (c)(2) by adding a new entry numerically to read as follows:

§ 510.600 Names, address, and drug labeler codes of sponsors of approved applications.

* * * * *

(c) * * *

(1) * * *

Firm name and address	Drug labeler code
* * * * *	
Agri-Basics, ConAgra-Westfeeds, 1420 Minnesota Ave., Billings, MT 59101	023398
* * * * *	

(2) * * *

Drug labeler code	Firm name and address
023398	Agri-Basics, ConAgra-Westfeeds, 1420 Minnesota Ave, Billings, MT 59101.

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

3. The authority citation for 21 CFR Part 558 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

§ 558.630 [Amended]

4. Section 558.630 *Tylosin and sulfamethazine* is amended in paragraph (b)(10) by inserting numerically the number "023398."

Dated: May 27, 1986.

Gerald B. Guest,

Acting Director, Center for Veterinary Medicine.

BILLING CODE 4160-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Part 13

[Docket No. R-86-1289; FR-2229]

Procedures for Use of Penalty Mail in the Location and Recovery of Missing Children

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule.

SUMMARY: This rule establishes the procedures under which the Department may use penalty mail to aid in the location and recovery of missing children.

EFFECTIVE DATE: July 21, 1986.

FOR FURTHER INFORMATION CONTACT: Sandra L. Timbrook, Chief, Mail and Transportation Branch, Office of Administrative and Management Services, Room 5176, Department of Housing and Urban Development, 451 Seventh Street, NW., Washington, DC 20410. Telephone: (202) 755-5703. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Section 1(a) of S. 1195, Pub. L. 99-87, 99 Stat. 290, August 9, 1985, adds to Chapter 32 of title 39, United States Code, new provisions to authorize each executive department and independent establishment of the Government of the United States, to use official mail to aid in the location and recovery of missing children. The passage of S. 1195 reflects an increasing public concern with the problem of missing and exploited children.

Newly added 39 U.S.C. 3220(a)(1) directs the Office of Juvenile Justice and Delinquency Prevention (OJJDP) within the Department of Justice, after consultation with appropriate public and private agencies, to prescribe general guidelines under which penalty mail may be used to assist in the location and recovery of missing children. These guidelines were published on November 8, 1985 (50 FR 46622). In addition, 39 U.S.C. 3220(a)(2) requires each executive department and independent establishment of the Government of the United States to promulgate regulations under which penalty mail sent by such departments and establishments may be used in conformance with the OJJDP guidelines.

This rule is being promulgated in compliance with 39 U.S.C. 3220(a)(2) and in conformance with the OJJDP guidelines. The rule sets forth information on U.S. Postal Service restrictions on the placement of information on envelopes, "shelf-life" restrictions on the use of missing children information, and other administrative factors which are applicable.

HUD will receive camera-ready photographic and biographical information on missing children through the National Center for Missing and Exploited Children. HUD will then give priority to the use of missing children information in mail addressed to members of the public.

The Secretary has determined that notice and prior public procedure are impracticable and contrary to the public interest and that good cause exists for making this rule effective as soon after publication as possible because of the overwhelming national concern that this rule addresses. Any delay in effectiveness would clearly be counter to the national effort to locate and recover missing children.

Findings and Other Matters

Environment Impact

A Finding of No Significant Impact with respect to the environment is not necessary for this rule in accordance with HUD regulations at 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. Under 24 CFR 50.20, this rule is categorically exempt because it pertains only to an administrative procedure concerning the dissemination of public information.

Regulatory Impact Analysis

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order on Federal Regulations issued by the President on February 17, 1981 (E.O. 12291). Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to complete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Certification

Under the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities because it pertains only to an administrative

BEST COPY AVAILABLE

procedures concerning the dissemination of public information.

Semiannual Agenda of Regulations

This rule was not listed in the Department's Semiannual Agenda of Regulations published on April 21, 1986 (51 FR 15038) pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

Accordingly, Title 28 of the Code of Federal Regulations is amended by adding a new Part 13 to read as follows:

PART 13—USE OF PENALTY MAIL IN THE LOCATION AND RECOVERY OF MISSING CHILDREN

Sec.
13.1 Purpose.
13.2 Procedure for obtaining and disseminating data.
13.3 Withdrawal of data.
13.4 Reports.

Authority: The Missing Children's Assistance Act of 1984, Pub. L. 98-473, October 12, 1984; S. 1195 "Official Mail Use in the Location and Recovery of Missing Children", Pub. L. 99-87, 39 U.S.C. 3220.

§ 13.1 Purpose.

To support the national effort to locate and recover missing children, the Department of Housing and Urban Development (HUD) joins other executive departments and independent establishments of the Government of the United States in using official mail to disseminate photographs and biographical information on hundreds of missing children.

§ 13.2 Procedures for obtaining and disseminating data.

(a) HUD shall insert, manually and via automated inserts, pictures and biographical data related to missing children in domestic penalty mail directed to members of the public in the United States, its territories and possessions. These include:

(1) Standard letter-size envelopes (4⅛" X 9½");

(2) Document-size envelopes (9½" X 12", 9½" X 11½", 10" X 13"); and

(3) Other envelopes (miscellaneous size).

(b) Missing children information shall not be placed on the "Penalty Indicia", "OCR Read Area", "Bar Code Read Area", and "Return Address" areas of letter-size envelopes.

(c) Posters containing pictures and biographical data shall be placed on bulletin boards in Headquarters and Field offices.

(d) HUD shall accept camera-ready and other photographic and biographical materials solely from the National Center for Missing and Exploited Children (National Center). Photographs that were reasonably current as of the time of the child's disappearance shall be the only acceptable form of visual media or pictorial likeness used in penalty mail or posters.

§ 13.3 Withdrawal of data.

HUD shall remove all printed penalty mail envelopes and other materials from circulation or other use within a three month period from the date the National Center receives information or notice that a child, whose picture and biographical information have been made available to HUD, has been recovered or that the parent or guardian's permission to use the child's photograph and biographical information has been withdrawn. The HUD contact person shall be notified immediately and in writing by the National Center of the need to withdraw from circulation penalty mail envelopes and other materials related to a particular child.

§ 13.4 Reports.

HUD shall compile and submit to Office of Juvenile Justice and Delinquency Prevention (OJJDP), by June 30, 1987, a consolidated report on its experience in implementing S. 1195 "Official Mail Use in the Location and Recovery of Missing Children" along with recommendations for future Departmental action.

Dated: May 29, 1986.
Samuel R. Pierce, Jr.,
Secretary.

BILLING CODE 3810-AE-M

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 211

Appeal of Decisions Concerning the National Forest System

AGENCY: Forest Service, USDA.

ACTION: Final rule.

SUMMARY: This rule makes a technical change in the present Forest Service administrative appeal procedures to make explicit that legible United States Postal Service (USPS) postmarks take precedence in determining time of filing. The change is necessary to achieve consistent interpretation. The final rule is issued after consideration of public comment received on the interim rule published in the Federal Register of March 17, 1986 (51 FR 9010).

EFFECTIVE DATE: This rule is effective June 3, 1986.

FOR FURTHER INFORMATION CONTACT: Larry Hill, Acting Staff Assistant, National Forest System Staff, Forest Service, USDA, P.O. Box 2417, DC 20013, (202) 382-9349.

SUPPLEMENTARY INFORMATION:

Background

This amendment to Forest Service appeal procedures makes clear that when officials determine timeliness under 36 CFR 211.18(c)(4), legible USPS postmarks shall take precedence over "other evidence of mailing." Only where the USPS postmark is illegible or missing will "other evidence of mailing" be used to determine timeliness.

This action is basically a technical clarification of the rule and does not represent a change in Agency policy or intended procedures.

Analysis of Public Comment

The interim rule generated only one response concerning clarification of the definition of "filing". It was considered in the final rule language.

The response is available for review at the Office of the Deputy Chief, National Forest System, Forest Service, USDA, Room 4211, South Agriculture Building, 12th and Independence Avenues SW., Washington, DC 20250, telephone (202) 382-9349.

Regulatory Impact

Because of its technical nature, it has been determined that this rule is exempt from review procedures required by E.O. 12291. The rule will have no effect on the Nation's economy, or substantial numbers of individuals or businesses, or on the quality of the human environment. The rule does not contain an information collection or recordkeeping requirement as defined in the Paperwork Reduction Act of 1980.

List of Subjects in 36 CFR Part 211

Administrative practice and procedure, National forests.

PART 211—ADMINISTRATION [AMENDED]

Therefore, for the reasons set forth above, Subpart B—Appeal of Decisions Concerning the National Forest System, of Part 211—Administration of Title 36 of the Code of Federal Regulations is amended as follows:

1. The authority citation for Part 211 is added to read as follows, and all other authority citations which appear throughout Part 211 are removed:

Authority: 30 Stat. 35, as amended, sec.1, 38 Stat. 623 (16 U.S.C. 551,472).

Subpart B—Appeal of Decisions Concerning the National Forest System

2. Revise paragraph (c)(4) of § 211.18 to read as follows:

§ 211.18 Appeal of decisions of forest officers.

* * * * *

(c) * * *

(4) When determining time of filing, Reviewing Officers shall give precedence to United States Postal Service (USPS) postmarks over other evidence of timely filing. Filing is defined as either mailing or delivery of the appropriate documents. If documents are delivered by means other than the USPS, date of receipt determines time of filing. If the date of mailing cannot be determined from a legible USPS postmark, the Reviewing Officer may accept other evidence of timely filing. Weekends or Federal holidays are included in computing the time allowed for filing, but when the filing time would expire on a weekend or holiday, the filing time is extended to the end of the next business day.

* * * * *

Dated: May 23, 1986.

Peter C. Myers,

Assistant Secretary, Natural Resources and Environment.

BILLING CODE 3410-11-M

POSTAL SERVICE

39 CFR Part 111

Domestic Mail Manual; Eligibility To Mail Issues of a Publication at Second-Class Rates

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This final rule change adds a new section to the Domestic Mail Manual to incorporate changes in the Domestic Mail Classification Schedule (DMCS) concerning the eligibility requirements for entry into second-class mail of multiple "issues" of a single publication that are regularly published on the same day. Amendments to other sections of the Domestic Mail Manual are also being implemented to carry forth the intent of the Postal Rate Commission's (Commission) recommended decision in Docket No. C85-1, approved by the Governors of the Postal Service (Governors) on March 3, 1986, that publications identified in the administrative record as "Plus" publications be considered separate publications, whether called "issues" or "editions".

EFFECTIVE DATE: June 8, 1986.

FOR FURTHER INFORMATION CONTACT: Ms. Cheryl Beller, (202) 268-5166.

SUPPLEMENTARY INFORMATION: On April 2, 1986, the Postal Service published in the Federal Register, for comment, proposed changes in sections of the Domestic Mail Manual pertaining to issues and editions of second-class publications. 51 FR 11324-27. The changes were proposed to implement new section 200.0123 DMCS which provides that, for purposes of second-class eligibility and postage, an "issue" of a newspaper or other periodical shall be deemed to be a separate publication if it is published at a regular frequency on the same day as another regular "issue" of the same publication, and it is distributed to more than (i) 10 percent nonsubscribers, or (ii) twice as many nonsubscribers as the other issue on that same day, whichever is greater. As explained in the supplementary information, the proposed rule was phrased as "more than (i) . . . *and* (ii)", for greater ease of understanding. 51 FR 11325. Interested persons were invited to submit comments on the proposed changes by May 2, 1986.

Written comments were received from one third-class mailer. The commenter supported the proposed changes and also suggested that certain portions of the affected regulations be further refined and clarified to more closely reflect the intent of the DMCS change. Specifically, the commenter suggested simplifying proposed PS Form 3541-CX by including on it instructions to mailers to report the circulation figures for the issue with the lesser nonsubscriber distribution in the portion of Part A pertaining to "Issue #1" and the figures for the issue with the greater nonsubscriber distribution in the portion pertaining to "Issue #2". This would automatically establish Issue #1 as a regular issue and focus attention on the question of whether Issue #2 must be treated as a separate publication. In addition, the commenter suggested that the term "nonsubscriber copies" be defined on the form to conform to the text of DMM section 425.225b.

We have modified the commenter's suggestion and will require designation of Issue #1 as the one with the lesser nonsubscriber distribution. This will automatically identify Issue #2 as the one with the greater nonsubscriber distribution and will simplify the task of identifying the "parent periodical" and determining whether the issue with the greater nonsubscriber circulation should be treated as a separate publication.

We have not gone as far as the commenter has suggested in clarifying the term "nonsubscriber" on PS Form 3541-CX because of our desire to keep the form as uncomplicated as possible. Postal Service personnel are being instructed to interpret the term consistently with DMM section 422.221.

The commenter also suggested that the Postal Service further clarify the regulations pertaining to the records that are necessary to substantiate eligibility for second-class mail privileges of those publications which are determined to be separate publications under the new regulations. We believe that the regulations themselves, and current related DMM regulations pertaining to maintenance and verification of appropriate publisher records, are sufficient to ensure compliance with the intent and purpose of the Commission and the Governors relative to establishing independent second-class eligibility.

Finally, section 425.2 has been revised to make it clear that the restrictions on issues and editions therein apply only to eligibility for second-class rate status.

Accordingly, the Postal Service hereby adopts the following final regulations on this subject as amendments to the Domestic Mail Manual, which are incorporated by reference in the Code of Federal Regulations. See 39 CFR 111.1.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority for 39 CFR Part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 404, 407, 408, 3001–3011, 3201–3219, 3403–3405, 3621, 5001; 42 U.S.C. 1973aa–1, 1973aa–2, 1973aa–6.

PART 4—SECOND-CLASS MAIL

422.2 General Publications

2. Revise 422.221 to read as follows:

.22 Circulation Requirements

.221 List of Subscribers. General publications must have a legitimate list of subscribers who have paid or promised to pay, at a rate above a nominal rate, for copies to be received during a stated time. Records for subscriptions to a publication which are obtained in conjunction with subscriptions to another publication or other publications must be maintained in such a manner that individual subscriptions to each publication, by title, can be substantiated and verified. Persons whose subscriptions are obtained at a nominal rate (see 422.222) shall not be included as a part of the legitimate list of subscribers. Commingled copies sent in fulfillment of subscriptions obtained at a nominal rate must be charged with postage at regular rates (see 411.21 and 411.4).

422.6 Requester Publications

3. Revise 422.6d to read as follows:

d. Effective October 1, 1952, the publication must have a legitimate list of persons who request the publication, and 50 percent or more of the copies of the publication must be distributed to persons making such requests. Subscription copies of the publication which are paid for or promised to be paid for, including those at or below a nominal rate, may be included in the determination of whether the 50 percent request requirement is met. Persons will not be deemed to have requested the publication if their request is induced by a premium offer or by receipt of material consideration. Records of requests for a publication which are obtained in conjunction with subscriptions or requests for another publication or other publications must be maintained in such a manner that individual requests for the publication, by title, can be substantiated and verified. Requests which are more than three years old will not be considered to meet this requirement.

4. Revise 425.2 to read as follows:

425.2 Issues and Editions

.21 General. Issues and editions of a second-class publication may be mailed at the applicable second-class rates in 410, provided they exhibit the continuity required in 421.1 and satisfy the additional requirements in 425.22 and 425.23.

.22 Issues.

.221 Issues must be published in accordance with the publication's stated frequency (see 421.22).

.222 The publication of regular issues of general and requester publications must be reflected in the identification statement (455.2) and subscription proce. In the case of requester publications, copies must be distributed to requesters in accordance with 422.6d.

.223 Extra issues, not reflected in the publication's stated frequency, publishd for the purpose of communicating news and information received too late for insertion in the regular issue, but not for advertising purposes, may occasionally be mailed at second-class rates. The original entry post office must be notified in writing of such issues before they are mailed.

.224 For second-class purposes, issues may contain annual reports, directories, lists, and similar texts as a part of the contents. Copies of such issues shall not bear designations indicating they are separate publications such as annuals, directories, catalogs, yearbooks, or other types of separate publications. Such issues must bear the publication name as required by 455.1 and be included in the regular annual subscription price.

.225 An "issue" of a newspaper or other periodical shall be deemed to be a separate publication, for postal purposes, and must independently meet the applicable second-class eligibility qualifications in 421.2 through 421.4 and 422, when the following conditions are met:

a. It is published at a regular frequency, such as once each week, on the same day as another regular "issue" of the same publication, and

b. More than 10% of the total number of its copies are distributed to nonsubscribers to the other regular issue published on that day, AND the number of copies distributed to people who do not subscribe to the other issue is more than twice the number of copies of the other regular "issue" published on the same day which are distributed to nonsubscribers.

.23 Editions

.231 Individual issues may be mailed at second-class rates in editions such as demographic, morning or evening editions. Subscribers and requesters will routinely receive no more than one edition of any issue.

.232 Extra editions may be mailed at second-class rates for the purpose of communicating additional news and information received too late for insertion in the regular edition. Such editions may not be intended for advertising purposes.

.233 Editions may differ in content, but not to the extent that they constitute separate and independent publications. Separate publications will not be accepted for mailing as editions of another publication.

5. Revise 444.1 to read as follows:

444.1 Change in Title, Frequency, or Office of Publication

An application for reentry must be filed on Form 3510, Application for Additional Entry or Reentry of Second-Class Publication, whenever the name, frequency of issuance, location of the known office of publication, or qualification category (see 422) is changed. When the name or frequency of issuance of a publication is changed, a Form 3510 must be filed at the post office of original entry with two copies of the publication showing the new name or frequency. When the frequency is being changed to include more than one regular "issue" on any day, PS Form 3541–CX must be completed by the publisher and submitted with Form 3510.

BILLING CODE 7710-12-M

U.S. POSTAL SERVICE

SECOND-CLASS CERTIFICATION FOR MULTIPLE ISSUES ON THE SAME DAY

INSTRUCTIONS

1. Complete this form and attach it to Form 3510, Application for Additional Entry, Reentry or Special Rate Request for Second-Class Publication, when the frequency of a second-class publication is being changed to include more than one "issue" on any day *(see 444.1, DMM)*.
2. This form must also be submitted to each office of mailing with all Forms 3541 and 3541-A for each "issue" of a second-class publication that is regularly published on the same day as another "issue" of the same publication.
3. The figures reported must be for the "issues" published on the same day and must include all copies of all editions of the "issues" identified as issues No. 1 and No. 2 which are circulated through the mails and by all other methods of distribution.

PART A – TO BE COMPLETED BY PUBLISHER/AGENT

Title of Publication	USPS Number	Date of Issue

ISSUE No. 1 (The issue distributed to the smaller number of nonsubscribers.)		Vol. Issue Number
1a. Total number of copies of issue distributed by all means.		1a.
1b. Total number of copies of issue distributed to NONSUBSCRIBERS. (See DMM 422.221)		1b.
1c. Percent of copies distributed to nonsubscribers (decimal format) 1b. divided by 1a. =		1c.
1d. Convert 1c. to percent format: (i.e., 17 X 100 = 17%)	1c. X 100 =	1d. %

ISSUE No. 2		Vol. Issue Number
2a. Total number of copies of issue distributed by all means.		2a.
2b. Total number of copies of issue distributed to NONSUBSCRIBERS to the other issue.		2b.
2c. Percent of copies distributed to nonsubscribers (decimal format) 2b. divided by 2a. =		2c.
2d. Convert 2c. to percent format: (i.e., 17 X 100 = 17%)	2c. X 100 =	2d. %

I certify that the information furnished on this form is correct.	Signature of Publisher/Agent required

PART B – TO BE COMPLETED BY ENTRY POST OFFICE

Post Office and State of Mailing

INSTRUCTIONS

1. Check Part A to be sure the publisher has included circulation figures for the issue with the smaller nonsubscriber distribution in the section for Issue No. 1.
2. If the date on this form indicates that "issue" No. 2 is a separate publication, that "issue" may not be mailed at the second-class rates under the authorization granted to the publication named in PART A.
3. It must instead independently meet the applicable second-class eligibility qualifications in 421.2 through 421.4 and 422, DMM, or be mailed at third- or fourth-class rates.

Copy the figures for 1b, 2b and 2d furnished by the publisher in PART A in the corresponding spaces below. You must calculate 1a below using the publisher's figures.

1b. _____ X 2 = _____ 1a.

For purposes of determining eligibility to mail at second-class rates.

ISSUE No. 2 will be treated as a SEPARATE PUBLICATION if 2b. is greater than 1a. and 2d. is greater than 10%.

2b. _____ 1a. _____ 2d. _____

Based on the data on this form, ISSUE No. 2 is a separate publication: ☐ YES ☐ NO

PS Form 3541-CK, Apr. 1986

Exhibit 484a

BILLING CODE 7710-12-C

9. Add new section 424 as follows:

424 Statement of Publication of More Than One Issue on the Same Day

The publisher must submit PS Form 3541–CX whenever the publisher desires to mail an "issue" that is regularly published on the same day as another "issue" of the same publication under a single second-class permit granted to the parent publication. This form is necessary to determine whether either "issue" will be treated as a separate publication for purposes of determining eligibility to mail at the second-class rates (see 425.225). The publisher must attach the completed form(s) to the mailing statement(s) submitted to each office where mailings are made. A sample of PS Form 3541–CX is shown in Exhibit 424a.

A transmittal letter making these changes in the pages of the Domestic Mail Manual will be published and will be transmitted to subscribers automatically. Notice of issuance of the transmittal letter will be published in the Federal Register as provided in 39 CFR 111.3.

Fred Eggleston,
Assistant General Counsel, Legislative Division.

BILLING CODE 7710–12–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL–3024–9]

Approval and Promulgation of Implementation Plans; Indiana

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Final rulemaking.

SUMMARY: The State of Indiana submitted to USEPA Rule 325 IAC 13–2, Motor Vehicle Tampering and Fuel Switching. USEPA is approving this addition to the Indiana State Implementation Plan (SIP) as contributing to the attainment and maintenance of the National Ambient Air Quality Standards (NAAQS) in Indiana.

EFFECTIVE DATE: This final rulemaking becomes effective on July 3, 1986.

ADDRESSES: Copies of this revision to the Indiana SIP are available for inspection at: The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, DC.

Copies of the SIP revision, public comments on the notice of proposed rulemaking and other materials relating to this rulemaking are available for inspection at the following addresses: (It is recommended that you telephone Anne E. Tenner, at (312) 886–6036, before visiting the Region V Office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR–26), 230 South Dearborn Street, Chicago, Illinois, 60604

U.S. Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, DC 20460

Indiana Air Pollution Control Division, Indiana State Board of Health, 1330 West Michigan Street, Indianapolis, Indiana 46206

FOR FURTHER INFORMATION CONTACT: Anne E. Tenner (312) 886–6036.

SUPPLEMENTARY INFORMATION: On July 31, 1985 (50 FR 30960), USEPA proposed approval of Rule 325 IAC 13–2, Motor Vehicle Tampering and Fuel Switching. A detailed discussion of USEPA's action can be found in the notice of proposed rulemaking and the technical support document which is available at USEPA's Region V office.

During the 60 day public comment period, USEPA received no comments on this proposed action.

USEPA reviewed the requirements of 325 IAC 13–2 in relation to the applicable portions of the Clean Air Act and has found that the Indiana anti-tampering provisions are consistent with Section 211 of the Act, and 40 CFR Part 80 Subpart B. As a result, USEPA approves 325 IAC 13–2 as an addition to the Indiana SIP.

USEPA notes that Indiana submitted the regulation without requesting specific emission reduction credits in its air quality attainment and maintenance plans due to implementation of this rule. Although it is not Agency policy to assign specific credits for this activity, USEPA believes that enforcement of this rule is an important part of the efforts to reduce the incidence of vehicle tampering and fuel switching and the related emissions of Carbon monoxide, hydrocarbons and oxides of nitrogen.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from date of publication). This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental Protection Agency, Air pollution control, Incorporation by reference, Ozone, Nitrogen dioxide, Lead, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

Note.—Incorporation by reference of the State Implementation Plan for the State of Indiana was approved by the Director of the Federal Register on July 1, 1982.

Dated: May 27, 1986.

Lee M. Thomas,
Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Indiana

Title 40 of the Code of Federal Regulations, Chapter I, Part 52, is amended as follows:

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Section 52.770 is amended by adding new paragraph (c)(58) as follows:

§ 52.770 Identification of plan.

40 CFR Part 52

[FRL–3025–2; NC–017]

Approval and Promulgation of Implementation Plans, North Carolina; 1978 SIP Update

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: On March 31, 1978, the North Carolina Department of Natural and Economic Resources submitted for EPA's approval an updated version of its State implementation plan (SIP). (North Carolina's original SIP was approved by EPA on May 31, 1972). EPA did not act on the submittal at the time because of the editorial nature of the revisions made for this update. Since the regulations were recodified in the updated version, EPA feels that formal action is now needed to avoid confusion, and today approves the 1978

version of the North Carolina regulations. EPA is also removing 40 CFR 52.1774, which states EPA approval of specific North Carolina compliance schedules, since the schedules are now irrelevant—none has a final compliance date after 1975.

EFFECTIVE DATE: These actions will be effective on August 4, 1986, unless notice is received within 30 days that adverse or critical comments will be submitted.

ADDRESSES: Copies of the materials submitted by North Carolina may be examined during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

Air Programs Branch, EPA, Region IV, 345 Courtland Street NE., Atlanta, Georgia 30365

Division of Environmental Management, North Carolina Department of Natural Resources and Community Development, Archdale Building, 512 N. Salisbury Street, Raleigh, North Carolina 27611

Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Janet Hayward, Air Programs Branch, EPA Region IV, at the above address, telephone 404-347-3286 (FTS 257-3286).

SUPPLEMENTARY INFORMATION: In awarding air program support grants to its states for fiscal year 1978, EPA Region IV set as a condition that the grantees should update their SIP to take into account changes that had taken place since the original SIP approval of May 31, 1972 (37 FR 10858). North Carolina complied with an updated SIP submitted on March 31, 1978.

In updating its SIP, the State complied with a directive from the North Carolina legislature that all State agency regulations be put into the same format as part of the North Carolina Administrative Code. The regulation numbering system used for the 1972 SIP, the basis for the regulatory citations found in 40 CFR 52.1774, was replaced with a new one. Also, a number of other editorial changes were made. Most of these changes were made to update titles or dates and require no comment. Three changes merit mention, however.

In the 1972 regulations, Section IV, Emission Control Standards, contained graphs to show allowable emission rates between rates shown in the applicable tables. The 1978 version gave instead an equation to calculate the rates not given in the process weight tables; the actual limits did not change from 1972 to 1978.

Also, ¶ 1.10(1) of the same Section, recodified in the 1978 SIP as 15 NCAC 2D.0503(b), lacked wording found in the 1978 version; this wording is italicized in the following quotation: "When any products or by-products of a manufacturing process are burned for *the same purpose, or in conjunction with any fuel*, the same maximum emissions limitations shall apply." This was apparently to correct an omission in the 1972 version of the regulations. Finally, a new regulation, 15 NCAC 2D.0523, was added for conical burners; this had not been previously submitted for EPA approval and EPA has no record of its having been given public hearing. Accordingly, today's approval action does not apply to regulation 2D.0523.

The following table summarizes the changes which were made in regulation numbering and organization from the 1972 version to the 1978 version of the North Carolina SIP.

1972 No.	Title	1978 No.	Title
I	Definitions	2D.0100	Same.
		.0101	Words.
		.0102	Phrases.
II-1	Control and prohibition of open burning	2D.0520	Same.

1972 No.	Title	1979 No.	Title
N-1.00	Purpose	2D.0502	Same.
N-1.10	Control and prohibition of particulate matter emissions from fuel burning sources.	2D.0503	Control of particulates from fuel burning sources.
N-1.20	Control and prohibition of particulate matter emissions from wood burning indirect heat exchangers.	2D.0504	Particulates from wood burning indirect heat exchangers.
N-1.30	Control and prohibition of particulate matter emissions from refuse burning equipment.	2D.0505	Control of particulates from refuse burning equipment.
N-1.40	Control and prohibition of particulate matter from hot mix asphalt plants	2D.0506	Control of particulates from hot mix asphalt plants.
N-1.50	Control and prohibition of particulate matter emissions from chemical fertilizer manufacturing plants.	2D.0507	Particulates from chemical fertilizer manufacturing plants.
N-1.60	Control and prohibition of particulate matter from pulp and paper mills	2D.0508	Control of particulates from pulp and paper mills.
N-1.70	Control and prohibition of the emission of particulate matter from plants engaged in the processing of rice or feldspar.	2D.0509	Particulates from rice or feldspar processing plants.
N-1.80	Control and prohibition of particulate matter from materials handling in sand, gravel and crushed stone operations.	2D.0510	Particulates: Sand, gravel, crushed stone operations.
N-1.90	Control and prohibition of particulate matter and sulfur dioxide from lightweight aggregate processes.	2D.0511	Particulates, SO_2 from lightweight aggregate processes.
N-8.00	Control and prohibition of particulate matter emissions from plants engaged in the finishing of wood products.	2D.0512	Particulates from wood products finishing plants.
N-8.10	Control and prohibition of particulate matter emissions from Portland cement plants.	2D.0513	Control of particulates from Portland cement plants.
N-8.20	Control and prohibition of particulate matter emissions from existing ferrous jobbing foundries.	2D.0514	Control of particulates from ferrous jobbing foundries.
N-8.30	Control and prohibition of particulate matter emissions from miscellaneous industrial processes.	2D.0515	Particulates from miscellaneous industrial processes.
N-8.40	Control and prohibition of the emission of sulfur dioxide from fuel burning installations.	2D.0516	Sulfur dioxide emissions from fuel burning installations.
N-8.50	Control and prohibition of sulfur dioxide emissions from plants producing sulfuric acid.	2D.0517	SO_2 emissions from plants producing sulfuric acid.
N-8.60	Control of hydrocarbon emissions from stationary sources	2D.0518	Same.
N-8.70	Control of nitrogen dioxide emissions	2D.0519	Same.

The original (1972) regulation numbers given above are cited in the compliance schedules of 40 CFR 52.1774. None of these schedules is still relevant to existing air pollution control activity in North Carolina. Accordingly, EPA is removing them from the Code of Federal Regulations.

Final Action

Since the changes in the 1979 North Carolina regulations are editorial in nature, EPA find it appropriate to approve them without prior proposal. The same holds for the deletion of the obsolete compliance schedules. These are noncontroversial amendments and no adverse comments are anticipated. These actions will be effective 60 days from the date of this Federal Register notice unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted. If such notice is received, this action will be withdrawn before the effect date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective August 4, 1986.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the Unites States Court of Appeals for the appropriate circuit by August 4, 1986. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

Under 5 U.S.C. 605(b) I certify that SIP revisions do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Incorporation by reference of the North Carolina State Implementation Plan was approved by the Director of the Federal Register on July 1, 1982.

List of Subjects in 40 CFR Part 52

Administrator.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

Subpart II—North Carolina

2. In § 52.1770 is amended by adding paragraph (c)(41) as follows:

§ 52.1770 Identification of plan.

* * * * *

(c) * * *

(41) Updated air pollution control regulations submitted on March 31, 1978, by the North Carolina Department of Natural and Economic Resources. (No action is taken to approve regulation 2D.0523.)

(i) Incorporation by reference

(A) NCAC Title 15, Dept. of Natural and Economic Resources, Chapter 2, Environmental Management, Recodification and other editorial revisions in regulations, effective February 1, 1978.

(ii) Other material—None

§ 52.1774 [Removed and Reserved]

3. Section 52.1774, Compliance schedules, is removed and reserved.

40 CFR Part 52

[FRL-3025-1; TN-007]

Approval and Promulgation of Implementation Plans, Tennessee; 1982 Carbon Monoxide Nonattainment Plan, for Nashville-Davidson County

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: EPA today announces its approval of the 1982 State Implementation Plan revisions which the State of Tennessee submitted on June 14, 1985, for the Nashville-Davidson County carbon monoxide nonattainment area. These revisions meet the requirements of the Clean Air Act (CAA) and EPA policy. The intended purpose of this action is to provide for

attainment of the National Ambient Air Quality Standards for carbon monoxide (CO), as required under Part D of Title I of the Clean Air Act. EPA is also removing the construction ban imposed earlier under the provisions of Section 110(a)(2)(I) of the Act.

DATES: This action will be effective August 4, 1986, unless notice is received within 30 days that adverse or critical comments will be submitted.

ADDRESSES: Send any comments to Waymond Blackmon, EPA Region IV, Air Programs Branch, 404/881–2864 or FTS 257–2864. You may inspect copies of the submittal and EPA's evaluation during normal business hours at the following locations:

EPA Regional IV, Air Programs Branch, 345 Courtland Street NE., Atlanta, Georgia 30365

Tennessee Air Pollution Control Division, Customs House, 4th Floor, 710 Broadway, Nashville, Tennessee 37219–5403

Copies of the submittal can be inspected during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Waymond Blackmon, EPA, Region IV, Air Programs Branch, 404/881–2864 or FTS 257–2864.

SUPPLEMENTARY INFORMATION: As detailed in the proposal notice of February 3, 1983 (48 FR 5068), the State of Tennessee submitted its initial SIP revision for the Metropolitan Nashville-Davidson County CO nonattainment area on February 13, 1979. The State requested that EPA extend the attainment date of the CO standard in this area to December 31, 1987. EPA granted this request and conditionally approved the initial plan revison on August 13, 1980 (45 FR 53809).

Tennessee submitted its 1982 CO SIP revision for Nashville-Davidson county on June 30, 1982, and EPA proposed to disapprove it on February 3, 1983. Those revisions submitted by the State/local agency failed to provide fully approvable plans for Transportation Control Measures (TCMs), Basic Transportation Needs (BTNs), Resource Commitments, Reasonable Further Progress (RFP) and an acceptable Inspection and Maintenance (I/M) program. For a full discussion of these SIP revisions and EPA's evaluation of them, the reader may consult the February 3, 1983 (48 FR 5068), notice proposing disapproval of the CO plan and the final disapproval notice of April 5, 1984 (49 FR 13522), which stated the Agency's intent to impose funding restrictions under Section 176(b) of the Act and imposed a ban on construction of major new or modified stationary sources of carbon monoxide in the Nashville-Davidson County nonattainment area Sections 173(4) and 110(a)(2)(I) of the Act. On July 31, 1984 (49 FR 30486), EPA removed the funding restrictions of Section 176(b) and the construction ban imposed under Section 173(4); that action was based upon EPA's receipt of an approved, signed contract for the operation of the I/M program. Stationary source construction sanctions under Section 110(a)(2)(I) remained in place.

On September 13, 1985 (50 FR 37363), EPA announced final approval of the transportation control measures portion of the submittal upon receiving adopted contingency measures as required for full approval by EPA. Implementation of the I/M program started January 2, 1985, enabling EPA to give full approval to the 1982 CO SIP for Nashville-Davidson County area.

Carbon Monoxide (CO) SIP

CO violations are caused primarily by automobile emissions. They generally occur in the areas around major intersections, or in central business districts, where vehicles tend to idle for relatively long periods. EPA calls these problem areas "hot spots." The State's submittal combines a mix of mobile source strategies necessary to project attainment of the carbon monoxide standard. It is divided into seven sections:

1. Emission Inventories.
2. Modeling and Monitoring.
3. Stationary Source Controls.
4. Inspection and Maintenance (I/M).
5. Reasonable Further Progress (RFP).
6. Basic Transportation Needs (BTNs).
7. Resource Commitments.

Emission Inventory

The emission inventory for carbon monoxide (CO) was done using a typical winter workday and a three-month average temperature of 38.8° F. The inventory was done for a base year of 1982 with projection through 1987. The mobile source inventory was developed by the Metropolitan Planning Council (MPC) and the stationary source inventory was developed by the Metropolitan Health Department (MHD). The emission inventory was compiled pursuant to appropriate EPA policies and procedures. Furthermore, there were no point sources of CO greater than 1000 TPY.

Modeling and Monitoring

The State's submittal contains a detailed modeling analysis to demonstrate attainment of the CO standard by 1987 at local hot spot intersections. Fifty-one intersections were screened, and twenty-two were found to need further investigation. Upon further screening, eleven were found to need a detailed modeling analysis to determine what type of strategies would be needed to reduce the ambient CO emissions to an acceptable level. These eleven were analyzed with the Intersection Midblock Model (IMM) program. The IMM uses meteorological inputs as well as traffic parameters and emission factors for mobile sources to predict one and eight-hour concentrations of CO. These concentrations are then compared to the one and eight-hour standards for CO. Using IMM, the State demonstrated that attainment would be achieved at four of the intersections in 1990. Of the remaining seven, three were demonstrated to attain the standards by 1993 before any reduction strategies could be put into place. This left only four intersections where TCMs were needed to attain the CO standard. These four intersections were modeled using strategies of (a) road alignment, (b) throat widening, and (c) the optimization of signalization for the downtown area. From the SIP submittal it became apparent that two of these intersections would not come into compliance unless the projected improvements were made. These two intersections are Harding Road with Woodmont/White bridge, and Broadway with Eighth Avenue. These two intersections required straightening the alignment and signal optimization project to attain the CO standard. EPA proposed disapproval on February 3, 1983 (48 FR 5068) of the signal optimization program, because it was not being implemented. Subsequently, the signal optimization program has been reevaluated and its implementation is under way. EPA has concurred with these revisions. The TCMs portion of the submittal was approved on September 13, 1985 (50 FR 37363).

Stationary Source Controls

EPA policy requires that regulations for the RACT control of 1000 TPY stationary sources of CO be submitted with the 1982 SIP revision. The State of Tennessee's CO emission inventory for the Nashville-Davidson county area did not identify any source greater than 1000

TPY. Since EPA policy only requires controlling of sources greater than 1000 TPY, no stationary source RACT regulations were required to be submitted from the Metropolitan Health Department.

Inspection and Maintenance (I/M)

On April 5, 1984 (49 FR 13622), EPA disapproved Tennessee's 1982 revision to its Carbon Monoxide State Implementation Plan for the Metropolitan Nashville-Davidson county area, because of the failure to enter into a contract for operation of an I/M program. The plan submitted by the state/local agency failed to provide an acceptable I/M program. Disapproval of the CO portion of the SIP invoked a ban on the construction of major new or modified stationary sources of carbon monoxide in the Nashville-Davidson county nonattainment area as required by Section 110(a)(2)(I) of the Act (42 U.S.C. 7410(a)(2)(I)).

EPA also found that Tennessee's 1979 CO SIP for Nashville was not being implemented because the enforcement mechanism for the I/M program had not been adopted. This finding also imposed a moratorium on construction of major new or modified sources of CO in the nonattainment area under Section 173(4) of the Act. The 173(4) moratorium prohibited the issuance of any new permits to affected sources, including those which had already made a complete application before April 5, 1984, the date on which this restriction was imposed. The Agency's intent to place restrictions on grant funds under Section 176(b) of the Act was also proposed in the August 3, 1983, notice (48 FR 35314), and finalized in the April 5, 1984, notice (49 FR 13622).

However, because the issue of the appropriate formula for applying these restrictions had not been resolved, no actual funding sanctions were imposed. On May 3, 1984, EPA received the approved, signed contract for the operation of an I/M program for Nashville-Davidson County, Tennessee (start-up of I/M program in Nashville was January 2, 1986). Since this submittal demonstrated a good faith effort toward implementing an I/M program in an expeditious manner, EPA removed the construction moratorium and funding restriction imposed under 173(4) and 176(b) of the Act, respectively. (49 FR 30566, July 31, 1984)

Sanctions imposed under Section 110(a)(2)(I) of the Act remained in place until EPA could take final action on the entire CO SIP; this prohibited the issuance of permits for which a complete application had not been submitted as of April 5, 1984. Today's action to approve the entire CO SIP will revoke the sanctions imposed under Section 110(a)(2)(I) of the Act.

Reasonable Further Progress (RFP)

The SIP contained RFP graphs for the intersections that needed TCMs to attain the CO standard. These appeared to be reasonable, except that the TCMs that were adopted were not implemented because of the failure of the one-cent tax referendum and personnel shortages. Subsequently, the measure requiring return to the 1980 level of service for transit has been replaced with a "two-cent gas tax" equivalent and the ridesharing program measure from the contingency package.

Also, the signal optimization program has been reevaluated and its implementation is under way. EPA has concurred with these revisions. The TCMs portion of the submittal was approved on September 13, 1985 (50 FR 37363).

Basic Transportation Needs (BTN)

The BTN for Nashville was developed by the Metropolitan Planning Council in conjunction with the Citizen Advisory Committee (CAC) and the Technical Coordinating Committee (TCC). Working together these groups determined and selected a transportation system that would meet and enhance the transportation system's goals of increasing efficiency, quality, and mobility. An integral part of the BTN involved adopting and selecting the TCM strategies for the area. In particular, the low-cost transit emphasis package of the TCM analysis was being used to enhance the BTN for Nashville. Failure of the one-cent tax referendum placed the BTN in limbo because the low-cost transit improvements could not be implemented. EPA proposed in the February 3, 1983, Federal Register, to disapprove the BTN portion of the CO SIP. In order for the BTN to be approved, EPA asked the MPC to demonstrate that they could meet these requirements without implementing the low-cost transit improvements. The MPC could also substitute measures for those that were lost because of the failure of the one-cent gas tax.

The low-cost Transit Emphasis Package consisted of the improved bus speeds, subsidized employee transit costs, variable work hours, study of the transit fare structure, two-cent gas tax equivalent and traffic flow improvements (signal optimization project and intersection improvements). Since that time, Nashville has submitted the revised Transportation Control Plan portion and has satisfied EPA's TCP requirements by substituting measures from the contingency plan for those measures not implemented. (See 50 FR 37369 for approval of TCM portion of CO SIP.)

Resource Commitments

On September 22, 1982, EPA received a copy of a letter sent from the MPC to the MHD indicating that the one-cent gasoline sales tax referendum did not pass. It was EPA's understanding that this would prevent the implementation of the transit strategies adopted for the SIP. Furthermore, the letter stated that the Metropolitan Traffic and Parking Commission was not implementing the signal optimization program because of personnel shortages. With regard to the one-cent gas tax referendum, the MPC would have to substitute measures to replace those that would not be carried out because of the loss of revenue. EPA suggested that the MPC consider substituting measures from its contingency plan. Since that time, Nashville has submitted the revised TCP portion and has satisfied EPA's transportation control plan requirements by substituting measures from the contingency plan.

EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective 60 days from date of publication unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted.

If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective August 4, 1986.

Final Action. Based upon the above discussions, EPA today is fully approving the 1982 Carbon Monoxide (CO) SIP revisions for Nashville-Davidson County, Tennessee, and revoking the moratorium imposed under the provisions of Section 110(a)(2)(I) of the Clean Air Act on the construction of major new or modified sources of carbon monoxide in the nonattainment area.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have significant economic impact on a substantial number of small entities.

The Office of Management and Budget has exempted this rule from the

requirements of Section 3 of Executive Order 12291.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by August 4, 1986. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

Incorporation by reference of the State Implementation Plan for the State of Tennessee was approved by the director of the Federal Register on July 1, 1982.

List of Subjects in 40 CFR Part 52

Air pollution control, Intergovernmental relations, Carbon monoxide, Incorporation by reference.

Dated: May 27, 1986.

Lee M. Thomas,

Administrator.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

Subpart RR—Tennessee

2. Section 52.2220 is amended by adding paragraph (c) (56) as follows:

§ 52.2220 Identification of plan.

* * * * *

(c) * * *

(56) 1982 revisions in the Part D CO SIP for the Nashville-Davidson County nonattainment area (except TCM portion approved on September 13, 1985), submitted on June 30, 1982, and June 14, 1985.

(i) Incorporation by reference.

(A) Metropolitan Health Department Pollution Control Division Regulation No. 8 for Inspection and Maintenance (I/M) adopted on May 13, 1981; and revised on June 12, 1985, and February 15, 1984.

(B) Metropolitan Nashville and Davidson County's Carbon Monoxide Reasonable Further Progress (RFP) curve adopted on May 8, 1985.

(ii) Other Material.

(A) Narrative adopted June 16, 1982.

(B) Public awareness program mechanics training program adopted May 8, 1985.

§ 52.2225 [Removed]

3. Section 52.2225, Control Strategy: Carbon monoxide and ozone, is removed.

[FR Doc. 86-12442 Filed 6-2-86; 8:45 am]

BILLING CODE 6560-50-M

40 CFR Part 704

[OPTS-62022; FRL-3024-2]

Reporting and Recordkeeping Requirements; Technical Amendments

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; Technical amendment.

SUMMARY: EPA has learned that a list of substances, which are the subject of a chemical-specific rule, is incorrectly set out in the Code of Federal Regulations. Some of the substances on the list have been assigned the Chemical Abstract Service (CAS) Registry numbers of other substances on the list and vice versa. This notice will revise the list of substances by correctly setting out the list and by placing the list of substances in CAS number order. This is a non-substantive change that does not require public comment.

DATE: This final rule is effective on June 3, 1986.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Room E-543, 401 M Street, SW., Washington, DC 20460, Toll free: (800-424-9065), In Washington, DC: (554-1404), Outside the USA: (Operator-202-554-1404).

List of Subjects in 40 CFR Part 704

Hazardous materials, Imports, Environmental protection, Reporting and recordkeeping requirements.

Dated: May 22, 1986.

Don Clay,

Director, Office of Toxic Substances.

PART 704—[AMENDED]

Therefore, 40 CFR Part 704 is amended as follows:

1. The authority citation continues to read as follows:

Authority: 15 U.S.C. 2607(a).

2. Section 704.83 is amended by revising paragraph (b) to read as follows:

§ 704.83 Chlorinated naphthalenes.

* * * * *

(b) *Substances for which reports must be submitted.*

CAS registry number	Chemical substance
90-13-1	Naphthalene, 1-chloro-
91-58-7	Naphthalene, 2-chloro-
1321-64-8	Naphthalene, pentachloro-
1321-65-9	Naphthalene, trichloro-
1335-87-1	Naphthalene, hexachloro-
1335-88-2	Naphthalene, tetrachloro-
1335-30-4	Naphthalene, 1,5-dichloro-
1825-31-6	Naphthalene, 1,4-dichloro-
2050-69-3	Naphthalene, 1,3-dichloro-
2050-72-6	Naphthalene, 1,6-dichloro-
2050-73-7	Naphthalene, 1,7-dichloro-
2050-74-8	Naphthalene, 1,8-dichloro-
2050-75-1	Naphthalene, 2,3-dichloro-
2065-70-5	Naphthalene, 2,6-dichloro-
2198-75-6	Naphthalene, 1,2-dichloro-
2198-77-8	Naphthalene, 2,7-dichloro-
2234-13-1	Naphthalene, octachloro-
25586-43-0	Naphthalene, chloro-
32241-08-0	Naphthalene, heptachloro-
70776-03-3	Naphthalene, chloro derivatives.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 21, 74, 78, and 94

[Gen Docket No. 82-334; FCC 86-203]

Establishment of a Spectrum Utilization Policy for the Fixed and Mobile Services' Use of Certain Bands Between 947 MHz and 40 GHz

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action disposes of a Petition for Limited Reconsideration requesting review of decisions made in the *Second Report and Order (2nd R&O)* in General Docket 82-334, FCC 85-49 (50 FR 7336; February 22, 1985) which provided expanded access to the 31.0-31.3 GHz (31 GHz) band. The petition requested that certain changes be made in the technical standards which govern mobile use of the band; and this action partially grants the request by relaxing restrictions on antenna standards in order to permit more convenient mobile operations.

EFFECTIVE DATE: June 4, 1986.

ADDRESS: Federal Communications Commission, 1919 M Street, NW, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Donald Draper Campbell, Office of Engineering and Technology, Spectrum Engineering Division, Frequency Allocations Branch, tele: 202-653-8113.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Memorandum Opinion and Order* in General Docket 82-334, FCC 86-203, Adopted April 21, 1986, and Released April 28, 1986.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230),

1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Memorandum Opinion and Order

1. In this *Memorandum Opinion and Order (MOaO)*, we are considering a Petition for Limited Reconsideration filed by M/A-COM, Inc. (M/A-COM) with regard to the *2nd R&O*. The *2nd R&O* dealt exclusively with operations in the 31.0 to 31.3 GHz (31 GHz) band. M/A-COM requests modification of the antenna standard and power limit to accommodate portable/mobile operations. Examples of such applications include mobile video cameras for use in filmmaking and control of industrial robots.

2. The Commission finds merit in M/A-COM's petition and accordingly is exempting most mobile operations from any antenna requirements; however, we are retaining the transmitter output power limit of 50 mW in lieu of an alternative limit based on EIRP. This action will allow manufacturers flexibility in design of systems for mobile use while minimizing the risk of harmful interference.

Ordering Clauses

3. Accordingly, it is ordered that, under the authority contained in 47 U.S.C. 4(i), 301 and 308(r), the *Petition for Limited Reconsideration* file by M/A-COM, Inc. is granted in part and denied in part for the reasons stated above.

4. It is further ordered, that under the authority contained in 47 U.S.C. 154(j), 154(j) and 220, Parts 21, 74, 78 and 94 of the Commission's Rules are amended effective June 4, 1986, as shown below.

List of Subjects

47 CFR Part 2

Allocations.

47 CFR Part 21

Communication common carriers, Point-to-point microwave, Transmission.

47 CFR Parts 74, 78, 94 and 95

Point-to-point microwave.

Rule Changes

5. Parts 21, 74, 78 and 94 of Title 47 of the Code of Federal Regulations are amended as follows:

PART 21—DOMESTIC PUBLIC FIXED RADIO SERVICES (OTHER THAN MARITIME MOBILE)

6. The authority citation for Part 21 continues to read as follows:

Authority: Sec. 4, 303, 48 Stat. 1066, as amended; 47 U.S.C. 154, 303, unless otherwise noted.

7. Section 21.106 is amended by revising the entry for the frequency band 31,000 to 31,300 MHz in the table and adding a new footnote 3 to the table in paragraph (c) as follows:

§ 21.106 Directional antennas.

* * * * *

(c) * * *

Frequency (MHz)	Category	Maximum beamwidth to 3 dB points (included angle in degrees)	Minimum antenna gain (dBi)	Minimum radiation suppression to angle in degrees from centerline of main beam in decibels: 5 to 10	10 to 15	15 to 20	20 to 30	30 to 100	100 to 140	140 to 180
31,000 to 31,300 [3]	NA		[1] 44	25.0						

[1] Digital Termination User Station antennas shall meet performance Standard B and have a minimum antenna gain of 34 dBi.

[3] Mobile, except aeronautical mobile, stations need not comply with these standards.

* * * * *

PART 74—EXPERIMENTAL, AUXILIARY AND SPECIAL BROADCAST AND OTHER PROGRAM DISTRIBUTIONAL SERVICES

8. The authority citation for Part 74 continues to read as follows:

Authority: Sec. 4, 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended; 47 U.S.C. 301, 303, 307, unless otherwise noted.

9. Section 74.536 is amended by revising the entry for the frequency band 31,000 to 31,300 MHz in the table and adding a new footnote 2 to the table in paragraph (b) as follows:

§ 74.536 Directional antenna required.

* * * * *

(b) * * *

Frequency (MHz)	Category	Maximum beamwidth to 3 dB points (included angle in degrees)	Minimum antenna gain (dBi)	Minimum radiation suppression to angle in degrees from centerline of main beam in decibels: 5 to 10	10 to 15	15 to 20	20 to 30	30 to 100	100 to 140	140 to 180
31,000 to 31,300 [2]	NA		[1] 4.0	25.0						

[1] The minimum front-to-back ratio shall be 25 dB.

[2] Mobile, except aeronautical mobile, stations need not comply with these standards.

* * * * *

10. Section 74.641 is amended by revising the entry for the frequency band 31,000 to 31,300 MHz in the table and adding a new footnote 2 to the table in paragraph (a)(1) as follows:

§ 74.641 Antenna systems.

(a) * * *

(1) * * *

Frequency (MHz)	Category	Maximum beamwidth to 3 dB points (included angle in degrees)	Minimum antenna gain (dBi)	Minimum radiation suppression to angle in degrees from centerline of main beam in decibels: 5 to 10	10 to 15	15 to 20	20 to 30	30 to 100	100 to 140	140 to 180
31,000 to 31,300 [2]	NA		[1] 4.0	25.0						

[1] The minimum front-to-back ratio shall be 25 dBi.

[2] Mobile, except aeronautical mobile, stations need not comply with these standards.

* * * * *

PART 78—CABLE TELEVISION RELAY SERVICE CHANGES

11. The authority citation for Part 78 continues to read as follows:

Authority: Sec. 2, 3, 4, 301, 303, 307, 308, 309, 48 Stat. as amended, 1064, 1065, 1066, 1081, 1082, 1083, 1084, 1085; 47 U.S.C. 152, 153, 154, 301, 303, 307, 308, 309, unless otherwise noted.

12. Section 78.106 is amended by revising the entry for the frequency band 31,000 to 31,300 MHz in the table and adding a new footnote 2 to the table in paragraph (a)(1) as follows:

§ 78.106 Antenna systems.

(a) * * *

(1) * * *

Frequency (MHz)	Category	Maximum beamwidth to 3 dB points (included angle in degrees)	Minimum antenna gain (dBi)	Minimum radiation suppression to angle in degrees from centerline of main beam in decibels: 5 to 10	10 to 15	15 to 20	20 to 30	30 to 100	100 to 140	140 to 180
31,000 to 31,300 [2]	8A	[1] 4.0	36.0							

[1] The minimum front-to-back ratio shall be 36 dB.
[2] Mobile, except aeronautical mobile, stations need not comply with these standards.

* * * * *

PART 94—PRIVATE OPERATIONAL-FIXED MICROWAVE SERVICE

13. The authority citation for Part 94 continues to read as follows:

Authority: Sec. 4, 303, 48 Stat. 1066, 1082; 47 U.S.C. 154, 303, unless otherwise noted.

14. Section 94.75 is amended by revising the entry for the frequency band 31,000 to 31,300 MHz in the table and adding a new footnote 8 to the table in paragraph (b) as follows:

§ 94.75 Antenna limitations

* * * * *

(b) * * *

Frequency (MHz)	Category	Maximum beamwidth to 3 dB points (included angle in degrees)	Minimum antenna gain (dBi)	Minimum radiation suppression to angle in degrees from centerline of main beam in decibels: 5 to 10	10 to 15	15 to 20	20 to 30	30 to 100	100 to 140	140 to 180
31,00 to 31,300 [8]	8A		14.0	36.0						

[7] The minimum front-to-back ratio shall be 36 dB.
[8] Mobile, except aeronautical mobile, stations need not comply with these standards.

BILLING CODE 6712-01-M

DEPARTMENT OF DEFENSE

Department of the Navy

48 CFR Parts 5242 and 5252

Department of the Navy Federal Acquisition Regulations; Policy Concerning Navy Requests for Refunds

AGENCY: Department of the Navy.

ACTION: Final rule.

SUMMARY: The Department of the Navy is establishing Chapter 52 and adding Subpart 5242.90, *Refunds Requirements (Spares and Support Equipment)*, Section 5242.9000, Requests for Refunds, and Subpart 5252.2, *Texts of Provisions and Clauses*, Section 5252.242-9000, Refunds, to set forth Navy policy on refunds to the Government. Existing policy included in the Federal Acquisition Regulation (FAR) and the Defense Federal Acquisition Regualtion Supplement (DFARS) only pertains to the solicitation of voluntary refunds for overpriced items. This new rule sets forth a Navy policy with regard to requesting and obtaining contractually prescribed refunds from contractors for spare parts or items of support equipment when it is determined that the negotiated price of such parts or items significantly exceeds the intrinsic value of the parts or items.

EFFECTIVE DATE: 28 April 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Sidney Tronic, Office of the Assistant Secretary of the Navy (Shipbuilding & Logistics), Contracts and Business Management (CBM-BPC), Washington, DC 20360-5000, Telephone: (202) 692-3553/3/9.

SUPPLEMENTARY INFORMATION:

1. Background

The Navy guidance and clause at Subpart 5242.90, Section 5242.9000 and Subpart 5252.2, Section 5252.242-9000 allows the Navy to obtain a refund or a negotiated price adjustment whenever the Navy determines a price paid for a spare part or item of support equipment significantly exceeds the intrinsic value of the part or item.

Proposed rulemaking was published on December 4, 1985, at 50 FR 49619 and invited comments for 30 days ending January 3, 1986. Comments were received from seven sources, including individuals, companies, and industrial associations. The following summarizes significant comments, suggestions, and actions taken.

Inconsistent with Existing Policy

It was suggested that the Navy's refund policy is inconsistent with the intentions of the Secretary of Defense to establish a uniform refund policy for all of DOD. It was also suggested that the Navy's refund policy is prohibited by the FAR and the DFARS. The Navy does not agree. The FAR and the DFARS do not prohibit a mandatory refund policy. Rather, they are silent on this matter. The deviation which the Navy obtained from the DAR Council authorizes use of a Navy unique clause.

No Time Limit

Concern was expressed that the Navy's proposed clause did not specify a time limit for the Navy to obtain a refund. The clause has been clarified to indicate that the Navy can request a refund at any time either before or after final payment under the contract.

Inconsistent With General Contracting Principles

Concern was expressed that the Navy's proposed clause was inconsistent with general contracting principles which would not permit one party to a contract to unilaterally reopen the agreement and then either annul the agreement or renegotiate the price on the basis of information which might not have been available at the time of the original negotiations. The Navy does not agree that its clause is inconsistent with general contracting principles. The parties to a binding contract may agree to include a clause which provides for a contract price adjustment in certain circumstances, including, for example, the obtaining by one party of additional

information concerning the reasonableness of the contract price. There are many contracts which include price adjustment provisions.

Use for More Than Spare Parts

Concern was expressed that the Navy's proposed policy and clause were worded such that they could be interpreted as applying to more than spare and similar parts. The policy and the clause have been reworded to clarify that they apply only to refunds for spare parts and items of support equipment.

Applicability to Competitively Obtained Prices

It was suggested that the Navy's proposed clause should not be required in contracts awarded as a result of competition. The policy and the clause have been changed so that the clause is not required with respect to spare parts and items of support equipment whose prices are established through sealed bidding or competitive small purchase procedures.

2. Statutory and Regulatory Requirements

This rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) and is not a "major" rule pursuant to E.O. 12291. The Paperwork Reduction Act (44 U.S.C. 3501 et seq.) does not apply to this rule because it does not impose any additional reporting requirements on the public.

List of Subjects in 48 CFR Parts 5242 and 5252

Government procurement.

For the reasons set out in the preamble, Chapter 52 of Title 48 of the Code of Federal Regulations is established and Parts 5242 and 5252 are added to read as follows.

CHAPTER 52—DEPARTMENT OF THE NAVY ACQUISITION REGULATIONS

PART 5242—CONTRACT ADMINISTRATION

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DOD Directive 5000.35.

Subpart 5242.90—Refunds Requirements (Spares and Support Equipment)

5242.9000 Request for refunds.

(a) *Policy.* This subpart establishes uniform policy and procedures on requesting refunds and ensuring fair and reasonable prices for spare parts or items of support equipment. Contracting activities shall request a refund whenever the contract price of any spare part or item of support equipment significantly exceeds the item's intrinsic value after considering the impact of specified delivery terms and quantity. The intrinsic value of an item is the price an individual would expect to pay based upon the cost to manufacture, using standard labor costs, material costs, shop cost and reasonable markup for overhead and profit. The following circumstances are examples which may establish a basis for a refund or pricing adjustment:

(1) A technical or engineering analysis, such as that done by PRICE FIGHTER, results in a determination that the intrinsic value is significantly lower than the historical pricing structure.

(2) The price paid for an item bought competitively in similar quantity and circumstances (e.g., urgency, delivery terms) is significantly less than the former sole source price.

(3) Prices paid to the actual manufacturer of an item indicate the amount previously charged by the prime contractor for the item significantly exceeded the value added by the prime contractor in providing the item.

(4) Postaward price reviews which indicate an increase in recent contract price which causes the price to exceed significantly the intrinsic value of the part.

(5) Postaward audit reports which identify over-charges.

(b) *Solicitation Provisions.* The contracting officer shall insert the clause at 5252.242-9000 in solicitations, Basic Ordering Agreements, and contracts (as defined in FAR 2.101) which contain or may contain requirements for spare parts or items of support equipment, except those contracts awarded as a result of competitive small purchase procedures. Heads of contracting activities are delegated, without power of redelegation, authority to establish monetary thresholds below which refunds will not be requested.

PART 5252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DOD Directive 5000.35.

Subpart 5252.2—Texts of Provisions and Clauses

5252.242-9000 Refunds.

As prescribed in 5242.9000 insert the following clause:

Refunds (Spares and Support Equipment) (April 86)

(a) In the event that the negotiated price of a spare part or item of support equipment under this contract exceeds its intrinsic value, the contractor agrees to refund the difference. The intrinsic value of an item is defined as the price an individual would expect to pay based upon the cost to manufacture, using standard labor costs, material costs, shop cost and reasonable markup for overhead and profit.

(b) At any time before or after final payment under this contract, the contracting officer may notify the contractor of any negotiated price of an item described above that, based on all information available to the contracting officer at the time of the notice, exceeds the intrinsic value of the item.

(c) The contractor shall enter into good faith negotiations for the downward repricing of the item. All information available to the Navy, whether or not available at the time the original contract price was negotiated and any additional information, including cost data, supplied by the Contractor, shall be considered in determining the amount of any refund.

(d) Refunds under an open contract shall be made by a contract modification. Refunds under closed contracts shall be made by means of a check payable to the office designated for contract administration.

(e) If agreement on a downward repricing of the item cannot be reached, and the Navy's return of the new or unused item to the contractor is practical, the Navy may elect to return the item to the contractor. Upon return of the item to its original point of government acceptance, the contractor shall refund in full the price paid. If no agreement concerning downward repricing is reached, and return of the item by the Navy is impractical the Contracting Officer may, with approval of the Head of the Contracting Activity, determine a reasonable refund, subject to contractor appeal as provided in the Disputes clause.

(End of Clause)

Dated: May 28, 1986.

William F. Roos, Jr.,

Lt, JAGC, U.S. Naval Reserve Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1241

[Ex Parte No. 460]

Certification of Railroad Annual Report R-1 by Independent Accountant

AGENCY: Interstate Commerce Commission.

ACTION: Clarification of Final Rules.

SUMMARY: On October 10, 1985 (50 FR 41008) the Commission published final rules which require Class I railroads to submit a report from an independent public accountant stating that specified data in the R-1 annual report have been examined, using agreed-upon procedures, and found to be in compliance with the Uniform System of Accounts for Railroad Companies (49 CFR Part 1201).

Subsequent to the issuance of the Final Rules, Association of American Railroads (AAR) requested that the Commission clarify the audit requirements of Schedules 209 and 210; affirm that the data audited by the independent accountants will be accorded the same procedural treatment and presumption of credibility presently accorded to the R-1 data; publish the proposed auditing procedures for comment prior to their adoption; and strike that portion of the Final Rules which imposes additional audit requirements without prior notice.

The Commission has clarified the audit requirements and reaffirms the procedural treatment and credibility of the R-1 data as requested in the AAR petition. It also has aligned the audit requirements with those originally proposed.

DATE: Effective for the R-1 annual reports for the year 1986, which are due to be filed by March 31, 1987.

FOR FURTHER INFORMATION CONTACT: William F. Moss III (202) 275-7510.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T. S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289-4357 (DC Metropolitan area) or toll free (800) 424-5403.

This action will not significantly affect either the quality of the human environment or energy conservation. This rule will not have a significant economic impact on a substantial number of small entities.

BILLING CODE 7035-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 661

[Docket No. 60477-6077]

Ocean Salmon Fisheries off the Coasts of Washington, Oregon, and California

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of reopening of fishery.

SUMMARY: The Secretary of Commerce (Secretary) announces the reopening for two days of the non-Indian commercial salmon fishery for all species except coho from the U.S.-Canadian border to Cape Falcon, Oregon. The fishery was closed on May 19, 1986, when it was projected that the harvest quota had been reached. Subsequent evaluation of landings indicated that the actual catch had been overestimated, and the fishery was reopened from May 24 through May 27, 1986. Further evaluation of landings indicates nearly 6,000 fish remain to be harvested in the troll quota. This reopening is calculated to maximize ocean harvest of chinook salmon without exceeding the established quota.

DATES: Reopening of the fishery conservation zone (FCZ) from the U.S.-Canada border to Cape Falcon, Oregon, to non-Indian commercial salmon fishing is effective at 0001 hours Pacific Daylight Time (PDT) May 30, 1986, until 2400 hours PDT May 31, 1986. Comments on this notice will be received until June 18, 1986.

ADDRESS: Comments may be mailed to the Director, Northwest Region, NMFS, BIN C15700, 7600 Sand Point Way, NE., Seattle, WA 98115-0070. Information relevant to this notice has been compiled in aggregate form and is available for public review during business hours at the same address.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten (Regional Director), 206-526-6150.

SUPPLEMENTARY INFORMATION: Regulations governing the ocean salmon fisheries at 50 CFR Part 661 specify at § 661.21(a)(2) that "If a fishery is closed under a quota before the end of a scheduled season based on an overestimate of actual catch, the Secretary may reopen that fishery for all or part of the remaining original season by publication of a notice in the Federal Register under § 661.23 in order to allow the quota to be met so long as the additional period is no less than 24 hours."

The commercial fishery from the U.S.-Canada border to Cape Falcon, Oregon, was closed at midnight, May 19, 1986 (51 FR 18796; May 22, 1986) when it was projected that the harvest quota of 33,700 chinook salmon had been caught. A subsequent evaluation of landings indicated that the original projection was based on an overestimate of actual catch, with approximately 6,900 fish remaining in the quota. Thus, the fishery was reopened for four days, from May 24 through May 27, 1986 (51 FR 19350, May 29, 1986). However, hazardous fishing conditions due to inclement weather prevented full harvest of the quota. Current evaluation of landings indicates nearly 6,000 fish remain in the quota. The Secretary therefore issues this notice to reopen the non-Indian commercial fishery in the FCZ from the U.S.-Canada border to Cape Falcon, Oregon, for two days, from 0001 hours PDT May 30, 1986, until 2400 hours PDT May 31, 1986.

The Regional Director consulted with the Directors of the Washington Department of Fisheries (WDF) and the Oregon Department of Fish and Wildlife (ODFW) regarding this reopening. The Directors of WDF and ODFW confirmed that Washington and Oregon will reopen the commercial fishery in State waters adjacent to this area of the FCZ during the same time period.

Other Matters

This action is taken under § 661.21 and 661.23 and is in compliance with Executive Order 12291.

BILLING CODE 3510-22-M

50 CFR Part 671

[Docket No. 50653-5153]

Tanner Crab off Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of season closure.

SUMMARY: The Director, Alaska Region, NMFS (Regional Director), has determined that the *Chionoecetes opilio* Tanner crab fishery in the Pribilof Subdistrict of the Bering Sea District of Registration Area J (Westward) must be closed in order to protect all Tanner crab stocks. The Secretary of Commerce therefore issues this notice closing fishing for all Tanner crabs by vessels of the United States in the Pribilof subdistrict effective June 1, 1986. This action is intended as a management measure to conserve Tanner crab stocks.

DATES: This notice is effective at noon, Alaska Daylight Time (ADT), June 1, 1986. Public comments on this notice of closure are invited until June 18, 1986.

ADDRESSES: Comments should be sent to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, AK 99802. During the 15-day comment period, the data on which this notice is based will be available for public inspection during business hours (8:00 a.m. to 4:30 p.m., AST, weekdays) at the NMFS Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT: Raymond E. Baglin (Fishery Management Biologist, NMFS), 907–586–7230.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the Commercial Tanner Crab Fishery off the Coast of Alaska (FMP), which governs this fishery in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act (Magnuson Act), provides for inseason adjustments of area openings and closures. Implementing regulations at § 671.27(b) specify that notices of these adjustments will be issued by the Secretary of Commerce under criteria set out in that section.

Section 671.26(f) establishes six districts within Registration Area J to independently manage individual Tanner crab stocks. One of these districts is the Bering Sea District, which is further divided into three subdistricts enabling management of localized Tanner crab stocks. The regularly scheduled 1986 fishing season for *C. opilio* in the Pribilof Subdistrict began on January 15, 1986 (50 FR 47549, November 19, 1985).

Reasons for this closure follow:

The optimum yield range for the entire Bering Sea District fishery for *C. opilio* Tanner crabs is 20–130 million pounds. The 1985 NMFS trawl survey indicated that 57 million pounds of male *C. opilio*, 4 inches and larger in carapace width, would be available at a desired exploitation rate of 0.58. The survey predicated that about 28 million pounds of this total would be available from the Pribilof Subdistrict.

Fishery performance, however, has indicated that a larger population of crab than was anticipated before the season was available and the catch has exceeded the survey prediction while exhibiting relatively stable catch per unit of effort (CPUE). As of May 18, 1986, approximately 70 vessels have delivered about 44 million pounds of *C. opilio* Tanner crab. Analysis of CPUE data indicates that a harvest of 50 million pounds of *C. opilio* will be achieved by noon June 1, 1986. Fishery performance has been closely monitored throughout the entire fishery. The CPUE averaged about 220 crabs per pot during January. The overall CPUE remained steady during February, March, and April with an average of about 150 crabs per pot. During May a rapid downward trend in CPUE occurred with the catch declining from about 169 to 92 crabs per pot. This indicates that the fishery has begun to deplete the remaining *C. opilio* stock and a fishery closure is necessary to conserve the reproductive capacity of the remaining stock. Due to low CPUE, the fishing fleet has already started to move out of the Pribilof Subdistrict and into the Northern Subdistrict.

In light of this information, the Regional Director has determined that the condition of the *C. opilio* Tanner crab stocks in the Pribilof Subdistrict is substantially different from the condition anticipated at the beginning of the fishing year, and that this difference reasonably supports the need to protect the Tanner crab stocks. The Pribilof Subdistrict, as defined in § 671.26(f) (1) (vi) (B), is closed by this notice until noon, ADT, August 1, 1986, at which time the closure of the entire Bering Sea District prescribed in Table 1 of § 671.21(a) will begin.

This closure will become effective after this notice is filed for public inspection with the Office of the Federal Register and the closure is publicized for 48 hours through procedures of the Alaska Department of Fish and Game. Public comments on this notice of closure may be submitted to the Regional Director at the address above. If comments are received, the necessity of this closure will be reconsidered and a subsequent notice will be published in the Federal Register, either confirming this notice's continued effect, modifying it, or rescinding it.

Other Matters

Tanner crab stocks in the the Pribilof Subdistrict of Registration Area J (Westward) will be subject to damage by overfishing unless this closure takes effect promply. NOAA therefore finds for good cause that advance opportunity for public comment on this notice is contrary to the public interest and that no delay should occur in its effective date.

This action is taken under 50 CFR Part 671 and complies with Executive Order 12291.

Proposed Rules

Federal Register
Vol. 51, No. 108
Tuesday, June 3, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1065

Milk in the Nebraska-Western Iowa Marketing Area; Notice of Proposed Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed suspension of rule.

SUMMARY: This notice invites public comments on a proposal to suspend for the months of June through August 1986 the requirement that a cooperative association deliver 51 percent or more of the producer milk of members of the association to pool distributing plants of other handlers in order to qualify a supply plant operated by the cooperative association that represents producers who supply milk for the market. The association claims that this action is necessary to assure that its member dairy farmers who have regularly supplied the market's fluid needs will continue to share in the market's fluid milk sales.

DATE: Comments are due on or before 7 days after publication in the Federal Register.

ADDRESS: Comments (two copies) should be filed with the Dairy Division, Room 2968, South Building, U.S. Department of Agriculture, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Constance M. Brenner, Marketing Specialist, Dairy Division, Agriculture Marketing Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-7311.

SUPPLEMENTARY INFORMATION: The Administrator of the Agriculture Marketing Service has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to ensure that dairy farmers would continue to have their milk pooled and priced under the order and thereby receive the benefits that accue from such pricing.

Notice is hereby given that, pursuant to the provisions of the Agriculture Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), the suspension of the following provisions of the order regulating the handling of milk in the Nebraska-Western Iowa marketing area is being considered for the months of June through August 1986:

In § 1065.7(c), the words "51 percent or more of the".

All persons who want to send written data, views or arguments about the proposed suspension should send two copies of them to the Dairy Division, Agricultural Marketing Service, Room 2968, South Building, U.S. Department of Agriculture, Washington, DC 20250, by the 7th day after publication of this notice in the Federal Register. The period for filing comments is limited to 7 days because a longer would not provide the time needed to complete the required procedures and include June 1986 in the suspension period.

The comments that are sent will be made available for public inspection in the Diary Division during normal business hours (7 CFR 1.27(b)).

Statement of Consideration

The proposed suspension would remove for the months of June through August 1986 the requirement that a cooperative association deliver 51 percent or more of the producer milk of members of the association to pool distributing plants of other handlers in order to qualify a supply plant operated by the cooperative association for pooling. The suspension was requested by Mid-America Dairymen, Inc. (Mid-Am), a cooperative association that represents a large number of the market's producers.

The cooperative states that the proposed suspension is needed because of increased production by the cooperative's members, as well as for the market as a whole, that greatly exceeds increased Class I sales. For the months of January through April 1986, Mid-Am production pooled on the Nebraska-Western Iowa order was 10.1 percent higher than for the same period of 1985, while Class I sales increased only 0.2 percent.

With the decrease in Class I sales that will accompany the closing of schools for the summer, Mid-Am states that the percentage of the cooperative's producer milk shipped to Nebraska-Western Iowa pool distributing plants is likely to fall below 51 percent. As alternatives to depooling some milk of its member producers, the cooperative would have to attempt to pool Nebraska-Western Iowa producer milk on another Federal order or ship milk to distributing plants where the milk would be received, loaded back into the truck and shipped to a manufacturing plant. Either alternative would require the cooperative to move milk in an uneconomic and inefficient manner solely to maintain the pool status of producers who historically have supplied the fluid needs of the Nebraska-Western Iowa marketing area.

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 151

[Docket No. 86-001]

Recognized Breeds and Books of Record

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the "Recognition of Breeds and Books of Record of Purebred Animals" regulations by adding the Irish Angus Herd Book, maintained by the Irish Angus Cattle Society Ltd., to the list of "recognized breeds and books of record" for Aberdeen-Angus cattle. It has been determined that the Irish Angus Herd Book qualifies for such listing, thereby providing for duty-free

entry into the United States of cattle which are registered in the book.

DATE: Written comments must be received on or before August 4, 1986.

ADDRESS: Written comments concerning this proposed rule should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Comments should state that they are in response to Docket No. 86-001. Written comments received may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Robert E. Wagner, Regulatory Communications and Compliance Policy Staff, VS, APHIS, USDA, Room 827, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8365.

SUPPLEMENTARY INFORMATION:

Background

Item 100.01 in Part 1, Schedule 1, of 19 U.S.C. 1202 (the Tariff Act of 1930, as amended) provides, in part, that animals (except for certain foxes) certified to the collector of customs by the Department of Agriculture as being pure bred of a recognized breed and duly registered in a book of record recognized by the Secretary of Agriculture for that breed, may enter the United States free of duty if imported for breeding purposes. Implementing regulations, captioned "Recognition of Breeds and Books of Record of Purebred Animals" (referred to below as the regulations), are set forth in 9 CFR Part 151.

In accordance with § 151.2 of the regulations, Veterinary Services issues certificates of pure breeding for certain animals. To be eligible for a certificate, an animal must be "purebred of a recognized breed and have been registered in good faith in a book of record listed in § 151.9(a) [of the regulations] and must not have been registered on inspection without regard to purity of breeding." The regulations contain lists of "recognized breeds and books of record" for cattle, horses, asses, sheep, goats, swine, dogs, and cats.

Under the regulations, purebred cattle are those which are the progeny of known and registered ancestors of the same recognized breed and for which at least three generations of ancestry can be traced. A "book of record" is defined in the regulations as: "[a] printed book or an approved microfilm record sponsored by a registry association and containing breeding data relative to a large number of registered purebred animals used as a basis for the issuance of pedigree certificates." The regulations also provide that a book of record for a breed of animal must be examined and approved by Veterinary Services before the breed and book of record are eligible to be added to the list contained in the regulations.

The custodian of the Irish Angus Herd Book, a book of record for Aberdeen-Angus cattle issued by the Irish Angus Cattle Societ Ltd., has submitted to Veterinary Services a complete copy of the book of record with a copy of all rules and forms affecting the registration of the animals in the book of record. A representative of Veterinary Services has reviewed the material submitted and has determined that this book of record meets the requirements of the regulations for addition to the list of "recognized breeds and books of record."

Therefore, this document proposes to amend the list of "recognized breeds and books of record" in § 151.9(a) of the regulations by adding as an additinal book of record for the Aberdeen-Angus breed, the "Irish Angus Herd Book," issued by the Irish Angus Cattle Society Ltd., John L. Murphy, Secretary, Agriculture House, Kildare Street, Dublin 2, Ireland.

Executive Order 12291 and Regulatory Flexibility act

This action has been reviewed in conformance with Executive Order 12291 and has been determined to be not a "major rule." The Department has determined that this action would not have a significant effect on the economy; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and would have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

If the proposal is adopted as a final rule, Aberdeen-Angus cattle listed in the Irish Angus Herd Book will be eligible for duty-free importation into the United States. It is anticipated that the number of these Aberdeen-Angus cattle imported into the United States annually would be less than one percent of the total number of cattle imported into the United States annually.

Under the circumstances explained above, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. (See 7 CFR Part 3015, Subpart V).

List of Subjects in 9 CFR Part 151

Animals, Animal pedigree, Imports, Purebred animals.

PART 151—RECOGNITION OF BREEDS AND BOOKS OF RECORD OF PUREBRED ANIMALS

Accordingly, 9 CFR Part 151 would be amended as follows:

1. The authority citation for Part 151 would be revised to read as set forth below and the authority citations following all the sections in Part 151 would be removed:

Authority: 19 U.S.C. 1202; 7 CFR 2.17, 2.51, and 371.2(d).

2. In § 151.9, the chart in paragraph (a) would be amended by adding the following after Code 1112 under the heading "Cattle":

§ 151.9 Recognized breeds and books of record.

BILLING CODE 3410-34-M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 709

Division of Assets, Liabilities and Capital; Proposed Deletion

AGENCY: National Credit Union Administration.

ACTION: Proposed deletion of existing regulation.

SUMMARY: The deletion of Part 709—Division of Assets, Liabilities and Capital—is proposed because the regulation has been rarely used and is no longer needed. Special situations can be handled on a case-by-case basis without the regulation.

DATE: Comments must be received on or before August 6, 1986.

ADDRESS: Send comments to Rosemary Brady, Secretary, National Credit Union Administration Board, 1776 G Street, NW., Washington, DC 20456.

FOR FURTHER INFORMATION CONTACT: D. Michael Riley, Director, Office of Examination and Insurance, at the above address, or telephone: (202) 357-1095.

SUPPLEMENTARY INFORMATION: NCUA requests comment on its proposal to delete Part 709 of the NCUA Rules and Regulations. Part 709—Division of Assets, Liabilities and Capital—contains provisions and procedures that enable members of a Federal credit union, who are a separately identifiable group, to undertake an equitable division of their assets, liabilities and capital, and charter a new Federal credit union. The most recent update of Part 709 was in 1973. Significant economic and policy changes have occurred since the regulation was modified. Over the past few years, there have been few, if any, "spin offs" using Part 709 of the Rules and Regulations. Accordingly, there does not appear to be a need to retain this regulation. In addition, a number of requirements contained in Part 709 are duplicated in other sections of the Regulations, Bylaws, and chartering and insurance policies. These other provisions provide adequate flexibility for special cases to be resolved when, and if, they arise.

Regulatory Procedures

The NCUA Board hereby certifies that the proposed deletion, if adopted, will not have a significant economic impact on a substantial number of small credit unions. The elimination of the regulation will reduce regulatory burden and will not create any negative impact on credit unions.

Paperwork Reduction Act

The proposed deletion will not increase collection requirements under the Paperwork Reduction Act. Therefore, the approval of the Office of Management and Budget is not required.

List of Subjects in 12 CFR Part 709

Division of assets, Liabilities and capital, Credit unions.

By the National Credit Union Administration Board on the 21st day of May 1986.

Rosemary Brady,

Secretary of the Board.

PART 709—[REMOVED]

Accordingly, NCUA proposes to remove Part 709 from the Regulations.

Authority: 12 U.S.C. 1766, 1788.)

[FR Doc. 86-12417 Filed 6-2-86; 8:45 am]

BILLING CODE 7535-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 86-NM-124-AD]

Airworthiness Directives; Boeing Model 737-300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require inspection for proper clearance between the number two engine fuel feed tube and adjacent strut fairing fasteners on certain Boeing Model 737-300 airplanes, and adjustment or replacement, if necessary. This action is prompted by a report of a fuel leak on one airplane, resulting from chafing between the fuel tube and fasteners. This condition, if not corrected, could result in a strut fire.

DATES: Comments must be received on or before July 25, 1986.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 86-NM-124-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Stewart R. Miller, Aerospace Engineer, Propulsion Branch, ANM-140S; telephone (206) 431-2969. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be sumitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the subetance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 86-NM-124-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

An operator of a Boeing Model 737-300 reported that, during a walk around inspection, fuel was noted to be dripping from the number two engine strut aft drain. Subsequent investigation revealed the fuel feed tube assembly had chafed through due to contact with adjacent strut fasteners.

An examination, by the manufacturer, of production line airplanes revealed several which did not meet the minumum clearance requirements of appropriate drawings.

Boeing issued Alert Service Bulletin 737-28A1062 on February 21, 1986, which describes an inspection for fuel feed tube assembly clearance and, if necessary, maintenance action to correct the clearance. This was followed by Revision 1 on April 11, 1986, which makes no substantive change from the original. Parts kits (one kit per airplane) became available in February and are now available in sufficient quantity for expected need.

Since a situation exists where chafing of the fuel feed tube assembly could contribute to a fire hazard resulting from a fuel leak in the strut, an AD is proposed that would require inspection of the number two engine fuel feed tube for proper clearance and correction of any unsafe condition found in accordance with Boeing Alert Service Bulletin 737-28A1062, Revision 1, dated April 11, 1986, or later FAA-approved revision.

It is estimated that 80 airplanes of U.S. registry would require inspection, which would require one manhour per airplane to accomplish. It is estimated that 30 airplanes of U.S. registry would require modification, which would require 5 manhours per airplane to accomplish. At an estimated labor cost of $40 per manhour, the impact of this AD on U.S. operators is estimated to be $6,400.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979), and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because few, if any, Boeing Model 737-300 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.19 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation of Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Boeing: Applies to the Model 737-300 series airplanes specified in Boeing Alert Service Bulletin, 737-28A1062, Revision 1, dated April 11, 1986, certificated in any category. To minimize the fire hazard associated with a fuel leak due to the fuel feed tube assembly chafing against strut fasteners, accomplish the following within 3 months after the effective date of this AD, unless previously accomplished:

A. Inspect and, if necessary, adjust fuel feed tube assembly clearance and replace chafed tubes in accordance with Boeing Service Bulletin 737-28A1062, Revision 1, dated April 11, 1986, or later FAA-approved revision.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this proposal who have not already received copies of the manufacturer's Service Bulletin may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124-2207. This document may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on May 27, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 86-NM-125-AD]

Airworthiness Directives; Boeing Model 747-100SR Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) which would require structural inspections and repairs or replacements, as necessary, on certain high time Boeing Model 747-100SR series airplane fuselage and nacelle struts are approaching the manufacturer's original objective fatigue design life. This AD would add the Boeing Model 747-100SR series airplanes to the "Supplemental Structural Inspection Program for Large Transport Category Airplanes" and would define structural maintenance requirements for certain identified structural components.

DATES: Comments must be received on or before July 25, 1986.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 86-NM-125-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Owen E. Schrader, Airframe Branch, ANM-120S; telephone (206) 431-2923. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the

BEST COPY AVAILABLE

proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 86-NM-125-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion: The FAA issued AD 84-21-02 on October 9, 1984, which requires the incorporation of a Supplemental Structural Inspection Document (SSID) into Boeing Model 747-100SR operators' maintenance program. This existing AD identified by serial number the candidate airplanes for the SSID program. They consisted of Boeing Model 747-100 and Model 747-200 series airplanes that had accumulated more than one-half of their design life goal. This proposed AD will add the Boeing Model 747-100SR series airplanes to the SSID program.

Because of operational procedures, the pressure-critical fuselage structure and the nacelle strut structure of a significant number of Boeing Model 747-100SR series airplanes are now approaching their design life goal. It is expected that these airplanes will continue to be operated beyond this point. The incidence of fatigue cracking of the fuselage and nacelle strut on these airplanes is expected to increase as airplanes reach and exceed their goals.

Boeing has developed Document D6-35655, approved on March 22, 1986, that identifies those airplanes exceeding 12,000 landings after January 1, 1985. A list of candidate airplane serial and line numbers is listed in Boeing Document D6-35655 for the Boeing Model 747-100SR series airplanes. The candidate list will re reviewed periodically and updated if there are significant changes in fleet distribution, composition, or utilization.

To maintain adequate fleet surveillance, each operator with candidate airplanes must provide a directed inspection program for those airplanes which meet the requirements established by this document. This AD would require directed inspection programs for those airplanes (i.e. the candidate fleet), coupled with reporting of discrepancies found and, where necessary, follow-up action, to maintain structural airworthiness in the total fleet when fatigue cracking occurs.

Information collection requirements contained in this regulation have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511) and have been assigned OMB Control Number 2120-0056.

No airplanes of U.S. registry would be affected by this AD, therefore there is no cost impact on this AD to U.S. operators.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because few, if any, Boeing Model 747-100SR airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 747-100SR series airplanes listed in section 3.0 of Boeing Document No. D6-35655 "Supplemental Structural Inspection Document" (SSID), approved March 22, 1986, certified in any category. Compliance is required as indicated in the body of the AD.

To ensure the continuing structural intergrity of these airplanes, accomplish the following, unless already accomplished:

A. Within one year after the effective date of the AD, incorporate a revision into the FAA approved maintenance inspection program which provides no less than the required damage tolerance rating (DTR) for each Structural Significant Item (SSI) listed in Boeing Document D6-35655, approved March 22, 1986, or later FAA-approved revisions. The required DTR value for each SSI is listed in the document. The revision to the maintenance program must include and be implemented in accordance with the procedures in sections 5.0 and 6.0 of the SSID.

B. Cracked structure must be repaired before further flight in accordance with an FAA approved-method.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modification required by this AD.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

E. Operators who have acceptably incorporated Boeing Document No. D6-35655, approved March 22, 1986, or later FAA-approved revisions, into their approved maintenance program are exempt from the requirements of this AD.

The FAA has requested Federal Register approval to incorporate by reference the manufacturer's Supplemental Inspection Document identified and described in this proposal.

All persons affected by this proposal who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to the Boeing Commerical Airplane Company, P.O. Box 3707, Seattle, Washington 98124-2207. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on May 27, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 20

[Docket No. 86N-0130]

Public Information; Proposed Amendment To Exempt Certain Memoranda of Understanding From Publication

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to amend its requirements concerning publication in the Federal Register of written agreements and understandings between FDA and other departments, agencies, and organizations. The proposed rule would exempt memoranda of understanding between FDA and State agencies from the requirement of publication and would require only periodic publication in the Federal Register of a listing of all such written agreements or understandings.

DATE: Comments by August 4, 1986.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Robert Tucker, Division of Federal-State Relations (HFC-152), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3380.

SUPPLEMENTARY INFORMATION: In the Federal Register of October 3, 1974 (39 FR 35697), FDA announced that all memoranda of understanding entered into by the agency would be published in the Federal Register for public review. Subsequently, FDA codified the policy at 21 CFR 4.108 (39 FR 44602, 44603; December 24, 1974), which was recodified at 21 CFR 20.108 (42 FR 15553, 15625; March 22, 1977). FDA took this action because, between 1948 and 1974, the agency had entered into many international agreements with foreign countries and numerous memoranda of understanding with other Federal Government agencies. At the time, there was widespread interest on the part of consumers, industry, professional groups, associations, educators, and other government agencies in the text of these memoranda and agreements.

Since 1974, FDA has published in the Federal Register all memoranda of understanding into which the agency has entered, including those with State agencies. Memoranda between FDA and State agencies are work-sharing agreements that are intended to avoid duplication of inspectional activities and to coordinate responses to emergencies (e.g., recalls). Rarely is there a significant difference between the memorandum of understanding FDA enters into with one State and the memorandum of understanding the agency enters into with another State. Consequently, FDA believes that little useful purpose is served by continuing to publish in the Federal Register the complete text of memorandum of understanding between FDA and State agencies. Accordingly, FDA is proposing to amend § 20.108 to provide that instead of publishing each memorandum of understanding that FDA enters into with a State agency, FDA will periodically publish in the Federal Register a notice that will list all such memoranda of understanding currently in effect. These memoranda would remain part of the public file (see 21 CFR 10.90(d)) and, such, would remain available for public review and dissemination upon request.

Comments

Interested persons may, on or before August 4, 1986, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 20

Confidential business information, Freedom of information.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, it is proposed that Part 20 be amended as follows:

PART 20—PUBLIC INFORMATION

1. The authority citation for 21 CFR Part 20 is revised to read as follows:

Authority: Sec. 201 et seq., Pub. L. 717, 52 Stat. 1040 et seq., as amended (21 U.S.C. 321 et seq.); sec. 1 et seq., Pub. L. 410, 58 Stat. 682 et seq., as amended (42 U.S.C. 201 et seq.); Pub. L. 89-23, 81 Stat. 54-56 as amended by 86 Stat. 1297-1305; 5 U.S.C. 552; 21 CFR 5.10.

2. In § 20.108 by revising paragraph (c) to read as follows:

§ 20.108 Agreements between the Food and Drug Administration and other departments, agencies, and organizations.

* * * * *

(c) All such agreements and understandings, except memoranda of understanding between FDA and State agencies, shall be published in the Federal Register. Periodically, but not less than once every 2 years, FDA shall publish a notice in the Federal Register listing all memoranda of understanding and agreements that are in effect between FDA and State agencies.

Dated: May 27, 1986.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

21 CFR Parts 182 and 186

[Docket No. 78N-0265]

Sodium Oleate and Sodium Palmitate; Tentative Affirmation of GRAS Status as Indirect Human Food Ingredients

AGENCY: Food and Drug Administration.

ACTION: Tentative final rule.

SUMMARY: The Food and Drug Admnistration (FDA) is tentatively affirming that sodium oleate and sodium palmitate are generally recognized as safe (GRAS) as indirect human food ingredients for use in paper and paperboard products used in food packaging. FDA is also tentatively affirming that sodium oleate is GRAS for use as a component of lubricants with incidental food contact. The agency has evaluated the safety of these ingredients under the comprehensive safety review conducted by the agency. FDA is publishing this document as a tentative final rule, however, because the agency has modified proposed 21 CFR 186.1770 and 186.1771 to omit specifications for sodium oleate and sodium palmitate.

DATE: Comments by August 4, 1986.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, room 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Hortense S. Macon, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In the Federal Register of January 30, 1979 (44 FR 5905), FDA published a proposal to affirm that sodium oleate and sodium

palmitate are GRAS for use in paper and paperboard products used in food packaging, and that sodium oleate is GRAS for use as a component of lubricants, with incidental food contact. FDA published the proposal in accordance with its announced review of the safety of GRAS and prior-sanctioned ingredients.

In accordance with § 170.35 (21 CFR 170.35), copies of the scientific literature review on sodium oleate and sodium palmitate and the report of the Select Committee on GRAS Substances (the Select Committee) on sodium oleate and sodium palmitate are available for public review in the Dockets Management Branch (address above). Copies of these documents have also been made available for public purchase from the National Technical Information Service, as announced in the proposal.

In addition to proposing to affirm the GRAS status of sodium oleate and sodium palmitate, FDA gave public notice that it was unaware of any prior-sanctioned uses for these substances other than the proposed conditions of use. Persons asserting additional or extended uses in accordance with approvals granted by the U.S. Department of Agriculture or FDA before September 6, 1958, were given notice to submit proof of those sanctions, so that the safety of the prior-sanctioned uses could be determined. That notice was also an opportunity to have prior-sanctioned uses of sodium oleate or sodium palmitate approved by issuance of an appropriate regulation under Part 181—Prior-Sanctioned Food Ingredients (21 CFR Part 181) or affirmed as GRAS under Part 186 (21 CFR Part 186), as appropriate.

FDA also gave notice that failure to submit proof of an applicable prior sanction in response to the proposal would constitute a waiver of the right to assert the sanction at any future time.

No reports of prior-sanctioned uses for sodium oleate or sodium palmitate were received in response to the proposal. Therefore, in accordance with that proposal, any right to assert a prior sanction for uses of these ingredients under conditions different from those set forth in the regulations has been waived.

No comments were received in response to the proposal on sodium oleate and sodium palmitate. However, in a regulation published in the Federal Register of October 19, 1983 (48 FR 48456), FDA announced that it would only include purity specifications for substances affirmed as GRAS in Part 186 for indirect use if such purity specifications were necessary based on safety considerations. In the case of sodium oleate and sodium palmitate, the agency has concluded that purity specifications are not required to ensure safety because of the extremely small exposure to sodium oleate and sodium palmitate from their use in food-packaging materials. Therefore, the agency has modified proposed §§ 186.1770 and 186.1771 by removing the specifications that were listed in those regulations. Nonetheless, under § 186.1(a) (21 CFR 186.1(a)), the ingredients must be of a purity suitable for their intended use in accordance with the provisions of 21 CFR 186.1 and 170.30(h)(1).

In addition, FDA has combined the paragraphs that described the conditions of use of these ingredients (proposed paragraphs (c) and (d)) into a single paragraph (b). This modification conforms to the amendment of § 186.1(b)(1) that FDA adopted in 1983 (48 FR 48457; October 19, 1983).

The agency has concluded that its actions not to include specifications in the regulations affirming the GRAS status of sodium oleate and sodium palmitate and to modify the paragraph on the conditions of use of these ingredients do not represent a major change from the proposed regulations. However, to afford interested persons the opportunity to comment on these actions, FDA is issuing this tentative final rule under 21 CFR 10.40(f)(6).

The agency has determined under 21 CFR 25.24(b)(7) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

In accordance with the Regulatory Flexibility Act, the agency previously considered the potential effects that this tentative final rule would have on small entities, including small businesses. In accordance with section 605(b) of the Regulatory Flexibility Act, the agency has determined that no significant impact on a substantial number of small entities would derive from this action. FDA has not received any new information or comments that would alter its previous determination.

In accordance with Executive Order 12291, FDA has previously analyzed the potential economic effects of this tentative final rule. As announced in the proposal, the agency has determined that the rule is not a major rule as determined by the Order. The agency has not received any new information or comments that would alter its previous determination.

The agency's findings of no major economic impact on a substantial number of small entities, and the evidence supporting these findings are contained in a threshold assessment which may be seen in the Dockets Management Branch (address above).

Interested persons may, on or before August 4, 1986, submit to the Dockets Management Branch (address above) written comments regarding this tentative final rule. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Recieved comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects

21 CFR Part 182

Food ingredients, Spices and flavorings.

21 CFR Part 186

Food ingredients, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Food and Safety and Applied Nutrition, Parts 182 and 186 would be amended as follows:

PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

1. The authority citation for 21 CFR Part 182 continues to read as follows:

Authority: Secs. 201(s), 402, 409, 701, 52 Stat. 1046–1047 as amended, 1055–1056 as amended, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 342, 348, 371); 21 CFR 5.10 and 5.61.

§ 182.90 [Amended]

2. In § 182.90 *Substances migrating to food from paper and paperboard products* by removing the entry for "Soap (sodium oleate, sodium palmitate)" from the list of substances.

PART 186—INDIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

3. The authority citation for 21 CFR Part 186 is revised to read as follows:

Authority: Secs. 201(s), 402, 409, 701, 52 Stat. 1046–1047 as amended, 1055–1056 as amended, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 342, 348, 371); 21 CFR 5.10 and 5.61.

4. By adding new § 186.1770 to read as follows:

§ 186.1770 Sodium oleate.

(a) Sodium oleate ($C_{18}H_{33}O_2Na$, CAS Reg. No. 143–19–1) is the sodium salt of oleic acidic (cis-9-octadecenoic-acid). It

exists as a white to yellowish powder with a slight tallow-like odor. Commercially, sodium oleate is made by mixing and heating flaked sodium hydroxide and oleic acid.

(b) In accordance with § 186.1(b)(1), the ingredient is used as a constituent of paper and paperboard used for food packaging, and a component of lubricants with incidential food contact in accordance with § 178.3570 of this chapter, with no limitation other than current good manufacturing practice.

(c) Prior sanctions for this ingredient different from the uses established in this section do not exist or have been waived.

5. By adding new § 186.1771 to read as follows:

§ 186.1771 Sodium palmitate.

(a) Sodium palmitate ($C_{16}H_{31}O_2Na$, CAS Reg. No. 408-35-5) is the sodium salt of palmitic acid (hexadecanoic acid). It exists as a white to yellow powder. Commercially, sodium palmitate is made by mixing and heating flaked sodium hydroxide and palmitic acid.

(b) In accordance with § 186.1(b)(1), the ingredient is used as a constituent of paper and paperboard for food packaging with no limitation other than current good manufacturing practice.

(c) Prior sanctions for this ingredient different from the uses established in this section do not exist or have been waived.

Dated May 15, 1986.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 86-12345 Filed 6-2-86; 8:45 am]

BILLING CODE 4160-01-M

---

21 CFR Part 201

[Docket No. 85N-0554]

Labeling Requirements for Over-the Counter Drugs; Proposed Amendment of Statement of Identity Requirements; Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Notice of Proposed rulemaking; extension of comment period.

SUMMARY: The Food and Drug Administration (FDA) is extending to July 16, 1986, the comment period for the notice of proposed rulemaking to amend the labeling requirements for over-the-counter (OTC) drugs in § 201.61(b) (21 CFR 201.61(b)). This action responds to a request to extend the comment period for an additional 30 days to allow more time for interested persons to review the proposal and to prepare meaningful comments.

DATE: Written comments by July 16, 1986.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: William E. Gilbertson, Center for Drugs and Biologics (HFN-210), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8000.

SUPPLEMENTARY INFORMATION: In the Federal Register of April 17, 1986 (51 FR 13023), FDA issued a notice of proposed rulemaking to amend the labeling requirements for OTC drugs in § 201.61(b) (21 CFR 201.61(b)), as follows: (1) To clarify that the statement of identity requirements apply to both single active ingredients and combinations of active ingredients, and (2) to state that OTC drug monographs established under Part 330 (21 CFR Part 330) are the source of the statement of identity of an OTC drug, unless otherwise stated in an approved new drug application, or unless there is no applicable monograph. Interested persons were given until June 16, 1986, to comment on the notice of proposed rulemaking.

In response to the proposal, The Proprietary Association requested a 30-day extension of the comment period in order to allow adequate time for the association to review the proposal. The Proprietary Association stated that the rulemaking is of significant interest to the OTC drug industry and that extending the comment period will allow greater participation by all those who will be affected by the proposal.

FDA has carefully considered the request. The agency believes that greater participation by those affected by the proposal is in the public interest, and may be of assistance in amending the statement of identity labeling requirements for OTC drug products. Thus, the agency considers a general extension of the comment period for 30 days to be appropriate.

Interested persons may, on or before July 16, 1986, submit to the Dockets Management Branch (address above) written comments concerning the notice of proposed rulemaking. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated May 28, 1986.

John M. Taylor,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 86-12343 Filed 5-29-86; 10:32 am]

BILLING CODE 4160-01-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[Notice No. 582]

Revision of the Boundary of the El Dorado Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: ATF is proposing to amend the approved boundary of the El Dorado viticultural area to include vineyard which was unintentionally omitted from the original petition which ATF adopted in T.D. ATF-152 (48 FR 46518). This proposal is based on a petition submitted by Mr. A.G. Boissevain, President, El Dorado Wine Grape Growers Association, Camino, California. The establishment of viticultural areas and the subsequent use of viticultural area names as appellations of origin in wine labeling and advertising will help consumers better identify wines they purchase. The use of viticultural area appellations of origin will also help wineries distinguish their products from wines made in other areas.

DATE: Written comments must be received by July 3, 1986.

ADDRESSES: Send written comments to: Chief, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, DC 20044-0385.

Copies of the petition and the written comments received in response to this notice will be available for public inspection during normal business hours at: ATF Reading Room, Room 4406, Ariel Rios Federal Building, 12th and Pennsylvania Avenue NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: James A. Hunt, Coordinator, FAA, Wine and Beer Branch, (202) 566-7626.

SUPPLEMENTARY INFORMATION: The El Dorado Wine Grape Growers Association in Camino, California, petitioned ATF for the establishment of an American viticultural area to be

named "El Dorado." The El Dorado viticultural area is located within El Dorado County, east of Sacramento, California. In response to this petition, ATF published a notice of proposed rulemaking, Notice No. 420 (47 FR 55064), in the Federal Register on December 14, 1982, proposing the establishment of El Dorado as a viticultural area. On October 13, 1983, ATF published T.D. ATF-152 (48 FR 46518) establishing the El Dorado viticultural area. On December 13, 1984, a petition was received from Mr. A.G. Boissevain, President, El Dorado Wine Grape Growers Association, to include a vineyard just outside of the western boundary of the El Dorado viticultural area. The vineyard was unintentionally omitted when the boundaries were established along Range and Township lines rather than along a more complicated contour line of 1200 foot elevation. Mr. Boissevain stated that the petitioned for area has the same name identification, topography, soil types, amount of rainfall, elevation and temperatures as found in the El Dorado viticultural area and would be distinguished from the surrounding area.

Public Participation—Written Comments

Based on the above discussion, ATF is issuing this notice of proposed rulemaking to request comments concerning this proposed revision of the El Dorado viticultural area boundary.

ATF will not recognize any material or comments as confidential. Comments may be disclosed to the public. Any material which the respondent considers to be confidential or inappropriate for disclosure to the public should not be included in the comment. The name of any person submitting a comment is not exempt from disclosure.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this proposal because the notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities. The proposal will not impose, or otherwise cause, a significant increase in reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The proposal is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

In compliance with Executive Order 12291, 46 FR 13193 (1981), ATF has determined that this final rule is not a "major rule" since it will not result in:

(a) An annual effect on the economy of $100 million or more;

(b) A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or

(c) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Pub. L. 96-511, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR Part 1320, do not apply to this notice because no requirement to collect information is proposed.

The principal author of this document is James A. Hunt, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

Authority and Issuance

PART 9—[AMENDED]

27 CFR Part 9—American Viticultural Areas—is amended as follows:

Paragraph 1. The authority citation for Part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

Para. 2. Section 9.61(c) is amended by revising paragraph (12), designating existing paragraphs (13) through (15) as (17) through (19) respectively, and adding new paragraphs (13) through (16), to read as follows:

§9.61 El Dorado.

* * * * *

(c) * * *

(12) Thence north along the range line to its intersection with U.S. Route 50;

(13) Thence west along U.S. Route 50 to its intersection with Cameron Park Drive;

(14) Thence north along Cameron Park Drive to its intersection with Green Valley Road;

(15) Thence east along Green Valley Road to its intersection with range line R. 10 E./ R. 9 E.;

(16) Thence north along the range line to its intersection with the township line T. 10. N./ T. 11 N.;

* * * * *

27 CFR Part 9

[Notice No. 593]

Bell Mountain Viticultural Area, Texas; Consideration of Establishment

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Department of the Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF) is considering the establishment of a viticultural area in Texas to be known as "Bell Mountain." This proposal is the result of a petition submitted by Mr. Robert P. Oberhelman, a grape grower in the proposed area. The establishment of viticultural areas and the subsequent use of viticultural area names as appellations of origin in wine labeling and advertising will enable winemakers to label wines more precisely and will help consumers to better identify the wines they purchase.

Comment date: Written comments must be received by July 18, 1986.

ADDRESSES: Send written comments to: Chief, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, DC 20044-0385 (Notice No. 593).

Copies of the petition, the proposed regulations, the appropriate map, and the written comments will be available for public inspection during normal business hours at: ATF Reading Room, Office of Public Affairs and Disclosure, Room 4408, Ariel Rios Federal Building, 1200 Pennsylvania Avenue NW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Steve Simon, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, 1200 Pennsylvania Avenue NW, Washington, DC 20226 (202-566-7626).

SUPPLEMENTARY INFORMATION:

Background

ATF regulations in 27 CFR Part 4 provide for the establishment of definite viticultural areas. The regulations also allow the name of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements.

Part 9 of 27 CFR provides for the listing of approved American viticultural areas, the names of which may be used as appellations of origin.

Section 4.25a(e)(1), Title 27 CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features. Section 4.25a(e)(2) outlines the procedures for proposing an American viticultural area. Any interested person may petition ATF to establish a grape growing region as a viticultural area. The petition should include—

(a) Evidence that the name of the proposed viticultural area is locally and/or nationally known as referring to the area specified in the petition;

(b) Historical or current evidence that the boundaries of the viticultural area are as specified in the petition;

(c) Evidence relating to the geographical features (climate, soil, elevation, physical features, etc.) which distinguish the viticultural features of the proposed area from surrounding areas;

(d) A description of the specific boundaries of the viticultural area, based on features which can be found on United States Geological Survey (U.S.G.S.) maps of the largest applicable scale; and

(e) A copy of the appropriate U.S.G.S. map(s) with the boundaries prominently marked.

Petition

ATF has received a petition from Mr. Robert P. Oberhelman, president of Oberhellmann Vineyards, proposing an area in Gillespie County, Texas, as a viticultural area to be known as "Bell Mountain." The proposed area contains about 5 square miles and is located along the southern and southwestern slopes of Bell Mountain, about 15 miles north of Fredericksburg, Texas. The petitioner states that the area's winegrape acreage consists of about 45 acres on two vineyards. There is one bonded winery operating within the area.

Name of the Area

The petitioner claims that the proposed viticultural area is known by the name of "Bell Mountain." To support this, he submitted the following evidence:

(a) Bell Mountain, which at 1,956 feet is the highest elevation in the local area, was first given this name by early settlers of the area in the mid nineteenth century.

(b) The mountain has been labeled with this name on maps of the U.S. Geological Service since the first such map published for the area in 1885.

Geography of the Area

The proposed viticultural area is distinguished geographically from the surrounding areas as follows:

(a) To the north and northeast, the area is distinguished by the steepness of the mountain slopes outside the boundaries of the area. Further, soil conditions outside the area preclude viticulture on those other slopes of Bell Mountain. The petition states: "The granite protrudes through the ground surface profusely on the Peak's northern slope, therefore making tillage impossible. For this reason, only the slopes to the south and southwest are included in the boundary of the proposed Viticultural Area."

(b) In other directions, the viticultural area is distinguished by soil types and by the topographical limits of the slopes of Bell Mountain. With respect to soil, the petition states as follows:

The soils within the boundaries of the proposed Viticultural Area are identified on the map as "pp-Pedernales-Ponototoc Association". The description reads "Non-Calcareous, sandy, loam soils, with light sandy clay subsoil. Udic Palenstalfs; Typic Rhodustalfs". These soils are unique in the general area referred to as the "Hill Country" or the Edwards Plateau in that they are slightly acid, whereas most of the soils are calcareous, or lime-bearing.

In support of his contention, the petitioner submitted a copy of a soil map from the book, *Eastern Hill Country Resource Conservation & Development Project*, published by the U.S. Department of Agriculture in 1968. This map shows that the proposed viticultural area boundaries correspond approximately to the limits of the area with soils of the pedernales-pontotoc association. This is the only occurrence of these soils shown anywhere on that map.

(c) In addition, the petition states that "The area is drier than the Pedernales valley to its south and the Llano valley to its north. It is also cooler due to its elevation, and constant breezes."

Boundaries of the Area

The boundaries of the proposed viticultural area may be found on one U.S.G.S. map of the 7.5 minute series, titled Willow City Quadrangle. The boundaries would be as described in the proposed § 9.55.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this proposal because the notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities. The proposal is not expected to have significant secondary or incidental effects on a substantial number of small entities. Further, the proposal will not impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of Section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

In compliance with Executive Order 12291 of Feb. 17, 1981, the Bureau has determined that this proposal is not a major rule since it will not result in:

(a) An annual effect on the economy of $100 million or more;

(b) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographical regions; or

(c) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domesic or export markets.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Pub. L. 96-511, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR Part 1320, do not apply to this notice, because no requirement to collect information is proposed.

Public Participation—Written Comments

ATF requests comments concerning this proposed viticultural area from all interested persons. Furthermore, while this document proposes possible boundaries for the Bell Mountain viticultural area, comments concerning other possible boundaries for this viticultural area will be given consideration.

Comments received before the closing date will be carefully considered. Comments received after the closing date and too late for consideration will be treated as suggestions for possible future ATF action.

ATF will not recognize any material or comments as confidential. Comments may be disclosed to the public. Any material which the commenter considers to be confidential or inappropriate for disclosure to the public should not be included in the comment. The name of the person submitting a comment is not exempt from disclosure.

Any person who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his or her request, in writing, to the Director within the 45-day comment period. The request should include reasons why the commenter feels that a public hearing is necessary. The Director, however, reserves the right to determine, in light of all circumstances, whether a public hearing will be held.

List of Subjects in 27 CFR Part 9

Administrative practice and procedures, Consumer protection, Viticultural areas, Wine.

Drafting Information

The principal author of this document is Mr. Steve Simon of the FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

Issuance

PART 9—AMERICAN VITICULTURAL AREAS

Accordingly, the Director proposes the amendment of 27 CFR Part 9 as follows:

Paragraph A. The authority citation for Part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

Par. B. The table of sections in 27 CFR Part 9, Subpart C, is amended to add the title of of § 9.55, to read as follows:

* * * * *

Subpart C—Approved American Viticultural Areas

Sec.

* * * * *

9.55 Bell Mountain.

* * * * *

Par. C. Subpart C of 27 CFR Part 9 is amended by adding § 9.55, which reads as follows:

§ 9.55 Bell Mountain.

(a) *Name.* The name of the viticultural area described in this section is "Bell Mountain."

(b) *Approved maps.* The appropriate map for determining the boundaries of the Bell Mountain viticultural area is one U.S.G.S. map, titled: Willow City Quadrangle, 7.5 minute series, 1987.

(c) *Boundary*—(1) *General.* The Bell Mountain viticultural area is located in Gillespie County, Texas. The starting point of the following boundary description is the summit of Bell Mountain (1,958 feet).

(2) *Boundary Description*—(i) From the starting point, the boundary proceeds due southward for exactly one half mile;

(ii) Then southeastward in a straight line to the intersection of Willow City Loop Road with an unnamed unimproved road, where marked with an elevation of 1,773 feet;

(iii) Then generally southward along Willow City Loop Road (a light-duty road) to Willow City.

(iv) Then continuing southward and westward along the same light-duty road to the intersection having an elevation of 1,864 feet;

(v) Then continuing westward along the light-duty road to the intersection having an elevation of 1,702 feet;

(vi) Then turning southward along the light-duty road to the intersection having an elevation of 1,736 feet;

(vii) Then turning westward along the light-duty road to the intersection having an elevation of 1,784 feet;

(viii) Then turning southward and then westward, following the light-duty road to its intersection with Texas Highway 16, where marked with an elevation of 1,792 feet;

(ix) Then due westward to the longitude line 98° 45';

(x) Then northward along that longitude line to a point due west of an unnamed peak with an elevation of 1,784 feet;

(xi) Then due eastward to the summit of that unnamed peak;

(xii) Then in a straight line eastward to the intersection of an unnamed unimproved road with Texas Highway 16, where marked with an elevation of 1,522 feet;

(xiii) Then following that unnamed road, taking the right-hand fork at an intersection, to a point due west of the summit of Bell Mountain;

(xiv) Then due eastward to the summit of Bell Mountain.

Approved: May 19, 1986.

Stephen E. Higgins,

Director.

BILLING CODE 4810-31-M

27 CFR Part 9

[Notice No. 556]

Revision of the Boundary of the Monticello Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: ATF is proposing to amend the approved boundary of the Monticello viticultural area to include vineyards which were omitted from the original petition which ATF adopted in T.D. ATF-184 (49 FR 2737). This proposal is based on a petition submitted by Edward W. Schwab, Autumn Hill Vineyards, located in Stanardsville, Virginia. The establishment of viticultural areas and the subsequent use of viticultural area names as appellations of origin in wine labeling and advertising will help consumers better identify wines they purchase. The use of viticultural area appellations of origin will also help wineries distinguish their products from wines made in other areas.

DATE: Written comments must be received by July 3, 1986.

ADDRESSES: Send written comments to: Chief, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, DC 20044-0385.

Copies of the petition and the written comments received in response to this notice will be available for public inspection during normal business hours at: ATF Reading Room, Room 4408, Ariel Rios Federal Building, 12th and Pennsylvania Avenue, NW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: James A. Hunt, Coordinator, FAA, Wine and Beer Branch, (202) 566-7626.

SUPPLEMENTARY INFORMATION: Six wine grape growers in the Charlottesville area of Virginia first petitioned ATF to establish a viticultural area to be known as "Monticello." In response to the petition, AFT published a notice of proposed rulemaking, Notice No. 309 (46 FR 59274), on December 4, 1981, to establish a viticultural area in the Charlottesville, Virginia, area to be known as "Monticello." During the comment period The Jefferson Wine Grape Growers Society petitioned for an enlargement of the Monticello viticultural area boundary. ATF published an amended notice of proposed rulemaking, Notice No. 434 (47 FR 52200), on November 19, 1982. All the comments received favored the enlarged

boundary for the Monticello viticultural area.

On January 22, 1984, ATF published T.D. ATF-164 (49 FR 2757) establishing the Monticello viticultural area. On November 8, 1984, a petition was received from Mr. Edward W. Schwab, Managing Partner, Autumn Hill Vineyards, to include Greene County in the Monticello viticultural area. Mr. Schwab said he became aware of the Monticello viticultural area after it was established and he was not aware of the rulemaking process that had taken place.

Greene County is a small county which borders the northern boundary of the Monticello viticultural area. Mr. Schwab submitted a statement and evidence from the Virginia Cooperative Extension Service Agriculture Extension Agent that the petitioned for area has essentially the same topography, soil types, amount of rainfall, elevation and temperatures as found in the bordering Monticello viticultural area. Mr. Schwab amended his petition to exclude a mountainous area in the western part of Greene County so that the revised area would be even more similar to the existing Monticello viticultural area.

The existing Monticello viticultural area is approximately 1260 square miles and therefore extends many miles from its name sake and home of Thomas Jefferson in Charlottesville, Virginia. The evidence during the rulemaking process established that the Monticello name extends throughout Central Virginia, to include Albemarle, Orange, Nelson and Greene Counties, because of Thomas Jefferson's dominant influence in the region. Historical publications have numerous references to Jefferson leasing farm land throughout Central Virginia to expand his Monticello acreage. Other references list Monticello as the primary source of crop experimentation data and planting material (including grapevines) used to start new farms in Central Virginia.

One current example which shows that the name identification extended several miles to the north of Monticello to Orange and Greene Counties is a mansion similar in appearance to Monticello which Jefferson designed for his friend, James Barbour. The mansion burned in 1884, but all the brick structure and columns remain making the structure easily identified with Monticello. This mansion, the Barboursville Ruins, is now a historical landmark and tourist attraction. The eastern boundary of the proposed amended viticultural area revision is near the Barboursville Ruins.

Public Participation—Written Comments

Based on the above discussion, ATF is issuing this notice of proposed rulemaking to request comments concerning this proposed revision of the Monticello viticultural area boundary.

ATF will not recognize any material or comments as confidential. Comments may be disclosed to the public. Any material which the respondent considers to be confidential or inappropriate for disclosure to the public should not be included in the comment. The name of any person submitting a comment is not exempt from disclosure.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this proposal because the notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities. The proposal will not impose, or otherwise cause, a significant increase in reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The proposal is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

In compliance with Executive Order 12291, 46 FR 13193 (1981), ATF has determined that this final rule is not a "major rule" since it will not result in:

(a) An annual effect on the economy of $100 million or more;

(b) A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or

(c) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Pub. L. 96-511, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR 1320, do not apply to this notice because no requirement to collect information is proposed.

List of Subjects in 27 CFR Part 9

Administrative practice and procedures, Consumer protection, Viticultural areas, Wine.

Drafting Information

The principal author of this document is James A. Hunt, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

Authority and Issuance

PART 9—[AMENDED]

27 CFR Part 9—American Viticultural Areas is amended as follows:

Paragraph 1. The authority citation for Part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

Par. 2. Section 9.46(c) is revised to add the amended boundaries and by adding numbers to the descriptions to read as follows:

§ 9.46 Monticello.

* * * * *

(c) Boundaries. (1) From Norwood, Virginia, following the Tye River west and northwest until it intersects with the eastern boundary of the George Washington National Forest; (2) following this boundary northeast to Virginia Rt. 664; (3) then west following Rt. 664 to its intersection with the Nelson County line; (4) then northeast along the Nelson County line to its intersection with the Albemarle County line at Jarman Gap; (5) from this point continuing northeast along the eastern boundary of the Shenandoah National Park to its intersection with the northern Albemarle County line; (6) continuing northeast along the Greene County line to its intersection with Virginia Rt. 33; (7) follow Virginia Rt. 33 east to the intersection of Virginia Rt. 230 at Stanardsville; (8) follow Virginia Rt. 230 north to the Greene County line (the Conway River); (9) following the county line southeast to its intersection with the Orange County line, (10) continuing north on the county line to its intersection with the Rapidan River, whic continues as the Orange County line; (11) following the river east and northeast to its confluence with the Mountain Run River; (12) then following the Mountain Run River southwest to its intersection with Virginia Rt. 20; (13) continuing southwest along Rt. 20 to the corporate limits of the town of Orange; (14) following southwest the corporate limit line to its intersection with U.S. Rt. 15; (15) continuing southwest on Rt. 15 to its intersection with Virginia Rt. 231 in

the town of Cordonsville; (16) then southwest along Rt. 231 to its intersection with the Albemarle County line; (17) continuing southwest along the the county line to its intersection with the James River; (18) then following the James River to its confluence with the Tye River at Norwood, Virginia, the beginning point.

Signed: May 27, 1986.

BILLING CODE 4310-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 901

Withdrawal of a Proposed Rulemaking To Amend the Alabama Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Withdrawn of a Proposed rule.

SUMMARY: OSMRE is announcing the withdrawal of a proposed rulemaking for an amendment submitted by the State of Alabama to amend its permanent regulatory program (hereinafter referred to as the Alabama program). The proposed amendment concerned requirements for operations extracting coal incidental to extraction of other minerals (Sub-chapter 880-X-2E of the Alabama Surface Mining Commission regulations). The proposed amendment was withdrawal by the State in a letter to OSMRE dated May 7, 1986.

DATE: This withdrawal is effective June 3, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. John T. Davis, Director, Birmingham Field Office, Office of Surface Mining Reclamation and Enforcement, 228 West Valley Avenue, 3rd Floor, Homewood, Alabama 35209; Telephone: (205) 731-0890.

SUPPLEMENTARY INFORMATION: On December 30, 1985, Alabama submitted a proposed amendment to its approved regulatory program to modify requirements for operations extracting coal incidental to extraction of other minerals (Sub-chapter 880-X-2E of the Alabama Surface Mining Commission rules). The proposed rules outlined the information requirements necessary for such extraction, and criteria to be used by the Alabama Surface Mining Commission (ASMC) to determine the eligibility of the proposed operation for exemption from regulatory requirements for surface coal mining operations under the Alabama program. The proposed rules replaced rules previously approved by OSMRE (July 19, 1985, 50 FR 29379).

On January 30, 1986, OSMRE published a notice in the Federal Register announcing receipt of the amendment and soliciting public comment on its adequacy. The comment period ended on March 3, 1986.

On May 7, 1986, Alabama submitted a copy of Alabama Senate Bill 445, Act 86-108, which had been passed by the Alabama Legislature and which in part repealed rule 880-X-2E. In a letter which accompanied the Senate Bill, Alabama therefore withdrew the proposed amendment at ASMC 880-X-2E.

Dated: May 28, 1986.

H. Leonard Richcreek,

Acting Assistant Director, Program Operations.

[FR Doc. 86-12371 Filed 6-2-86; 8:45 am]

BILLING CODE 4310-05-M

National Park Service

36 CFR Parts 1 and 3

Permit Requirements; Penalty Provisions

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: This proposed rulemaking clarifies the penalty provisions of the three general regulations used by the National Park Service as basic authorities to issue and require permits for members of the public to engage in certain activities. These provisions were inadvertently omitted when the regulations were originally promulgated in 1983. Experience since that time has shown that these clarifications are necessary in order to outline the mandatory aspects of permit systems established and used by park managers to manage visitor use activities in park areas. This rulemaking is a clarification only and does not impose new restrictions or requirements.

DATE: Written comments will be accepted until July 3, 1986.

ADDRESS: Comments should be addressed to: Associate Director, Park Operations, National Park Service, P.O. Box 37127, Washington, DC 20013-7127.

FOR FURTHER INFORMATION CONTACT: Andy Ringgold, National Park Service, Branch of Ranger Activities, P.O. Box 37127, Washington, DC 20013-7127, Telephone: 202-343-1360.

SUPPLEMENTARY INFORMATION:

Background

On June 30, 1983, the National Park Service (NPS) published a major revision of its general regulations in Title 36 of the Code of Federal Regulations that pertain to resource protection, public use and recreation (48 FR 30252). One of these regulations, § 1.6, provides the general procedures and criteria under which NPS permits are issued. Another, § 1.5, sets forth the basic authority for park managers to establish permit systems in order to implement public use limits. A third general regulation, § 3.3, authorizes the superintendent to issue permits to manage boating activities within a park area.

These three regulations all contain provisions that address a superintendent's authority to issue permits and/or to establish permit conditions; other provisions prohibit violating the terms and conditions of a permit. Both §§ 1.5 and 3.3 make reference to the permit criteria and procedures of § 1.6. However, none of these sections contains text that clearly indicates that, if a permit is required by a superintendent in order for a person to engage in a certain activity, failure to obtain a permit prior to engaging in that activity constitutes a violation of the regulation by that individual.

The original intent of the NPS was that such a provision was understood as being inherent in the fact that the superintendent was authorized to require a permit. However, in the period since the effective date of these regulations, questions raised by members of the public, NPS employees and some U.S. Magistrates have indicated that this intention was not clear and that clarifying text is necessary.

This rulemaking proposes to clarify NPS permit requirements by consolidating all the general procedural and regulatory provisions pertaining to NPS permit systms and authorities found in these three sections in section 1.6 and deleting duplicative provisions from §§ 1.5 and 3.3. A provision emphasizing the mandatory nature of permit requirements has been added to section 1.6. Clarifying text has also been added to § 1.6(c) that indicates that terms and conditions of a permit may derive not only from the criteria presently specified in that paragraph but also from criteria and restrictions that exist in other regulations.

These proposed changes do not add new obligations or impose new restrictions. The intent of this

rulemaking is solely one of clarification. A minor technical change is also included in this rulemaking to revise the authority citation in 36 CFR Part 3 to reflect the statutory authority found in 16 U.S.C. 1a–2(h) that authorizes the NPS to regulate boating activities in park areas.

Public Participation

The policy of the National Park Service is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments regarding this proposed regulation to the address noted at the beginning of this rulemaking.

Drafting Information

The author of this rulemaking is Andy Ringgold of the NPS Branch of Ranger Activities, Washington, DC.

Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

Compliance with Other Laws

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 (February 19, 1981), 46 FR 13193, and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). These determinations are based on the fact that this rulemaking is a clarification only and has no economic effect.

The National Park Service has determined that this proposed rulemaking will not have a significant effect on the quality of the human environment, health and safety because it is not expected to:

(a) Increase pubic use to the extent of compromising the nature and character of the area or causing physical damage to it;

(b) Introduce noncompatible uses which might compromise the nature and characteristics of the area, or cause physical damage to it;

(c) Conflict with adjacent ownerships or land uses; or

(d) Cause a nuisance to adjacent owners or occupants.

Based on this determination, this proposed rulemaking is categorically excluded from the procedural requirements of the National Environmental Policy Act (NEPA) by Departmental regulations in 516 DM 6, (49 FR 21438). As such, neither an Environmental Assessment nor an Environmental Impact Statement has been prepared.

List of Subjects

36 CFR Part 1

National parks, Penalties.

36 CFR Part 3

Marine safety, National parks.

In consideration of the foregoing, it is proposed to amend 36 CFR Chapter I as follows:

PART 1—GENERAL PROVISIONS

1. The authority citation for Part 1 continues to read as follows:

Authority: 16 U.S.C. 1, 3, 9a, 460*l*–6a(e), 462(k).

2. By revising paragraph (f) § 1.5 to read as follows:

§ 1.5 Closures and public use limits.

* * * * *

(f) Violating a closure, designation, use or activity restriction or condition, schedule of visiting hours, or public use limit is prohibited.

3. By revising § 1.6(e), (g) and (h) to read as follows:

§ 1.6 Permits.

* * * * *

(e) The superintendent shall include in a permit the terms and conditions that the superintendent deems necessary to protect park resources or public safety and may also include terms or conditions established pursuant to the authority of any other section of this chapter.

* * * * *

(g) The following are prohibited:

(1) Engaging in an activity subject to a permit requirement imposed pursuant to this section without obtaining a permit; or

(2) Violating a term or condition of a permit issued pursuant to this section.

(h) Violating a term or condition of a permit issued pursuant to this section may also result in the suspension or revocation of the permit by the superintendent.

PART 3—BOATING AND WATER USE ACTIVITIES

4. The authority citation for Part 3 is revised to read as follows:

Authority: 16 U.S.C. 1, 1a-2(h), 3.

5. By revising § 3.3 to read as follows:

§ 3.3 Permits.

The superintendent may require a permit for use of a vessel within a park area in accordance with the criteria and procedures of § 1.6 of this chapter.

Dated: May 3, 1986.

Daniel Smith,

Deputy Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310-70-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR 261

[SW-FRL-3024-8]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comment.

SUMMARY: The Environmental Protection Agency (EPA) is today proposing to amend the regulations for hazardous waste management under the Resource Conservation and Recovery Act (RCRA) by designating as hazardous waste (rather than acute hazardous waste) the scrubber water generated by EPA's Combustion Research Facility (CRF) located in Jefferson, Arkansas as a result of burning certain dioxin-containing wastes. The Agency further proposes to re-designate all scrubber water that will be generated from burning listed dioxin-containing wastes at this facility from acute hazardous waste (H) to hazardous waste (T) based upon the testing conditions specified elsewhere in this notice. This action is in response to a petition submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of Parts 260 through 265, 124, 270, and 271 of Title 40 of the Code of Federal Regulations, and 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator on a "generator-specific basis". The effect of this action, if promulgated, would be to allow CFR to manage their waste in accordance with the waste management standards contained in 40 CFR Parts 264 and 265 allowed for all other hazardous wastes.

DATES: EPA will accept public comments on this proposed exclusion until July 3, 1986. Comments postmarked after the close of the comment period will be stamped "late".

Any person may request a hearing on this proposed exclusion by filing a request with Eileen B. Claussen, whose address appears below, by June 18, 1986. The request must contain the information prescribed in 40 CFR 260.20(d).

ADDRESSES: Comments should be sent to the Docket Clerk, Office of Solid Waste (WH-562), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Requests for a hearing should be addressed to Eileen B. Claussen, Director, Characterization and Assessment Division, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Communications should identify the regulatory docket number: "F-86-CRFP-FFFFF".

The public docket for this proposed rule is located in the Sub-basement, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, and is available for viewing from 9:30 a.m. to 3:30 p.m., Monday through Friday, excluding Federal holidays. Call Mia Zmud at (202) 475-9327 of Kate Blow (202) 382-4675 for appointments. The public may copy a maximum of 50 pages of material from any one regulatory docket at no cost. Additional copies cost $.20 per page.

FOR FURTHER INFORMATION CONTACT: RCRA Hotline, toll free at (800) 424-9346, or at (202) 382-3000. For technical information, contact Dr. Doreen Sterling, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 475-8551.

SUPPLEMENTARY INFORMATION:

Background

On January 14, 1985, EPA published a final rule ("the dioxin rule") designating as acute hazardous waste, certain wastes containing tetra-, penta-, and hexachlorinated dibenzo-p-dioxins (CDDs), -dibenzofurans (CDFs), and certain chlorinated phenols (See 50 *FR*, 1978-2006). These regulations also specified certain management standards for these wastes. For incineration, the regulations specify that these wastes must be managed at fully permitted incinerators that have been certified by the Assistant Administrator for Solid Waste and Emergency Response to achieve 99.9999% (six 9s) destruction and removal efficiency (DRE) for the CDDs and CDFs or for principal organic hazardous constituent(s) (POHCs) which are as difficult or more difficult or more difficult to incinerate than the CDDs and CDFs.

Under 40 CFR 261.3(c)(2)(i), any residue derived from the treatment of a hazardous waste is a hazardous waste unless otherwise designated, or delisted under the provisions of 40 CFR 260.20 and 260.22. EPA has interpreted this to mean that the residues resulting from the incineration of listed acute hazardous waste (*i.e.*, dioxin wastes) are still acute hazardous wastes, unless otherwise designated or delisted. (In the dioxin regulation, the Agency designated the residues resulting from six 9's incineration or thermal treatment of dioxin-contaminated soils as toxid wastes (EPA Hazardous Waste No. F028). This waste therfore can be managed at interim status facilities and at fully permitted facilities not required to meet the special standards for other listed dioxin-containing wastes.)

Therefore, the wastes covered by the "dioxin rule" (except as otherwise indicated) are considered to be acute hazardous wastes because of the presence of the CDDs/CDFs. The Agency recognizes that an individual facility may demonstrate through representative sampling and analysis that the waste does not contain CDDs/CDFs at concentrations that would cause the waste to be designated as an acute hazardouse waste. The consequence of this reclassification would be that such wastes would not be subject to the more stringent management requirement for fully permitted facilities mandated by the "dioxin rule", and also can be managed at interim status facilities. This is because the Agency would be determining that the CDDs and CDFs in such wastes can be managed so as to protect human health and the environment without extraordinary precautions required for acute hazardous waste containing much higher concentrations of CDDs and CDFs.

Petitioner

The proposed re-designation published today involves EPA's Combustion Research Facility (CFR) located in Jefferson, Arkansas.

I. Combustion Research Facility

A. Petition for Exclusion

The Environmental Protection Agency, Combustion Research Facility (CRF), located in Jefferson, Arkansas, is a research facility involved in studying the feasibility of incineration of hazardous waste. Most of the waste that CRF is currently evaluating is from clean up operations at Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) sites. One of the wastes incinerated by CRF was toluene still bottoms from 2,4,5-trichlorophenol (2,4,5-TCP) production previously generated at the Vertac Chemical Company site in Jacksonville, Arkansas (referred to as the "Vertac Waste"). The CRF has petitioned the Agency to re-designate the scrubber water that has resulted from the incineration of the "Vertac" Waste from acute hazardous waste (H) to toxic waste (T). This waste is listed as EPA Hazardous Waste No. F020—Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tri- or tetrachlorophenol, or of intermediates used to produce their pesticide derivatives. The scrubber water is currently designated as an acute hazardous waste because of the presence of CDDs and CDFs and, as such, the waste is subject to more stringent management standards. CRF claims, however, that the scrubber water does not contain the CDDS/CDFs at levels of regulatory concern (although the waste may still be hazardous because it may still exhibit the characteristics of a hazardous waste or contain other toxicants at levels of regulatory concern). CFR has further petitioned the Agency to re-designate from acute hazardous waste (H) to toxic waste (T) all scrubber water generated by this incinerator when burning the listed dioxin-containing wastes based on a testing requirement for CDDs/CDFS. (It should be noted that this petition does not cover any ash, filters, or any other solid residues generated by this incinerator.)

In support of their petition, CFR has submitted: a detailed description of their incinerator, including schematic diagrams, an engineering description, and the incinerator operating conditions; a general characterization of the "Vertac" waste that was incinerated; and analytical test results on CDD/CDF concentrations in the scrubber water generated from burning the "Vertac waste" after carbon filtration.

Description of the Incinerator. The rotary kiln incineration system at CRF consists of a rotary kiln primary combustion chamber, a fired afterburner, and a primary air pollution control system consisting of a quench elbow and venturi scrubber followed by a packed tower scrubber. In addition, a back up air pollution control system consisting of a carbon-bed absorber and a High Efficiency Particulate Air Pollution Control Device (HEPA) filter is in place. Scrubber blowdown also

passes through a carbon filter before storage in the blowdown tanks.

During this test burn, the operating temperature was maintained at 1800°F for the kiln and 2030°F for the afterburner. The calculated residence time in the kiln main chamber ranged between 4.9 to 6.0 seconds, while the residence time in the afterburner ranged from 1.8 to 2.3 seconds.

For these tests, waste was introduced at the feed face through the front face line with a Moyno pump at a mean feed rate of 22 lb. per hour for burn 1 and 30 lb. per hour for burn 2. Auxiliary fuel (propane) was fired through a burner located at the transfer duct end of the kiln. The afterburner was also fired with auxiliary fuel.

7000 gallons of filtered blowdown water, generated from the incineration of the "Vertac" waste, is currently contained in the blowdown tanks. It is this water which is the subject of this notice. In addition, CRF is also requesting a re-designation of all scrubber water generated by this incinerator during subsequent research burns of the listed dioxin-containing wastes provided the scrubber water meets certain testing requirements.

Description of the Waste. The approximate composition of the 2,4,5-TCP/toluene still bottoms (the "Vertac" waste) contaminated with CDDs/CDFs that was incinerated by CRF is presented in Table 1. This waste was reported to contain approximately 40 ppm of 2,3,7,8-TCDD.

TABLE 1.—*Estimated Composition of Stillbottoms*

Compound	Composition (percent)
Methanol	1
Toluene	5
Dichlorobenzenes	1.5
Trichlorobenzenes	1.5
2,4,5-Trichlorophenate	38
Na-Trichlorophenol	7
Dichlorodimethoxy-benzene	18
2,4,5-T, Na salt	7

Sampling and Analysis. The total volume of water generated during the incineration of the "Vertac Waste" is stored in two holding tanks. (4,000 gallons in one tank and 3,000 gallons in the other tank.) The tanks were sampled after completion of the entire burn series. Eight composite samples were taken. For each composite, 60% was obtained from the larger tank while 40% of the sample was obtained from the smaller tank, thus representing a weighted average (*i.e.*, 4,000/7,000=60% 3,000/7,000=40%). Both tanks were sampled by Dipper Method (See SW-846, Test Methods for Evaluating Hazardous Wastes, July, 1982) from the top of the tank while the water was recirculated (duration about 20 hrs.) at 53 gal/min. Four of the samples were analyzed for CDDS/CDFs by High Resolution Gas Chromatography/High Resolution Mass Spectrometry (HRGC/HRMS). The other four samples remained on site as archives. The results of their analyses are presented in Table 2.

TABLE 2.—*Maximum Concentrations of CDDs/CDFs*

Isomer/homolog	Concentration pg/ml (ppt) [1] [2]
2,3,7,8-TCDD	0.12
TetraCDD (TCDD)	0.12
PentaCDD (PCDD)	(0.012)
HexaCDD (HxCDD)	(0.020)
2,3,7,8-TCDF	(0.011)
TetraCDF (TCDF)	0.23
PentaCDF (PCDF)	0.015
HexaCDF (HxCDF)	(0.009)

[1] Numbers in parentheses are detection limits.
[2] Data was also reported on the hepta- and octa- isomers; these data were not included in this table since these homologs are not covered by the original listing. In addition, since these isomers are not on Appendix VIII of Part 261 (i.e. the list of hazardous constituents identified by the Agency), we have not included them in our evaluation.

B. Agency Analysis and Action

The CRF has demonstrated through analysis of representative samples that the 7000 gallons of scrubber water, generated during the incineration of the "VERTAC waste", is not an acute hazardous waste. The Agency believes that the grab samples collected from the two blowdown tanks are biased and adequately represent any variations which may occur in the waste. The Agency is satisfied that the grab samples do not mask any possible variability in the waste because: (1) the tanks contained the entire volume of water generated during the Vertac burns, (2) the tanks were sampled after completion of the burns, and (3) the tanks were well mixed prior to and during sampling.

The Agency has evaluated the analytical data provided by CRF on the CDD/CDF homologs. The Agency has used the hazard evaluation procedure developed by the Agency's Chlorinated Dioxins Workgroup (CDWG) to assess the risks associated with exposure to the CDDs and CDFs in these residues.[1] The procedure, which involves the evaluation of the toxicity of a mixture of CDDs and CDFs by estimation of 2,3,7,8-TCDD equivalents, is based on structure-activity relationships using their carcinogenic, reproductive, and biochemical effects. 2,3,7,8-TCDD equivalents are calculated by summing the products of the concentration of each homolog and its toxic equivalents (TEF). The product is the 2,3,7,8-TCDD equivalent for each homolog; the sum of the products is the 2,3,7,8-TCDD equivalent concentration of the mixture. The 2,3,7,8-TCDD equivalents estimate for the wastewater is given in Table 3. (As is the Office of Solid Waste's (OSW) practice, the detection limit is used as the possible upper limit of exposure for purposes of hazard evaluation when a constituent is not detected.)

TABLE 3.—CALCULATION OF TOXIC EQUIVALENCE FACTOR (TEF)

Homolog	Maximum reported concentration, ppt [1]	TEF	TCDD equivalents
TCDD	0.12	1	0.1
PCDD	(0.012)	0.5	0.006
HxCDD	(0.02)	0.04	0.008
TCDF	0.23	0.1	0.02
PCDF	0.01	0.1	0.001
HxCDF	(0.01)	0.01	0001
Total			0.1 ppt

[1] Numbers in parentheses indicate detection limits.

The Agency believes that this waste can safely be managed as a hazardous (T) waste without the special management controls required for an acute hazardous waste due to the low level of 0.1 ppt TCDD equivalents in the scrubber water. EPA determined that special controls were needed for certain of the listed dioxin-containing wastes in light of the high concentrations of CDDs and CDFs found in the wastes before treatment (50 FR 1965). When these concentrations are greatly reduced by treatment, as in CFR's waste, the residual waste presents much less risk and can be safely managed in the same manner as other hazardous wastes (Id. at 1995). The Agency already has acknowledged that less stringent standards are appropriate for less contaminated, dioxin-containing wastes. In particular, the "dioxin rule", promulgated on January 14, 1985 (see 50 *FR* 1978–2006), designated as hazardous (T) (as opposed to acute hazardous (H)), residues resulting from the incineration or thermal treatment of dioxin-contaminated soils. These residues are allowed to be managed at interim status land disposal facilities and at treatment, storage, or disposal facilities pursuant to the usual Part 264 standards (*i.e.*, not meeting the special standards for other dioxin-containing wastes, such as

[1] Chlorinated Dioxins Workgroup Position Document, "Interim Procedures for Estimating Risk Associated with Exposures to Mixtures of Chlorinated Dioxins and -Dibenzofurans (CDDs and CDFs), November 21, 1985.

secondary containment or a waste management plan). EPA's rationale for this decision was that the concentration of TCDD in the residue from incineration of soils will be less than 1 ppb. This concentration in soil was determined to be a reasonable level at which to consider limiting human exposure in a residential setting.[5] EPA, therefore, concluded that the residues from incineration or thermal treatment of CDD/CDF contaminated soils, present much less risk than the untreated soils, and thus, could be managed safely at normal hazardous waste management facilities.

In a later notice (September 12, 1985, 50 *FR* 37338–37342), the Agency proposed to extend this idea by proposing to re-designate the residues resulting from the incineration of certain dioxin-containing wastes as hazardous (T) when the waste that is incinerated contains less [6] than 10 ppm TCDD equivalents (the "residue rule"). The basis for this proposed decision was that the residues would contain less than 0.1 ppb of TCDD equivalents, a concentration well below the 1 ppb level cited above. There was substantial consensus in the comments to this proposed rule that dioxin-containing wastes did not require extraordinary management controls when concentrations were below 1 ppb.

EPA is tentatively of the view that the level for designating scrubber effluent as toxic should be lower than the level for solid matrices. This is because CDDs/CDFs in liquid are already mobile. Consequently, EPA views 10 ppt as an appropriate level for scrubber effluent. This level is two orders of magnitude less than the 1 ppb level cited above.

The Agency's proposed decision here to re-designate the 7000 gallons of scrubber water is therefore based on the belief that wastes containing less than 10 ppt TCDD equivalents can be managed safely at interim status facilities, and at fully permitted facilities without waste management plans. In particular, the potential risk resulting from exposure to a contaminant depends on the route of exposure and the matrix of which the contaminant is a part. This is particularly true for dioxins since bioavailability, which is matrix-dependent, is a significant factor in determining these levels. The exposure pathways of most concern for the CDDs/CDFs are postulated to result from the contamination of husbandry and stream sediment by CDD/CDF-contaminated soil dispersed from the disposal site by rain, flood water, or wind. Leaching of CDDs/CDFs to ground water is also of concern, however. The Agency believes that adequate controls currently exist at interim status facilities to control surface run-off/run and wind dispersal (see, e.g., 40 CFR § 265.302), in light of the low concentrations of CDDs/CDFs found in this scrubber water. We also believe that because of the low concentrations of the CDDs/CDFs, interim status facilities should control the leaching of CDDs/CDFs to ground water until final permits are issued. We note further that non-dioxin containing wastes which are more hazardous than this scrubber water (due to high concentrations of other toxicants) are not required to be managed pursuant to special standards. EPA believes that this redesignated scrubber water thus is more appropriately managed pursuant to the same standards to which these other toxic hazardous wastes are subject.

The level reported in CRF's waste was 0.1 ppt of TCDD equivalents; this is two orders of magnitude lower than the 10 ppt level that the Agency believes can be safely handled without the special management standards required for the listed dioxin wastes. EPA, therefore, does not believe that CRF's scrubber water is an acute hazardous waste requirng the heightened regulatory controls and can thus be redesignated as hazardous (T).[4]

Note, however, that it is still EPA's conclusion that these wastes are still hazardous due to their CDD/CDF content and thus still require the same level of management as other hazardous waste. In particular, on January 14, 1986, the Agency proposed its framework for a regulatory program to implement the congressionally mandated land disposal prohibitions (see 51 *FR* 1602–1705). The ban rule sets a screening level of 4 ppg for the 2,3,7,8-TCDD isomer using the TEFs. This level was based upon an estimate for the allowable concentration of TCDD in potable ground water of 0.2 ppg.

This concentration is the 10^{-6} risk level dose in water based upon a 70 kg man consuming 2L of water per day over a 70 year lifetime. This concentration is two orders of magnitude less than the action level for acute hazardous versus toxic we are positing here. Although one can assume some attenuation in the event of release, not enough information is currently available on attenuation mechanisms (e.g., dilution when discharged to surface water, etc.) to conclude that the concentrations of CDDs/CDFs would be reduced two orders of magnitude to levels of non-regulatory concern. Based on the above considerations, the Agency believes that the scrubber water still requires control as a hazardous waste by virtue of its CDD and CDF content.

The Agency is also proposing today to re-designate (as toxic (T)) all carbon filtered scrubber water that will be generated by CRF's incinerator contingent upon the testing of each tank of water for the CDD/CDF homologs and that the TCDD equivalents of each tank does not exceed 10 ppt. A detection limit of about 5 ppt for each homolog in a carbon treated aqueous matrix is achievable by EPA's test mentod 8280 (this method involves sample clean-up followed by HRGC/LRMS analysis).[5] The Agency believes as previously described that this level will be protective of human health and the environment when the waste is managed in accordance with the general waste management standards. It should be noted that in both the September 12, 1985 notice and in this preamble, we indicate that below 0.1 ppt of TCDD-equivalents, a dioxin-containing waste can be managed without the special management standards (*i.e.*, secondary containment or a waste management plan). As noted above, since the CDDs/CDFs in the scrubber water are more likely to escape from the waste and get into the environment than CDDs/CDFs in a solid matrix, we believe a lower level would be more protective. We therefore selected a level of 10 ppt since this level (in our opinion) would provide a greater margin of safety in managing this waste at interim status facilities. Considering the toxicity of these compounds, such a distinction is appropriate. In addition, we believe that any incinerator that is operating properly and achieving six 9's DRE should easily achieve this level. The Agency, however, solicits comment on this level.[6] Thus, if the level in CRF's

---

[5] USEDHS. 1984. Health Risk Estimate for 2,3,7,8-TCDD in soil. Morbidity and mortality weekly report 33:289.

[6] CRF's waste contains approximately 40 ppm of 2,3,7,8-TCDD and is thus not covered by the proposed "residue rule".

[4] The Agency is proposing to add a new waste to the hazardous waste list (EPA Hazardous Waste No. F031) to make it clear that these wastes will be considered as toxic (T).

[5] A limit of 1 ppb for each homolog in the leachate was proposed in the land disposal restrictions rule (51 *FR* 1724). Even though lower detection levels are achievable, test method 8280 is expected to perform more reliably on a routine basis at a limit of 1 ppb.

[6] The Agency plans to solicit comments in a future notice to extend the r esposed September 12,

Continued

scrubber water exceed 10 ppt of TCDD equivalents, the waste must either be retreated or be managed as an acute hazardous waste.

II. Effective Date

This rule, if promulgated, will become effective immediately. Although subtitle C regulations normally take effect six months from promulgation (RCRA section 3010 (b)), the Hazardous and Solid Waste Amendments of 1984 amended Section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six month period to come into compliance. That is the case here since this rule reduces, rather than increases the existing requirements for persons generating hazardous wastes. In light of the unnecessary hardship and expense which would be imposed on the petitioner by an effective date six months after promulgation and the fact that such a deadline is not necessary to achieve the purpose of section 3010, we believe that these rules should be effective immediately. These reasons also provide a basis for making this rule effective immediately under the Administrative Procedure Act, pursuant to 5 U.S.C. Sec. 553(d).

III. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. this proposal is not major since its effect is to reduce the overall costs and economic impact of EPA's hazardous waste management regulations. This reduction is achieved by re-designating the scrubber water from acute hazardous waste (H) to hazardous waste (T) at CRF's facility in Jefferson, Arkansas and thereby enabling the facility to manage its waste in accordance with the general waste management standards. Since this rulemaking is not a major rule, a regulatory impact analysis was not conducted.

IV. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an Agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment will not have adverse economic impact on small entities since its effect will be to reduce the overall costs of EPA's hazardous waste regulations. Accordingly, I hereby certify that this final regulation will not have significant economic impact on a substantial number of small entities.

This regulation, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 261

Hazardous waste, Recycling.

Dated: May 23, 1986.

Marcia Williams,

Director, Office of Solid Waste.

For the reasons set out in the preamble, 40 CFR Part 261 is proposed to be amended as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for Part 261 continues to read as follows:

Authority: Secs. 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended [42 U.S.C. 6905, 6912(a), 6921, and 6922].

§ 261.31 [Amended]

2. In § 261.31, add the following waste stream in numerical order:

EPA hazardous waste No.	Hazardous waste	Hazard code
•	•	•
F091	Residues resulting from the incineration or thermal treatment of EPA Hazardous Waste Nos. F020, F021, F022, F023, F026, and F027, as identified in Appendix IX, Table 4.	(T)
•	•	•

Appendix VII [Amended]

3. Add the following entry in numerical order to Appendix VII of Part 261:

EPA hazardous waste No.	Hazardous waste constituents for which listed
•	•
F091	Tetra-, penta-, and hexachlorodibenzo-p-dioxins; tetra-, penta-, and hexachlorodibenzofurans; tri-, tetra-, and pentachlorophenols and their chlorophenoxy derivatives.
•	•

4. In Appendix IX, add Table 4 and the following wastestream:

Appendix XI—Wastes Excluded Under §§ 260.20 and 260.22

TABLE 4.—WASTE REDESIGNATED FROM ACUTE HAZARDOUS WASTE TO HAZARDOUS WASTE

Facility	Address	Waste description
U.S. EPA Combustion Research Facility (CRF).	Jefferson, AR.	(1) Scrubber water generated by CRF's incineration of the "Vertac waste". (2) All future scrubber water generated by CRF's incinerator burning listed dioxin-containing waste contingent upon analyzing each tank of wastewater for the CDD/CDF homologs and that the TCDD equivalent is below 10 ppt.

[MM Docket No. 86–200, RM–5239]

Radio Broadcasting Services; Lone Grove, OK

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes the allocation of Channel 294A to Lone Grove, Oklahoma, as the community's first local FM service, at the request of SSS Communications, Inc.

In addition to filing comments with the FCC, interested parties should serve the petitioner, or their counsel or consultant, as follows: SSS Communications, Inc., Attn: Steve L. Sowers, 908 A Street, NW., Ardmore, Oklahoma 73401 (Petitioner).

DATES: Comments must be filed on or before July 21, 1986, and reply comments on or before August 5, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 86–200, adopted May 15, 1986, and released May 28, 1986. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW, Washington, D.C. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street, NW, Suite 140, Washington, D.C. 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

[MM Docket No. 86–194, RM 5266]

Radio Broadcasting Services; Lampasas, TX

AGENCY: Federal Communications Commmission.

ACTION: Proposed rule.

SUMMARY: This document request comments on a petition by Ronald K. Witcher, licensee of FM Station KLTD (Channel 257A), Lampasas, Texas, proposing the substitution of Channel 258C1 for Channel 257A and modification of its license accordingly. The proposal could provide a first wide area coverage station at Lampasas.

In addition to filing comments with the FCC, interested parties should serve the petitioners, or their counsel or consultant, as follows: Ronald K. Witcher, c/o Bromo Communications, P.O. Box M, St. Simons Island, Georgia 31522.

DATES: Comments must be filed on or before July 14, 1986, and reply comments on or before July 29, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Patricia Rawlings (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 86–194, adopted May 12, 1986, and released May 23, 1986. BILLING CODE 6712–01–M

DEPARTMENT OF DEFENSE

48 CFR Parts 230 and 253

Department of Defense Federal Acquisition Regulation Supplement; Cost Accounting Standards

AGENCY: Department of Defense (DoD)

ACTION: Proposed rule and request for comments.

SUMMARY: The Defense Acquisition Regulatory Council is considering a change to the coverage in the DoD FAR

Supplement to add the Cost Accounting Standards Disclosure Statement (253.303–70–DD–xxx) and to prescribe at 230.501–7 the form used to compute the Facilities Capital Cost of Money Factors (253.303–70–DD–x).

DATE: Comments on the proposed revisions should be submitted in writing to the Executive Secretary, DAR Council, at the address shown below on or before August 4, 1986, to be considered in the formulation of a final rule. Please cite DAR Case 85–139 in all correspondence related to this issue.

ADDRESS: Interested parties should written comments to: Defense Acquisition Regulatory Council, ATTN: Mr. Charles W. Lloyd, Executive Secretary, ODASD(P)/DARS, c/o OASD(A&L)(MRS), Room 3C841, The Pentagon, Washington, DC 20301–3062.

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, (202)697–7266.

SUPPLEMENTARY INFORMATION:

A. Background.

Public Law 91–379 (50 U.S.C. APP. 2168) requires certain defense contractors and subcontractors to disclose in writing and follow consistently their cost accounting practices. In a document published elsewhere in this issue of the Federal Register the FAR Secretariat proposed changes to Federal Acquisition Regulation Part 30 to incorporate Cost Accounting Standards into the FAR. Although the Standards themselves are being considered for incorporation into the FAR, it is proposed that the Form CASB–DS–1, CASB Disclosure Statement, and the Form CASB–CMF, Facilities Capital Cost of Money Factors Computation, be changed to DoD forms with no planned change in format and be incorporated into the DoD FAR Supplement. Copies of the proposed forms may be obtained from the address cited above.

B. Regulatory Flexibility Act.

The proposed change to DoD FAR Supplement Part 230 will not have a significant impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) because the changes cover Cost Accounting Standards and associated rules and regulations from which small business concerns are exempt.

C. Paperwork Reduction Act.

The collection of information is required by FAR 30.202 and 30.5. The forms being proposed by this coverage is nothing more than the vehicle used to collect the information and does not require an OMB clearance.

List of Subjects in 48 CFR Parts 230 and 253

Government procurement.

Owen L. Green

Acting Executive Secretary Defense Acquisition Regulatory Council.

Therefore, it is proposed that 48 CFR Parts 230 and 253 be amended as follows:

1. The authority citation for 48 CFR Part 230 and 253 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

PART 230—COST ACCOUNTING STANDARDS

2. A new subpart 230.5, consiting of section 230.501–7, is added to read as follows:

Subpart 230.5—Cost of Money for Capital Employed for Facilities in Use or Under Construction

230.501–7 Contract Facilities Capital Estimates.

(a) After the appropriate DD Forms (x) have been analyzed and CMF's have been developed, the contracting officer is in a position to estimate the facilities capital cost of money and capital employed for a contract proposal. DD Form 1861, "Contract Facilities Capital and Cost of Money", have been provided for this purpose and, when properly completed, becomes a connecting link between the DD Forms (x) and DD Form 1547, "Weighted Guidelines Profit/Fee Objective". An evaluated contract cost breakdown, reduced to the contracting officer's prenegotiation cost objective, must be available. The procedure is similar to applying overhead rates to appropriate overhead allocation based to determine contract overhead costs.

(b) DD Form 1861 provides for listing overhead pools and direct-charging service centers (if used) in the same structure they appear on the contractor's cost proposal and DD Forms (x). The structure and allocation base units-of-measure must be compatible on all three displays. The base for each overhead pool must be broken down by year to match each separate DD From (x). Appropriate contract overhead allocation base data are extracted by year from the evaluated cost breakdown or prenegotiation cost objective, and are listed against each separate DD Form (x). Each allocation base is multiplied by its corresponding cost of money factor to get the Facilities Capital Cost of Money estimated to be incurred each year. The sum of these products represents the estimated Contract Facilities Capital Cost of Money for the year's effort. Total contract facilities cost of money is the sum of the yearly amounts.

(c) Since the Facilities Capital Cost of Money Factors reflect the applicable cost of money rate in Column 1 of DD Form (x), the Contract Facilities Capital Employed can be determined by *dividing* the contract Cost of Money by that same rate. DD Form 1861 is designed to record and compute all the above in the most direct way possible, and the end result is the Contract Facilities Capital Cost of Money and Capital Employed which is carried forward to DD Form 1547.

PART 253—FORMS

3. Section 253.230–70 is added to read as follows:

253.230–70 Cost Accounting Standards (DD Form X and XXX).

(a) *DD Form X, Facilities Capital Cost of Money Factor Computation (Rev. 1986).* DD Form X is used by contractors as the basis for measurement and allocation of facilities cost of money to indirect cost pools at the business unit level.

(b) *DD Form XXX, Cost Accounting Standards Disclosure Statement (Rev. 1986).* DD Form XXX is used by contractors to disclose cost accounting practices by providing a written description of their cost accounting practices and procedures.

BILLING CODE 3810–01–M

---

48 CFR Part 252

Department of Defense Federal Acquisition Regulation Supplement; Contract Financing

AGENCY: Department of Defense (DoD).

ACTION: Proposed rule and request for comments.

SUMMARY: The Defense Acquisition Regulatory Council is considering a change to the coverage in the DoD FAR Supplement at 232.501–1 to make the progress payment rates for Foreign Military Sales (FMS) Contracts the same level as provided by DoD on domestic defense contracts. This means that the progress payment rate would be 80% for other than small businesses and 90% for small businesses.

DATE: Comments on the proposed revisions should be submitted in writing to the Executive Secretary, DAR Council, at the address shown below on or before July 3, 1986, to be considered in the formulation of the final rule. Please cite DAR Case 86-52 in all correspondence related to this issue.

ADDRESS: Interested parties should submit written comments to: Defense Acquisition Regulatory Council, Attn: Mr. Charles W. Lloyd, Executive Secretary, ODASD(P)DARS, c/o OASD(A&L)(MRS), Room 3C841, The Pentagon, Washington, DC 20301-3062.

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, telephone (202)697-7266.

SUPPLEMENTARY INFORMATION:

A. Background.

These changes are being considered in a response to a recommendation contained in DoD Defense Financial and Investment Review (DFAIR). DFAIR had concluded that the working capital requirements on FMS contracts were higher than experienced on domestic defense contracts. Thus the progress payment rates should not be different.

B. Regulatory Flexibility Act.

It is expected that the proposed change to DFARS 232.501-1(a) will have little if any impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). A Regulatory Flexibility Analysis has been prepared and submitted to the Chief Council for Advocacy for the Small Business Administration.

C. Paperwork Reduction Act.

The proposed rule does not contain information collection requirements which require the approval of OMB under 44 U.S.C. 3501 et seq.

List of Subjects in 48 CFR Part 232

Government procurement.

Owen L. Green,

Assistant to the Executive Secretary, Defense Acquisition Regulatory Council.

Therefore, it is proposed that 48 CFR Part 232 be amended as follows:

PART 232—CONTRACT FINANCING

1. The authority citation for 48 CFR Part 232 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

§ 232.501-1 [Amended]

2. Section 232.501-1 is amended by revising paragraph (a) to read as follows:

232.501-1 Customary Progress Payment Rates.

(a) The customary progress payment rate applicable to Foreign Military Sales requirements is the same as that applicable to DoD requirements. The customary progress payment rate for flexible progress payments is the rate determined by use of either the CASH II or CASH III computer program as applicable in accordance with the requirements of 232.502-1(S-71).

BILLING CODE 3810-01-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 171, 172, 173, 174, 175, 177, 178, and 179

[Docket No. HM-186U; Notice No. 86-3]

Transportation of Hazardous Materials; Proposed Miscellaneous Amendments

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Research and Special Programs Administration is proposing to make several miscellaneous amendments to the regulations pertaining to the transportation of hazardous materials. The action is necessary to update the regulations and to reduce RSPA's backlog of rulemaking petitions.

DATES: Comments must be received by July 31, 1986.

ADDRESS: Address comments to the Dockets Branch, Research and Special Programs Administration, U.S. Department of Transportation, Washington, DC 20590. Comments should identify the docket and notice number and be submitted in five copies. Persons wishing to receive confirmation of receipt of their comments should include a self-addressed stamped post card. The Dockets Branch is located in Room 8426 of the Nassif Building, 400 7th Street SW., Washington, DC. Public dockets may be reviewed between the hours of 8:30 a.m. and 5:00 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Darrell L. Raines, Chief, Exemptions and Regulations Termination Branch, Office of Hazardous Materials Transportation, Washington, DC 20590 (202) 426-2075.

SUPPLEMENTARY INFORMATION: This document is primarily designed to reduce regulatory burdens by incorporating changes in the Hazardous Materials Regulations based on either petitions for rulemaking submitted in accordance with 49 CFR 106.31 or on RSPA's own initiative. These proposed amendments are in keeping with Executive Order 12291 and are designed to simplify existing regulations.

In Part 171, these proposed amendments would (1) update five Compressed Gas Association Pamphlets to the latest editions; (2) update the Association of American Railroads "Specifications for Tank Cars" to the 1985 edition; (3) incorporate by reference ASTM D 4359-84 "Standard Test Method for Determining Whether a Material is a Liquid or a Solid"; and (4) add a definition for "Liquid" and "Solid".

In Part 172, the Table would be revised by (1) removing the entries "1-Bromo-3-nitrobenzene (unstable at 56 °C)" and "Compound, water treatment, liquid. *See* Water treatment, liquid."; (2) reinstating the entry "Ethyl phosphonothioicdichloride, anhydrous"; (3) changing the ID number for the entry "Ink", combustible liquid; (4) changing the hazard class for the entry "Ethylene glycol diethyl ether (diethyl cellosolve)"; (5) revising the entry "Gasohol (*gasoline mixed with ethyl alcohol*). *See* Gasoline"; (6) adding a new entry "Air, refrigerated liquid (*cryogenic liquid*)"; (7) changing the hazard class, label, and packaging authorization sections for ethylene dibromide. This change results from RSPA's review of published data that indicates the proper hazard class for this material should be "Poison B" instead of "ORM-A". The toxicity of this material is such that it poses a significant hazard to health during transportation. This change in classification and packaging authorization would result in this material being subject to the requirements of §173.3a; and (8) adding "Aluminum alkyl" and "Aluminum alkyl halide" to the § 172.102 Table. In § 172.202, paragraph (a)(4) would be revised to require the unit of measure to be identified on the shipping papers. In § 172.336, paragraphs (c)(4) and (c)(5) would be revised by adding the word "petroleum" before the word "distillate". In § 172.504, footnote 8 of Table 2 would be amended to include an OXYGEN placard. In § 172.519, paragraphs (b)(2) and (b)(4) would be revised to upgrade the placard construction standards.

In Part 173, these proposed amendments would (1) amend § 173.11(b)(4) to require the registration statement to include the type of packaging being used; (2) amend Retest Table 2 in § 173.31 to include DOT Specification 110A600–W multi-unit tank cars; (3) revise § 173.32 to authorize a portable tank to be used as a cargo tank; (4) revise § 173.51(g) to provide an exception for persons who are authorized to board an airplane with a loaded firearm; (5) remove paragraph (b) in § 173.57; (6) make an editorial correction in § 173.61(b) and § 173.104(c) regarding the marking for detonating cord; (7) add a paragraph (h) and (i) in § 173.86 regarding small arms ammunition and devices which contain small quantities of explosives; (8) amend the introductory text of § 173.87 to reference § 173.7(a); (9) add paragraph (a)(2) in § 173.93 to authorize smokeless powder for small arms to be shipped as Class B explosives in packagings approved in accordance with § 173.197a; (10) make an editorial correction in § 173.104; (11) remove paragraph (a)(4) in § 173.122; (12) amend § 173.164(a)(2) to add DOT Specification 17C metal drums for packaging chromic acid or chromic acid mixture, dry; (13) revise § 173.197a by adding the Bureau of Mines and to authorize co-mingling of inside boxes of smokeless powder for small arms; (14) amend the introductory text of § 173.220(a) to authorize the use of fiberboard boxes with inside polyethylene bags for packaging magnesium or zirconium scrap consisting to borings, shavings, or turnings; (15) add a Note 2 in § 173.245(a) to amend the requirements for nickel tank car tanks and cargo tanks for consistency with fabricating capabilities and construction materials available in the market place today. Similiar changes are being proposed in § 173.253(a)(7) and (8), § 173.271(a)(7), (8) and (9), § 173.294(a)(2), (3), and (b), § 179.202–8, § 179.202–11, and § 179.202–16; (16) to provide for marking of stainless steel cargo tanks; (17) remove paragraph (d)(1) in § 173.277; (18) amend the first sentence of § 173.300(a) to clarify that a cryogenic liquid is subject to regulation without regard to the pressure in the package; (19) revise § 173.301(k) to remove the requirement that the outside packaging must provide valve protection if the cylinder has features providing valve protection; (20) revise § 173.302(a)(5)(iv) by restricting the charged service pressure for oxygen to 3000 psig at 70°; (21) reinstate DOT 4DW225 for sulfur dioxide in § 173.304(a)(2); (22) revise Note 6 in § 173.314 to make the safety relief devices to be the same as required in § 178.102–1(a)(3); (23) make an editorial correction in § 173.315(c); (24) amend § 173.316(c)(2) to provide filling limits for "air refrigerated liquid (*cryogenic liquid*)" in cylinders; (25) revise § 173.318(b)(2)(i)(B), (iii), and (iv) to require the use of a primary and a secondary system of pressure relief devices on cargo tanks used in cryogenic liquid service; (26) amend § 173.318(f) (2) and (3) to provide filling limits for "air, refrigerated liquid" and "hydrogen, refrigerated, liquid" in cargo tanks"; (27) add a new paragraph (a)(3) in § 173.320 to include a reference to Subparts A and B of Part 173, § 174.1 and § 177.804; and (28) reinstate § 173.965 "Cotton and other fibers".

In Part 174, these proposed amendments would amend § 174.9(b) by changing the word "must" to "may" regarding the drainage of heater coil inlet and outlet pipes.

In Part 176, § 176.76(g)(2) would allow hazardous materials in portable tanks to be transported on small passenger vessels.

In Part 177, these proposed amendments would remove paragraph (k) of § 177.834 which specifies how certain hazardous materials must be loaded to provide ready access, (2) revise § 177.841(e) to prohibit a motor carrier from carrying poisons in the passenger compartment of a motor vehicle and (3) revise § 177.848(b) to authorize cyanides or cyanide mixtures to be loaded or stored with corrosive liquids that are alkaline.

In Part 178, these proposed amendments would (1) authorize DOT–3E cylinders to be stamped in the sidewall; (2) correct and update the DOT–3AL Specification in § 178.46; (3) revise § 178.51–10(d) and § 178.61–10(b) regarding wall thickness of DOT Specifications 4BA and 4BW steel cylinders (4) make an editorial correction in § 178.53–6(a) regarding DOT–4D cylinders; (5) remove DOT–4B240–FLW from Part 178 and (6) revise § 178.245–1(a) by removing the requirement that DOT Specification 51 portable tanks must be postweld heat treated.

In Part 179, several of these proposed miscellaneous changes are based on recommendations from the Association of American Railroads and are designed to update and clarify the present wording. The Chlorine Institute requested that § 179.102–2(a)(3) be revised to allow the use of a new insulation package of future tank cars for chlorine.

I certify that this proposed regulation will not, if promulgated, have a significant economic impact on a substantial number of small entities. Also, the RSPA has determined that this Notice (1) is not "major" under Executive Order 12291; (2) is not "significant" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact would be so minimal; (4) will not affect not-for-profit enterprises, or small governmental jurisdictions and (5) does not require an environmental impact statement under the National Environmental Policy Act (49 U.S.C. 4321 et seq.).

Regulation affected	Reason(s) for proposed change.	Proposed amendment
§ 171.7(d)(2)	To reference the latest edition of the AAR's "Specification for Tank Cars."	In § 171.7, paragraph (d)(2) would be revised to read as follows: (2) AAR Specifications for Tank Cars means the 1985 edition of the "Association of American Railroads Specifications for Tank Cars, Specification M-1002."
§ 171.7(d)(3)(i)	To update CGA Pamphlet C-6 to the 1984 edition.	In § 171.7 paragraph (d)(3)(i) would be revised to read: (i) CGA Pamphlet C-6 is titled "Standards for Visual Inspection of Steel Compressed Gas Cylinders", 1984 edition.
§ 171.7(d)(3)(ii)	To update CGA Pamphlet C-7 to the 1986 edition.	In § 171.7, paragraph (d)(3)(ii) would be revised to read: (ii) CGA Pamphlet C-7, Appendix A, is titled "Guide to the Preparation of Precautionary Labeling and Marking of Compressed Gas Containers",1983 edition.
§ 171.7(d)(3)(iv)	To update CGA Pamphlet C-8 to the 1985 edition.	In § 171.7, paragraph (d)(3)(iv) would be revised to read: (iv) CGA Pamphlet C-8 is titled, "Standard for Requalification of DOT-3HT Cylinders", 1985 edition.
§ 171.7(d)(3)(v)	To update CGA Pamphlet G-4.1 to the 1985 edition.	In § 171.7, paragraph (d)(3)(v) would be amended by changing "1977" edition to read "1985" edition.
§ 171.7(d)(3)(x)	To incorporate CGA Pamphlet G-2.2, 1985 edition, referenced in § 173.315(1)(ii).	In § 171.7, paragraph (d)(3)(x) would be added to read: (x) CGA Pamphlet G-2.2 is titled, "Guideline Method for Determining Minimum of 0.2% Water in Anhydrous Ammonia", 1985 edition.
§ 171.7(d)(5)	To incorporate by reference ASTM D 4359-84 "Standard Test Method for Determining Whether a Material is a Liquid or a Solid". Also, in § 171.8 definitions for "Liquid" and "Solid" would be added.	In § 171.7, paragraph (d)(5) (xxiv) would be added to read as follows: (xxiv) ASTM D 4359-84 is titled "Standard Test Method for Determining Whether a Material is a Liquid or a Solid", 1984 edition.
§ 171.8	To add a definition for "Liquid" and "Solid" as tested in accordance with ASTM D 4359-84.	In § 171.8, definitions for "Liquid" and Solid" would be added to read as follows: "Liquid" means a material that has a vertical flow over 2 inches (50 mm) within a three minute period, or a material having one gram (g) or more liquid separation when determined in accordance with the procedures specified in ASTM D 4359-84, "Standard Test Method for Determining Whether a Material is a Liquid or Solid", 1984 edition. • • • • • • "Solid" means a material which has a vertical flow of two inches (50 mm), or less, within a three-minute period, or; a separation of one gram (g), or less, of liquid when determined in accordance with the procedures specified in ASTM D 4359-84 "Standard Test Method for Determining whether a material is a Liquid or Solid", 1984 edition.
§ 172.101(Table)	The American Hoechst Corporation has requested that the entry "1-Bromo-3-nitrobenzene (unstable at 55 °C)" be removed as a "Forbidden" material. Based upon the information received and upon further research, the RSPA agrees that this material is not chemically unstable and should not be listed as a forbidden material.	In the § 172.101 Table the entry "*1-Bromo-3-nitrobenzene (unstable at 55°C)*" would be removed.
§ 172.101 (Table)	The Ethyle Corporation has brought to our attention that the entire Table entry for "Ethyl Phosphonothioldichloride, anhydrous" does not appear in the latest edition of 49 CFR. It appears that this entry was inadvertently removed when a change was made to the entry "Ethyl phosphorus dichloride, anhydrous".	In the § 172.101 Table the entire entry for "ethyl phosphonothioldichloride, anhydrous" would be reinstated the same as it appeared in the October 1, 1985 edition of 49 CFR.
§ 172.101 (Table)	The entry "Compound, water treatment, liquid. *See* Water treatment, liquid" should be removed. The entry "Water treatment liquid" was removed under Docket HM-169-0 on November 17, 1983, [48 FR 52083]. However, the entry "Compound, water treatment, liquid. *See* Water treatment, liquid" was omitted.	In § 172.101, the Table would be amended by removing the entry "Compound, water treatment, liquid. *See* Water treatment, liquid."
§ 172.101 (Table)	To change the ID number for "Ink", combustible liquid, from UN 2667 to UN 1210 to be consistent with the entry in the United Nations Recommendations for the Transport of Dangerous Goods.	In § 172.101, the Table would be amended by changing the ID number for "Ink", combustible liquid, from UN 2667 to read UN 1210.
§ 172.101 (Table)	The entry "Ethlene dibromide" is presently classed as an "ORM-A". RSPA has found published data that indicates that the proper hazard class for this material should be Poison B instead of ORM-A.The toxicity of this material is such that it may pose a significant hazard to health during transportation.	In § 172.101, the Table would be amended by changing the hazard class of "ethylene dibromide" from "ORM-A" to Poison B; the label would be changed from "None" to "Poison"; the packaging columns would be changed from "173.505 and 173.620" to "173.345 and 173.346" respectively.
§ 172.101 (Table)	The entry "Ethylene glycol diethyl etho (diethyl cellosolve)" is presently classed as a "Combustible liquid". The Grent Chemical Division has furnished us data that indicates that the proper hazard class for this material should be flammable liquid instead of combustible liquid.	In § 172.101, the Table would be amended by changing the hazard class for "Ethylene glycol diethyl ether (diethyl cellosolve)" from "Combustible liquid" to "Flammable liquid".
§ 172.101(Table)	This change is considered necessary to correctly identify the proper Emergency Reponse Guide number for Gasohol which has a maximum alcohol content of 20 percent. Paragraphs (c)(4) and (c)(5) in § 172.336 would be revised accordingly.	In the § 172.101 Table, the entry "Gasohol (*gasoline mixed with ethyl alcohol*, *See* Gasoline" would be revised to read "Gasohol (*gasoline mixed with ethyl alcohol containing 20% maximum alcohol*)." *See* Gasoline. In § 172.336, paragraphs(c)(4) and (c)(5) would be revised to read as follows: (4) For each of the different liquid petroleum distillate fuels, including gasoline and gasohol in a compartmented cargo tank or tank car, if the identification number is displayed for the distillate fuel having the lowest flash point. (5) For each of the different liquid petroleum distillate fuels, including gasoline and gasohol transported in a cargo tank, if the identification number is displayed for the liquid petroleum distillate fuel having the lowest flash point.
§ 172.102(Table)	The entries "Aluminum alkyl, UN3051"and "Aluminum alkyl halide, UN3052" would be added in order to comply with Amendment 22-84 of the IMDG Code which becomes effective July 1, 1986. These changes are necessary to avoid the need for dual shipping names and placarding for certain pyroforic liquids.	In § 172.101, the table would be amended by adding "Aluminum alkyl" and "Aluminum alkyl halide".

§ 172.101 Hazardous Materials Table.

+/E/A/W	Hazardous materials descriptions and proper shipping names	Hazard class	Identification number	Label(s) required (if not excepted)	Packaging		Maximum net quantity in one package		Water shipments		
					Exceptions	Specific requirements	Passenger carrying aircraft or railcar	Cargo only aircraft	Cargo vessel	Passenger vessel	Other requirements
(1)	(2)	(3)	(3)(a)	(4)	(5)(a)	(5)(c)	(6)(a)	(6)(b)	(7)(a)	(7)(b)	(7)(c)
	ADD										
	Air, refrigerated liquid (cryogenic liquid).	Nonflammable Gas.	UN 1003	Nonflammable Gas.	173.320	173.318, 173.319	Forbidden	300 pounds	1,3	1,3	Stow separate from flammables. Do not overstow with other cargo.

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 172.202(a)(4)	To require the unit of measure to be identified on the shipping papers.	In § 172.202, paragraph (a)(4) would be revised to read as follows: (4) Except for empty packagings, cylinders for compressed gases, and packagings of greater than 110 gallons capacity, the total quantity by weight (net or gross as appropriate) or volume, including the unit of measure, of the hazardous material covered by the description. For example: "800 lbs."; "95 gal.".
§ 172.504 Table 2.	To eliminate the need for dual placarding.	In § 172.504, footnote 6 of Table 2 would be amended by adding" or an OXYGEN placard" at the end.
§ 172.519(b)(2) and (4).	Proposed change responds to a petition of National Tank Truck Carriers, Inc., (P-863) concerning the need to upgrade the placard construction standards. Some of the present placards being employed do not have sufficient durability to withstand weathering for 30 days consistent with the intent of the present § 172.519(a)(4).	In § 172.519, paragraphs (b)(2) and (b)(4) would be revised to read as follows: (2) A weight of 200 pounds per ream of 24 by 36-inch sheets; (4) Been treated with plastic or other waterproofing material that will give it the ability to withstand open weather exposure (including rain) for 30 days without a substantial reduction in effectiveness.
§ 173.11(b)(4)	To require that a shipper identify the type of packaging being used to ship a flammable cryogenic liquid on the registration statement.	In § 173.11, the beginning of the first sentence of paragraph (b)(4) would be amended as follows: (4) The type of packaging and the serial number or vehicle identification number • • •
§ 173.31 Retest Table 2.	To amend Retest Table 2 to include a new DOT Specification 110A600-W multi-unit tank car tank that is being added to § 1780.301.	In § 173.31, Retest Table 2 would be amended by adding the following:

RETEST TABLE 2

Specification	Retest interval—years		Retest pressure p.s.i.		Safety relief valve pressure—p.s.i.	
	Tank	Safety relief devices	Tank hydrostatic expansion	Tank air test	Start-to-discharge	Vapor tight
110A600-W	5	2	600	100	450	360

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 173.32(a)	To provide for the use under certain conditions of a portable tank as a cargo tank.	In § 173.32, paragraph (a)(1) would be revised and a new paragraph (a)(2) would be added to read as follows: (a) • • • (1) A portable tank containing a hazardous material may not be transported on a motor vehicle unless it is secured to the motor vehicle by a system which conforms to the requirements contained in 49 CFR 393.100 through 393.106, and is located at least six inches forward of the motor vehicle's rear bumper. A portable tank may not be filled or discharged while the tank remains on the vehicle, except as provided by paragraph (a)(2) of this section. (2) A DOT Specification 51, 60 or Marine Portable Tank (46 CFR Part 64) or an equivalent non-DOT specification portable tank authorized under a DOT exemption may not be filled or discharged while the tank remains on the motor vehicle, unless— (i) each discharge and filling outlet is equipped with an internal valve. Additionally, tanks used for the transportation of liquefied compressed gases, except carbon dioxide, must be equipped with excess-flow valves as specified in paragraph (n) of this section; (ii) bottom outlets, if provived, are fitted with three serially-mounted closures consisting of an internal valve, an external valve and a bolted flange or other suitable, liquid-tight closure on the outlet side of the external valve, and (iii) the internal valve is fitted with a remote means of closure located more than 10 feet from the loading/unloading-hose connection or as far as possible from the loading/unloading-hose connection. The remote closure system must be corrosion resistant and effective in all environments. The remote means of closure must be actuated manually. For other that corrosive material service, the remote means of closure must also be activated thermally. Thermally activated closures must operate at a temperature not over 250°F. and not less than 230°F.
§ 173.33c	See § 173.32(a).	In § 173.33c new paragraphs (m)(1) and (2) would be added to read as follows: (m)(1) An IM portable tank containing a hazardous material may not be transported on a motor vehicle unless it is secured to the motor vehicle by a system which conforms to the requirements of 49 CFR 393.100 through 393.106 and is located at least six inches forward of the motor vehicle's rear bumper. (2) A Specification IM 101 and IM 102 portable tank may not be filled or discharged while the tank remains on the motor vehicle, unless the portable tank—

Regulation affected	Reason(s) for proposed change	Proposed amendment
		(f) is in conformance with the requirements of paragraph (g) of this section; and (g) when required, the internal valve is fitted with a remote means of closure located more than 10 feet from the loading/unloading-hose connection or as far as possible from the loading/unloading-hose connection. The remote closure system must be corrosion resistant and effective in all environments. The remote means of closure must be actuated manually. For other than corrosive material service, the remote means of closure must also be actuated thermally. Thermally actuated closures must operate at a temperature not over 250°F. and not less than 220°F.
§ 173.51	In 14 CFR 108.11 certain persons are authorized to board an airplane with a loaded weapon. In § 173.51, paragraph (g) prohibits the transportation of loaded firearms. The RSPA is proposing to amend paragraph (g) of § 173.51 to provide for an exception as authorized in 14 CFR 108.11.	In § 173.51, paragraph (g) would be revised to read as follows: (g) Loaded firearms (except as provided in 14 CFR 108.11).
§ 173.57(b)	Column (8) of the § 172.101 Table specifies the hazardous materials descriptions and proper shipping names. Repeating this same information on Part 173 serves no useful purpose.	In § 173.57, paragraph (b) would be removed.
§ 173.61(a)	Editorial correction	In § 173.61, paragraph (c)(a) would be corrected to read (c)(3) and paragraph (h) would be revised to read as follows: § 173.61 *Detonating cord.* (a) • • • (h) Each outside packaging shall be plainly marked "CORD, DETONATING—HANDLE CAREFULLY".
§ 173.86(h) and (i).	This proposed change is considered necessary because this type of small arms ammunition has a low level of risk and the actual explosive components have been approved previously and separately from the ammunition itself. Paragraph (i) is considered necessary to provide a means for recognizing that certain devices which contain explosives in small quantities or in certain configurations may be included in a different classification, or excepted from the requirements of the regulations.	In § 173.86, paragraphs (h) and (i) would be added to read as follows: § 173.86 *New explosives definitions; approval and notification.* • • • • • • (h) The requirements of this section do not apply to small arms ammunition which is: (1) Not a forbidden explosive under § 173.51; (2) Ammunition for rifle, pistol, or shotgun; (3) Ammunition with inert projectiles or blank ammunition; and (4) Ammunition not exceeding 50 caliber for rifle or pistol cartridges or 8 gauge for shotshells. (i) If experience or other data indicate that the hazard of a material (device) containing an explosive composition is greater or less than indicated according to the definition and criteria specified in §§ 173.53, 173.86 and 173.100 of this Part, the Director, OHMT may, following examination in accordance with paragraph (b) of this section, revise its classification or except the material (device) from the requirements of this Subchapter.
§ 173.87	To authorize shipment of explosives and other articles when packaged by the Department of Defense (DOD) in accordance with § 173.7(a).	In § 173.87, the first sentence is amended to read as follows: § 173.87 *Explosives in mixed packaging.* Unless specifically authorized in this subchapter, explosives may not be packed in the same outside packaging with other articles unless packaged by the DOD in accordance with § 173.7(a). • • •
§ 173.93(a)(2)	To authorize smokeless powder for small arms to be shipped as Class B explosives in packagings which have been approved under § 173.87a.	In § 173.93, paragraph (a)(2) would be added to read as follows: § 173.93 *Propellant explosives (solid) for cannon, small arms, rockets, guided missiles, or other devices, and propellant explosives (liquid).* (a) • • • (1) • • • (2) Smokeless powder for small arms may be shipped as Class B explosives in packagings approved in accordance with § 173.197a.
§ 173.104(c)	Editorial correction	In § 173.104, the heading and paragraph (c) would be revised to read as follows: § 173.104 *Cord, detonating flexible; fuse, mild detonating, metal clad; or flexible linear shaped charge, metal clad.* • • • • • • (c) Cord, detonating flexible; fuse, mild detonating, metal clad and flexible linear shaped charges, metal clad shall be packed in wooden or fiberboard boxes. Each package shall be marked "CORD, DETONATING—HANDLE CAREFULLY", "FUSE, MILD DETONATING, METAL CLAD—HANDLE CAREFULLY" or "FLEXIBLE LINEAR SHAPED CHARGES, METAL CLAD—HANDLE CAREFULLY", as appropriate.
§ 173.122(b)(4)	To prohibit the use of DOT Specification 17C metal drums for packaging acrolein, inhibited. In view of HM-186, the use of the 17C drum should not be authorized for acrolein, inhibited.	In § 173.122, paragraph (a)(4) would be removed and reserved.
§ 173.164(a)(3)	This paragraph presently authorizes chromic acid or chromic acid mixture, dry, to be packaged in DOT Specification 17H or 37A metal drums. The U.S. Army Chemical Research and Development Center has requested that DOT Specification 17C steel drums be added to this paragraph. RSPA's findings indicates that DOT Specification 17C drums would be acceptable for this material.	In § 173.164, paragraph (a)(3) would be amended to include Specification 17C metal drums.
§ 173.197a	To authorize co-shipping of inside boxes of smokeless powder without further approval by the Director, OHMT. Also, the Bureau of Mines would be added as an authorized testing facility.	§ 173.197a *Smokeless powder for small arms.* Smokeless powder for small arms in quantities not exceeding 100 pounds net weight transported in one car or motor vehicle may be classed as a flammable solid when examined for this classification by the Bureau of Explosives or the Bureau of Mines and approved by the Director, OHMT. Maximum quantity in any inside packaging must not exceed 8 pounds and inside packagings must be arranged and protected to prevent simultaneous ignition of the contents. The complete package must be a type examined by the Bureau of Explosives or the Bureau of Mines and approved by the Director, OHMT. In addition, inside packages which have been examined by the Bureau of Explosives or the Bureau of Mines and approved by the Director, OHMT, may be overpacked in DOT-12A66, 12B66, or 12H66 fiberboard boxes provided all inside containers are firmly packed to prevent movement and the net weight of smokeless powder in any one box does not exceed 16 pounds. Each outside package must bear a flammable solid label.
§ 173.220(a)	To authorize the use of fiberboard boxes with inside polyethylene bags for packaging magnesium or zirconium scrap consisting of borings, shavings, or turnings. This proposed packaging is considered to be equal to or better than the four-ply paper bags that are presently authorized. Also, a paragraph (d) would be added to be consistent with the IMDG Code.	In § 173.220, the introductory text of paragraph (a) would be revised and paragraph (d) would be added to read as follows: (a) Magnesium or zirconium scrap consisting of borings, shavings, or turnings, must be packed in closed metal barrels or drums, wooden barrels, metal pails, fiber drums, fiberboard boxes with inside polyethylene bags or liner, or four-ply paper bags.

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 173.245(a), Note 2.	These proposed changes and additions would amend the requirements for nickel tank car tanks and cargo tanks for consistency with fabricating capabilities and construction materials available in the market place today.	Fiberboard boxes with inside polyethylene bags or liner or paper bags are not authorized for less-than-carload or less-than-truckload shipments. • • • • • (3) When transported by vessel, magnesium scrap may not be carried in paper bags and zirconium scrap may only be packaged in an hermetically sealed metal drum not exceeding 60 pounds net weight. In § 173.245(a), Note 2 would be added to read as follows: § 173.245 *Corrosive liquids not specifically provided for.* (a) • • • (33) • • • Note 1: • • • NOTE 2. Specification 103AHW tank car tanks must be fabricated of solid nickel at least 98 percent pure and containing not more than 1 percent iron. Metal test coupons for welding procedure qualification must contain not more than 1 percent iron. All cast metal parts of the tank in contact with the lading must have a minimum nickel content of approximately 98.7 percent. Specification 103A tank car tanks must be lead-lined steel or must be made of steel with at least 10 percent nickel cladding. Specification 103AW, 111A100F2, or 111A60W2 tanks must be lead-lined steel or made of steel with a minimum nickel cladding of ¼ inch thickness; nickel cladding in tanks must have a minimum nickel content of at least 99 percent. • • • • •
§ 173.253(a)(7) and (8).	See § 173.245(a), Note 2.	In § 173.253, paragraph (a)(7) and (a)(8) would be revised to read as follows: § 173.253 *Chlorosulfuryl chloride.* (a) • • • (7) Specification 103AW, 111A60W2, or 111A100F2 (§§ 179.200, 179.201 of this subchapter). Tank cars. Tanks must have a nickel cladding of 1/16 inch minimum thickness. Nickel cladding in tanks must have a minimum nickel content of at least 99 percent. (8) Specification 103AHW (§§ 179.200 and 179.201 of this subchapter). Tank cars. Tanks must be fabricated of solid nickel at least 98 percent pure and containing not more than 1 percent iron. Metal test coupons for welding procedure qualification must contain not more than 1 percent iron. All cast metal parts of the tank in contact with the lading must have a minimum nickel content of approximately 98.7 percent. • • • • •
§ 173.266(f)(2)	To provide for the metal identification plate on stainless steel cargo tanks to be marked "DOT MC 312–SS–H_2O_2".	In § 173.266, the eighth sentence in paragraph (f)(2) would be revised to read as follows: § 173.266 *Hydrogen peroxide solution in water.* • • • • • (f) • • • (2) • • • The tank metal identification plate required shall be marked "DOT MC 310–H_2O_2" or "DOT MC 312–AL–H_2O_2", or "DOT MC 312–SS–H_2O_2", as appropriate, and, in addition, the cargo tank shall be clearly marked in letters not less than one inch high "FOR HYDROGEN PEROXIDE ONLY". • • •
§ 173.271(a)(7), (a)(9)(iv), and (a)(9).	See § 173.245(a) Note 2.	In § 173.271, paragraphs (a)(7), (a)(9)(iv), and (a)(9) would be revised to read as follows: § 173.271 *Methyl phosphonic dichloride, phosphorus oxybromide, phosphorus oxychloride, phosphorus trichloride, and thiophosphoryl chloride.* (a) • • • (7) Specification 103AHW (§§ 179.200 and 179.201 of this chapter). Tank cars. Tanks must be fabricated of solid nickel at least 98 percent pure and containing not more than 1 percent iron. Metal test coupons for welding procedure qualification must contain not more than 1 percent iron. All cast metal parts of the tank in contact with the lading must have a minimum nickel content of approximately 98.7 percent. (9) • • • • • • • • (iv) Specification MC 311 or MC 312 cargo tanks. Tanks must be fabricated of solid nickel at least 98 percent pure and not more than 1 percent iron. Metal test coupons for welding procedure qualification must contain not more than 1 percent iron. All cast metal parts of the tank in contact with the lading must have a minimum nickel content of approximately 98.7 percent. Authorized only for phosphorus oxychloride and phosphorus trichloride. (9) Specification 103A[1], 103AW, 111A60W2, or 111A100F2 (§§ 179.200, 179.201 of this subchapter). Tank cars. Specification 103A[1], tanks must be lead-lined steel or made of steel with nickel cladding of at least 10% of the shell thickness. Specification 1103AW, 111A60W2, or 111A100F2 tanks must be lead-lined steel or made of steel with nickel cladding with a minimum thickness of 1/16-inch. Nickel cladding in tanks must have a minimum nickel content of at least 99 percent. • • • • •
§ 173.277(b)(1)	the RSPA proposed to delete paragraph (d)(1) of § 173.277. This paragraph should have been deleted when paragraph (d) was revised under Docket No. HM–103; HM–112 (41 FR 15972) on April 15, 1976.	In § 173.277, paragraph (d)(1) would be removed.
§ 173.294(a)(2), (a)(3) and (b).	See § 173.245(a) Note 2.	In § 173.294, the heading, paragraphs (a)(2), (a)(3) and and (b) would be revised to read as follows: § 173.294 *Chloroacetic acid, liquid or solution.* (a) • • • (2) Specification 103AHW,. 103AW, 111A60W2, or 111A100F2 (§§ 179.200, 179.201 of this subchapter). Tank cars. Specification 103AW, 111A60W2, or 111A100F2 tank cars must be nickel clad with a nickel thickness of at least 20 percent. Nickel cladding in tanks must have a minimum nickel content of at least 99 percent. (3) Specifications MC 310, MC 311, or MC 312 (§§ 178.348 of this chapter). Cargo tanks. Tanks must be fabricated of solid nickel at least 98 percent pure and containing not more than 1 percent iron, type 304 or 316 stainless steel or be suitably lined. Nickel metal test coupons for welding procedure qualification must contain not more than 1 percent iron. • • • • •

Regulation affected	Reason(s) for proposed change	Proposed amendment
		(ii) *Chlorosulfic acid, anhydrous*, when shipped as a liquid must be shipped in Specification 103 A60W tank car tanks fabricated of nickel containing not more than 1 percent iron or in Specification 103 AW or 111A60W6 tank car tanks nickel clad. Cladding must be at least 20 percent of the shell thickness. In place of cladding, the tank may be provided with a suitable corrosive resistant coating or lining. Nickel cladding in tanks must have a minimum nickel content of a least 99 percent.
§ 173.300(a)	To clarify that a cryogenic liquid is subject to regulation without regard to the pressure in the container.	In § 173.300, a sentence would be added at the end of paragraph (a) to read as follows: (a) • • •, or a cryogenic liquid. For a definition of a cryogenic liquid, see paragraph (f) of this section.
§ 173.301(i)	If the cylinder has features providing valve protection, it is unnecessary for the outside packaging to provide this protection.	In § 173.301, paragraph (k) would be revised to read as follows: § 173.301 *General requirements for shipment of compressed gases in cylinders.* • • • • • (k) *Outside packagings.* • • • (1) Outside packagings must provide protection for the cylinder. Unless the cylinder has a protective collar or neckring, the outside packaging must provide protection to the valve against accidental functioning and damage. • • • • •
§ 173.302(a)(1)(ii)-(v)	Present wording limits the service pressure on the cylinder to 3,000 psig, whereas the reason for the present wording is to prevent the charging pressure for oxygen from exceeding 3,000 psig. There is no reason why a higher design pressure cylinder should be excluded as long as the oxygen pressure limit is not exceeded.	In § 173.302, paragraph (a)(ii) (iv) would be revised to read as follows: (iv) The pressure in the cylinder may not exceed 3,000 psig at 70 °F.
§ 173.304(a)(2)	To reinstate the 4BW225 to the list of cylinders authorized for the transportation of sulfur dioxide. This cylinder was inadvertently omitted in Docket HM–176 (48 FR 52402, December 24, 1991).	In § 173.314(a)(2) the Table would be amended by adding "DOT–4BW225" in the third column for the entry "Sulfur dioxide".
§ 173.314(c) Note 6 of Table.	The present wording of Note 6 states in part that the discharge capacity of each of these safety relief devices must be sufficient to prevent building up of pressure in the tank in excess of ⅓ of the test pressure of the tank. In § 178.168–1, paragraph (a)(3) uses a 66.6 percent figure. The AAR has requested that this discrepancy be corrected.	In § 173.314, the third sentence of Note 6 following the Table would be revised to read as follows: Note 6: • • • The discharge capacity of each of these safety relief devices must be sufficient to prevent building up of pressure in the tank in excess of 82⅓ percent of the tank test pressure. • • •
§ 173.315(c)	Docket HM–115 (48 FR 27674, June 16, 1983) revised paragraph (c)(1); however, that portion which read "The vapor pressure (psig) at 115 °F. must not exceed the design pressure of the cargo tank or portable tank container" was inadvertently omitted.	In § 173.315, paragraph (c) would be revised to read as follows: (c) Except as otherwise provided, the loading of a liquefied gas into a cargo tank or portable tank shall be determined by weight or by a suitable liquid level gauging device. The vapor pressure (psig) at 115 °F. must not exceed the design pressure of the cargo tank or portable tank container. The liquid portion of the gas shall not fill the tank at 105 °F. if the tank is insulated, or at 115 °F. if the tank is uninsulated, except that this requirement shall not apply to: • • • • •
§ 173.316	To provide filling limits for "air, refrigerated liquid" in cylinders	In § 173.316, paragraph (a)(2) would be amended by inserting the word "air" immediate before the work "argon", and the table would be amended by adding a column for "air" immediately preceding the column for "argon" to read as follows: (2) • • •

Pressure control valve setting (maximum start-to-discharge pressure, psig)	Maximum permitted filling density (percent by weight) Air
45	82.5
75	80.3
100	78.4
170	76.2

Pressure control valve setting (maximum start-to-discharge pressure, psig)	Maximum permitted filling density (percent by weight) Air
230	75.1
295	73.3
360	70.7
450	68.9

Pressure control valve setting (maximum start-to-discharge pressure, psig)	Maximum permitted filling density (percent by weight) Air
540	62.9
625	60.1
Design Service Temperature (°F.)	–320

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 173.316(b)(2)	To require the use of a primary and a secondary system of pressure relief devices on a cargo tank used in atmospheric gas (except oxygen) and helium, cryogenic liquid service. Proposed change is in response to a petition from the Compressed Gas Association.	In § 173.316, paragraphs (b)(2)(ii)(B), (b)(2) (iii) and (iv) would be revised to read as follows: (ii) *Tanks in atmospheric gas (except oxygen) and helium, cryogenic liquid service.* (B) The primary system of pressure relief valve or valves must have a flow capacity equal to or greater than that specified in 4.1.10.1.1 of CGA Pamphlet S1.2. The inlet connection shall not be less than ¾" nominal pipe size. The combined pressure relief system must have a flow capacity equal to or greater than that calculated by the applicable formula in paragraph 5.3.2 or paragraph 5.3.3 of CGA Pamphlet S–1.2. • • • • • (iii) The secondary system of frangible discs of additional pressure relief valves must have the minimum capacity specified in paragraph (b)(2)(ii) of this section, at a pressure not exceeding 150 percent of the tank design pressure (iv) The primary system of pressure relief valves must have a liquid flow capacity (rated at a pressure not exceeding 120 percent of the tank design pressure), that equals or exceeds the maximum rate at which the tank is to be filled. However, a rating pressure, for purpose of flow capacity not exceeding 150 percent of the tank design pressure is authorized on a tank used in atmospheric gas (except oxygen) and helium, cryogenic liquid service.
§ 173.316(b)(2) & (3).	To provide filling limits for "air, refrigerated liquid" and to increase the filling limit authorized for "hydrogen" when shipped in cargo tanks. Proposed changes respond to petitions from Air Products and Union Carbide Corp.	In § 173.316, paragraph (b)(2) would be amended by removing the word "argon" and inserting in its place the words "Air, argon", and the Table would be amended by adding a column for "air" immediately preceding the column for "argon," and paragraph (b)(3) would be amended by adding an entry in the Table for "hydrogen".

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 173.320	At present, shipments of atmospheric gas and helium, cryogenic liquid, in packagings authorized under this section do not have to conform with Subparts A and B of Part 173, and §§ 174.1 and 177.804. It was never the intent to except these cryogenic liquids from the above referenced sections. A change is needed to prevent the shipment of leaking packagings	In §§ 173.320 the last sentence in paragraph (a) would be revised to include a reference to paragraph (a)(3); paragraph (a)(3) would be redesignated as (a)(4), and a new paragraph (a)(3) would be added to read as follows: (3) Subparts A and B of Part 173, and §§ 174.1 and 177.804 of this subchapter.
§ 173.985	On November 17, 1983, Docket No. HM-168-D (48 FR 52308) inadvertently removed § 173.985. However, cotton is listed in the § 172.101 Table and reference § 172.985	§ 173.985 would be added to read as follows: § 173.985 *Cotton and other fibers.* Cotton and fibers jute, hemp, flax, sisal, coir, kapok, or similar vegetable fibers, when offered for transportation by water, must be packaged in bales, securely and tightly bound with rope, wire, or other similar means.
§ 174.9(b)	Reference paragraph states that heater coil inlet and outlet pipes must be left open for drainage. The Pennzoil Products Company reports that steam is applied only during the coldest portion of the winter season. When steam is applied, the heater caps must be left off to allow proper drainage. However, 95% of the time steam is not applied and removing and reapplying heater caps at the loading site, except during the cold season is time consuming and serves no useful purpose. The RSPA proposes to change the present word "must" to read "may"	In § 174.9 paragraph (b) would be revised to read as follows: (b) An empty tank car which previously contained a hazardous material and which is tendered for movement or received in interchange must have all manhole covers, outlet valve reducers, outlet valve caps, outlet valve cap plugs, end plugs, and plugs or caps or other openings securely in their proper places, except that heater coil inlet and outlet pipes may be left open for drainage.
§ 176.76(g)(2)	Construction standards for small passenger vessels certificated by the U.S. Coast Guard under 46 CFR Subchapter T are much less stringent than the standards for large passenger vessels. The Coast Guard believes that these small vessels are not suitable for the carriage of hazardous materials in portable tanks when carrying a full complement of passengers. These small vessels (commonly referred to as T-Boats) are used on a regular basis to carry passengers and supplies to offshore platforms and drill rigs. The Coast Guard has corrected this potential problem in the past by placing an endorsement on the vessel's Certificate of Inspection which permits them to carry hazardous materials in portable tanks only when no passengers are on board.	In § 176.76, paragraph (g)(2) would be revised to read as follows: (2) Small passenger vessels of 100 gross tons, or less, may carry a hazardous material in a portable tank only when 16 or less passengers are on board and only when specifically authorized by the Officer-in-Charge, Marine Inspection, by endorsement on the vessel's Certificate of Inspection.
§ 177.834(k)	The American Trucking Association, Inc., (ATA) has petitioned for the removal of paragraph (k) which reads as follows: "(k) *Access to mixed ladings.* Flammable solids, oxidizing materials, or corrosive liquids, when transported on a motor vehicle with other lading not otherwise forbidden, shall be so loaded as to provide ready access thereto for shifting or removal." The ATA believes that carrier operating practices should dictate how the weight of the load should be distributed throughout the trailer to insure an optimum level of vehicle stability and compliance with weight laws. The motor carrier also should be given the flexibility to load the trailer to minimize the possibility of lighter packages being crushed by heavier freight	In § 177.834, paragraph (k) would be removed and reserved. Also reference to paragraph (k) in the beginning of Sections §§ 177.835, 177.837, 177.838, 177.839, 177.840, and 177.841 would be amended to read (j).
§ 177.841(e)	To prohibit a motor carrier from carrying poisons or an irritating material in the passenger compartment of a motor vehicle. Incidents have occurred where a driver has placed a hazardous material (poison) in the passenger compartment and the packaging leaked which endangered the driver	In § 177.841, paragraph (e) would be revised by adding a sentence at the end to read as follows: (e) * * * No motor carrier may transport a packaging containing a material labeled "Poison", or "Poison gas", or "Irritant" in the drivers compartment of a motor vehicle.
§ 177.848(b)	This paragraph reads "cyanides or cyanide, mixtures must not be loaded or stored with acids or corrosive liquids." Cyanides and cyanide mixtures do not present an undue hazard by being stored next to or even by being mixed with corrosive liquids that are alkaline Several commenters have requested that this unnecessary restriction be removed	In § 177.848, paragraph (b) would be revised to read as follows: (b) Cyanides or cyanide mixtures must not be loaded or stored with acids or any other acidic materials which could release hydrocyanic acid from cyanides.
§ 178.42–14	For most specifications cylinders, any identification in the sidewall is prohibited. This proposed change clarifies that the markings on a DOT 3E cylinder may be stamped in the sidewall	In § 178.42–14, paragraph (a) would be revised to read: (a) Marking on each cylinder by stamping plainly and permanently on shoulder, top head, neck, or sidewall as follows: * * * * *
§ 178.46–4(a)	To correct and update the DOT-3AL Specification and to prohibit use of aluminum alloys with harmful quantities of lead and bismuth. The proposed threading requirements are expected to be included in all high pressure cylinder specifications in a future rulemaking. The proposal to authorize the 4D size tensile specimen for a second test to qualify a cylinder lot was indicated as acceptable in the preamble to Docket No. HM-176 but was not included in the final rule. Authorization to use the 4D bar in a second test does not apply to cylinders with sidewall thickness of 9/64 inch and less. RSPA believes that a valid test using the 4D size specimen cannot be obtained in this thickness range	In § 178.46–4, paragraph (a) would be revised to read as follows: § 178.46–4 *Duties of the Inspector.* (a) The inspector shall determine that all materials are in compliance with the requirements of this specification.
§ 178.45–5(g)(1) and (2).		
§ 178.46–5(c).		
§ 178.46–5(e).		
		* * * * *
		In § 178.46–5, Table 1 and footnote 2 of Table 2 in paragraph (d) would be revised to read as follows: § 178.46–5 *Authorized material and identification of material.* * * * * *
		(d) * * *

(1) CHEMICAL COMPOSITION LIMITS [1]

(Chemical Composition (in weight percent))

Aluminum Assoc. alloy designation No.	Si	Fe	Cu	Mn	Mg	Cr	Zn	Ti	Pb	Bi	Other [2] Each	Other [2] Total	Al
6351	0.7–1.3	0.50	0.10	0.40–0.80	0.40–0.80		0.20	0.20	0.01	0.01	0.05	0.15	Remainder.
6061	0.40–0.80	0.70	0.15–0.40	0.15	0.80–1.20	0.04–0.35	0.25	0.15	0.01	0.01	0.05	0.15	Remainder.

[1] ASTM B 221–76 Standard Specification for Aluminum-Alloy Extruded Bars, Rods Shapes, and Tubes, Table 1 Chemical Composition Limits, except for Pb and Bi. Limits are in percent maximum unless otherwise indicated.

[2] Analyses is regularly made only for the elements for which specific limits are shown, except for unalloyed aluminum. If, however, the presence of other elements is suspected to be, or in the course of routine analyses is indicated to be in excess of specified limits, further analyses is made to determine that these other elements are not in excess of the amount specified. (Aluminum Association Standards and Data–Sixth Edition 1979).

Regulation affected	Reason(s) for proposed change	Proposed amendment
		(2) *Mechanical Property Limits.* . . . . .
		1 "D" represents specimen diameters. When the cylinder wall is greater than ¾ inch thick, a retest without retreat treatment using the 4D size specimen is authorized if the test using the 2 inch size specimen fails to meet elongation requirements.
		. . . . .
		In § 178.46–6, paragraph (c) would be revised to read as follows:
		§ 178.46–6 *Manufacture.*
		. . . . .
		(c) Thickness of the cylinder base may not be less than the prescribed minimum wall thickness of the cylindrical shell. The cylinder base must have a basic torispherical, hemispherical, or ellipsoidal interior base configuration where the dish radius is no greater than 1.2 times the inside diameter of the shell. The knuckle radius may not be less than 12 percent of the inside diameter of the shell. The interior base contour may deviate from the true torispherical, hemispherical or ellipsoidal configuration provided,
		(1) any areas of deviation are accompanied by an increase in base thickness;
		(2) all radii of merging surfaces are equal to or greater than the knuckle radius;
		(3) each design has been qualified by successfully passing the cycling tests in § 178.46–6(f); and
		(4) that detailed specifications of the base design are available to the inspector.
		. . . . .
		In § 178.46–8, paragraph (e) would be revised to read as follows:
		§ 178.46–8 *Openings.*
		. . . . .
		(e) All openings must be threaded. Threads must comply with the following:
		(1) Each thread must be clean cut, even, without checks, and to gauge.
		(2) Taper threads, when used, must comply with one of the following:
		(i) American Standard Pipe Thread (NPT) type must comply with the requirements of Federal Standard H–28 (1978), Section 7.
		(ii) National Gas Taper Thread (NGT) type must comply with the requirements of Federal Standard H–28 (1978), Sections 7 and 9.
		(iii) Other taper threads in compliance with other standards may be used provided the length is not less than that specified for NPT threads.
		(3) Straight threads when used must comply with one of the following:
		(i) National Gas Straight Thread (NGS) type must comply with the requirements of Federal Standard H–28, (1978), Sections 7 and 9.
		(ii) Unified Thread (UN) type must comply with the requirements of Federal Standard H–28 (1978), Section 8.
		(iii) Controlled Radius Root Thread (UNJ) type must comply with the requirements of Federal Standard H–28 (1978), Section 4.
		(iv) Other straight threads in compliance with other recognized standards may be used provided that the requirements in (4) below are met.
		(4) All straight threads must have at least 8 engaged threads, a tight fit, and a factor of safety in shear of at least 10 at the test pressure of the cylinder. Shear stress must be calculated by using the appropriate thread shear area in accordance with Federal Standard H–28 (1978), Appendix A6, Section 3.
§ 178.51–10(d) § 178.61–10(b)	At the present time, these two sections state that for cylinders with wall thicknesses less than 0.100 inch, the ratio of tangential length to outside diameter shall not exceed 4.0. The 4.0 does not apply consistently. It is not in Specification 4B and is not in any of the seamless cylinder specifications. Based on a request from a cylinder manufacturer the RSPA is proposing to change the "4.0" to "4.1".	In § 178.51–10, paragraph (d) would be revised to read as follows: § 178.51–10 *Wall thickness.* . . . . . . (d) For cylinders with a wall thickness less than 0.100 inch, the ratio of tangential length to outside diameter may not exceed 4.1. In § 178.61–10, paragraph (b) would be revised as follows: In § 178.61–10 *Wall thickness.* . . . . . . (b) For cylinders with a wall thickness less than 0.100 inch, the ratio of tangential length to outside diameter may not exceed 4.1.
§ 178.53–8(a)	Editorial correction. The wall thickness for DOT Specification 4D cylinders states that the minimum wall for any container having a capacity of 1,100 cubic inches or less is 0.40 inch. The RSPA proposes to correct the "0.40" to read "0.04".	In § 178.53–8, paragraph (a) would be amended by changing 0.40 to read 0.04.
§ 178.54	To our knowledge, DOT Specification 4B240–FLW, welded or welded and brazed cylinders with fusion-welded longitudinal seam are not being made. At the time this specification was added to Part 178, Specification 4BW was not available. Therefore, since the 4B240–FLW cylinder is no longer being made and the 4BW cylinder is available, we are proposing to remove DOT Specification 4B240–FLW from Part 178. Part 173 would not be effected.	In Part 178, § 178.54 would be removed in its entirety.

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 178.245–1(a)	To remove the requirement that DOT Specification 51 portable tanks be postweld heat treated. Manufacturers of DOT–51 portable tanks, made for certain austenitic stainless steels, maintain that postweld heat treatment does not enhance the integrity of the tank. The ASME Code does not require postweld heat treatment on this particular type of steel because such treatment is not beneficial. RSPA agrees with the manufacturer's position.	In § 178.245–1, the introductory text of paragraph (a) would be revised to read as follows: § 178.245–1 *Requirements for design and construction.* (a) Tanks must be seamless or welded steel construction or combination of both and must have a water capacity in excess of 1,000 pounds. Fusion welded tanks must be postweld heat treated and radiographed to provide the highest joint efficiency provided by the ASME Code, except that postweld heat treatment of tanks made from austenitic stainless steel grades 304L, 316L, 321 and 347 shall be as required by the ASME Code. Tanks must be designed and constructed in accordance with and fulfill the requirements of the ASME Code. Tanks constructed in accordance with the requirements of Part UHT of the ASME Code must comply with the following additional requirements:
§ 179.100–13(a)	The referenced paragraph discusses the bolting of venting, loading and unloading valves to seatings on manway covers. The AAR has requested that the word "directly" be removed because the present wording can be interpreted as prohibiting the use of intervening eductor pipe flange between a valve and a manway cover.	In § 179.100–13, the second sentance in paragraph (a) would be revised to read as follows: § 179.100–13 *Venting, loading and unloading valves, measuring and sampling devices.* (a) * * * The valves shall be bolted to seatings on the manway cover, except as provided in § 179.103. * * *
§ 179.100–14(a)(1). § 179.100–14(a)(3).	To improve railroad safety by (1) increasing the minimum allowable vertical clearance requirements for bottom outlets; (2) regulating the use of supplementary bottom outlet fittings; and (3) clarifying the requirement for bottom outlet and shear breakage groove requirements.	In § 179.100–14, paragraph (a)(1) and (a)(3) would be revised to read as follows: (a) * * * (1) The extreme projection of the bottom washout equipment may be no more than that allowed by Appendix E of the AAR Specifications for Tank Cars. (2) * * * (3) If the bottom washout nozzle extends 8 inches or more from shell of tank, a V-shaped breakage groove must be cut (not cast) in the upper part of the outlet nozzle at a point immediately below the lowest part of the inside closure seat or plug. In no case shall the nozzle wall thickness at the root of the "V" be more than ¼-inch. Where the nozzle is not a single piece, provision must be made for the equivalent of the breakage groove. The nozzle must be of a thickness to insure that accidental breakage will occur at or below the "V" groove or its equivalent. On cars without continuous center sills, the breakage groove or its equivalent must not be more than 15 inches below the tank shell. On cars with continuous center sills, the breakage groove or its equivalent must be above the bottom of the center sill construction.
§ 179.102–2(a)(3)	The Chlorine Institute has requested that this subparagraph be updated to allow the use of a new insulation package on future tank cars for chlorine. A fire test was conducted and the fire protection capability of the ceramic fiberglass fiber system is excellent and well below the targeted limit of 483 degrees. F. Without sacrificing any other properties.	In § 179.102–2, paragraph (a)(3) would be revised to read as follows: § 179.102–2 *Chlorine.* (a) * * * (3) Insulation must be 4 inches minimum thickness of corkboard or of self-extinguishing polyurethane foam or must be 2 inches minimum thickness of 4 pounds per cubic foot minimum density ceramic fiber covered by 2 inches minimum thickness of glass fiber.
§ 179.102–13	To improve railroad safety by requiring that hydrogen fluoride tank cars be constructed of corrosion resistant materials.	§ 179.102–13 would be revised to read as follows: § 179.102–13 *Hydrofluoric acid, anhydrous.* (a) Tank cars used to transport hydrofluoric acid, anhydrous, must comply with the following special requirements: (1) Bottom openings in tank are prohibited. (2) Plates for the tank shell, heads and manway must comply with Specification ASTM A516, Grade 70 normalized, or ASTM A537, Class 1. (3) Tanks must be postweld heat treated at 1,100 °F minimum; postweld heat treatment at the alternate lower temperatures listed in AAR Specifications for Tank Cars, Appendix W, is prohibited. (4) If welding or welded repairs are required on the tank shell, heads or manway nozzle after the tank is postweld heat treated, the tank or area repaired must be postweld heat treated again after the welding is completed. In such instances, the temperature must be controlled to provide protection for the adjacent metal to prevent a harmful temperature gradient. (5) The maximum hardness of the weld in the heat-affected zone may be no more than Brinell 237 (Rockwell C 22), measured on the production test plate on the cross section, after welding and final post-weld heat treatment. (6) Valves, valve parts, and other appurtenances normally in contact with the lading must comply with the National Association of Corrosion Engineers' Publication MR–01–75 and must be approved for hydrogen fluoride service. Ferritic stainless steels may not be used. (7) Safety relief valves must be in combination with either a breaking pin device or a frangible disc. See § 179.100–15(b) and (c). (8) Fasteners used in valve assemblies must conform to the National Association of Corrosion Engineers' Publication MR–01–75 and must be approved for hydrofluoric acid, anhydrous. Ferritic stainless steels may not be used. Studs, bolts, and nuts used to fasten any valves or fittings to the cover plate or the cover plate to the manway ring must meet the following specifications: (a) Studs and bolts: ASTM A–193–B7M; or ASTM A–193–B7-maximum hardness may be no more than Brinell 237 (Rockwell C–22); or ASTM A–320–L7-maximum hardness may be no more than Brinell 237 (Rockwell C–22). (2) Nuts ASTM A–194–2M; or ASTM A–194–2-maximum hardness may be no more than Brinell 237 (Rockwell C–22). (9) Each tank must be marked "HYDROGEN FLOURIDE" in accordance with § 172.330.

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 179.100–8(b)(1), § 179.100–8(b)(4)	To improve railroad safety	In § 179.100–8, paragraphs (b)(1) and (b)(4) would be revised to read as follows: (b) • • • (1) The extreme projection of the bottom outlet equipment may be no more than that allowed by Appendix E of the AAR Specifications for Tank Cars. All bottom outlet reducers and closures and their attachments must be secured to car by at least 3/8-inch chain, or its equivalent, except that bottom outlet closure plugs may be attached by ¼-inch chain. When the bottom outlet closure is of the combination cap and valve type, the pipe connection to the valve must be closed by a plug, cap, or approved quick coupling device. the bottom outlet equipment should include only the valve, reducers and closures that are necessary for the attachment of unloading fixtures. The permanent attachment of supplementary exterior fittings must be approved by the Director, Office to Hazardous Materials Transportation. • • • • • (4) If the outlet nozzle extends 6 inches or more from shell of tank, a V-shaped breakage groove must be cut (not cast) in the upper part to the outlet nozzle at a point immediately below the lowest part of valve closest to the tank. In no case shall the nozzle wall thickness at the root of the "V" be more than ⅛ inch. On cars without continuous center sills, the breakage groove or its equivalent must not be more than 15 inches below the tank shell. On cars with continuous center sills, the breakage groove or its equivalent must be above the bottom of the center sill construction. • • • • •
§ 179.200–7 Tables.	The Association of American Railroads has requested that referenced section be amended to resolve the confusion that exists between the AAR Specification for Tank cars, Appendix M and the ASTM Specifications covering the variation of minimum elongation between the welded condition and the as rolled base metal.	In § 179.200–7, the third column of the Tables in paragraphs (b), (c), (d), (e), and (f) would be revised to read as follows: Minimum elongation in 2 inches (percent) weld metal (longitudinal)
§ 179.200–13	The specifications for pressure tank car tanks recognize that many nozzle-to-tank joints are neither the butt nor lap-joint types (§ 179.100–12(a)). The specifications for non-pressure tank car tanks require that such joints be of the butt or lap-joint type (§ 179.200–13 (c). The AAR has requested that the two sets of specifications be consistent.	In § 179.200, § 179.200–13 would be revised to read as follows: § 179.200–13 *Manway ring or flange, safety relief device flange, bottom outlet nozzle flange, bottom washout nozzle flange and other attachments and openings.* (a) These attachments shall be fusion welded to the tank and reinforced in an approved manner in compliance with the requirements of Appendix E, Figure 10, of the AAR Specifications for Tank cars. (b) The opening in the manway ring shall be at least 16 inches in diameter except that acid resistant lined manways shall be at least 16 inches in diameter before lining. (c) The manway ring or flange, if riveted to the dome or tank, shall be of cast, forged or fabricated steel, malleable iron or other malleable metals. (d) The manway ring or flange, if welded to the dome, tank or nozzle, shall be made of cast, forged or fabricated metal. The metal of the dome, tank, or nozzle shall be compatible with the manway ring or flange, so that they may be welded together. (e) The openings for the manway or other fittings shall be reinforced in an approved manner.
§ 179.200–17 (a)(1), (a)(6), (a)(7), (b)(1), and (b)(3).	The AAR contends that the present wording is unclear and recommends these proposed changes.	In § 179.200–17, paragraphs (a)(1), (a)(6), (a)(7), (b)(1), and (b)(3) would be revised to read as follows: (a) • • • (1) The extreme projection of the bottom outlet equipment may be no more than that allowed by Appendix E of the AAR Specifications for Tank Cars. All bottom outlet reducers and closures and their attachments must be secured to the car by at least ⅜-inch chain, or its equivalent, except that the bottom outlet closure plugs may be attached by ¼-inch chain. When the bottom outlet closure is of the combination cap and valve type, the pipe connection to the valve must be closed by a plug, cap, or approved quick coupling device. The bottom outlet equipment should include only the valve, reducers and closures that are necessary for the attachment of unloading fixtures. The permanent attachment of supplementary exterior fittings must be approved by the Director, Office of Hazardous Materials Transportation. • • • • • (6) To provide for the attachment of unloading connections, the discharge end of the bottom outlet nozzle or reducer, the valve body of the exterior valve, or some fixed attachment thereto, must be provided with one of the following arrangements or an approved modification thereof. (See Appendix E, Fig. E17 of the AAR Specifications for Tank Cars for illustrations of some of the possible arrangements.) (i) A bolted flange closure arrangement including a minimum 1-inch NPT pipe plug (see Fig. E17.1) or including an auxiliary valve with a threaded closure. (ii) A threaded cap closure arrangement including a minimum 1-inch NPT pipe plug (see Fig. E17.2) or including an auxiliary valve with a threaded closure. (iii) A quick-coupling device using a threaded plug closure of at least 1-inch NPT or having a threaded cap closure with a minimum 1-inch NPT pipe plug (see Fig. E17.3 through E17.5). A minimum 1-inch auxiliary test valve with a threaded closure may be substituted for the 1-inch pipe plug (see Fig. E17.6). If the threaded cap closure does not have a pipe plug, or integral auxiliary test valve, a minimum 1-inch NPT pipe plug must be installed in the outlet nozzle above the closure (see Fig. E17.7).

Regulation affected	Reason(s) for proposed change	Proposed amendment
		(iv) A two-piece quick-coupling device using a clamped dust cap which must include an in-line auxiliary valve, either integral with the quick-coupling device or located between the primary bottom outlet valve and the quick-coupling device. The quick-coupling device closure dust cap or outlet nozzle must be fitted with a minimum 1-inch NPT closure (see Fig. E17.8 and E17.9). (7) If the outlet nozzle extends 6 inches or more from the shell of the tank, a V-shaped breakage groove must be cut (not cast) in the upper part of the outlet nozzle at a point immediately below the lowest part of valve closest to the tank. In no case shall the nozzle wall thickness at the root of the "V" be more than ¼ inch. The outlet nozzle on interior valves or the valve body on exterior valves may be steam jacketed, in which case the breakage groove or its equivalent must be below the steam chamber but above the bottom of center sill construction. If the outlet nozzle is not a single piece, or if exterior valves are applied, provisions must be made for the equivalent of the breakage groove. On cars without continuous center sills, the breakage groove or its equivalent must be no more than 15 inches below the tank shell. On cars with continuous center sills, the breakage groove or its equivalent must be above the bottom of the center sill construction. • • • • • • (b) • • • 1. The extreme projection of the bottom washout equipment may be no more than that allowed by Appendix E of the AAR Specifications for Tank Cars. • • • • • • (3) If the washout nozzle extends 6 inches or more from the shell of the tank, a V-shaped breakage groove must be cut (not cast) in the upper part of the nozzle at a point immediately below the lowest part of the inside closure seat or plug. In no case shall the nozzle wall thickness at the root of the "V" be more than ¼ inch. Where the nozzle is not a single piece, provisions must be made for the equivalent of the breakage groove. The nozzle must be of a thickness to insure that accidental breakage will occur at or below the "V" groove or its equivalent. On cars without continuous center sills, the breakage groove or its equivalent must not be more than 15 inches below the outer shell. On cars with continuous centersills, the breakage groove or its equivalent must be above the bottom of the center sill construction.
§ 179.202-8	See § 179.245(a) Note 2.	In § 179.202, § 179.202-8, § 179.202-11, and § 179.202-16 would be revised to read as follows: § 179.202-8 *Chloroacetyl chloride.* Tank cars used to transport chloroacetyl chloride must have a nickel cladding with a minimum thickness of 1/16. Nickel cladding in tanks must have a minimum nickel content of at least 99 percent. Specification DOT–103ANW tank car tanks used to transport chloroacetyl chloride must be fabricated of nickel containing not more than 1 percent iron. Metal test coupons for welding procedure qualification must contain not more than 1 percent iron. All cast metal parts of the tank in contact with the lading must have a minimum nickel content of 96.7 percent. • • • • • •
§ 179.202-11	Present wording requires phosphorus trichloride to be transported in certain lined tank cars. § 173.271(a)(11) does not require a lining for DOT 103A, 103AW, and 111A100F2 tank cars.	In § 179.202-11 the second and third sentences would be revised to read as follows: § 179.202-11 *Phosphorus oxybromide, phosphorus oxychloride, phosphorus trichloride, and thio-phosphoryl chloride.* • • • Specification 103ANW tank cars used to transport transport phosphorus oxybromide, phosphorus oxychloride, phosphorus trichloride, and thiophosphonyl chloride, tanks must be fabricated of solid nickel containing not more than 1 percent iron. Metal test coupon for welding procedure qualification must contain not more than 1 percent iron. All cast metal parts of the tank in contact with the lading must have a minimum nickel content of approximately 98.7 percent. Specification 103A tank cars used to transport phosphorus trichloride must be lead-lined steel, or made of steel with a nicked cladding of a least 10 percent of the shell thickness. Specifications 103AW, 111A100F2, or 111A60W2 tank cars used to transport phosphorus trichloride must be lead-lined steel or made of steel with a minimum thickness of nickel cladding of 1/16-inch. Nickel cladding must have a minimum nickel content of at least 99 percent. Specification 103EW tank cars used to transport phosphorus trichloride and thiophosphonyl chloride must have tanks fabricated from Type 316 stainless steel. Unlined Specification 103A, 103AW, 111A100F2, or 111A100W2 tank cars are authorized for phosphorus trichloride only.
§ 179.202-16	See § 173.245(a) Note 2.	§ 179.202-16 *Chloroacetic acid, liquid.* (a) Tank cars used to transport Chloro-acetic acid, liquid, must have tanks with nickel cladding of at least 20 percent of the shell thickness. Nickel cladding in tanks must have a minimum nickel content of a least 99 percent. • • • • • • (b) Chloroacetic acid, anhydrous, when shipped as a liquid must be shipped in Specification 103ANW tank car tanks fabricated of nickel containing not more than 1 percent iron, or in Specification 103AW or 111A60W2 tank car tanks with nickel cladding of at least 20 percent of the shell thickness, or be provided with a suitable corrosion resistant coating or lining. Metal test coupons for welding procedure qualification must contain not more than 1 percent iron. Nickel cladding in tanks must have a minimum nickel content of at least 99 percent.
id		In § 179.202-16, paragraphs (a)(1), (a)(6), (b)(1), and (b)(3) would be revised to read as follows: (a) • • • (1) The extreme projection of the bottom outlet equipment may be no more than that allowed by Appendix E of the AAR Specifications for Tank Cars. All bottom outlet reducers and closures and their attachments must be secured to care by at at least ¾-inch chain, or its equivalent, except that bottom outlet closure plugs may be attached by ½-inch chain. When the bottom outlet closure is of the combination cap and valve type, the pipe connection to the valve must be closed by a plug, or cap. The bottom outlet equipment should include only the valve, reducers and closures that are necessary for the attachment of unloading fixtures. The permanent attachment of supplementary exterior fittings must be approved by the Director, Office of Hazardous Materials Transportation. • • • • • •

Regulation affected	Reason(s) for proposed change	Proposed amendment
		(ii) If outlet nozzle and its closure extends below the bottom of the outer shell, a V-shaped breakage groove must be cut (not cast) in the upper part of the outlet nozzle at a point immediately below the lowest part of the valve closest to the tank. In no case shall the nozzle wall thickness at the root of the "V" be more than ¼ inch. The outlet nozzle or the valve body may be steam jacketed, in which case the breakage groove or its equivalent must be below the steam chamber but above the bottom of the center sill construction. If the outlet nozzle is not a single piece or if exterior valves are applied, provision must be made for the equivalent of the breakage groove. On cars without continuous center sills, the breakage groove or its equivalent must not be more than 15 inches below the outer shell.
		• • • • •
		(h)* * *
		1. The extreme projection of the bottom washout equipment may be no more than that allowed by Appendix E of the AAR Specifications for Tank Cars.
		• • • • •
		(3) If washout nozzle extends below the bottom of the outer shell, a V-shaped breakage groove must be cut (not cast) in the upper part of the nozzle at a point immediately below the lowest part of the inside closure seat or plug. In no case shall the nozzle wall thickness at the root of the "V" be more than ¼ inch. Where the nozzle is not a single piece, provisions must be made for the equivalent of the breakage groove. The nozzle must be of a thickness to insure that accidental breakage will occur at or below the "V" groove or its equivalent. On cars without continuous center sills, the breakage groove or its equivalent must not be more than 15 inches below the outer shell. On cars with continuous center sills, the breakage groove or its equivalent must be above the bottom of the center sill construction.
§179.220–19(c)	To make an exception for the use of safety vents on DOT 115A tank cars for the transportation of chloroprene. See §179.222 for more information.	In §179.220–19, paragraph (c) would be amended by changing the last sentence to read as follows: (c) * * * Except for tanks for chloroprene (see §179.222–1), tanks equipped with vents must be stenciled "Not for flammable liquids".
§179.221–1	To add a "Special reference" to the Table in §179.221–1 for the 115A60W1 and 115A60W6 tank cars to coincide with the proposed change to §179.222 for the transportation of chloroprene.	In §179.221, the Table would be amended by adding an entry to read as follows:
		• • • • •
Special reference	§179.222–1	179.222–1
§197.222	To authorize DOT 115A tank cars for the transportation of chloroprene to be equipped with safety vents instead of safety relief valves. Chloroprene is classed as a flammable liquid. Also, it is polymerizable and its vapor discharging through a relief valve orifice may condense, build up, and plug the orifice. A minimum safety vent diameter of 12 inches is being proposed.	In Part 179, a new section §179.222 would be added to read as follows: §179.222 *Special commodity requirements for DOT 115A tank car tanks.* In addition to §179.220 and §179.221 the following requirements are applicable: §179.222–1 *Chloroprene.* DOT 115A tank car tanks used to transport chloroprene must be equipped with a safety vent with a diameter not less than 12 inches complying with §179.221–1 instead of a safety relief valve. The outer shell shall be stenciled "CHLOROPRENE ONLY" on both sides in letters not less than 1½ inches high.
§179.222–1		
§179.301	To add a new DOT Specification 110A600–W to the list of authorized multi-unit tank car tanks.	In §179.301, the Table would be amended by adding the following: §179.301 *Individual specification requirements for multi-unit tank car tanks.* (a) * * *

DOT specifications	100A600–W
Bursting pressure, psi (see 179.300–8)	1500
Minimum thickness shell, inches	⅜
Test pressure psi (see §179.300–16)	600
Safety relief devices psi (see §179.300–15)	
Start-to-discharge, or burst maximum psi	450
Vapor-tight, minimum psi	360

[1] None specified.

Issued in Washington, DC on May 23, 1986 under authority delegated in 49 CFR Part 106, Appendix A.

BILLING CODE 4910–60–M

Research and Special Programs Administration

49 CFR Part 192

[Docket No. PS–80, Notice 1]

Transportation of Natural and Other Gas by Pipeline; Period for Confirmation or Revision of Maximum Allowable Operating Pressure

AGENCY: Research and Special Programs Administration (RSPA).

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes to clarify the rule that a pipeline's maximum allowable operating pressure (MAOP) must be confirmed or revised within 18 months after an increase in class location. Some operators have misinterpreted this rule to bar later pressure testing to qualify a current MAOP if that pressure is reduced during the 18-month period. The proposed rule would clarify that the previously established MAOP of pipelines that have had their MAOP reduced to meet the 18-month deadline may be reinstated by pressure testing at any time after the 18-month period.

DATE: Interested persons are invited to submit written comments on this proposal by July 18, 1986. Late filed comments will be considered to the extent practicable.

ADDRESS: Comments should be sent to the Dockets Branch, Room 8426, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, and identify the docket and notice numbers. All

comments and other docket material are available in Room 8426 for inspection and copying between the hours of 8:30 am and 5:00 pm each working day.

FOR FURTHER INFORMATION CONTACT: L.M. Furrow, (202) 426–2392.

Address: Copies of the proposal and documents related thereto may be obtained from the Dockets Branch, Room 8426, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 426–3148.

SUPPLEMENTARY INFORMATION: By letter of January 22, 1985, (P–30), The Gas Piping Technology Committee of the American Society of Mechanical Engineers (ASME) petitioned RSPA to clarify the period allowed for confirmation or revision of a pipeline's MAOP following a change in class location.

Whenever an increase in population density causes an increase in a pipeline's designated class location, and the hoop stress corresponding to the pipeline's MAOP is not commensurate with the new class location, the MAOP must be confirmed or revised according to the rules in § 192.611. Paragraph (e) of § 192.611 requires that the confirmation or revision be completed within 18 months of the change in class location.

Section 192.611 permits alternative actions for pipelines that have not previously been pressure tested for at least 8 hours to at least 90 percent of specified minimum yield strength. These alternatives are (1) reduce the pipeline's MAOP (to the level where the corresponding hoop stress does not exceed the stress permitted for new pipelines in that class location (section 192.611(b)), or (2) pressure test the pipeline and either reestablish the original MAOP or establish a lower MAOP based on that test (section 192.611(c)).

Because of operating constraints, reductions in market demand or gas supplies, or other economic factors, operators sometimes find it more practical to reduce a pipeline's MAOP rather than conduct a pressure test, even though the existing MAOP may be needed to handle anticipated future operating conditions. However, ASME argues that the 18-month rule of § 192.611(e) thwarts this option because it makes the two alternatives mutually exclusive. In other words, ASME says operators who choose pressure reduction as a temporary measure are precluded from pressure testing at a later date to confirm the existing MAOP. As a result, operators are compelled to test within 18 months to preserve an existing MAOP, even though that pressure level is not necessary for current operations.

In contrast, RSPA does not believe that the 18-month rule blocks operators who choose one compliance option from later selecting the other. In an August 29, 1984, response to a waiver request from Tennessee Gas Pipeline (Petition 84–5W), RSPA said:

> [T]here is nothing in § 192.611(b), (c), or (e) that bars application of paragraph (c) once paragraph (b) has been applied. Under § 192.611, paragraphs (b) and (c) provide independent alternative ways to comply with the confirmation or revision rule. Choosing pressure reduction under paragraph (b) initially is not inconsistent in any way with testing later under paragraph (c) to confirm the preexisting MAOP. Paragraph (e) requires that confirmation or revision be done within 18 months after a class change occurs. It does not preclude taking alternative compliance action at a later date.

Still, RSPA is concerned, because of the ASME petition and the earlier waiver request, that § 192.611(e) may, in practice, be adversely affecting economical pipeline operations of some operators. Therefore, RSPA is proposing to amend § 192.611 by revising paragraph (e)(2) as set forth below to make it clear that operators who reduce a pipeline's MAOP under § 192.611(b) within the 18-month period may at a later date reinstate the preexisting MAOP by pressure testing under § 192.611(c).

Classification

Since this proposed rule will have a positive effect on the economy of less than $100 million a year, it will result in cost savings to consumers, industry, and government agencies, and no adverse impacts are anticipated the proposed rule is not "major" under Executive Order 12291. Also, it is not "significant" under Department of Transportation procedures (44 FR 11034). RSPA believes that the proposed rule will reduce the costs of confirmation or revision programs by reducing the number of pressure tests unnecessarily done to satisfy the current rule. However, this savings is not expected to be large enough to warrant preparation of a Draft Regulatory Evaluation.

Based on the facts available concerning the impact of this rulemaking action, I certify pursuant to Section 605 of the Regulatory Flexibility Act that the action will not, if adopted as final, have a significant economic impact on a substantial number of small entities.

List of Subjects in 49 CFR Part 192

Pipeline safety, Maximum allowable operating pressure.

PART 192—[AMENDED]

In view of the above, RSPA, proposes to amend Part 192 to Title 49 of the Code of Federal Regulations as follows:

1. The authority citation for Part 192 continues to read as set forth below:

> **Authority:** 49 U.S.C. 1672; U.S.C. 1804; 49 CFR 1.53 and Appendix A of Part 1.

2. Section 192.611(e)(2) would be revised to read as follows:

§ 192.611 Change in class location: Confirmation or revision of maximum allowable operating pressure.

* * * * *

(e) * * *

(2) Confirmation or revisicn due to changes in class location that occur on or after July 1, 1973, must be completed within 18 months of the change in class location. Pressure reduction under paragraph (b) of the section within the 18-month period does not preclude establishing a maximum allowable operating pressure under paragraph (c) at a later date.

Issued in Washington, DC on May 29, 1986, under authority delegated by 49 CFR Part 106, Appendix A.

Robert L. Paullin,

Director, Office of Pipeline Safety.

Notices

Federal Register
Vol. 51, No. 106
Tuesday, June 3, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Citizen's Advisory Committee on Equal Opportunity; Meeting

In accordance with Section 10(a) (2) of the Federal Advisory Committee Act (Pub. L. 92-463), an announcment is made of the following committee meeting:

Name: Citizen's Advisory Committee on Equal Opportunity.

Date: July 28-30, 1986.

Place: Park East Hotel, 916 East State Street, Milwaukee, Wisconsin 53202.

Time: 9:00 a.m.—5:00 p.m.

Purpose:

—Advise the Secretary on the effectiveness of compliance program directives;

—Review all aspects of the Department's policies, practices, and procedures on Equal Opportunity;

—Recommend changes in Department rules, regulations, and orders to assure USDA activities are free from discrimination;

—Additionally, the Committee will focus on:

—Review of the status of Equal Employment Opportunity in the Department of Agriculture;

—Employment programs and constituent services in the Forest Service;

The meeting is open to the public. Persons may participate in the meeting as time and space permit. Persons who wish to address the Committee at the meeting or who wish to file written comments before or after the meeting should contact: Lawrence Bembry, Associate Director, Equal Opportunity, Office of Advocacy and Enterprise, 201 14th Street, SW., Room 2305 Auditors Building, Washington, DC 20024 (202) 447-5681.

Written statements may be submitted until July 11, 1986.

Lawrence Bembry,

Associate Director, Equal Opportunity, Office of Advocacy and Enterprise.

BILLING CODE 3410-54-M

Food and Nutrition Service

Level of Donated-Food Assistant or Cash in Lieu Thereof for Nutrition Program for the Elderly Fiscal Year 1985

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice.

SUMMARY: This notice announces the level of assistance for the Nutrition Program for the Elderly for Fiscal Year 1985. Based on final meal participation data reported for Fiscal Year 1985, 225,293,379 meals were served. Given the total funding of $120,800,000 for Fiscal Year 1985, the per-meal level of assistance is set at $.53618 per meal in accordance with section 311(c)(2) of the Older Americans Act of 1965 (the Act).

EFFECTIVE DATE: October 1, 1984.

FOR FURTHER INFORMATION CONTACT: Beverly King, Chief, Program Administration Branch, Food Distribution Division, Food and Nutrition Service, U.S. Department of Agriculture, Alexandria, Virginia 22302 (703) 756-3660.

SUPPLEMENTARY INFORMATION: This action, which implements a mandatory provision of section 311 of the Act, has been reviewed under Executive Order 12291 and Secretary's Memorandum No. 1512-1 and has been classified as "nonmajor" because it does not meet any of the three criteria in the definition of "major rule" in the Executive Order. It will not have an annual effect on the economy of $100 million or more, will not cause a major increase in costs or prices, and will not have a significant impact on competition, employment, productivity, innovation, or the ability of U.S. enterprises to compete. The purpose of this action is to notify States of the level of donated-food assistance to be povided for nutrition services under the Act during Fiscal Year 1985.

This notice imposes no new reporting or recordkeeping provisions that are subject to Office of Management and Budget review.

The Nutrition Program for the Elderly was funded at $120,800,000 for Fiscal Year 1985 to carryout the provisions of section 311(a)(4). On August 19, 1985, (50 FR 33363) a Federal Register Notice was published stating that the total number of meals served in Fiscal Year 1985 might exceed the previous estimate of 212,800,000. It was estimated that the total number of meals might range between 220 million and slightly above 230 million, based on estimates of meals to be served and that the per-meal reimbursement rate would depend on the final meal count. Final meal participation data has now been reported to the Department which indicates that 225,293,379 meals were served. Therefore, the per-meal reimbursement rate is set at $.53618 for Fiscal Year 1985. The final meal rate is calculated by dividing the $120,800,000 funding level by 225,293,379 meals served. This rate applies to all eligible meals served in fiscal year 1985.

(42 U.S.C. 3030a)

BILLING CODE 3410-30-M

Food Stamp Program: Adjustment of Income Eligibility Standards

AGENCY: Food and Nutrition Service, USDA.

ACTION: General notice.

SUMMARY: The Department is adjusting the limits on gross and net income which certain households may have and still be eligible for food stamps. The Food Stamp Act of 1977, as amended, requires the Department to make this adjustment each year. By adjusting the income elibility limits, the Program takes into account changes in the cost of living.

EFFECTIVE DATE: July 1, 1986.

FOR FURTHER INFORMATION CONTACT: Thomas O'Connor, Supervisor, State Management Section, Administration and Design Branch, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, USDA, Alexandria, Virginia, 22302, (703) 756-3385.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291

The Department has reviewed this action under Executive Order 12291 and Secretary's Memorandum No. 1512–1. This action will affect the economy by less than $100 million a year. It will not significantly raise costs or prices for consumers, industries, government agencies or geographic regions. There will not be significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, the Department has classified this action as "not major".

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the Final Rule related Notice to 7 CFR Part 3015, Subpart V (48 FR 29115), this program is excluded from the scope of Executive Order 12372, which requires intergovernmental consultation with State and local officials.

Publication

State agencies must implement the new standards on July 1, 1986, and these offices need adequate advance notice of the new standards to carry out all steps necessary for them to meet the implementation deadline. Based on regulations published at 47 FR 46485–46487 (October 19, 1982), annual statutory adjustments to the gross and net monthly income eligibility standards are issued by General Notices published in the **Federal Register** and not through rulemaking procedures.

Regulatory Flexibility Act

The Administrator of the Food and Nutrition Service has certified that this action will not have a significant economic impact on a substantial number of small entities. The action will primarily affect State and local welfare agencies and future food stamp applicants. The effect upon the welfare agencies is not significant.

Paperwork Reduction Act

This action does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget (OMB).

Background

All households, except those in which all members are receiving public assistance or supplemental security income benefits, must meet the Food Stamp Program's income eligibility standards. Households which contain an elderly or disabled member must meet the net income eligibility standards—equal to the poverty level. Households which do not contain an elderly or disabled member must meet both the net income eligibility standards and the gross income eligiblity standards—equal to 130 percent of the poverty level. In addition, elderly individuals (and their spouses) unable to prepare meals because of certain disabilities may be considered separate households even if they are living and eating with another household. The Act limits this exception to those persons who meet both of the following requirements: (1) Their own income may not exceed the net income eligibility standards, and (2) the income of those with whom they reside may not exceed 165 percent of the poverty level. The Food Stamp Act requires that the gross and net income eligibility standards take into account the annual adjustments of the poverty guidelines issued by the Department of Health and Human Services. The elderly/disabled standards must also be adjusted. These adjustments are set forth in the following tables.

NEW MONTHLY INCOME ELIGIBILITY STANDARDS

[100% of poverty level]

Household size	48 States[1]	Alaska	Hawaii

BILLING CODE 3410-30-M

DEPARTMENT OF COMMERCE

Minority Business Development Agency

Applications Under Minority Business Development Center Program

May 23, 1986.

AGENCY: Minority Business Development Agency.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting applications under its Minority Business Development Center (MBDC) Program to operate a MBDC for a 3 year period, subject to available funds. The cost performance for the first 12 months is estimated at $694,118 for the project performance period of September 1, 1986 to August 31, 1987. The first year cost for the MBDC will consist of $590,000 in Federal funds and a minimum of $104,118 in non-Federal funds (which can be a combination of cash, in-kind contribution and fees for services).

The I.D. Number for this project will be 09–10–86015–01.

The funding instrument for the MBDC will be a cooperative agreement and competition is open to individuals, non-profit organizations, local and state governments, American Indian tribes and educational institutions.

The MBDC will provide management and technical assistance to eligible clients for the establishment and operation of businesses. The MBDC program is designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDC support MBDC

programs that can: coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be judged on the experience and capability of the firm and its staff in addressing the needs of minority business individuals and organizations; the resources available to the firm in providing management and technical assistance; the firm's proposed approach to performing the work requirements included in the application; and the firm's estimated cost for providing such assistance. It is advisable that applicants have an existing office in the geographic region for which applying.

The MBDC will operate for a three (3) year period with periodic reviews culminating in annual evaluations to determine if funding for the project should continue. Continued funding will be at the discretion of MBDC based on such factors as the MBDC's satisfactory performance, the availability of funds, and Agency priorities.

A pre-application conference to assist all interested applicants will be held at the following address and time:

Minority Business Development Agency, U.S. Department of Commerce, 221 Main Street, Room 1280, San Francisco, California 94105

June 11, 1986 at 10:00 A.M.

Proposals Are To Be Mailed to the Following Address

Minority Business Development Agency, U.S. Department of Commerce, San Francisco Regional Office, 221 Main Street, Room 1280, San Francisco, California 94105, 415/974-9597.

DATES: Closing date: The closing date for application is June 20, 1986. Applications must be postmarked by midnight, June 20, 1986.

FOR FURTHER INFORMATION CONTACT: Dr. Xavier Mena, Regional Director, San Francisco Regional Office.

SUPPLEMENTARY INFORMATION: Questions concerning the preceding information, copies of application kits and applicable regulations can be obtained at the above address.

May 22, 1986.

11.800 Minority Business Development. (Catalog of Federal Domestic Assistance)

Victor Cassus,

Regional Director, San Francisco Regional Office.

BILLING CODE 3510-21-M

National Oceanic and Atmospheric Administration

Marine Mammals Permit Application; NMFS, Northwest and Alaska Fisheries Center (P77#19)

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Fur Seal Act of 1966 (16 U.S.C. 1151-1187), and the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:

a. Name—Northwest and Alaska Fisheries Center, National Marine Fisheries Service.

b. Address—7600 Sand Point Way, N.E., Seattle, Washington 98115.

2. Type of Permit: Scientific research

3. Species: Northern fur seal *(Callorhinus ursinus)*.

4. Number and Type of Take:

To take annually for five (5) years up to 1,500 females, 2,500 males and 32,500 pups of either sex may be captured by the use of physical and/or chemical restraint for marking (which may include the use of tags, paint, bleach, shearing, branding, tattooing, and injection of tetracycline); handling (which may include weighing, examining, measuring, obtaining blood, milk, and swab samples, identifying sex, and administering lavage and enema procedures); and release near the capture site. All of the above takes may occur an unspecified number of times per individual each year.

Of the above: Up to 250 may have instruments affixed which may include sensors, recorders, radio transmitters, and satellite-linked electronics. Take by instrumenting will involve a maximum of 10 recaptures per individual each year for instrument monitoring; up to 40 will be injected with labeled water which may include holding individuals captive, injecting radioisotopic water, and obtaining blood and milk samples. This type of take will involve a maximum of 5 recaptures and processing per individual per year; up to 50 will be taken by experimental entangling which may include placing net webbing and/or other debris onto the necks of individuals. A maximum of 10 recaptures per individual per year will be taken for the evaluation of the effects of the debris; and up to 50 will be held captive, which may consist of restraining individuals near their site of capture for periods of up to one month. Take by holding captive may occur up to a maximum of 5 times per individual each year.

In addition, throughout the duration of the permit 300 animals will be taken by incidental entanglement and/or death associated with research on interactions between large fragments of marine debris and 1,800 will be taken by intentional sacrifice or incidental killing. An unspecified number may be taken by incidental harassment by ground surveys, aerial surveys, boat or ship surveys, and activities supporting northern fur seal research. An unspecified amount of specimen material will be collected from animals killed during harvest activities and found dead during the course of the research. The applicant is also requesting authorization to import specimen material collected by official representatives of the governments of Canada, Japan, or the USSR for scientific research.

5. Location of Activity: Alaska: Pribilof Islands, Bering Sea, Boqoslof Island, Aleutian Islands; and the Channel Islands of California.

6. Period of Activity: 5 years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, DC 20235, within 30 days of the publications of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, DC;

Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way, N.E., BIN C15700, Seattle, Washington 98115;

Director, Alaska Region, National Marine Fisheries Service, 700 West 9th Street, Federal Building, Juneau, Alaska 99902; and

Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731.

Dated: May 29, 1986

Henry R. Beasley,

Director, Office of International Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-M

National Technical Information Service

Intent to Grant Exclusive Patent License; United Merchants and Manufacturers, Inc.

The National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to United Merchants and Manufacturers, Inc. having a place of business in New York, NY an exclusive right in the United States to manufacture, use, and sell products embodied in the invention entitled "Process for Reinforced Yarn with Glass Fiber Core," U.S. Patent 4,541,231. The patent rights in this invention have been assigned to the United States of America, as represented by the Secretary of Commerce.

The proposed exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The proposed license may be granted unless, within sixty days from the date of this published Notice, NTIS receives written evidence and argument which establishes that the grant of the proposed license would not serve the public interest.

Inquiries, comments and other materials relating to the proposed license must be submitted to Douglas J. Campion, Office of Federal Patent Licensing, NTIS, Box 1423, Springfield, VA 22151.

Douglas J. Campion,

Office of Federal Patent Licensing, U.S. Department of Commerce, National Technical Information Service.

BILLING CODE 3510-04-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Issuance of Marine Mammals; Permit; Dr. Lanny H. Cornell and Mr. Edward D. Asper (P373)

On January 27, 1986, notice was published in the **Federal Register** (51 FR 3382) that an application had been filed by Dr. Lanny H. Cornell, 1720 South Shores Road, San Diego, California 92109 and Mr. Edward D. Asper, 7007 Sea World Drive, Orlando, Florida 32821 to import unspecified number of all species of marine mammals for scientific research.

Notice is hereby given that on May 22, 1986 as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543), the National Marine Fisheries Service and the Fish and Wildlife Service jointly issued a Permit for the above taking subject to certain conditions set forth therein.

Issuance of this Permit, as required by the Endangered Species Act of 1973, is based on a finding that such Permit; (1) was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which are the subject of this Permit; (3) and will be consistent with the purposes and policies set forth in Section 2 of the Endangered Species Act of 1973. This Permit was also issued in accordance with, and is subject to Parts 220–222 of Title 50 CFR, the National Marine Fisheries Service regulations governing endangered species permits and Part 17 of Title 50 CFR, the Fish and Wildlife Service regulations governing endangered species.

The Permit is available for review by interested persons in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, DC;

Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731;

Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way, NE., BIN C15700, Seattle, Washington 98115;

Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930;

Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702; and

Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802.

Dated: May 21, 1986.

Richard B. Roe,

Director, Office of Fisheries Management, National Marine Fisheries Service.

Dated: May 22, 1986.

R.K. Robinson,

Chief, Branch of Permits, Federal Wildlife Permit Office.

BILLING CODE 3510-22-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Intelligence Agency Scientific Advisory Committee; Closed Meeting

AGENCY: Defense Intelligence Agency Scientific Advisory Committee, Defense.

ACTION: Notice of closed meeting.

SUMMARY: Pursuant to the provision of Subsection (d) of Section 10 of Pub. L. 92–463, as amended by Section 5 of Pub. L. 94–409, notice is hereby given that a closed meeting of a panel of the DIA Scientific Advisory Committee has been rescheduled from 17 June 1986 as follows:

DATE: 25 June 1986, 9:00 a.m. to 5:00 p.m.

ADDRESS: The DIAC, Bolling AFB, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Lieutenant Colonel Harold E. Linton, USAF, Executive Secretary, DIA Scientific Advisory Committee, Washington, DC 20301, (202/373–4930).

SUPPLEMENTARY INFORMATION: The entire meeting is devoted to the discussion of classified information as defined in Section 552b(c)(1), Title 5 of the U.S. Code and therefore will be closed to the public. Subject matter will be used in a special study on Microelectronics and Computers.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 86-12446 Filed 6-2-86; 8:45 am]

BILLING CODE 3810-01-M

DOD Advisory Group on Electron Devices; Advisory Committee; Closed Meeting

SUMMARY: The DOD Advisory Group on Electron Devices (AGED) announces a closed session ad-hoc meeting.

DATE: The meeting will be held at 1700, Thursday 19 June 1986.

ADDRESS: Palisades Institute for

Research Services, Inc., 2011 Crystal Drive, Suite 307, Arlington, Va 22202.

FOR FURTHER INFORMATION CONTACT: Mr. Harry Summer, AGED Secretariat, 201 Varick street, New York, NY 10014.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide the Under Secretary of Defense of Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The AGED Consultants Ad-Hoc meeting will be limited to the real-time review of the Science and Technology Review presented by the three Services to the Director, VHSIC/Electron Devices. The review will include details of classified defense programs thoughout.

In accordance with Section 10(d) of Pub. L. 92-463, as amended (5 U.S.C. App. II. 10(d) (1982)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly, this meeting will be closed to the public.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-AE-M

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Naval Research Advisory Committee Panel on U.S. Navy Anti-Submarine Warfare Technology 1986–1996 will meet on June 18–20, 1986, at the Naval Research Laboratory, Building 43, Washington, DC. The meeting will commence at 8:30 A.M. and terminate at 5:30 P.M. on June 18; and commence at 8:30 A.M. and terminate at 5:00 P.M. on June 19 and 20, 1986. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to evaluate the security of the present and future U.S. Navy surface fleet and undersea surveillance systems. The agenda will include technical briefings on the threat, surface ASW response, strategic and tactical performance requirements, undersea surveillance, and emerging technology. These briefings will contain information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and is in fact properly classified pursuant to such Executive order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander T. C. Fritz, U.S. Navy, Office of Naval Research (Code 100N), 800 North Quincy Street, Arlington, VA 22217–5000, Telephone (202) 696–4870.

Dated: May 28, 1986.

William F. Roos, Jr.,

Lieutenant, JACC, U.S. Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Naval Research Advisory Committee Panel on Under Ice Warfare Requirements will meet on June 24 and 25, 1986 at the Naval Research Laboratory, Washington, D.C. The meeting will commence at 8:00 A.M. and terminate at 5:00 P.M. on June 24 and 25, 1986. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to understand, deal with, and exploit environmental surveillance issues in polar waters, identify what study has been done on the subject thus far, identify promising technologies, and drive operational requirements to deal with under ice anti-submarine warfare. The agenda will include technical briefings on the threat, maritime strategy and environmental considerations. These briefings will contain classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and are in fact properly classified pursuant to such Executive order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this matter contact: Commander T. C. Fritz, U.S. Navy, Office of the Chief of Naval Research (Code 00NR), 800 North Quincy Street, Arlington, VA 22217–5000, Telephone (202) 696–4870.

Dated: May 28, 1986.

William F. Roos, Jr.,

Lieutenant, JACC, U.S. Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

Privacy Act of 1974; New and Amended Systems of Records

AGENCY: Department of the Navy, DOD.

ACTION: Notice of a new and three amended systems of records.

SUMMARY: The Department of the Navy proposes to add a new and amend three existing systems of records in its inventory of systems of records subject to the Privacy Act of 1974.

DATES: This proposed action will be effective without further notice July 3, 1986, unless comments are received which would result in a contrary determination.

ADDRESS: Send any comments to Mrs. Gwen Aitken, Privacy Act Coordinator, Office of the Chief of Naval Operations (OP-09B30), Department of the Navy, The Pentagon, Washington, DC 20350–

2000, telephone: 202–697–1459, autovon: 227–1459.

SUPPLEMENTARY INFORMATION: The Department of the Navy systems of records notices subject to the Privacy Act of 1974 have been published in the Federal Register as follows:

FR Doc. 86–10763 (51 FR 16096) May 16, 1986

A new system report, as required by 5 U.S.C. 552a(o) of the Privacy Act was submitted on the new system on April 4, 1986, pursuant to paragraph 4b of Appendix I to OMB Circular No. A–130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated December 12, 1985. The proposed amendments are not within the purview of 5 U.S.C. 552a(o) of the Privacy Act which requires the submission of an altered systems report.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

May 29, 1986.

New System

N01571–1

SYSTEM NAME:

Reserve Financial Management/ Training System (RESFMS).

SYSTEM LOCATION:

Primary-Commander, Naval Reserve Force, 4400 Dauphine Street, New Orleans, LA 70146–500.

Decentralized segments—Naval Reserve Surface Force, Naval Reserve Air Force and their claimancies.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All individuals who are members of the Naval Reserve and those that are recruited into the Naval Reserve Programs.

CATEGORIES OF RECORDS IN THE SYSTEM:

System comprises records reflecting information pertaining to reservist's Active Duty for Training (ACDUTRA) and associated personal information such as name/rank/grade, SSN, current address, academic, medical qualifications, schools and training information. The system also contains a Standard Document Number (SD) which is used to track cost of training, clothing and subsistence that is provided to the reservist.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 5031.

PURPOSE(S):

To write, modify and cancel orders for Naval Reservists performing ACDUTRA; to issue seabags, death benefits paid, per diem, travel, subsistence, drill pay, ACDUTRA and Temporary Active Duty (TEMAC) pay, disability payments, bonuses, school costs and special pay such as flight and sea pay, and to monitor training needs.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Blanket Routing Uses that appear at the beginning of the Department of the Navy's compilation apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING/ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Automated records are stored on magnetic tapes, disks and drums. Paper record, microfiche, printed reports and other related documents supporting the system are filed in cabinets and stored in authorized areas only.

RETRIEVABILITY:

Automated records are retrieved by SSN, name and standard document numbers.

SAFEGUARDS:

Within the computer center, controls have been established to distribute computer output over the counter only to authorized users. Specific procedures are also in force for the disposal of computer output. Output material in the sensitive category will be shredded. Computer files are kept in a secure, continuously manned area and are accessible only to authorized computer operators, programmers, enlisted management, placement, and distributing personnel who are directed to respond to valid, official requests for data. These accesses are controlled and monitored by the Security System.

RETENTION AND DISPOSAL:

History of ACDUTRA orders are maintained in the system for three years, then destroyed, Accounting documents are maintained in the system for three years (current year and two prior years). Paper documents for each year are destroyed one year after the lapse for the earliest appropriation year.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, Naval Reserve Force, 4400 Dauphine Street, New Orleans, LA 70146–5000.

NOTIFICATION PROCEDURE:

Information should be obtained from the systems manager. Requesting individuals should specify their full names. Visitors should be able to identify themselves by a commonly recognized evidence of identity. Written requests must be signed by the requesting individual.

RECORD ACCESS PROCEDURE:

The agency's rules for access to records may be obtained from the system manager.

CONTESTING RECORD PROCEDURES:

The agency's rules for contesting contents and appealing initial determinations by the individual concerned may be obtained from the systems manager.

RECORD SOURCE CATEGORIES:

Individuals concerned, disbursing officers, Navy schools, and military command to which the individual is attached.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

AMENDMENTS

N01070–3

System name:

Navy Personnel Records System (51 FR 16094) May 16, 1986.

Changes:

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

After the third paragraph, insert a new entry: "To officials and employees of the Veterans Administration in the performance of their duties relating to approved research projects."

N03760–1

System name:

Individual Flight Activity Report (51 FR 16129) May 16, 1986.

Changes:

System name:

Delete the entire entry and substitute with the following: "Naval Flight Record Subsystem (NAVFLIRS)".

System location:

Delete the entire entry and substitute with the following: "The primary data base is maintained at the Navy Maintenance Support Office, Mechanicsburg, PA 17055. Secondary data bases are maintained at the Naval Safety Center, Naval Air Station, Norfolk, VA 23511 and at Commandant of the Marine Corps, Headquarters, U.S. Marine Corps, Washington, DC 20380. Local data bases are maintained at all Navy and Marine Corps aviation ships. (See Directory of the Department of the

Navy mailing addresses). Additional Marine Corps sites are FMFPAC ASC 08, Camp Smith, HA; RASC, Camp Pendleton, CA; RJE, Marine Corps Air Station, Cherry Point, NC; 6th FASC, Marine Corps Air Station, Iwakuni, Japan and ASC, Marine Corps Base, Quantico, VA."

Categories of individuals covered by the system:

Delete the entire entry and substitute with the following:

"All aeronautically designated commissioned Navy and Marine Corps officers and enlisted members assigned as aircrew members in the operation of an aircraft in accordance with the direction of competent authority."

Categories of records in the system:

In line two, delete the sentence beginning with: "Total flight * * *" and substitute with the following: "Records contain personal identification (name, rank, SSN), and specific technical data related to the flight of Naval aircraft."

Authority for maintenance of the System:

Delete the entry in its entirety and substitute with the following: "10 U.S.C. 5031."

Purpose(s):

Delete lines 1–19 and substitute with the following: "NAVFLIRS consolidates the collection of Naval flight data into a single, locally controlled collection and correction system, and implements a standard data collection source document (the Naval Flight Record OPNAV 3710/4) throughout the Navy and Marine Corps. It further establishes a single central data base containing all Naval flight data."

Policies and Practices for Storing, Retrieving, Accessing, Retaining, and Disposing of Records in the System:

Retrievability:

Delete the entry in its entirety and substitute with: "Individual records are primarily retrieved by a unique document number assigned to each naval flight record. Additionally, each of the data elements such as pilot's social security number, model aircraft and squardon may be used to retrieve individual records."

Safeguards:

Delete the entry in its entirety and substitute with: "Magnetic tapes are stored in limited access areas and handled by personnel that are properly trained in working with automated systems of records."

Retention and Disposal:

Delete the entry in its entirety and substitute with the following: "The primary data base and the secondary data base at the Naval Safety Center are permanent. Records in the secondary data base at Headquarters, U.S. Marine Corps are erased from tape when the individual is removed from active flight status. Local data bases purge all magnetic tape records after 6 months."

System Manager(s) and Address:

Delete the entry in its entirety and substitute with the following: "Commander, Naval Air Systems Command, Washington, DC 20301."

N06320-2

System name:

Family Advocacy Program System (51 FR 18191) May 16, 1986.

Changes:

Categories of individuals covered by the system:

In line 5, after the phrase: "* * * all persons * * *" delete the phrase: "* * * suspected of * * *" and replace with: "* * * reported for * * *".

Categories of records in the system:

At the end of the entry, add a new sentence as follows: "Sponsor's SSN is maintained for appropriate central registry accountability."

Amended Systems

N01070-3

SYSTEM NAME:

Navy Personnel Records System.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To officials and employees of other Departments and Agencies of the Executive Branch of government, upon request, in the performance of their official duties related to the management, supervision and administration of military personnel and the operation of personnel affairs and functions.

To officials and employees of the National Research Council in Cooperative Studies of the National History of Disease; of Prognosis and of Epidemology. Each study in which the records of members and former members of the naval service are used must be approved by the Commander, Naval Military Personnel Command.

To officials and employees of the Department of Health and Human Services, Veterans Administration, and Selective Service Administration in the performance of their official duties related to eligibility, notification and assistance in obtaining benefits by members and former members of the Navy.

To officials and employees of the Veterans Administration in the performance of their duties relating to approved research projects.

To officials and employees of Navy Relief and the American Red Cross in the performance of their duties related to assistance of the members and their dependents and relatives.

To duly appointed Family Ombudsmen in the performance of their duties related to the assistance of the members and their families.

To state and local agencies in performance of their official duties related to verification of status for determination of eligibility for Veterans Bonuses and other benefits and entitlements.

To officials and employees of the Office of the Sergent at Arms of the United States House of Representatives in the performance of their official duties related to the verification of the active duty naval service of members of Congress.

Information as to current military addresses and assignments may be provided to military banking facilities who provide banking services overseas and who are reimbursed by the Government for certain checking and loan losses. For personnel separated, discharged or retired from the Armed Forces information as to last known residential or home of record address may be provided to the military banking facility upon certification by a banking facility officer that the facility has a returned or dishonored check negotiated by the individual or the individual has defaulted on a loan and that if restitution is not made by the individual the United States Government will be liable for the losses the facility may incur.

To state, local, and foreign (within Status of Forces agreements) law enforcement agencies or their authorized representatives in connection with litigation, law enforcement, or other matters under the jurisdiction of such agencies.

When required by Federal statute, by Executive Order, or by treaty, personnel record information will be disclosed to the individual, organization, or governmental agency as necessary.

The Blanket Routine Uses that appear at the beginning of the Department of

the Navy's compilation also apply to this system.

* * * * *

NO3760-1

SYSTEM NAME:

Naval Flight Record Subsystem (NAVFLIRS).

SYSTEM LOCATION:

The primary data base is maintained at the Navy Maintenance Support Office, Mechanicsburg, PA 17055. Secondary data bases are maintained at the Naval Safety Center, Naval Air Station, Norfolk, VA 23511 and at Commandant of the Marine Corps, Headquarters, U.S. Marine Corps, Washington, DC 20380. Local data bases are maintained at all Navy and Marine Corps aviation ships. (See Directory of the Department of the Navy mailing addresses). Additional Marine Corps sites are FMFPAC ASC 08, Camp Smith, HA: RASC, Camp Pendleton, CA; RJE, Marine Corps Air Station, Cherry Point, NC; 6th FASC, Marine Corps Air Station, Iwakuni, Japan and ASC, Marine Corps Base, Quantico, VA.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All aeronautically designated commissioned Navy and Marine Corps officers and enlisted members assigned as aircrew members in the operation of an aircraft in accordance with the direction of competent authority.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of each flight are submitted by the reporting custodian of the aircraft. Records contain personal identification (name, rank social security number), and specific technical data related to the flight of Naval aircraft.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 5031

PURPOSE(S):

NAVFLIRS consolidates the collection of Naval flight data into a single, locally controlled collection and correction system, and implements a standard data collection source document (the Naval Flight Record OPNAV 3710/4) throughout the Navy and Marine Corps. It further establishes a single central data base containing all Naval flight data. Records are also provided to the Commander, Naval Military Personnel Command for promotional screening, detailing and compliance with minimum standards. Summaries of flight activity for Marine Corps personnel are provided to the Commandant of the Marine Corps. Records of specific pilots or categories of pilots are provided to contractors, if required, for projects either funded by or deemed potentially valuable to the Department of the Navy.

To the Naval Audit Service to investigate certain phrases of the Naval Aviation Program.

* * * * *

RETRIEVABILITY:

Individual records are primarily retrieved by a unique document number assigned to each naval flight record. Additionally, each of the data elements such as pilot's social security number, model aircraft and squadron may be used to retrieve individual records.

SAFEGUARDS:

Magnetic tapes are stored in limited access areas and handled by personnel that are properly trained in working with automated systems of records.

RETENTION AND DISPOSAL:

The primary data base and the secondary data base at the Naval Safety Center are permanent. Records in the secondary data base at Headquarters, U.S. Marine Corps are erased from tape when the individual is removed from active flight status. Local data bases purge all magnetic tape records after 6 months.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, Naval Air Systems Command, Washington, DC 20361

* * * * *

NO6320-2

SYSTEM NAME:

Family Advocacy Program System.

* * * * *

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All beneficiaries entitled to care at Navy medical and dental facilities who abuse or neglect is brought to the attention of appropriate authorities, and all persons reported for abusing or neglecting such beneficiaries.

CATEGORIES OF RECORDS IN THE SYSTEM:

Medical records of suspected and confirmed cases of family member abuse or neglect, also, investigative reports, correspondence, family advocacy committee reports, follow-up and evaluative reports, and any other supportive data assembled relevant to individual family advocacy program files. Sponsor's SSN is maintained for appropriate central registry accountability.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

Proposed Information Requests

AGENCY: Department of Education.

ACTION: Notice of Proposed Information Collection Requests.

SUMMARY: The Director, Information Resources Management Service invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATE: Interested persons are invited to submit comments on or before July 3, 1986.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue, SW., Room 4074, Switzer Building, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 426-7304.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with an agency's ability to perform its statutory obligations.

The Director, Information Resources Management Service publishes this notice containing proposed information collection requests prior to the submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Agency form number (if any); (4) Frequency of the

collection; (5) The affected public; (6) Reporting burden; and/or (7) Recordkeeping burden; and (8) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: May 29, 1986.

George P. Sotos,

Director, Information Resources Management Service.

Office of Postsecondary Education

Type of Review: Extension.

Title: Application for Certification for Participation in Programs under Title IV of the Higher Education Act of 1965, as amended.

Agency Form Number: ED 633.

Frequency: Annually.

Affected Public: Businesses or other for profit.

Reporting Burden:

Responses: 1,500; Burden Hours: 3,000.

Recordkeeping Burden:

Recordkeepers: 0; Burden Hours: 0.

Abstract: This form is used by colleges, universities and vocational schools to apply to the Department of Education for certification to participate in student financial assistance programs under Title IV of the Higher Education Act of 1965, as amended.

Office of Postsecondary Education

Type of Review: Extension.

Title: Application for Grants and Contracts Under the Minority Institutions Science Improvement Program (MISIP).

Agency Form Number: ED 0007.

Frequency: Annually.

Affected Public: Businesses and other for profit; and non-profit institutions.

Reporting Burden:

Responses: 150; Burden Hours: 6,450.

Recordkeeping Burden:

Recordkeepers: 0; Burden Hours: 0.

Abstract: This form is used by applicants to provide the Department of Education with necessary information to competitively award grants and contracts under the Minority Institutions Science Improvement Program.

Office of Elementary and Secondary Education

Type of Review: Reinstatement.

Title: Application Form for Grants under Indian Education Programs.

Agency Form Number: ED 736 & 736-1.

Frequency: Annually.

Affected Public: State or local governments; non-profit institutions; small businesses or organizations.

Reporting Burden:

Responses: 1,500; Burden Hours: 45,000.

Recordkeeping Burden:

Recordkeeping: 0; Burden Hours: 0.

Abstract: This form is used to apply for grants under the programs authorized by the Indian Education Act, P.L. 92-318, as amended.

BILLING CODE 4000-01-M

Educational Media Research, Production, Distribution, and Training

AGENCY: Department of Education.

ACTION: Application Notice Establishing Closing Date for Transmittal of New Applications for Fiscal Year 1986 Awards.

Applications are invited for new projects under the Educational Media Research, Production, Distribution and Training program.

Authority for this program is contained in Sections 651 and 652 of Part F of the Education of the Handicapped Act. (20 U.S.C. 1451, 1452)

Applications may be submitted by profit and nonprofit public and private agencies, organizations, and institutions.

The Educational Media Research, Production, Distribution, and Training program is designed to promote the educational advancement of handicapped persons by providing assistance for: (a) Conducting research on the use of educational media and technology for handicapped persons; (b) producing and distributing educational media for the use of handicapped persons, their parents, their actual or potential employers, and other persons directly involved in work for the advancement of handicapped persons; and (c) training persons in the use of educational media for the instruction of handicapped persons.

Closing Date for Transmittal of Applications

An application for a new project must be mailed or hand-delivered on or before July 18, 1986.

Applications Delivered by Mail

An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: CFDA Number 84.026, 400 Maryland Avenue, SW., Washington, DC 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail.

Each late applicant will be notified that its application will not be considered.

Applications Delivered by Hand

An application that is hand-delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building 3, 7th and D Streets, SW., Washington, DC.

The Application Control Center will accept a hand-delivered application between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application for a new project that is hand-delivered will not be accepted by the Application Control Center after 4:30 p.m. on the closing date.

Intergovernmental Review

On June 24, 1983, the Secretary published in the Federal Register final regulations (34 CFR Part 79, published at 48 FR 29158 *et seq.*) implementing Executive Order 12372, entitled "Intergovernmental Review of Federal Programs." The regulations took effect September 30, 1983.

This program is subject to the requirements of the Executive Order and the regulations in 34 CFR Part 79. The objective of Executive Order 12372 is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of Federal financial assistance.

The Executive Order—

- Allows States, after consultation with local officials, to establish their own process for review and comment on proposed Federal financial assistance;
- Increases Federal responsiveness to State and local officials by requiring Federal agencies to accommodate State and local views or explain why those views will not be accommodated; and

• Revokes OMB Circular A-95.

Transactions with nongovernmental entities, including State postsecondary education institutions and federally recognized Indian tribal governments, are not covered by Executive Order 12372. Also excluded from coverage are research, development, or demonstration projects that do not have a unique geographic focus and are not directly relevant to the governmental responsibilities of a State or local government within that geographic area.

The following is a current list of States that have established a process, designated a single point of contact, and have selected this program for review:

Alabama
Arizona
Arkansas
California
Connecticut
Delaware
Florida
Guam
Hawaii
Indiana
Kansas
Kentucky
Louisiana
Maine
Massachusetts
Michigan
Missouri
Montana
Nebraska
Nevada
New Hampshire
New Jersey
New Mexico
New York
Northern Mariana Islands
North Dakota
Ohio
Oklahoma
Oregon
Pennsylvania
South Carolina
South Dakota
Tennessee
Texas
Trust Territory
Utah
Vermont
Virgin Islands
Virginia
Washington
Wyoming

Immediately upon receipt of this notice, applicants which are governmental entities, including local educational agencies, must contact the appropriate State single point of contact to find out about, and to comply with, the State's process under the Executive Order. Applicants proposing to perform activities in more than one State should, immediately upon receipt of this notice, contact the single point of contact for each State and follow the procedures established in those States under the Executive Order. A list containing the single point of contact for each State is included in the application package for this program.

In States that have not established a process or chosen this program for review, State, areawide, regional, and local entities may submit comments directly to the Department.

All comments from State single points of contact and all comments from State, areawide, regional, and local entities must be mailed or hand-delivered by September 18, 1986 to the following address:

The Secretary, U.S. Department of Education, Room 4181 (84.028), 400 Maryland Avenue, SW., Washington, DC 20202. (Proof of mailing will be determined on the same basis as applications).

PLEASE NOTE THAT THE ABOVE ADDRESS IS NOT THE SAME ADDRESS AS THE ONE TO WHICH THE APPLICANT SUBMITS ITS APPLICATION. *DO NOT SEND APPLICATIONS TO THE ABOVE ADDRESS.*

Available Funds

It is estimated that approximately $1,000,000 will be available for support of one cooperative agreement manufacturer at least 33,000 additional Line 21 decoders during fiscal year 1986. These estimates of funding level do not bind the U.S. Department of Education to a specific number of awards or to the amount of any award unless that amount is otherwise specified by statute or regulations.

Priority for Funding

A notice of proposed annual funding priority for this program is published in this issue of the Federal Register.

Application Forms

Application forms and program information packages are expected to be available for mailing on June 6, 1986. These materials may be obtained by writing to the Captioning and Adaptation Branch, Special Education Programs, Department of Education, 400 Maryland Avenue, SW. (Switzer Building, Room 3511-M/S 2313), Washington, DC 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information packages. However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirements beyond those imposed under the statute and regulations.

The Secretary strongly urges that the narrative portion of the application not exceed 20 pages in length. The Secretary further urges that applicants not submit information that is not requested.

(Approved by the Office of Management and Budget under control number 1820-0028)

Applicable Regulations

Regulations applicable to this program include the following:

(a) The regulations governing the Educational Media Research, Production, Distribution and Training program (34 CFR Part 332). A Notice of Proposed Annual Funding Priority for this program is published in this issue of the Federal Register. Prospective applicants are advised that the proposed annual funding priority is subject to modification in response to public comments submitted within 30 days of publication. In the event any substantive changes are made in the priority or other requirements for a new project, applicants will be given the opportunity to amend or resubmit their applications.

(b) The Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77, 78, and 79).

For Further Information Contact

Dr. Malcolm J. Norwood, Chief, Captioning and Adaptation Branch, Special Education Programs, Department of Education, 330 C Street, SW. (Switzer Building, Room 3511-M/S 2313), Washington, DC 20202. Telephone: (202) 732-1177.

(20 U.S.C. 1451, 1452)

Dated: May 29, 1986.

Madeleine Will,

Assistant Secretary, Office of Special Education and Rehabilitative Services.

(Catalog of Federal Domestic Assistance No. 84.028, Educational Media Research, Production, Distribution, and Training)

BILLING CODE 4000-01-M

Privacy Act of 1974; System of Records

AGENCY: Department of Education.

ACTION: Notice of a New System of Records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended, the Secretary publishes this notice of a new system of records known as the Records of Educationally Disadvantaged Students Attending Private Schools Served Through Bypass Contracts. The new system will be used to provide contractors with information on test scores to identify private school students who are eligible for participation and to measure progress made by students in programs under Chaper 1 of the Education Consolidation and Improvement Act of 1981 (ECIA). The Secretary seeks comments on the proposed routine uses contained in this notice.

DATES: Comments on proposed routine uses must be submitted by July 3, 1986. The Department filed a report of the new system of records with the President of the Senate, the Speaker of the House of Representatives, and the Director, Office of Management and Budget (OMB)on May 29, 1986. This system of records will become effective

BEST COPY AVAILABLE

60 days after the report for the system of records was sent to these parties.

ADDRESSES: Comments on the proposed routine uses should be addressed to the Privacy Act Officer, Office of Planning, Budget, and Evaluation, Public Affairs Service, Department of Education, 400 Maryland Avenue, SW (Room 2069), Washington, D.C. 20202. All comments submitted in response to this notice will be available for public inspection, during and after the comment period, in Room 2065 between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mary Jean LeTendre, Director, Compensatory Education Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 5102, ROB-3), Washington, D.C. 20202. Telephone: (202) 245-3081.

SUPPLEMENTARY INFORMATION: The Privacy Act of 1974 (see 5 U.S.C. 552a(e)(4)) requires the Secretary to publish in the Federal Register this notice of a new system of records. The Department's regulations implementing the Privacy Act of 1974 are contained in the Code of Federal Regulations (CFR) at 34 CFR Part 5b.

Chapter 1 of the ECIA provides special educational services to selected public and private school children who are educationally disadvantaged and who reside in areas in which there is a high concentration of children from low-income families. Funds are allocated on a formula basis through State educational agencies (SEAs) to local educational agencies (LEAs) that have approved applications on file with their respecitve SEAs.

Under Section 557(a) of Chapter 1, an LEA must provide services to eligible private school students that are equitable to the services provided to eligible public school students. According to Section 557(b) of Chapter 1, if an LEA is prohibited by State law or has failed to provide the required services for eligible private school students, the Secretary of Education must provide equitable services for private school students under a bypass arrangement. Normally, the Secretary selects a contractor to provide the required services under a bypass.

The Secretary has implemented Chapter 1 bypasses in certain LEAs in Missouri and Virginia, and has awarded contracts through which the services are performed. The services consist primarily of supplementary instruction in reading and mathematics to students who, based on a needs assessment, are found to be below their grade median. These services are provided and records are kept for about 2,800 students under the Missouri bypass contract and 700 students under the Virginia contract.

In order to determine the eligibility of these students, a contractor must keep a record of the scores of students on the needs assessment test. After students have been selected, records are kept of scores of tests taken upon entering the Chapter 1 program and post-test scores at the end of the program year. In addition, records are kept of grades received in the subject areas, as well as copies of progress reports from Chapter 1 teachers to regular classroom teachers and to parents of participating students. These records are essential in order to determine whether the Chapter 1 program objectives are being met and whether the private school students are receiving services comparable to those received by public school students. Individual students or their parents consent to have this information collected as a condition for their participation in the program.

Dated: May 29, 1986.

William J. Bennett,

Secretary of Education.

The Secretary publishes notice of a new system of records to read as follows:

18-40-0077

SYSTEM NAME:

Records of Educationally Disadvantaged Students Attending Private Schools Served Through Bypass Contracts. ED/OESE/CEP.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

See the Appendix to this system notice.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Selected elementary and secondary school students who—

(1) Attend private schools;

(2) Reside in target areas of bypassed local educational agencies; and

(3) Participate in the program for educationally disadvantaged students under Chapter 1 of the Education Consolidation and Improvement Act of 1981.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains documents, identified by name and number, of students participating in programs under Chapter 1 of the Education Consolidation and Improvement Act, such as pre- and post-achievement test scores, report cards, and reports from Chapter 1 teachers to regular classroom teachers and to parents.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 557(b), Chapter 1, Education Consolidation and Improvement Act of 1981 (Pub. L. 97-35) (20 U.S.C. 3806(b)).

PURPOSES:

The purpose of the standardized test scores obtained at the beginning of a year is to determine the eligibility of students for participation in the Chapter 1 program. The purpose of report cards and reports of Chapter 1 teachers to regular classroom teachers and to parents is to report the progress students are making during the school year. The purpose of the scores made on achievement tests given at the end of a school year is to measure the progress students have made during the year and to measure to degree to which the objectives of the Chapter 1 program have been met.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Chapter 1 teachers make information contained in this system or records available to regular classroom teachers and to the record subjects' parents to explain to those persons the eligibility of students and their progress in the Chapter 1 program. Supervisors of the Chapter 1 teachers use information contained in this system of records as a part of the monitoring process to measure progress being made toward achieving program objectives.

The Department may disclose a record for the purposes described in the Department's Privacy Act regulations (34 CFR Part 5b, Appendix B, items (1), (3), (4), (5), (6), (8), (9), (10), and (11)).

Disclosure of information in this system of records may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

In the event of litigation involving one of the parties listed below or in which one of these parties has an interest, the Department may disclose those records that it deems relevant and necessary to the Department of Justice to enable that Department to effectively represent that party, if the disclosure is compatible with the purpose for which the records were collected. The parties to which this routine use applies are—

(a) The Department, any component of the Department, or any employee of the

Department in his or her official capacity;

(b) The United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of it components; and

(c) Any Department employee in his or her individual capacity where the Department of Justice has agreed to represent such employee.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Each student's records are kept in a separate file folder. All folders are filed in locked filing cabinet in the Chapter 1 classroom. After a student no longer participates in the program, his or her records are transferred to the contractor's office where they are stored in locked filing cabinets.

RETRIEVABILITY:

The records are indexed by the name and identification number of students participating in the Chapter 1 program.

SAFEGUARDS:

The records are secured in a locked filing cabinet. The key is kept by the Chapter 1 teacher. After a student no longer participates in the program, the records are transferred to the contractor's office where they are stored in a locked filing cabinet. Direct access is restricted to the Chapter 1 teacher and aide during the day-to-day program operation. The instructional supervisor, representatives of the contractor, and Department of Education staff have access during monitoring visits.

RETENTION AND DISPOSAL:

Records are maintained in the contractor's office for at least three years after final payment on the contract. Disposal of records follows the requirements of the Federal Records Disposal Act.

SYSTEM MANAGER AND ADDRESS:

Director, Compensatory Education Programs, U.S. Department of Education, 400 Maryland Avenue, SW (Room 5102, ROB–3), Washington, D.C. 20202.

NOTIFICATION PROCEDURE:

For information about a student in a program in a bypassed local educational agency in a State listed in the Appendix to this notice, the student or his or her parent or guardian (authorized individual) must notify the appropriate contractor for the State served by the bypass contract. The Appendix to this notice provides the name and address of the appropriate contractor.

For identification, the authorized individual seeking information should provide the name, home address, and school of the student for whom information is being requested. The request must meet the requirements in the Department's Privacy Act regulations at 34 CFR 5b.5.

RECORD ACCESS PROCEDURES:

An authorized individual must contact the appropriate contractor to obtain bypass information about a student who is or has been in a bypass program.

The authorized individual should provide the appropriate contractor with information listed in the notification procedure of this notice and reasonably specify the record contents being sought. If the authorized individual is unable to obtain satisfaction from the contractor, he or she may seek access through the system manager. The request must meet the requirements of the Department's Privacy Act regulations at 34 CFR 5b.5.

CONTESTING RECORD PROCEDURES:

An authorized individual who wishes to contest the content of the record of a participating Chapter 1 student should contact the appropriate contractor for the State served by the bypass contract. See the Appendix to this notice for the name and address of the appropriate contractor. The authorized individual should identify himself or herself and state, in writing, which portion of the record the individual desires changed and provide a justification and authorization for the change. The appropriate contractor will forward the request to the system manager. The request must meet the requirements of 34 CFR 5b.7.

RECORD SOURCE CATAGORIES:

The contractor obtains test score information from public and private schools where achievement tests for program eligibility are administered, and obtains class performance information from Chapter 1 teachers.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Consolidated Gas Transmission Corp. and National Fuel Gas Supply Corp.; Notice of Petition To Amend

May 21, 1986.

Take notice that on April 30, 1986, National Fuel Gas Supply Corporation (National), Ten Lafayette Square, Buffalo, New York 14203, and Consolidated Gas Transmission Corporation (Consolidated), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP81-244-004 a joint petition to amend a certificate of public convenience and necessity authorizing the exchange of natural gas between National and Consolidated so as to expand the area of interest designated by the outstanding certificate issued October 26, 1981, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioners state that an existing certificate authorizes them to exchange gas at various points of interconnection within a designated area of interest which includes Elk, Cameron and Clearfield Counties in Pennsylvania, and Erie and Steuben Counties in New York. Petitioners are now requesting authorization to expand the designated area of interest to include Allegany County, New York. Petitioners state that such authorization would provide an additional outlet for gas produced by National from its wells in Allegany County, and would thereby improve recovery of National's reserves.

Petitioners state that they would notify the Commission of additional exchange points in Allegany County in their annual filing showing additions and deletions from the exchange agreement and that any jurisdictional facilities necessary to effect the exchange of gas from new exchange points would be constructed under § 157.208 of the Commission's Regulations.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 11, 1986, file with the Federal Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with with Commission's Rules.

Kenneth F. Plumb,

Secretary.

[Docket No. CP86-488-000]

The Inland Gas Co., Inc.; Proposed Change in FERC Gas Tariff

May 29, 1986.

Take notice that The Inland Gas Company, Inc. (Inland) on May 15, 1986 tendered for filing proposed First Revised Sheet No. 10 to its FERC Gas Tariff, First Revised Volume No. 1. Said tariff sheet bears an issue date of May 15, 1986 and an effective date of July 1, 1986. The sheet was amended on 5-21-86.

Inland states that the foregoing tariff sheet is being filed pursuant to the Commission's Order issued August 21, 1984 approving a Stipulation and Agreement in the above-captioned dockets. Inland further states that the subject tariff sets forth a proposed transportation rate, plus retainage, to be effective July 1, 1986.

A copy of Inland's tariff filing was served upon each of its affected customers. Also, a copy of Inland's tariff filing is available for public inspection during regular business hours in its offices at 336-338 Fourteenth Street, Ashland, Kentucky 41101.

Any person desiring to be heard or to protest should file a motion to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure. All such motions or protests should be filed on or before June 5, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of Inland's tariff and the proposed revision are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP86-775-001]

Northern Natural Gas Co., Division of InterNorth, Inc.; Application Amendment

May 21, 1986.

Take notice that on May 8, 1986, Northern Natural Gas Company,

Division of InterNorth, Inc., (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP85-775-001, an amendment to its application filed in Docket No. CP85-775-000 pursuant to section 7(c) of the Natural Gas Act, for authority to implement, on October 27, 1985, proposed adjustments to the firm entitlements of certain of Northern's market area utility customers, as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Northern indicates that in its original application, it proposed to effectuate on November 27, 1985, certain adjustments to the firm entitlements of its market area utility customers pursuant to a stipulation and agreement of settlement filed in resolution of issues in Docket Nos RP82-71, TA83-1-59, TA84-1-59, and TA85-1-59 (RP82-71 stipulation and agreement). Northern states that, subsequently, the Commission remanded the RP82-71 stipulation and agreement to the administrative law judge as to all participants for the purpose of developing a record upon which a decision on the contested issues regarding the offer of settlement may reasonably be based.

Northern indicates it has agreed in its stipulation and agreement of settlement filed in resolution of issues in Docket No. RP85-206 (RP85-206 stipulation and agreement) to implement on October 27, 1985, the changes in firm entitlements requested herein. Consequently, in view of the remand of the RP82-71 stipulation and agreement and the agreement reached in the RP85-206 stipulation and agreement, Northern is amending the effective date of the proposed adjustments in firm entitlements from November 27, 1985, to October 27, 1985.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 11, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. Persons who have heretofore filed need not file again.

[illegible] P. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA86-3-41-003]

Southwest Gas Corp.; Compliance Filing

May 23, 1986.

Take notice that on May 12, 1986, Southwest Gas Corporation (Southwest) tendered for filing Substitute Sixth Revised Sheet No. 31 to its FERC Gas Tariff, Original Volume No. 1. According to § 381.103(b)(2)(iii) of the Commission's regulations (18 CFR 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until May 19, 1986.

Southwest states that the revised language on the tariff sheet clarifies the methodology for calculating the surcharge adjustment.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 5, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-12399 Filed 6-2-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA86-4-17-000, 001]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

May 28, 1986.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on May 22, 1986, tendered for filing as a part of its FERC Gas Tariff, Fourth Revised Volume No. 1, six copies each of the following tariff sheets:

Seventy-ninth Revised Sheet No. 14
Seventy-ninth Revised Sheet No. 14A
Seventy-ninth Revised Sheet No. 14B
Seventy-ninth Revised Sheet No. 14C
Seventy-ninth Revised Sheet No. 14D

The above tariff sheets are being issued to reflect in Texas Eastern's rates the impact of Texas Eastern's latest exercise of "market-out" provisions in certain of its gas purchase contracts. Texas Eastern has exercised such market-out provisions to reduce the price under those certain gas purchase contracts to $1.65 mmbtu plus taxes effective June 1, 1986.

On March 13, 1986, Texas Eastern filed an out-of-cycle PGA decrease to be effective April 1, 1986. That filing reflected the impact of Texas Eastern's exercising market-out provisions in certain supplier contracts to a level of $2.25 per mmbtu plus taxes effective April 1, 1986. The March 13, 1986 filing was based upon the current cost of gas adjustment and surcharge adjustment effective as a result of Texas Eastern's regular semiannual PGA tracking filing of February 1, 1986, adjusted only to reflect the impact on the cost of gas adjustment of the cost reduction resulting from Texas Eastern's exercise of market-out provisions effective April 1, 1986. The above-listed tariff sheets are based upon the March 13, 1986 filing, adjusted only to reflect the impact on the cost of gas adjustment of the cost reduction resulting from Texas Eastern's exercise of market-out provisions effective June 1, 1986. The impact of Texas Eastern's rates of the instant proposal is a reduction of $.2092/dth in the commodity component of Texas Eastern's sales rates.

The above tariff sheets also reflect the Contract Adjustment Demand rates being filed almost concurrently herewith in Docket No. RP86-61-000 in compliance with the Commission's directive in its Order Accepting Tariff Sheets Subject To Conditions, issued May 7, 1986 in Docket RP86-61-000.

The proposed effective date of the above tariff sheets in June 1, 1986.

Texas Eastern respectfully requests waiver of the provisions of its tariff and any Regulations that the Commission may deem necessary to accept the above tariff sheets to be effective on June 1, 1986, coincidently with the effectiveness of Texas Eastern's exercise of market-out provisions, consistent with prior waiver orders by the Commission for such out-of-time market-out PGA rate reductions.

Copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825

North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure. All such motions or protests should be filed on or before June 5, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-12604 Filed 6-2-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP86-6-001]

Transwestern Pipeline Co.; Filing

May 28, 1986.

Take notice that on May 1, 1986, Transwestern Pipeline Company (Transwestern) tendered for filing the following schedules pursuant to the Commission's order issued December 12, 1985, approving Transwestern's October 31, 1985 request that it be permitted to direct bill its jurisdictional customers over two successive six-month periods for retroactive production-related costs (Order 94 costs) paid to its suppliers. These schedules set forth the calculations by customer of the amounts to be direct billed for the second six-month period.

Schedule A

By production month the Order 94 amount paid to producers subsequent to September 30, 1985.

Schedule B

The actual sales by month to each customer.

Schedule C

Each customer's applicable percentage of sales by month.

Schedule D

The allocated Order 94 costs by customer for each month.

Transwestern states that in the event it makes additional payments for retroactive Order 94 costs, it will file within 15 days of each monthly billing the information required under § 271.104(f) of the Commission's regulations and the relevant contract provisions supporting the billed costs.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 5, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb

Secretary.

BILLING CODE 6717-01

[Docket No. TA86-2-35-000]

West Texas Gas, Inc.; Tariff Filing and Petition for Waiver or, in the Alternative, for Clarification of Commission Regulations

May 28, 1986.

Take notice that on May 22, 1986, West Texas Gas, Inc. (WTG) filed a Petition for Waiver or, in the Alternative, for Clarification Of Commission Regulations. Specifically, WTG seeks a determination that § 381.205 of the Commission's regulations, 18 CFR 381.205 (1986), does not require a filing fee to be paid for the submission of a revised tariff sheet complying with and conforming to provisions of a Commission order in which a proposed tariff change has been reviewed and conditionally accepted.

This petition is in regard to WTG's filing of May 8, 1986 of Sixth Revised Sheet No. 3a, to its FERC Gas Tariff, Original Volume 1. The revised tariff sheet was submitted in accordance with the Commission's order issued May 7, 1986, in Docket No. TA86-2-35-000. The Commission notified WTG that its May 8, 1986, filing was deficient because it was not accompanied by the filing fee. By letter dated May 19, 1986, the Commission's Secretary notified WTG that the applicable fee or a petition for waiver must be submitted by May 28, 1986.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 5, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3023-6]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the Federal Register a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicitation and the expected impact, and where appropriate includes the actual data collection instrument. The following ICR is available for review and comment.

FOR FURTHER INFORMATION CONTACT: Nanette Liepman, (202) 382-2740 or FTS 382-2740.

SUPPLEMENTARY INFORMATION:

Office of Pesticides and Toxic Substances

Title: Chemical Imports and Exports; Section 12(b) Notification of Exports (EPA ICR #0795). (This is an extension of a previously approved ICR; the estimated number of respondents has gone up from fifty in the last ICR to eighty-five in the present one because of a projected increase in the number of chemicals subject to testing; otherwise, there is no change.)

Abstract: This information collection implements section 12(b) of the Toxic Substances Control Act (TSCA), and applies to exporters of chemical substances that are the subject of regulatory actions under certain other sections of TSCA. For each foreign country to which an exporter sends such a chemical, the exporter must report to EPA the first export each year of the

chemical to that country. The information is used to notify foreign governments of EPA actions with respect to the substances.

Respondents: Certain exporters of chemical substances.

Office of Solid Waste and Emergency Response

Title: Final Authorization for Hazardous Waste Management Programs (EPA ICR #0969). (This is a renewal of a previously approved ICR; there are no changes.)

Abstract: States seeking to receive interim or final authorization under RCRA to administer and enforce their hazardous waste management programs in lieu of the Federal program may submit an application to EPA. The information submitted should demonstrate that the State program is equivalent to the Federal program for a final authorization, or substantially equivalent for an interim authorization.

Respondents: States.

Agency PRA Clearance Requests Completed by OMB

EPA ICR #0097, Unleaded Gasoline Inspection and State I Vapor Recovery, was approved 5/12/86 (OMB #2060-0009; expires 5/31/89).

EPA ICR #0267, Report of Pollution-Caused Fish Kill, was approved 5/2/86 (OMB #2040-0067; expires 5/31/89).

EPA ICR #0064, New Source Performance Standards (NSPS) for Bulk Gasoline Terminals, was approved 5/2/86 (OMB #2060-0006; expires 5/31/89).

EPA ICR #1056, New Source Performance Standards (NSPS) for Emission Monitoring for Nitric Acid Plants, was approved 5/9/86, (OMB #2060-0019; expires 5/31/88).

EPA ICR #1067, Recordkeeping and Reporting for Primary Aluminum Reduction Plants (NSPS Subpart S), was approved 5/9/86 (OMB #2060-0031; expires 5/31/89).

EPA ICR #1071, New Source Performance Standards (NSPS) for Gas Turbines (Subpart GG)—Information Requirements, was approved 5/9/86 (OMB #2060-0028; expires 5/31/88).

EPA ICR #1282, Proposed Rule Regarding the Sale and Use of Aftermarket Converters, was approved 5/12/86 (OMB #2060-0135; expires 5/31/89).

Comments on all parts of this notice may be sent to:

Nanette Liepman, U.S. Environmental Protection Agency, Office of Standards and Regulations (PM-223), Information and Regulatory Systems Division, 401 M Street, SW., Washington, DC 20460

and

Carlos Tellez, Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building (Room 3228), 726 Jackson Place, NW., Washington, DC 20503.

Dated: May 28, 1986.

Daniel J. Florino,

Acting Director, Information and Regulatory Systems Division.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573 within 10 days after the date of the Federal Register in which this notice appears. The requirements for

comments are found in section 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 203-006103-066.

Title: Japan-Atlantic and Gulf Freight Conference.

Parties:

Barber Blue Sea Line
Japan Line, Ltd.
Kawasaki Kisen Kaisha, Ltd.
Mitsui O.S.K. Lines, Ltd.
A.P. Moller-Maersk Line
Neptune Orient Lines Limited
Nippon Yusen Kaisha
Orient Overseas Container Line, Inc.
United States Lines, Inc.
Yamashita-Shinnihon Steamship Co., Ltd.

Synopsis: The proposed amendment would permit the parties to disassociate from Conference actions taken to reduce rates on intermodal cargo or to publish new intermodal points until a conference intermodal tariff is filed. The parties have requested a shortened review period.

Agreement No.: 224-010644-002.

Title: Lost Angeles Terminal Agreement.

Parties:

City of Lost Angeles
Indies Terminal Company (Indies)

Synopsis: The proposed amendment would increase the size of the Indies permises by approximately 11.66 acres to permit Indies to serve Yang Ming Marine Transport, Ltd. (Yang Ming). The amendment would also provide for changes in the computation of revenue sharing breakpoints and tonnage handling guarantees to reflect Yang Ming's presence.

Agreement No.: 202-010850.

Title: Aruba Bonaire Curacao Liner Association.

Parties:

Genesis Container Line Ltd.
See-Land, Service, Inc.
King Ocean Service de Venezuela S.A.

Synopsis: The proposed agreement would establish a rate-making arrangement between the parties in the trade between U.S. Atlantic and Gulf Ports and ports in Aruba, Bonaire and Curacao and inland points via such ports. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.

Dated: May 29, 1986.

Tony P. Kominoth,
Assistant Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Federal Open Market Committee: Domestic Policy Directive of April 1, 1986

In accordance with section 271.5 of its rules regarding availability of information, there is set forth below the Committee's Policy Directive issued at its meeting held on April 1, 1986.[1] The following domestic policy directive was issued to the Federal Reserve Bank of New York:

The information reviewed at this meeting indicates a mixed pattern of development with evidence of a pickup in economic activity from the reduced fourthquarter pace but with spending sluggish in some key sectors. Total nonfarm payroll employment increased appreciably further in February following a large rise in January, but employment in manufacturing fell after four months of gains and industrial production declined. The civilian unemployment rate rose sharply to 7.3 percent. Retail sales were little changed in January and February after rising over the previous two months, while housing starts were well above their pace in late 1985. Business capital spending apparently weakened somewhat in early 1986. The merchandise trade deficit for January appears to have been only slightly smaller than in December; preliminary data for February suggest that exports increased and that the price and quantity of oil imports declined. Largely reflecting declines in energy prices, consumer prices edged down on balance over the first two mothe of 1986 and producer prices fell substantially.

Growth in M1 picked up considerably over the course of the first quarter, leaving this aggregate by March somewhat above the upper end of its range for the year. On the other hand, growth of M2 was generally sluggish over the past 3 months and was running below its long-run range. Expansion of M3 was moderate during the winter months, with growth around the midpoint of its range for 1986. Interest rates have declined considerably since the Febraury meeting of the Committee. On March 6, the Federal Reserve Board approved a reduction in the discount rate from 7-1/2 to 7 percent. The trade-weighted value of the dollar against major foreign currencies continued to decline through mid-March but has risen somewhat more recently; on balance the dollar has declined slightly since the February meeting.

The Federal Open Market Committee seeks monetary and financial conditions that will foster reasonable price stability over time, promote growth in output on a sustainable basis, and contribute to an improved pattern of international transactions. In furtherance of these objective the Committee agreed at its February meeting to establish the following ranges for monetary growth, measured from the fourth quarter of 1985 to the fourth quarter of 1986. With respect to M1, the Committee recognized that, based on the experience of recent years, the behavior of that aggregate was subject to substantial uncertainties in relationship to economic activity and prices, depending among other things on its responsiveness to changes in interest rates. It agreed that an appropriate target range under existing circumstances would be 3 to 8 percent, but it intends to evaluate movements in M1 in the light of its consistency with the other monetary aggregates, developments in the economy and financial markets, and potential inflationary pressures. It adopted a range of 6 to 9 percent for M2 and 6 to 9 percent for M3. The associated range for growth inf total domestic nonfinancial debt was set at 8 to 11 percent for the year 1986.

In the implementation of policy for the immediate future, the Committee seeks to maintain the existing degree of pressure on reserve positions. This action is expected to be consistent with growth in M2 and M3 over the period from March to June at annual rates of about 7 percent; while the behavior of M1 continues to be subject to unusual uncertainty, growth at an annual rate of about 7 to 8 percent over the period is anticipated. Somewhat lesser reserve restraint or somewhat greater reserve restraint might be acceptable depending on behavior of the aggregate, the strength of the business expansion, developments in foreign exchange markets, progress against inflation, and conditions in domestic and international credit markets. The Chairman may call for Committee consultation if it appears to the Manager for Domestic Operations that reserve conditions during the period before the next meeting are likely to be associated with a federal funds rate persistently outside a range of 6 to 10 percent.

Votes for this action: Messrs. Volcker, Corrigan, Angell, Guffey, Horn, Johnson, Melzer, Morris, Rice, Ms. Seger, and Mr. Wallich. Votes against this action: None. Absent and not voting: Mr. Martin.

By order of the Federal Open Market Committee, May 29, 1986.

Stephen H. Axilrod,
Secretary.

[1] The Record of policy actions of the Committee for the meeting of April 1, 1986, is filed as part of the original document. Copies are available upon request to The Board of Governors of the Federal Reserve System, Washington, DC 20551.

Citizens Financial Group, Inc.; Formation of; Acquisition by, or Merger of Bank Holding Companies

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.24) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than June 26, 1986.

A. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Citizens Financial Group, Inc.*, Toluca, Illinois; to become a bank holding company by acquiring 100 percent of the voting shares of The Citizens National Bank of Toluca, Toluca, Illinois.

Board of Governors of the Federal Reserve System, May 28, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

U.S. Trust Corp., et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23(a)(2) of (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8)) of the bank holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweight possible adverse effects, such as undue concentration of resources, decreased on unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than June 16, 1986.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *U.S. Trust Corporation*, New York, New York; to acquire Advanced Information Management, Inc., Boston, Massachusetts, and New York, New York, and thereby engage in licensing software and providing services to others relating to individual retirement account record keeping, mutual fund shareholder accounting and other data processing and data transmission services and facilities (including data processing and data transmission hardware, software, documention and operation personnel) or access to such services or facilities by any technologically feasible means for financial, banking, and economic data.

B. **Federal Reserve Bank of Cleve land** (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *AmeriTrust Corporation*, Cleveland, Ohio; to acquire certain assets of Associates Corporation of North America and its wholly-owned subsidiary, Associates Commercial Corporation, and thereby engage in the business of making and servicing loans in accordance with § 225.25(b)(1) of the Board's Regulation Y. This activity will be conducted from offices in Boston, Massachusetts; Chicago, Illinois; Dallas, Texas; North Charleston, South Carolina; and Philadelphia, Pennsylvania.

Board of Governors of the Federal Reserve System, May 28, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Viejo Bancorp; Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commerce or to engage de novo, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 19, 1986.

A. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President), 101 Market Street, San Francisco, California 94105:

1. *Viejo Bancorp*, Mission Viejo, California; to engage de novo through its subsidiary, Viejo Escrow Corporation, Mission Viejo, California, in the functions or activities that may be performed by a trust company pursuant to § 225.25(b)(3) of the Board's Regulation Y. These activities will be conducted only in the state of California.

Board of Governors of the Federal Reserve System, May 28, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 85D-0541]

Effectiveness Requirements and Good Manufacturing Requirements of New Animal Drugs Used in Free-Choice Feeds; Availability of Draft Guidelines

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of two draft guidelines; one entitled "Guidelines for Evaluation of Effectiveness of New Animal Drugs for Use in Free-Choice Feeds," and the other entitled "Medicated Free-Choice Feeds" covering good manufacturing practice concerning such products. These draft guidelines are intended to replace the current "Cattle Medicated Block Guidelines." In a separate document published elsewhere in this issue of the **Federal Register**, FDA is amending the animal drug regulations covering the requirements for approval of applications for medicated free-choice feed products.

ADDRESSES: The draft guidelines are available for public examination at, and written comments may be submitted to, the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857. Requests for copies of the draft guidelines may be submitted to the Division of Biometrics and Production Drugs (HFV-120), Center for Veterinary Medicine, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Richard P. Lehmann, Center for Veterinary Medicine (HFV-120), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5134.

SUPPLEMENTARY INFORMATION: These draft guidelines are intended to furnish guidance to sponsors of applications for and manufacturers of free-choice products covered by the final rule published elsewhere in this issue of the **Federal Register**. The final rule contains background information concerning FDA's regulation of such products.

This notice of availability is issued under 21 CFR 10.90(b), which provides for use of guidelines to establish procedures of general applicability that are not legal requirements but are acceptable to the agency. Sponsors and manufacturers may rely upon a guideline with the assurance that it represents procedures acceptable to the agency (see 21 CFR 10.90). If such persons believe that alternative procedures are also applicable, a guideline does not preclude them from pursuing the alternative procedures. Under such circumstances, however, the agency encourages sponsors and manufacturers to discuss the alternative procedures in advance with FDA to prevent the expenditure of money and effort for work that may later be found to be unacceptable.

Interested persons may, at any time, submit written comments on the guidelines to the Dockets Management Branch. Such comments will be considered in determining if revisions of the guidelines are required. Respondents should submit two copies (except that individuals may submit single copies) identified with the docket number found in brackets in the heading of this document. Received coments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: May 13, 1986.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 86-12347 Filed 6-2-86; 8:45 am]

BILLING CODE 4160-01-M

National Institutes of Health

National Institute of Allergy and Infectious Diseases; Meetings

Pursuant to Pub. L. 92-463, notice is hereby given of the meetings of committees of the National Institute of Allergy and Infectious Diseases for June, 1986.

These meetings will be open to the public to discuss administrative details relating to committee business and for program review. Attendance by the public will be limited to space available. Portions of these meetings will be closed to the public in accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code, and section 10(d) of Pub. L. 92-463, for the review, discussion, and evaluation of individual grant applications and contract proposals. These applications, proposals, and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications and proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Patricia Randall, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A-32, National Institutes of Health, Bethesda, Maryland 20892, telephone (301) 496-5717, will provide summaries of the meetings and rosters of the committees members upon request.

Substantive program information may be obtained from the Executive Secretary whose name, room number, and telephone number are listed below each committee.

Name of committee: Allergy and Clinical Immunology Subcommittee of the Allergy, Immunology, Transplantation Research Committee.

Executive secretary: Dr. Nirmal Das, Room 706, Westwood Building, National Institutes of Health, Bethesda, MD 20892. Telephone: (301) 496-7966.

Date of meeting: June 20, 1986.

Place of meeting: Linden Hill Hotel, Conference Room 22, 5400 Pooks Hill Road, Bethesda, MD 20814.

Open: June 20, 8:30 a.m.—9:10 a.m. and 2:30 p.m.—adjournment.

Agenda

Reports from Director and Deputy Director, Immunology, Allergic, and Immunologic Diseases Program (IAIDP); and Director and Deputy Director, Extramural Activities Program on Committee concerns and IAIDP program presentation.

Closed: June 20, 9:10 a.m.—2:30 p.m.

Closure reason: To review grant applications and contract proposals.

Name of committee: Transplantation Biology and Immunology Subcommittee of the Allergy, Immunology, and Transplanation Research Committee.

Executive secretary: Dr. Nirmal Das, Room 706, Westwood Building, National Institutes of Health, Bethesda, MD 20892. Telephone: (301) 496-7966.

Date of meeting: June 27, 1986.

Place of meeting: Building 31A, Conference Room 4, National Institutes of Health, 9000 Rockville Pike, Bethesda, MD 20892.

Open: June 27, 8:30 a.m.—9:10 a.m. and 1:40 p.m.—adjournment.

Agenda

Reports from Director and Deputy Director, Immunology, Allergic, and Immunologic Diseases Program (IAIDP); and Director and Deputy Director, Extramural Activities Program on Committee concerns followed by Program concept clearances and IAIDP.

Closed: June 27, 9:10 a.m.—1:40 p.m.

Closure reason: To review grant applications and contract proposals.

(Catalog of Federal Domestic Assistance Programs Nos. 13.855, Pharmacological Sciences; 13.859, Microbiology and Infectious Diseases Research, National Institutes of Health)

Dated: May 22, 1986.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140-01-M

Social Security Administration

Privacy Act of 1974; Notification of New System of Records

AGENCY: Social Security Administration (SSA), Department of Health and Human Services (HHS).

ACTION: New system of records.

SUMMARY: In accordance with the Privacy Act (5 U.S.C. 552a(e)(4)), we are issuing public notice of our intent to establish a new system of records. The proposed system of records is entitled "Kentucky Birth Records System, HHS/SSA/DO(KY), 09-60-0220." Information in the proposed system of records will be used by Social Security offices in the State of Kentucky to establish proof or age and other facts, as necessary, in processing applications for various Social Security benefits, Supplemental Security Income payments and Social Security numbers (SSN's). We are proposing routine use disclosures of information which will be maintained in the proposed system of records as discussed below. We invite public comments on this proposal.

DATES: We filed a report of a new system of records with the President of the Senate, the Speaker of the House of Representatives and the Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget, on May 23, 1986. The proposed system will become effective as proposed without further notice on July 22, 1986, unless we receive comments on or before that date which would result in a contrary determination.

FOR FURTHER INFORMATION CONTACT: Mr. Bert Sisk, District Manager, Social Security Administration, 330 Broadway, P.O. Box 579, Frankfort, Kentucky 40601, telephone (Area Code 502) 875-2231.

SUPPLEMENTARY INFORMATION:

I. Purpose, Background, and Contents of the Proposed System of Records

Individuals applying for entitlement under various Social Security programs must furnish SSA with evidentiary proof of age when age is a factor of entitlement. Additionally, evidence of age must be furnished when an individual applies for an SSN. Preferred proof of age is a public birth record or religious record of birth which was recorded before the age of 5. However, other documentation such as a school record also may be acceptable as evidentiary proof of age for entitlement purposes or for issuance of an SSN.

Generally, claimants have the responsibility for furnishing the proofs that are necessary to support their claims. However, we will assist claimants who are unable to obtain necessary documentation through their own efforts. In this regard, the State of Kentucky has prepared an index of birth records registered in that State and has offered to furnish the index to SSA. Kentucky will certify the accuracy of information on the index prior to furnishing it to SSA. We plan to obtain the index for use by Social Security offices in Kentucky whenever SSA must establish the age of individuals to determine entitlement under its programs or to issue an SSN. Further, other information contained in the index of birth records could be useful in determining other facts which could bear on entitlement; e.g., a parent's name could be used to establish relationship. Use of the index of birth records would obviate SSA or the individual otherwise obtaining a copy of a birth record from the State. This would help reduce the processing time of applications for entitlement under SSA programs or for obtaining SSN's.

The Kentucky Office of Vital Statistics will compile information on the index of birth records directly from birth records registered in that State. Specific information on the index will consist of the individual's name, date and place of birth, mother's maiden name, birth certificate number and the volume number of the index. We will retrieve information by use of the individual's name and other identifying information. Our use of the index, thus, would constitute a system of records as defined by the Privacy Act (5 U.S.C. 552a(a)(5)).

II. Proposed Routine Use Disclosures of Information Maintained in the Proposed System of Records

We are proposing to establish routine use disclosures of information which will be maintained in the proposed system of records as discussed below.

A. Disclosure to a congressional office in response to an inquiry from that office made at the request of the subject of a record.

This proposed routine use would enable SSA to disclose information to a congressional representative in those instances in which the subject of a record may ask the representative to intercede in a matter on his/her behalf involving this system of records and SSA. Information would be disclosed only when the representative makes an inquiry and presents evidence that he/she is acting on behalf of the individual whose record is requested.

b. Disclosure to the Department of Justice (DOJ), to a court or other tribunal, or another party before such tribunal, when:

(1) *HHS/SSA, or any component thereof; or*

(2) *Any HHS/SSA employee in his/her official capacity; or*

(3) *Any HHS/SSA employee in his/her individual capacity where DOJ (or HHS/SSA where it is authorized to do so) has agreed to represent the employee; or*

(4) *The United States or any agency thereof where HHS/SSA determines that the litigation is likely to affect the operations of HHS/SSA or any of its components,*

is a party to litigation or has an interest in such litigation, and HHS/SSA determines that the use of such records by DOJ, the tribunal, or the other party before such tribunal is relevant and necessary to the litigation, provided, however, that in each case, HHS/SSA determines that such disclosure is compatible with the purpose for which the records were collected.

Disclosure would be made under this proposal, as necessary, to defend HHS/SSA components or employees in litigation matters involving this system or when HHS/SSA has an interest in litigation which might affect HHS/SSA operations.

III. Compatibility of Proposed Routine Uses

The Privacy Act (5 U.S.C. 552a(b)(3)) and our disclosure regulation permit us to disclose information as a routine use for purposes which are compatible with the purpose for which we collect information. The regulation (20 CFR 401.310) permits us to disclose information as a routine use to administer our programs or similar income-maintenance or health-maintenance programs of other agencies. Disclosure would be made

under the proposed routine uses to provide a service to Social Security constituents and, as necessary, in litigation matters involving HHS/SSA operations and the proposed system. We consider disclosure in both instances as extensions of our program administration. Thus, the routine uses are appropriate and meet the criteria in the regulation.

IV. Safeguards Applicable to the Proposed System of Records

We will restrict access to records maintained in the proposed system to SSA employees who need the records in the performance of their official duties. The record will be maintained in secured facilities and, when not in use, will be kept from access by unauthorized individuals (e.g., stored in locked filing cabinets).

V. Effect of the Proposed System of Records on Individual Rights

Information in the proposed system of records will be used only to establish required proof of age and other facts about individuals applying for various benefits or payments administered by SSA or for SSN's. However, any individual who disputes the accuracy of information or objects to SSA's use of the records will be given an opportunity to present alternative supporting evidence on his/her behalf such as a certified copy of his/her birth certificate. Further, once the system is implemented, any individual who believed that he/she had been adversely affected by a decision which was based on information in the system would have the right to appeal the decision. Thus, we do not believe that use of the proposed system would result in any unwarranted adverse effects on individual rights.

Dated: May 23, 1986.

Martha A. McSteen,

Acting Commissioner of Social Security.

09-60-0220

System name:

Kentucky Birth Records System, HHS/SSA/DO(KY).

Security classification:

None.

System location:

Social Security district and branch offices located in the State of Kentucky. Individuals should consult Kentucky telephone directories for address and telephone information.

Categories of individuals covered by the system:

Members of the general public whose birth records have been registered in the State of Kentucky.

Categories of records in the system:

The system consists of an index of Kentucky birth records. Included on the index are the individual's name, mother's maiden name, date and place of birth, birth certificate number and volume number of the index.

Purpose:

Information in the system will be used by Social Security Administration (SSA) offices in the State of Kentucky to provide evidentiary proof of age and other facts about individuals applying for various Social Security benefits, Supplemental Security Income payments and Social Security numbers.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Disclosure may be made as routine uses as indicated below:

1. To a Congressional office in response to an inquiry from that office made at the request of the subject of a record.

2. To the Department of Justice (DOJ), to a court or other tribunal, or to another party before such tribunal, when:

(a) The Department of Health and Human Services (HHS)/SSA, or any component thereof; or

(b) Any HHS/SSA employee in his/her official capacity; or

(c) Any HHS/SSA employee in his/her individual capacity where DOJ (or HHS/SSA where it is authorized to do so) has agreed to represent the employee; or

(d) The United States or any agency thereof where HHS/SSA determines that the litigation is likely to affect the operations of HHS/SSA or any of its components,

Is a party to litigation or has an interest in such litigation, and HHS/SSA determines that the use of such records by DOJ, the tribunal, or the other party before such tribunal is relevant and necessary to the litigation, provided, however, that in each case, HHS/SSA determines that such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

Records will be stored on microfilm.

Retrievability:

Records will be retrieved by the individuals's name and other identifying information (e.g., mother's name and date of birth).

Safeguards:

Access to records in the system will be restricted to personnel who need them in the performance of their official duties. Also, the information will be maintained in secured facilities and kept from access by unauthorized individuals (e.g., stored in locked filing cabinets) when not in use.

Retention and disposal:

Records in the system will be updated biennially. Out-of-date microfilm records will be disposed of by the application of heat.

System manager(s) and address:

Managers of Social Security district/branch offices in the State of Kentucky. Individuals seeking office addresses and telephone numbers should consult Kentucky telephone directories.

Notification procedures:

An individual wishing to find out if this system of records contains information about him/her may do so by contacting any Social Security office and furnishing his/her name, date and place of birth and mother's maiden name. These procedures are in accordance with HHS Regulations 45 CFR Part 5b.

Record access procedures:

Same as notification procedures above. Also, individuals requesting access to their records should reasonable describe the records they are seeking. These procedures are in accordance with HHS Regulations 45 CFR Part 5b.

Contesting record procedures:

Same as notification procedures above. Also, individuals contesting the contents of records in the systems should reasonably describe the records, specify the information they are contesting and state the corrective action sought with supporting justification showing how the records are untimely, incomplete, inaccurate or irrelevant. These procedures are in accordance with HHS Regulations 45 CFR Part 5b.

Record source categories:

Records in the system will be obtained from the Kentucky Office of Vital Statistics.

System exempted from certain provisions of the act:

None.

Bureau of Indian Affairs

Establishment of Reservation; Jamestown Klallam Tribe

May 7, 1986.

This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.1. Notice is hereby given that under the authority of section 7 of the Act of June 18, 1934 (25 U.S.C. 467; 48 Stat. 986), the hereinafter described land located in Clallam County, Washington, was proclaimed to be an Indian reservation effective May 7, 1986, for exclusive use of Indians entitled by enrollment or by tribal membership to residence at such reservation.

Willamette Meridian

Clallam County, Washington

Tract 5 of Lot 1 of Assessor's Map of section 12, Township 29 North, Range 3 West, as recorded in Volume 4 of Plats, Page 5, records of Clallam County, Washington, and

Except a right-of-way conveyed to Seattle, Port Angeles and Lake Crescent Railway by deed recorded in Volume 94 of Deeds, page 107, records of Clallam County, Washington, and

Except Primary State Highway No. 9, and

Except any portion lying southerly of the following described line: Beginning at the meander corner between sections 1 and 12, Township 29 North, Range 3 West; thence north 89°20'11" east 628.46 feet to the northeast corner of said section 12; thence south 17°58'30" west 1367.00 feet to a point on the west margin of the Old Olympic Highway, said point being one-half inch steel rod in concrete, and the true point of beginning; thence south 88°23'15" west to the mean high tide line, and the end of the described line; containing 2.12 acres, more or less, after the above exceptions, together with tidelands of the second class situate in front of, adjacent to or abutting upon the south 295 feet of Lot 1 of section 12, as set forth in deed on file here in the Bureau of Indian Affairs, Portland Area Title Plant number 130-1891.

Said land being subject to all valid rights, reservations, rights-of-way and easements of record.

Ross O. Swimmer,

Assistant Secretary—Indian Affairs.

BILLING CODE 4310-02-M

Bureau of Land Management

[M 40844, et al.]

Proposed Continuation of Withdrawals; Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Reclamation, Department of the Interior, proposes to continue all or part of 6 existing land withdrawals for the Milk River Project for 50 years. The 24,581.16 acres of withdrawn unpatented lands proposed for continuation would remain closed to surface entry and mining. The extraction of locatable minerals from these lands would be permitted by the Bureau of Reclamation, provided this extraction can be performed in a manner that would not jeopardize or otherwise interfere with the purposes of the Milk River Project. All of the lands have been and would continue to be open to the mineral leasing laws.

FOR FURTHER INFORMATION CONTACT: James Binando, Chief, Branch of Land Resources, BLM, Montana State Office, P.O. Box 36800, Billings, Montana 59107, Phone (406) 657-6090.

The Bureau of Reclamation proposes that the existing land withdrawals made by Secretarial Orders of October 8, 1904, May 12, 1945, October 15, 1904, October 23, 1944, June 15, 1937, and September 8, 1903, be continued in their entirety or in part for 50 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714.

The purpose for continuance of the withdrawals is to protect the Milk River Reclamation Project. The withdrawals would continue to segregate 24,581.16 acres of unpatented lands located in

Blaine, Hill, and Phillips Counties in the State of Montana from operation of the public land laws and location under the United States mining laws; however, the extraction of locatable minerals would be permitted by the Bureau of Reclamation, provided that this extraction could be performed in a manner that would not jeopardize or otherwise interfere with the purposes of the Milk River Project. All of the lands would continue to be open to mineral leasing.

No change is proposed in the purpose or segregative effect of the withdrawals.

For a period of 90 days from the date of publication of the notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal continuations may present their views in writing to the undersigned office at the address specified above.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the lands and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress who will determine whether or not the withdrawals will be continued and, if so, for how long. The final determination on the continuation of the withdrawal will be published in the Federal Register. The existing withdrawals will continue until such final determination is made.

Dated: May 27, 1986.

James Ricondo,

Chief, Branch of Land Resources.

Minerals Management Service

Development Operations Coordination Document

AGENCY: Minerals Management Service.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Amoco Production Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 6032, Block 519, Matagorda Island Area, offshore Texas. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Port O'Connor, Texas.

DATE: The subject DOCD was deemed submitted on May 27, 1986.

ADDRESS: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service; Gulf of Mexico OCS Region; Rules and Production; Plans, Platform and Pipeline Section; Exploration/Development Plans Unit; Phone (504) 838-0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected States, local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: May 27, 1986.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OSC Region.

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

[Application No. D-6263 et al.]

Proposed Exemptions; Memphis Construction, Inc., et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this Federal Register Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Regulations and Interpretations, Room N-5669, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the Federal Register. Such notice shall include a copy of the notice of pendency of the exemption as published in the Federal Register and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Employees' Profit Sharing and Retirement Plan of Memphis Construction, Inc. (the Plan) Located in Memphis, New York

[Application No. D-6263]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale of certain real property by the Plan to Memphis Construction, Inc. (the Plan Sponsor) provided all of the terms of the proposed transaction are as favorable to the Plan as those obtainable in an arm's-length transaction with an unrelated party on the date of the consummation of the transaction.

Summary of Facts and Representations

1. The Plan is a defined contribution profit sharing plan with approximately 95 participants. The Plan had total assets of $694,441 as of November 30, 1984. The trustee of the Plan is Mr. Duane C. Olin (the Trustee). The Trustee is an officer and shareholder of the Plan Sponsor. The Plan Sponsor is a real estate development corporation.

2. The Plan is the owner of a parcel of vacant land including approximately 46 acres in the Town of Clay, Onondaga County, New York (the Property) [1] which was purchased from unrelated parties. At the time of its purchase, the Trustee decided that the purchase of this real property would diversify the Plan's investment portfolio and could be held for appreciation. The Trustee determined that the purchase price of the real property was reasonable in view of its growth potential, and that its purchase would be a suitable investment for the Plan.

3. The applicant represents that the purchase of the real property was not motivated by any intention to benefit a particular Plan participant, group of participants, nor the Plan Sponsor. In a sworn affidavit, the Trustee represented that on June 4, 1982, he authorized the purchase of the real property and that prior to its purchase, the fair market value was established by an independent real estate appraiser at $285,000 as of April 22, 1982. (According to the above-mentioned appraisal, the total purchase price of $184,978 represented approximately 65% of its fair market value.)

4. The applicant proposes that the Plan Sponsor purchase the Property from the Plan. The Plan Sponsor submitted an offer to purchase the Property dated May 23, 1985. The total purchase price will be $210,208. The Plan Sponsor will pay all charges in connection with the sale. An independent appraisal of the Property was performed by G. Richard Kelley, M.A.I., C.R.E., of Pomeroy Appraisal

[1] Originally the Plan purchased 49 acres of real property at a cost of $173,000 plus closing expenses of $11,000 for a total of $184,078. The Plan subsequently sold a parcel to an unrelated party for $50,000. The applicant represents that this sales price reflected a 230% gain above the amount the Plan invested in this 3-acre parcel.

Associates, Inc., located in Syracuse, New York (the Appraisal). The Appraisal established the fair market value of the Property at $210,000 as of April 22, 1985. Total costs to the Plan of the Property, including carrying expenses, amounted to $114,000.

5. Mr. Thomas J. Bader, CEBS, of Retirement Income Services, Inc. located in Syracuse, New York, has made an independent review of the proposed transaction. Mr. Bader is unrelated to the Plan or the Plan Sponsor. Mr. Bader noted that it is customary for most pension funds to limit the exposure real estate investments to between 10 to 20 of total plan assets. However, the Plan has over 57 percent of the total portfolio invested in real estate as of November 30, 1984. Mr. Bader believes that the extremely large percentage of the Plan's assets invested in non-income producing properties is justification for the sale of the Property and such sale would be in the best interests of the Plan and its participants and beneficiaries. In summary, Mr. Bader represents that the Plan would be much more diversified in income producing securities which could easily be sold if need be, rather than in an illiquid, non-income producing asset such as the Property; the rate of appreciation that the Property has achieved is good and the future returns that may be achieved are questionable. He therefore recommends the sale of the Property and respresents that such sale would be in the best interests of the Plan and its participants and beneficiaries.

6. In summary, the applicant represents that the proposed transaction meets the statutory criteria of section 408(a) of the Act because:

(a) The sale of the Property will yield a significant gain over the investment.

(b) The Plan will not incur any expenses with respect to the sale of the Property. Therefore, the proceeds received by the Plan would be greater than those obtainable from an independent third party purchaser due to the absence of sales brokerage commissions and other costs which the Plan would pay in a standard commercial sales transaction.

(c) The sale of the Property will make possible greater diversification in the investments of the Plan.

(d) The Plan will receive fair market value for the Property as determined by an independent appraiser.

(e) An independent party has reviewed the proposed transaction and determined that the sale of the Property is in the best interests of and protective of the Plan; and

(f) The Trustee has determined that the proposed transaction is in the interests of and protective of the Plan.

For Further Information Contact: Ms. Linda Hamilton of the Department, telephone (202) 523-8194. (This is not a toll-free number.)

Circleville Publishing Company Profit Sharing Plan (the Plan) Located in Circleville, Ohio

[Application No. D-6517]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale to Circleville Publishing Company (the Employer), a party in interest with respect to the Plan, of the shares of Press Properties, Inc. (Press) owned by the Plan, provided the sales price is not less than the fair market value of such shares on the date of the sale.

Summary of Facts and Representations

1. The Plan is a profit-sharing plan covering 24 participants as of December 31, 1984. The fair market value of the Plan's total assets was $946,936.00 as of March 7, 1986. The current trustee of the Plan is The Huntington National Bank, of Columbus Ohio (the Trustee), which requested the application for exemption as a condition of continuing to act as trustee of the Plan. The Trustee represents that it has no relationship with the Employer, its principals, or affiliates.

2. Press is a closely held corporation owned by 16 shareholders, including the Plan, five profit-sharing plans maintained by other employers, five companies, and five individuals. The largest shareholder of Press owns 16.0% of its 6,300 outstanding shares. As of June 30, 1985, six parcels of improved real property, all located in small farm communities in Ohio (Circleville, Van Wert, Logan, Wilmington, Hillsboro, and Washington Court House), comprised over 70% of Press' assets, the remainder of which consisted of cash and other liquid assets. Each of these six parcels is used for newspaper production, under a leasing or subleasing arrangement, by a different newspaper publishing company, namely: The Employer, Washington News Publishing Company, Van Wert Publishing Company, Wayne Newspaper Company, News-Journal Company, and Hillsboro Publishing Company (collectively, the Tenants). All of the Tenants maintain profit-sharing plans which own shares of Press. All such shares were purchased by such plans at various dates from 1969 through 1972 (before enactment of the Act). After obtaining appraisals by Mr. Tom Wilhelm, M.A.I., of each parcel of real property owned by Press, the Trustee determined that the fair market value of the outstanding shares of Press was $146.87 per share as of June 30, 1985. Mr. Wilhelm represents that he has no relationship with Press, any of the Tenants, or their affiliates or principals.

3. The applicant represents that Press is not an affiliate, for purposes of section 407(d)(7) of the Act, of any of the Tenants. All Tenants except Hillsboro Publishing Company may comprise various controlled groups, but, according to the applicant, until the current audit is completed the extent of the controlled groups cannot be determined.

4. The Plan owns a total of 918 shares of Press, representing approximately 14.5% of the Plan's total assets. The Plan paid $91,800 for these shares ($100 per share). The Trustee wishes to sell these shares to the Employer at a price equal to the fair market value of the shares on the date of the sale. The entire price will be paid in cash on the date of the sale. The Plan will pay no commissions or other expenses relating to the proposed sale.

5. The Trustee states that when the Plan purchased the 918 shares, companies with substantial real-estate holdings were thought to be prudent investments and that, in general, real estate was an excellent investment from 1970 through 1985. Therefore, the Trustee speculates that the previous trustee of the Plan acquired and held these shares for the Plan in the belief that companies with real-estate holdings were prudent investments.[2]

6. When the Trustee became trustee of the Plan, it was concerned about the concentration of Press shares owned by the Plan, particularly in light of the poor economic forecast for smaller towns dependent upon the depressed agricultural sector of the economy. In addition, the Trustee did not want the administrative burden and expense of appraising closely held companies and would prefer to diversify the

[2] The Department is expressing no opinion herein as to whether or not the continued holding by the Plan (or any of the other plans mentioned in 2, above) of shares of Press constituted either a prohibited transaction under section 406 of the Act or a violation of any of the other fiduciary responsibility provisions of Part 4, Subtitle B, of Title I of the Act.

investments of the Plan. The Trustee states that there is virtually no market for the Press shares and that other Press shareholders have been notified and have no interest in purchasing additional shares of Press. The Trustee asserts that unless the Employer purchases the Press shares owned by the Plan, the Plan's assets could depreciate in value as no upturn in the real-estate market is anticipated. The proposed sales price will equal the fair market value of the Press shares on the date of the proposed sale, according to the Trustee. For these reasons, the Trustee believes it to be in the best interests of the Plan and its participants and beneficiaries to sell its holdings of Press shares and to reinvest the proceeds in other types of more liquid investments.

7. In summary, the applicant represents that the proposed transaction satisfies the exemption criteria set forth in section 408(a) of the Act because: (a) The proposed transaction is a one-time cash transaction; (b) the proposed sales price will equal the fair market value of the shares on the date of the sale as determined by the Trustee; (c) the Plan will pay no commissions or other expenses relating to the proposed sale; and (d) the Trustee, who is not related to the Employer, its principals or affiliates, believes the proposed sale will spare the Plan from risk of loss and will permit the Plan to diversify further by investing in more liquid assets.

For Further Information Contact: Mrs. Miriam Freund of the Department, telephone (202) 523–8194. (This is not a toll-free number.)

The Washington News Publishing Company Profit Sharing Plan (the Plan) Located in Washington Court House, Ohio

[Application No. D–6520]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale to The Washington News Publishing Company (the Employer), a party in interest with respect to the Plan, of the shares of Press Properties, Inc. (Press) owned by the Plan, provided the sales price is not less than the fair market value of such shares on the date of the sale.

Summary of Facts and Representations

1. The Plan is a profit-sharing plan covering 23 participants as of December 31, 1984. The fair market value of the Plan's total assets was $636,821 as of December 30, 1985. The current trustee of the Plan is The Huntington National Bank, of Columbus Ohio (the Trustee), which requested the application for exemption as a condition of continuing to act as trustee of the Plan. The Trustee represents that it has no relationship with the Employer, its principals, or affiliates.

2. Press is a closely held corporation owned by 16 shareholders, including the Plan, five profit-sharing plans maintained by other employers, five companies, and five individuals. The largest shareholder of Press owns 16.0% of its 6,309 outstanding shares. As of June 30, 1985, six parcels of improved real property, all located in small farm communities in Ohio (Circleville, Van Wert, Logan, Wilmington, Hillsobor, and Washington Court House), comprised over 70% of Press' assets, the remainder of which consisted of cash and other liquid assets. Each of these six parcels is used for newspaper production, under a leasing or subleasing arrangement, by a different newspaper publishing company, namely: the Employer, Circleville Publishing Company, Van Wert Publishing Company, Wayne Newspaper Company, News-Journal Company, and Hillsboro Publishing Company (collectively, the Tenants). All of the Tenants maintain profit-sharing plans which own shares of Press. All such shares were purchased by such plans at various dates from 1969 through 1972 (before enactment of the Act). After obtaining appraisals by Mr. Tom Wilhelm, M.A.I., of each parcel of real property owned by Press, the Trustee determined that the fair market value of the outstanding shares of Press was $146.87 per share as of June 30, 1985. Mr. Wilhelm represents that he has no relationship with Press, any of the Tenants, or their affiliates or principals.

3. The applicant represents that Press is not an affiliate, for purposes of section 407(d)(7) of the Act, of any of the Tenants. All Tenants except Hillsboro Publishing Company may comprise various controlled groups, but, according to the applicant, until the current audit is completed the extent of the controlled groups cannot be determined.

4. The Plan owns a total of 1,009 shares of Press, representing approximately 23.4% of the Plan's total assets. The Plan paid $100,900 for these shares ($100 per share). The Trustee wishes to sell these shares to the Employer at a price equal to the fair market value of the shares on the date of the sale. The entire price will be paid in cash on the date of the sale. The Plan will pay no commissions or other expenses relating to the proposed sale.

5. The Trustee states that when the Plan purchased the 1,009 shares, companies with substantial real-estate holdings were thought to be prudent investments and that, in general, real estate was an excellent investment from 1970 through 1985. Therefore, the Trustee speculates that the previous trustee of the Plan acquired and held these shares for the Plan in the belief that companies with real-estate holdings were prudent investments.[3]

6. When the Trustee became trustee of the Plan, it was concerned about the concentration of Press shares owned by the Plan, particularly in light of the poor economic forecast for smaller towns dependent upon the depressed agricultural sector of the economy. In addition, the Trustee did not want the administrative burden and expense of appraising closely held companies and would prefer to diversify the investments of the Plan. The Trustee states that there is virtually no market for the Press shares and that other Press shareholders have been notified and have no interest in purchasing additional shares of Press. The Trustee asserts that unless the Employer purchases the Press shares owned by the Plan, the Plan's assets could depreciate in value as no upturn in the real-estate market is anticipated. The proposed sales price will equal the fair market value of the Press shares on the date of the proposed sale, according to the Trustee. For these reasons, the Trustee believes it to be in the best interests of the Plan and its participants and beneficiaries to sell its holdings of Press shares and to reinvest the proceeds in other types of more liquid investments.

7. In summary, the applicant represents that the proposed transaction satisfies the exemption criteria set forth in section 408(a) of the act because: (a) The proposed transaction is a one-time cash transaction; (b) the proposed sales price will equal the fair market value of the shares on the date of the sale as determined by the Trustee; (c) the Plan

[3] The Department is expressing no opinion herein as to whether or not the continued holding by the Plan (or any of the other plans mentioned in 2, above) of shares of Press constituted either a prohibited transaction under section 406 of the Act or a violation of any of the other fiduciary responsibility provisions of Part 4, Subtitle B, or Title I of the Act.

will pay no commissions or other expenses relating to the proposed sale; and (d) the Trustee, who is not related to the Employer, its principals or affiliates, believes the proposed sale will spare the Plan from risk of loss and will permit the Plan to diversify further by investing in more liquid assets.

For Further Information Contact: Mrs. Miriam Freund of the Department, telephone (202) 523–8194. (This is not a toll-free number.)

The Van Wert Publishing Company Profit Sharing Plan (the Plan) Located in Van Wert, Ohio

[Application No. D–6521]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale to The Van Wert Publishing Company (the Employer), a party in interest with respect to the Plan, of the shares of Press Properties, Inc. (Press) owned by the Plan, provided the sales price is not less than the fair market value of such shares on the date of the sale.

Summary of Facts and Representations

1. The Plan is a profit-sharing plan covering 22 participants as of December 31, 1984. The fair market value of the Plan's total assets was $581,826 as of December 30, 1985. The current trustee of the Plan is The Huntington National Bank of Columbus Ohio (the Trustee), which requested the application for exemption as a condition of continuing to act as trustee of the Plan. The Trustee represents that it has no relationship with the Employer, its principals, or affiliates.

2. Press is a closely held corporation owned by 16 shareholders, including the Plan, five profit-sharing plans maintained by other employers, five companies, and five individuals. The largest shareholder of Press owns 16.0% of its of 6,309 outstanding shares. As of June 30, 1985, six parcels of improved real property, all located in small farm communities in Ohio (Circleville, Van Wert, Logan, Wilmington, Hillsboro, and Washington Court House), comprised over 70% of Press' assets, the remainder of which consisted of cash and other liquid assets. Each of these six parcels is used for newspaper production, under a leasing or subleasing arrangement, by a different newspaper publishing company, namely: the Employer, Washington News Publishing Company, Circleville Publishing Company, Wayne Newspaper Company, News-Journal Company, and Hillsboro Publishing Company (collectively, the Tenants). All of the Tenants maintain profit-sharing plans which own shares of Press. All such shares were purchased by such plans at various dates from 1969 through 1972 (before enactment of the Act). After obtaining appraisals by Mr. Tom Wilhelm, M.A.I., of each parcel of real property owned by Press, the Trustee determined that the fair market value of the outstanding shares of Press was $146.87 per share as of June 30, 1985. Mr. Wilhelm represents that he has no relationship with Press, any of the Tenants, or their affiliates or principals.

3. The applicant represents that Press is not an affiliate, for purposes of section 407(d)(7) of the Act, of any of the Tenants. All Tenants except Hillsboro Publishing Company may comprise various controlled groups, but, according to the applicant, until the current audit is completed the extent of the controlled groups cannot be determined.

4. The Plan owns a total of 940 shares of Press, representing approximately 24% of the Plan's total assets. The Plan paid $94,600 for these shares ($100 per share). The Trustee wishes to sell these shares to the Employer at a price equal to the fair market value of the shares on the date of the sale. The entire price will be paid in cash on the date of the sale. The Plan will pay no commissions or other expenses relating to the proposed sale.

5. The Trustee states that when the Plan purchased the 940 shares, companies with substantial real-estate holdings were thought to be prudent investments and that, in general, real estate was an excellent investment from 1970 through 1985. Therefore, the Trustee speculates that the previous trustee of the Plan acquired and held these shares for the Plan in the belief that companies with real-estate holdings were prudent investments.[*]

6. When the Trustee became trustee of the Plan, it was concerned about the concentration of Press shares owned by the Plan, particularly in light of the poor economic forecast for smaller towns dependent upon the depressed agricultural sector of the economy. In addition, the Trustee did not want the administrative burden and expense of appraising closely held companies and would prefer to diversify the investments of the Plan. The Trustee states that there is virtually no market for the Press shares and that other Press shareholders have been notified and have no interest in purchasing additional shares of Press. The Trustee asserts that unless the Employer purchases the Press shares owned by the Plan, the Plan's assets could depreciate in value as no upturn in the real-estate market is anticipated. The proposed sales price will equal the fair market value of the Press shares on the date of the proposed sale, according to the Trustee. For these reasons, the Trustee believes it to be in the best interests of the Plan and its participants and beneficiaries to sell its holdings of Press shares and to reinvest the proceeds in other types of more liquid investments.

7. In summary, the applicant represents that the proposed transaction satisfies the exemption criteria set forth in section 408(a) of the Act because: (a) The proposed transaction is a one-time cash transaction; (b) the proposed sales price will equal the fair market value of the shares on the date of the sale as determined by the Trustee; (c) the Plan will pay no commissions or other expenses relating to the proposed sale; and (d) the Trustee, who is not related to the Employer, its principals or affiliates, believes the proposed sale will spare the Plan from risk of loss and will permit the Plan to diversify further by investing in more liquid assets.

The Wayne Newspaper Company Profit Sharing Plan (the Plan) Located in Logan, Ohio

[Application No. D–6522]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a)

[*] The Department is expressing no opinion herein as to whether or not the continued holding by the Plan (or any of the other plans mentioned in 2, above) of shares of Press constituted either a prohibited transaction under section 406 of the Act or a violation of any of the other fiduciary responsibility provisions of Part 4, Subtitle B, or Title I of the Act.

and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale to The Wayne Newspaper Company (the Employer), a party in interest with respect to the Plan, of the shares of Press Properties, Inc. (Press) owned by the Plan, provided the sales price is not less than the fair market value of such shares of the date of the sale.

Summary of Facts and Representations

1. The Plan is a profit-sharing plan covering 22 participants as of December 31, 1984. The fair market value of the Plan's total assets was $412,428 as of December 30, 1985. The current trustee of the Plan is The Huntington National Bank, of Columbus Ohio (the Trustee), which requested the application for exemption as a condition of continuing to act as trustee of the Plan. The Trustee represents that it has no relationship with the Employer, its principals, or affiliates.

2. Press is a closely held corporation owned by 16 shareholders, including the Plan, five profit-sharing plans maintained by other employes, five companies, and five individuals. The largest shareholder of Press owns 16.0% of its 6,300 outstanding shares. As of June 30, 1985, six parcels of improved real property, all located in small farm communities in Ohio (Circleville, Van Wert, Logan, Wilmington, Hillsboro, and Washington Court House), comprised over 70% of Press' assets, the remainder of which consisted of cash and other liquid assets. Each of these six parcels is used for newspaper production, under a leasing or subleasing arrangement, by a different newspaper publishing company, namely: the Employer, Washington News Publishing Company Van Wert Publishing Company, Circleville Publishing Company, News-Journal Company, and Hillsboro Publishing Company (collectively, the Tenants). All of the Tenants maintain profit-sharing plans which own shares of Press. All such shares were purchased by such plans at various dates from 1969 through 1972 (before enactment of the Act). After obtaining appraisals by Mr. Tom Wilhelm, M.A.I., of each parcel of real property owned by Press, the Trustee determined that the fair market value of the outstanding shares of Press was $146.67 per share as of June 30, 1985. Mr. Wilhelm represents that he has no relationship with Press, any of the Tenants, or their affiliates or principals.

3. The applicant represents that Press is not an affiliate, for purposes of section 407(d)(7) of the Act, of any of the Tenants. All Tenants except Hillsboro Publishing Company may comprise various controlled groups, but, according to the applicant, until the current audit is completed the extent of the controlled groups cannot be determined.

4. The Plan owns a total of 501 shares of Press, representing approximately 16% of the Plan's total assets.The Plan paid $50,100 for these shares ($100 per share). The Trustee wishes to sell these shares to the Employer at a price equal to the fair market value of the shares on the date of the sale. The entire price will be paid in cash on the date of the sale. The Plan will pay no commissions or other expenses relating to the proposed sale.

5. The Trustee states that when the Plan purchased the 501 shares, companies with substantial real-estate holdings were thought to be prudent investments and that, in general, real estate was an excellent investment from 1970 through 1985. Therefore, the Trustee speculates that the previous trustee of the Plan acquired and held these shares for the Plan in the belief that companies with real-estate holdings were prudent investments.[5]

6. When the Trustee became trustee of the Plan, it was concerned about the concentration of Press shares owned by the Plan, particularly in light of the poor economic forecast for smaller towns dependent upon the depressed agricultural sector of the economy. In addition, the Trustee did not want the administrative burden and expense of appraising closely held companies and would prefer to diversify the investments of the Plan. The Trustee states that there is virtually no market for the Press shares and that other Press shareholders have been notified and have no interest in purchasing additional shares of Press. The Trustee asserts that unless the Employer purchases the Press shares owned by the Plan, the Plan's assets could depreciate in value as no upturn in the real-estate market is anticipated. The proposed sales price will equal the fair market value of the Press shares on the date of the proposed sale, according to the Trustee. For these reasons, the Trustee believes it to be in the best interests of the Plan and its participants and beneficiaries to sell its holdings of Press shares and to reinvest the proceeds in other types of more liquid investments.

7. In summary, the applicant represents that the proposed transaction satisfies the exemption criteria set forth in section 408(a) of the Act because: (a) The proposed transaction is a one-time cash transaction; (b) the proposed sales price will equal the fair market value of the shares on the date of the sale as determined by the Trustee; (c) the Plan will pay no commissions or other expenses relating to the proposed sale; and (d) the Trustee, who is not related to the Employer, its principals or affiliates, believes the proposed sale will spare the Plan from risk of loss and will permit the Plan to diversify further by investing in more liquid assets.

For Further Information Contact: Mrs. Miriam Freund of the Department, telephone (202) 523-8194. (This is not a toll-free number.)

The News-Journal Company Profit Sharing Plan (the Plan) Located in Wilmington, Ohio

[Application No. D-6523]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale to The News-Journal Company (the Employer), a party in interest with respect to the Plan, of the shares of Press Properties, Inc. (Press) owned by the Plan, provided the sales price is not less than the fair market value of such shares on the date of the sale.

Summary of Facts and Representations

1. The Plan is a profit-sharing plan covering 24 participants as of December 31, 1984. The fair market value of the Plan's total assets was $474,441 as of December 30, 1985. The current trustee of the Plan is The Huntington National Bank, of Columbus Ohio (the Trustee), which requested the application for exemption as a condition of continuing to act as trustee of the Plan. The Trustee represents that it has no relationship with the Employer, its principals, or affiliates.

2. Press is a closely held corporation owned by 16 shareholders, including the

[5] The Department is expressing no opinion herein as to whether or not the continued holding by the Plan (or any of the other plans mentioned in 2, above) of shares of Press constituted either a prohibited transaction under section 406 of the Act or a violation of any of the other fiduciary responsibility provisions of Part 4, Subtitle B, of Title I of the Act.

Plan, five profit-sharing plans maintained by other employers, five companies, and five individuals. The largest shareholder of Press own 18.0% of its 6,309 outstanding shares. As of June 30, 1985, six parcels of improved real property, all located in small farm communities in Ohio (Circleville, Van Wert, Logan, Wilmington, Hillsboro, and Washington Court House), comprised over 70% of Press' assets, the remainder of which consisted of cash and other liquid assets. Each of these six parcels is used for newspaper production, under a leasing or subleasing arrangement, by a different newspaper publishing company, namely: the Employer Washington News Publishing Company, Van Wert Publishing Company, Wayne Newspaper Company, Circleville Publishing Company, and Hillsboro Publishing Company (collectively, the Tenants). All of the Tenants maintain profit-sharing plans which own shares of Press. All such shares were purchased by such plans at various dates from 1969 through 1972 (before enactment of the Act). After obtaining appraisals by Mr. Tom Wilhelm, M.A.I., of each parcel of real property owned by Press, the Trustee determined that the fair market value of the outstanding shares of Press was $146.87 per share as of June 30, 1985. Mr. Wilhelm represents that he has no relationship with Press, any of the Tenants, or their affiliates or principals.

3. The applicant represents the Press is not an affiliate, for purposes of section 407(d)(7) of the Act, of any of the Tenants. All Tenants except Hillsboro Publishing Company may comprise various controlled groups, but according to the applicant, until the current audit is completed the extent of the Controlled groups cannot be determined.

4. The Plan owns a total of 896 shares of Press, representing approximately 27.8% of the Plan's total assets. The Plan paid $89,600 for these shares ($100 per share). The Trustee wishes to sell these shares to the Employer at a price equal to the fair market value of the shares on the date of the sale. The entire price will be paid in cash on the date of the sale. The Plan will pay no commissions or other expenses relating to the proposed sale.

5. The Trustee states that when the Plan purchased the 896 shares, companies with substantial real-estate holdings were thought to be prudent investments and that, in general, real estate was an excellent investment from 1970 through 1985. Therefore, the Trustee speculates that the previous trustee of the Plan acquired and held these shares for the Plan in the belief that companies with real-estate holdings were prudent investments.[6]

6. When the Trustee became trustee of the Plan, it was concerned about the concentration of Press shares owned by the Plan, particularly in light of the poor economic forecast for smaller towns dependent upon the depressed agricultural sector of the economy. In addition, the Trustee did not want the administrative burden and expensed of appraising closely held companies and would prefer to diversify the investments of the Plan. The Trustee states that there is virtually no market for the Press shares and that other Press shareholders have been notified and have no interest in purchasing additional shares of Press. The Trustee asserts that unless the Employer purchases the Press shares owned by the Plan, the Plan's assets could depreciate in value as no upturn in the real-estate market is anticipated. The proposed sales price will equal the fair market value of the Press shares on the date of the proposed sale, according to the Trustee. For these reasons, the Trustee believes it to be in the best interests of the Plan and its participants and beneficiaries to sell its holdings of Press shares and to reinvest the proceeds in other types of more liquid investments.

7. In summary, the applicant represents that the proposed transaction satisfies the exemption criteria set forth in section 408(a) of the Act because: (a) The proposed transaction is a one-time cash transaction; (b) the proposed sales price will equal the fair market value of the shares on the date of the sale as determined by the Trustee; (c) the Plan will pay no commission or other expenses relating to the proposed sale; and (d) the Trustee, who is not related to the Employer, its principals or affiliates, believes the proposed sale will spare the Plan from risk of loss and will permit the Plan to diversify further by investing in more liquid assets.

For Further Information Contact: Mrs. Miriam Freund of the Department, telephone (202) 523-8194. (This is not a toll-free number.)

[6] The Department is expressing no opinion herein as to whether or not the continued holding by the Plan (or any of the other plans mentioned in 2, above) of shares of Press constituted either a prohibited transaction under section 406 of the Act or a violation of any of the other fiduciary responsibility provisions of Part 4, Subtitle B, of Title I of the Act.

John A. Colglazier Self Employed Retirement Plan (the Plan) Located in San Antonio, Texas

[Application No. D-5626]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in Rev. Proc. 75-26 (1975 C.B. 772). If the exemption is granted the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed cash sale by the Plan of a parcel of unimproved real property (the Property) located in San Antonio, Texas to John A. Colglazier (Mr. Colglazier), a disqualified person with respect the Plan;[7] provided that the cash received from the proposed sale is no less than the fair market value of the Property on the date of the sale.

Summary of Facts and Representations

1. The Plan is a defined contribution plan adopted on February 6, 1986, under a standardized master plan and trust agreement sponsored by RepublicBank Dallas, N.A., as a successor plan to a plan originally established March 13, 1963. RepublicBank San Antonio, N.A. serves as the trustee for the Plan. Mr. Colglazier, a self employed sole proprietor and the sole participant in the Plan, is engaged in the commercial and investment real estate business in San Antonio, Texas. The total Plan assets as of December 31, 1985, were approximately $294,636.

2. The Property consists of 1.0307 acres of unimproved land located in the northeast corner of the intersection of Mesquite and Duval Streets in San Antonio, Bexar County, Texas. The Plan acquired the Property on October 1, 1985, from Mr. William Cole Butler, an unrelated third party, for a purchase price of $2.80 per square foot plus $101 in charges for a total of $126,093.94. Also, the Plan has incurred engineering fees with respect to the Property in the amount of $628.41. The Property as of December 31, 1985, constituted approximately 42% of the assets of the Plan.

3. On February 6, 1986, Mr. Richard L. Dugger, MAI (Mr. Dugger) assisted by Mr. Bobby G. Mealer (Mr. Mealer), real

[7] Since Mr. Colglazier is a sole proprietor and the only participant in the Plan there is no jurisdiction under Title I of the Employee Retirement Income Security Act (the Act) pursuant to 29 CFR 2510.3-3(b). However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

estate consultants and appraisers associated with Love & Dugger located in San Antonio, Texas, valued the property at approximately $146,000. Both Mr. Dugger and Mr. Mealer verify their independence in that they have no present or prospective interest in the Property nor any personal interest or bias with respect to the parties involved. It is represented that neither their employment nor the fee for the appraisal was contingent upon the valuation placed on the Property. Mr. Dugger is qualified in that he has been engaged since 1969 in appraising commercial, industrial, and residential real property, and farm and ranch lands in San Antonio, Texas. Mr. Dugger is certified under the voluntary continuing education program of the American Institute of Real Estate Appraisers and has attended various advanced residential appraisal courses in addition to teaching a course on the principles of real estate appraisal at San Antonio College. Mr. Dugger's professional affiliations include membership in the National Association of Realtors, the Society of Real Estate Appraisers, and the Texas Association of Realtors.

4. Mr. Colglazier is seeking an exemption from the prohibited transaction provisions of section 4975 of the Code to permit him to purchase the Property from the Plan for cash in the amount of the higher of the fair market value of the Property or $146,000. It is represented that the Plan will incur no fees, commissions, or other costs as a result of the sale. Mr. Colglazier states that the Plan originally acquired the Property to hold for long term appreciation, but that due to the depressed economic conditions in the real estate market in the San Antonio area, it would be in the Plan's best interest to sell the Property.

Mr. Colglazier represents that the Property is not near any other land which he owns, and at the time the Plan purchased the Property, he had the financial ability to purchase the Property himself. Mr. Colglazier states that the sale of the Property to him would result in a profit to the Plan which would be in the best interest of the Plan. It is represented that the proceeds, from the sale would be invested in other assets.

5. In summary, Mr. Colglazier represents that the proposed transaction satisfies the criteria for exemption under section 4975(c)(2) of the Code because:

(a) The sale of the Property will be a one-time transaction for cash;

(b) No fees, commissions, or other costs will be incurred by the Plan as a result of the sale;

(c) The Plan will sell the Property at its fair market value as determined by a qualified, independent appraiser; and

(d) The Plan will realize profit from the sale of the Property which the Plan will be able to invest in other assets.

Notice to Interested Persons

Because Mr. Colglazier is the applicant as well as the only participant in the Plan, it has been determined that there is no need to distribute the notice of pendency to interested persons. Comments and requests for a hearing must be received by the Department within 30 days of the date of publication of this notice of proposed exemption.

For Further Information Contact: Ms. Angelena C. Le Blanc of the Department, telephone (202) 523-8196. (This is not a toll-free number).

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan an in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 29th day of May 1986.

Elliot I. Daniel,

Assistant Administrator for Regulations and Interpretations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

NATIONAL SCIENCE FOUNDATION

Advisory Committee for the Critical Engineering Systems Section; Meeting

The National Science Foundation announces the following advisory committee meeting:

Name: Advisory Committee for the Critical Engineering Systems Section.

Date and time: June 19, 1986 (8:30—5:00 p.m.) June 20, 1986 (9:00 a.m.—3:00 p.m.)

Place: State Plaza Hotel (Diplomat Room) 2117 E Street NW., Washington, DC.

BEST COPY AVAILABLE

Type of meeting: June 19—Open, June 20—Closed.

Contact person: Dr. Michael P. Gaus, Section Head, Critical Engineering Systems, Division of Fundamental Research for Emerging and Critical Engineering Systems, National Science Foundation, 1800 G Street NW., Room 1130, Washington, DC 20550 (Telephone: 202-357-9809).

Summary of minutes: May be obtained from Contact Person listed above.

Purpose of meeting: To provide advice and recommendations concerning fundamental research for critical engineering systems.

Agenda June 19—

- Review of Program Awards in the following Programs: Earthquake Hazard Mitigation, Environmental Engineering, Systems Engineering for Large Structures, Natural and Man-Made Hazard Mitigation.
- Current Plans and Program Goals.
- Future Thrust Areas and Activities.
- External Peer Oversight of the Earthquake Hazard Mitigation Program and the Environmental Engineering Program.

Reason for closing: External Peer Oversight. The Committee will review grant and declination jackets which contain the names of applicant institutions and principal investigators and privileged information contained in declined proposals. The meeting will also include a review of the peer review documentation pertaining to the applicant. These matters are within exemptions 4 and 6 of the Government in the Sunshine Act.

May 29, 1986.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

Advisory Committee for Science and Engineering Education (ACSEE); Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Science and Education (ACSEE).

Date and time: Monday, June 23, 1986, 9:00 A.M.—5:00 P.M. Tuesday, June 24, 1986, 9:00 A.M.—3:00 P.M.

Place: Room 540, National Science Foundation, 1800 G Street, NW., Washington, DC 20550.

Type of meeting: Open.

Contact person: Dr. Bassam Z. Shakhashiri, Assistant Director for Science and Engineering Education, National Science Foundation, Washington, DC 20550 Telephone: (202) 357-9522.

Summary minutes: May be obtained from Dr. W. Frederick Oettle, Executive Secretary, ACSEE, National Science Foundation, Room 414, Washington, DC 20550.

Purpose of committee: To provide advice and recommendations concerning NSF support for science and engineering education.

Agenda: June 23-24, 1986

Review of FY 86 Programs and Initiatives.
Review External Peer Oversight Committee Reports (External Peer Oversight Committee—Informal Science Education Program, External Peer Oversight Committee—Research in Teaching and Learning Program, External Peer Oversight Committee—Graduate/Minority Fellowships Program)
Discussion of NSB Report on Undergraduate Science, Mathematics, and Engineering Education.
Discussion of FY 87 Budget Request and proposed Plans and initiatives.
Strategic planning for FY 88-92.
Review Contractor's Report on Middle School Science.

May 29, 1986.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Consumers Power Co.; Withdrawal of Applications for Amendments to Facility Operating License

[Docket No. 50-255]

The U.S. Nuclear Regulatory Commission (the Commission has granted the request of Consumers Power Company (the licensee)) for withdrawal of six applications for amendments to Provisional Operating License No. DPR-20 for the Palisades Plant located in Van Buren County, Michigan. The Commission issued Notices of Consideration of Issuance of Amendments which were published in the Federal Register. The dates of application, subject matter of the proposed changes, and Federal Register citations are as follows:

1. Application dated November 12, 1981, "NUREG-0737 Action Item III.D.1.1," published December 21, 1983 (48 FR 56501);

2. Application dated November 17, 1981, "Equipment and Sampling Tests," published October 26, 1983 (48 FR 49582);

3. Application dated June 25, 1982, "Primary Coolant Boron Concentration," published September 21, 1983 (48 FR 43136);

4. Application dated June 25, 1982, "Fire Protection System," published October 26, 1983 (48 FR 49582);

5. Application dated June 29, 1982, "Surveillance Containment Air Coolers," published September 2, 1983 (48 FR 43136); and

6. Application dated February 5, 1985, "Minimum Conditions for Criticality," published May 21, 1984 (50 FR 20975).

By letter dated March 5, 1986, the licensee withdrew its applications for the proposed amendments.

For further details with respect to this action, see (1) the applications for amendments dated November 12, 1981; November 17, 1981; June 25, 1982 (2); June 29, 1982; and February 5, 1985; (2) the licensee's letter dated March 5, 1986 withdrawing the applications for amendments; and (3) the Commission's letter granting the withdrawal dated May 28, 1986. All of the above documents are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC and at the Van Zoeren Library, Hope College, Holland, Michigan 49423.

Dated at Bethesda, Maryland, this 28th day of May, 1986.

For The Nuclear Regulatory Commission.
Ashok C. Thadani,
Director, PWR Project Directorate No. 8, Division of PWR Licensing-B.

BILLING CODE 7590-01-M

Northern State Power Co. Environmental Assessment and Finding of No Significant Impact

[Docket No. 50-263]

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of exemption from certain requirements of Section III.G of Appendix R to 10 CFR Part 50 to Northern States Power Company (the licensee) for Monticello Nuclear Generating Plant, located at the licensee's site in Wright County, Minnesota.

Environmental Assessment

Identification of Proposed Action

The proposed action would grant exemption from certain requirements of Section III.G of Appendix R to 10 CFR Part 50 which relates to fire protection features for ensuring that systems and associated circuits used to achieve and maintain safe shutdown are free of fire damage. The exemption is technical since the licensee must demonstrate that fire protection configurations meet the specific requirements of Section III.G or that alternate fire protection configurations can be justified by an acceptable fire hazard analysis.

The Need for the Proposed Action

The proposed exemption is needed because the features described in the licensee's request regarding the existing and proposed fire protection at the plant would result in a net benefit to the public health and safety that compensates for any decrease in safety that may result from the granting of this exemption request.

Environmental Impacts of the Proposed Action

The proposed exemption will provide a degree of fire protection such that there is no increase in the risk of fires at Monticello. Consequently, the probability of fires has not been increased and the post-fire radiological releases will not be greater than previously determined nor does the proposed exemption otherwise affect radiological plant effluents. Therefore, the Commission concludes that there are not significant radiological environmental impacts associated with the proposed exemption.

With regard to potential nonradiological impacts, the proposed exemption involves features located entirely within the restricted areas as defined in 10 CFR Part 20. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed exemption.

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the licensee's letters dated August 5, 1983 and February 21, 1986. These letters are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, 55401.

Dated at Bethesda, Maryland, this 28th day of May 1986.

For The Nuclear Regulatory Commission.
John A. Zwolinski,
Director, BWR Project Directorate No. 1, Division of BWR Licensing.

PEACE CORPS

Submission of Public Use Forms Review Request to the Office of Management and Budget

SUMMARY: Pursuant to the Paperwork Reduction Act of 1981 (44 U.S.C. Chapter 35), The Peace Corps has submitted to the Office of Management and Budget a request to approve the use of the Peace Corps Partnership Donor Forms through June 1, 1989. The forms are completed voluntarily by those seeking additional information about the Partnership Program. The forms provide the name, organization, current address and current phone number of those people interested. This information is necessary for Peace Corps to continue to provide new project information on a regular basis to current or potential donors.

Information about the forms:

Agency address: Peace Corps, 806 Connecticut Avenue, NW., Washington, DC 20526.

Title: Peace Corps Partnership Donor Forms.

Type of Request: Renewal of approval of use.

Frequency of collection: On occassion.

General description of respondents: Random sampling of schools, businesses, civic organizations, corporations and individuals who have requested more information about the Partnership Program.

Estimated number of respondents: 4,000 annually.

Estimated hours for respondents to furnish information: Five minutes.

Comments: Comments on these forms should be directed to Francine Picoult, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

A copy of these forms may be obtained from Nicole Vanasse, Peace Corps Partnership Program, Room M-1107, 806 Connecticut Avenue, NW., Washington, DC 20526. Ms. Vanasse

may be called on area code 202–254–8406. This is not a toll-free number.

This is not a request to which 44 U.S.C. 3504(h) applies.

This notice is issued in Washington, DC, on May 29, 1986.

Linda Rae Gregory,

Associate Director for Management.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-23278; File No. SR-MCC-86-4]

Self-Regulatory Organizations; Proposed Rule Change by Midwest Clearing Corp. Relating to the Reorganization of the Board of Directors

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 24, 1986, the Midwest Clearing Corporation filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Attached to the filing as Exhibit A is the text of proposed amendments to the Midwest Clearing Corporation's By-Laws.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed amendments will facilitate the election of a separate Board of Directors for MCC. In the past, the membership of the MCC Board of Directors has in practice been the same as that of the Midwest Stock Exchange (MSE) Board of Governors. This common directorship reflected MCC's origin as an MSE subsidiary.

MCC will continue to be a wholly-owned MSE subsidiary. However, in order to address more efficiently MCC's business operations and goals, a separate Board of Directors is desired.

The proposed rule change will establish an seventeen member MCC Board. The MCC Chairman and Vice-Chairman will be chosen from among the directors; the President will be an *ex officio* director. The remaining sixteen directors will be divided into three classes and elected in staggered terms.

The proposed amendments are consistent with Section 17A of the Securities Exchange Act of 1934, in that it provides for the fair representation of MCC's Participants in the selection of its directors and the administration of its affairs.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Midwest Clearing Corporation does not believe that any burdens will be placed on competion as a result of the proposed rule change.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments have neither been solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will: (A) by order approve the proposed rule change, or (B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by June 24, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 29, 1986.

Shirley E. Hollis,

Acting Secretary.

[FR Doc. 86-12431 Filed 6-2-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-23277; File No. SR-MSRB-86-8]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Order Approving Proposed Rule Change

The Municipal Securities Rulemaking Board ("MSRB"), Suite 800, 1818 N Street, NW., Washington, DC 20036–2491, submitted on April 3, 1986, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b–4 thereunder, to modify MSRB rule G–11(g) on syndicate practices to require syndicate managers to provide to syndicate members a written summary of allocations receiving priority over members' "take-down" orders within two business days after the date of the sale, rather than the ten business days as currently required by the rule. The proposed rule change also would require that information identifying persons placing group or related portfolio orders to which securities are allocated be provided to syndicate members at or before final settlement of the syndicate, rather than within 10 business days of the sale date as the rule currently requires.

Notice of the proposed rule change was given in Securities Exchange Act Release No. 23134 (51 FR 15565, April 24, 1986). No comments were received regarding the proposal.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the

rules and regulations thereunder applicable to the MSRB, and, in particular, the requirements of Section 15B and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 28, 1986.

Shirley E. Hollis,

Acting Secretary.

[FR Doc. 86-12432 Filed 6-2-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-23278; File No. SR-OCC-86-11]

Self-Regulatory Organization; Proposed Rule Change by the Options Clearing Corp. Relating to Adjustments to the Terms of Outstanding Stock Options

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(i) (the "Act"), notice is hereby given that on May 13, 1986, The Options Clearing Corporation filed with the Securities and Exchange Commission the proposed rule change as descried in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Options Clearing Corporation ("OCC") proposes to amend Article VI, Section 11 of its By-Laws to read in its entirety as set forth below. Italics indicate material proposed to be added and bracketing indicates material proposed to be deleted.

THE OPTIONS CLEARING CORPORATION

BY-LAWS

Article VI

Adjustments

Section 11. (*a*) Whenever there is [declared] a *dividend*, stock dividend, stock distribution, stock split, [or] reverse *stock* split, rights offering distribution, reorganization, recapitalization, [or] reclassification or similar event in respect of any underlying security, *or a merger, consolidation, dissolution or liquidation of the issuer of any underlying security*, the number of [outstanding] option contracts, the unit of trading, [and/or] the exercise price, *and the underlying security, or any of them*, with respect to all *outstanding* option contracts open for trading in that underlying security *may* [shall] be adjusted [,effective on the "ex-date" of the underlying security in the primary market,] in accordance with this section 11. [The adjusted exercise price shall be rounded to the nearest ⅛ of a dollar and the adjusted trading unit shall be rounded down to eliminate any fractional share. No adjustment shall be made for cash distributions made out of "earnings and profits" as that term is used in the Federal Internal Revenue Code.]

(b) All adjustments hereunder shall be made by the Securities Committee. The Securities Committee shall determine to make adjustments to reflect particular events in respect of an underlying security, and the nature and extent of any such adjustment, based on its judgment as to what is appropriate for the protection of investors and the public interest, taking into account such factors as fairness to holders and writers of option contracts on the underlying security, the maintenance of a fair and orderly market it options on the underlying security, consistency of interpretation and practice, efficiency of exercise settlement procedures, and the coordination with other clearing agencies of the clearance and settlement of transactions in the underlying security. The Securities Committee may, in addition to determining adjustments on a case-by-case basis, adopt statements of policy or interpretations having general application to specified types of events. Every determination by the Securities Committee pursuant to this Section 11 shall be within the sole discretion of the Securities Committee and shall be conclusive and binding on all investors and not subject to review subject only to the oversight of the Securities and Exchange Commission pursuant to section 19(b) of the Securities Exchange Act of 1934, as amended, with respect to statements of policy or interpretations adopted by the Securities Committee.

(c) It shall be the general rule that there will be no adjustments to reflect ordinary cash dividends or distributions paid by the issuer of the underlying security.

[(a)] *(d) It shall be the general rule that* [I] *in* the case of a stock dividend, stock distribution or stock split whereby one or more whole numbers of shares of the underlying security are issued *with* [in] respect to each outstanding share, each option contract covering that underlying security [outstanding prior to such event] shall be increased by the same number of additional option contracts as the number of shares issued with respect to each share of the underlying security, [and] the exercise price per share in effect immediately prior to such event shall be proportionately reduced[.] , *and* [T] the unit of trading [with respect to each option contract] shall remain the same.

[(b)] *(e) It shall be the general rule that* [I] *in* the case of a stock dividend, stock distribution or stock split whereby other than a whole number of shares of the underlying security is issued in respect of each outstanding share, the exercise price in effect immediately prior to such event shall be proportionately reduced, and conversely, in the case of a reverse stock split or combination of shares, the exercise price in effect immediately prior to such event shall be proportionately increased. Whenever the exercise price with respect to an option contract has been reduced or increased in accordance with this paragraph *(e)* [(b)], the unit of trading [with respect to the option contact] shall be proportionately increased or reduced, as the case may be. [If an adjusted unit of trading is rounded down to eliminate a fractional share, the adjusted exercise price shall be further adjusted, to the nearest ⅛ of a dollar, to reflect any diminution in the value of the option contract resulting from the elimination of the fractional share. No adjustment in the number of option contracts outstanding shall be made on account of the happening of any of the events for which adjustments are provided in this paragraph.]

[(c)] *(f) It shall be the general rule that* [I] *in* the case of any distribution made with respect to shares of *an* underlying *security* [securities], other than cash distributions *subject to paragraph (c)* [of the character referred to in the third sentence] of this section 11 and other than distributions for which adjustments are provided in paragraphs (*d*) [(a)] or (*e*) [(b)] of this section 11, *if an adjustment is determined by* the Securities Committee *to be* [of the Corporation (as hereinafter defined) shall determine whether an adjustment is] appropriate, [by reason of such event in the interest of fairness to holders and writers of option contracts. Whenever an adjustment is so determined to be appropriate, either] (i) the exercise price in effect immediately prior to such event shall be reduced by the value per share of the distributed property, in which event the [trading] unit *of trading* shall not be adjusted, or (ii) the *unit of* trading [unit] in effect immediately prior to such event shall be adjusted so as to include the amount of property distributed with respect to the number of shares of the underlying security represented by the *unit of* trading [unit] in effect prior to such adjustment, in which event the exercise price shall not be adjusted. The Securities Committee shall, *with respect to adjustments under this paragraph or any other paragraph of this section 11, have the authority to determine the value of distributed property.* [determine whether a given event for which adjustment is provided under this paragraph shall result in an adjustment under clause (i) or clause (ii) of the preceding sentence, and, with respect to adjustments under clause (i), it shall determine the value of the distributed property.]

[(d)] *(g)* In the case of any [reorganization, recapitalization, reclassification or similar] event [with respect to shares of underlying securities] for which adjustment is not provided in any of the foregoing paragraphs of this section 11, [or in the case of any event for which adjustment is provided in one of the foregoing paragraphs but is not considered by the Securities Committee to be appropriate under the circumstances,] the Securities Committee *may* [shall] make such adjustments, *if any*, [in the exercise price, trading unit or number of contracts] with respect to the option contracts affected by such event as *the Securities* [that] Committee

[in its sole discretion] determines [to be fair to the holders and writers of such option contracts].

(h) Adjustments pursuant to this section 11 shall as a general rule become effective in respect of option contracts outstanding on the "ex-date" established by the primary market for the underlying security.

(i) It shall be the general rule that (1) all adjustments of the exercise price of an outstanding option contract shall be rounded to the nearest ⅛ of a dollar, and all adjustments of the unit of trading shall be rounded down to eliminate any fraction, and (2) if the unit of trading is rounded down to eliminate a fraction, the adjusted exercise price shall be further adjusted, to the nearest ⅛ of a dollar, to reflect any diminution in the vaule of the option contract resulting from the elimination of the fraction.

(j) Notwithstanding the general rules set forth in paragraphs (c) through (i) of this section 11 or which may be set forth as interpretations and policies under this section 11, the Securities Committee shall have the power to make exceptions in those cases or groups of cases in which, in applying the standards set forth in paragraph (b) hereof, the Securities Committee shall determine such exceptions to be appropriate. However, the general rules shall be applied unless the Securities Committee affirmatively determines to make an exception in a particular case or group of cases.

[(e)] *(k)* The Securities Committee[, in exercising its functions pursuant to paragraphs (c) or (d) of this section 11 regarding adjustment of option contracts in an underlying security,] shall consist of *one* [two] designated representative[s] of each Exchange [on which option contracts in that underlying security are open for trading] and the Chairman of the Corporation. *In making a determination regarding the adjustment of outstanding option contracts on a particular underlying security, the action of an adjustment panel consisting of two designated representatives of each Exchange on which option contracts on that underlying security are open for trading (one of whom shall be such Exchange's representative on the Securities Committee) and the Chairman of the Corporation shall constitute the action of the Securities Committee.* The vote of a majority of the voting members of the Securities Committee, *or of any adjustment panel,* shall constitute the *determination* [action] of the *Securities* Committee *or such panel.* The Chairman of the Corporation shall not be a voting member of the Committee *or of any adjustment panel* except in the case of a tie vote, in which case the Chairman shall have the right to cast a vote to break the tie and shall, for such purpose, be deemed to be a voting member. [The members of the Securities Committee need not be Clearing Members or officers or directors of the Corporation.] The Securities Committee *or any adjustment panel* may transact its business by telephone. *Notwithstanding the foregoing provisions of this paragraph, the Chairman of the Corporation may designate any other officer of the Corporation, and any representative of an Exchange may designate any other representative of such Exchange, to serve in his place at any meeting of the Securities Committee or of any adjustment panel. In the event of such designation, the designee shall, for the purposes of such meeting, have all of the powers and duties under this Section 11 of the person designating him. Neither the Corporation nor any Exchange shall designate to serve on any adjustment panel (i) any Exchange member or Clearing Member, or any director, officer, partner, or employee of any Exchange member or Clearing Member, or (ii) any person who, to the knowledge of the self-regulatory organization designating such person, is the beneficial holder of a long or short position in option contracts as to which adjustment panel is to make a determination.*

. . . Interpretations and Policies:

.01 Cash dividends or distributions in an aggregate amount which does not exceed 10% of the market value (as of the close of trading on the declaration date) of the underlying security outstanding will as a general rule, be deemed to be "ordinary cash dividends or distributions" within the meaning of paragraph (c) of Section 11. The Securities Committee will determine on a case-by-case basis whether other cash dividens or distributions are "ordinary cash dividiens or distributions" or whether they are dividends or distributions for which an adjustment should be made. [The Chairman of the Corporation may designate any other officer of the Corporation to serve in his place at any meeting of the Securities Committee. In the event of such designation, the Chairman's designee shall, for the purposes of such meeting, have all of the powers and duties of the Chairman under Article VI, section 11(e) of thue By-Laws.]

.02 Adjustments will not ordinarily be made to reflect the issuance of so-called "poison pill" right that are not immediately exercisable, trade as a unit or automatically with the underlying security, and may be redeemed by the issuer. In the event such rights become exercisable, begin to trade separately from the underlying security, or are redeemed, the Securities Committee will determine whether an adjustment is appropriate.

.03 Adjustments will not be made to reflect a tender offer or exchange offer to the holders of the underlying security, whether such offer is made by the issuer of the underlying security or by a third person or whether the offer is for cash, securities or other property. This policy will apply without regard to whether the price of the underlying security may be favorably or adversely affected by the offer or whether the offer may be deedmed to be "coercive." Outstanding options ordinarily will be adjusted to reflect a merger, consolidation or similar event that becomes effective following the completion of a tender offer or exchange offer.

.04 Adjustments will not be made to reflect changes in the capital structure of an issuer where all of the underlying securities outstanding in the hands of the public (other than dissenters' shares) are not changed into another security, cash or other property. For example, adjustments will not be made merely to reflect the issuance (except as a distribution on an underlying security) of new or additional debt, stock, or options, warrants or other securities convertible into or exercisable for the underlying security, the refinancing of the issuer's outstanding debt, the repurchase by the issuer of less than all of the underlying securities outstanding, or the sale by the issuer of significant capital assets.

.05 When an underlying security is converted into a right toreceive a fixed amount of cash, such as in a merger, outstanding options will be adjusted to require the delivery upon exercise of cash in an amount per share equal to the conversion price. As a result of such adjustment, the value of all outstanding in-the-money opitons will become fixed, and all at-the-money and out-of-the-money options will become worthless.

.06 In the case of a corporate reorganization, reincorporation or similar occurrence by the issuer of an underlying security which results in an automatic share-for-share exchange of shares in the issuer for shares in the resulting company, the options on the underlying security will ordinarily be adjusted to require delivery upon exercise of a like number of units of the shares of the resulting company. Because the securities are generally exchanged only on the books of the issuer and the resulting company, and are not generally exchanged physically, deliverable shares will ordinarily include certificates that are denominated on their face as shares in the original issuer, but which, as a result of the corporate transaction, represent shares in the resulting company.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

It its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed rule change would amend and restate Article VI, section 11 of OCC's By-Laws, which governs adjustments to the terms of outstanding option contracts.

A major purpose of the proposed rule change is to give the OCC Securities Committee more discretion to deal with novel securities and new types of corporate transactions not contemplated at the time when Article VI, Section 11

was drafted. The provisions of the amended By-Law are therefore framed as general rules, which the Securities Committee is empowered to override when it deems such action to be appropriate for the protection of investors and the public interest.

The present prohibition against adjusting for cash distributions made out of "earnings and profits," as defined in the Internal Revenue Code, would be eliminated. In some cases, the "earnings and profits" test has proven difficult or impossible to apply. More importantly, the inflexibility of the present rule could lead to inequities by preventing OCC from adjusting outstanding options in response to cash distributions that were extraordinary in source and amount, but were nonetheless chargeable against "earnings and profits" for tax purposes.

The proposed rule change would replace the outright prohibition in the present By-law with a general rule that there will be no adjustments for "ordinary" cash dividends or distributions. A stated policy thereunder would provide that cash dividends and distributions of up to 10% of the market value of the underlying security would generally be deemed to be "ordinary," so as not to call for an adjustment. The Securities Committee would evaluate larger distributions on a case-by-case basis.

Another purpose of the proposed rule change is to articulate the standard to be followed by the Securities Committee in making adjustment determinations. That standard is the Committee's judgment as to what is appropriate for the protection of investors and the public interest, taking into consideration such factors as the maintenance of fair and orderly markets, consistency of interpretation and practice, efficiency of exercise settlement procedures, and coordination with stock clearing agencies.

In addition, the rule change would make explicit a point that OCC believes to be implicit in the present By-Law—namely, that decisions of the Securities Committee are intended to be final, conclusive, and not subject to review. The purpose of that provision is to make it clear that the market may trade in reliance on announced adjustment determinations without the risk that such determinations may later be overturned, and that such determinations are conclusive and binding on investors.

Finally, the rule change would establish a standing Securities Committee (as distinct from the *ad hoc* panels convened to deal with specific transactions) consisting of the Chairman of OCC and one representative of each self-regulatory organization that maintains an options market. The standing Committee would have the power to adopt stated policies and interpretations having general application to recurrent types of transactions not specifically covered in the By-Law itself.

The proposed rule change also includes a number of stated policies relating to the interpretation and administration of the amended By-Law. In addition to the policy defining "ordinary" cash distributions, discussed above, there are policies reflecting OCC's historical practice of not adjusting for issuances of "poison pill" rights, for tender offers or exchange offers, or for changes in an issuer's capital structure not involving the alternation of the legal rights represented by outstanding securities. Other policies cover adjustments for cash mergers and for reincorporation mergers not involving the replacement of outstanding stock certificates.

The proposed rule change is consistent with the purposes and requirements of sections 6 and 17A of the Exchange Act because it would further the maintenance of fair and orderly markets and the protection of investors and the public interest by eliminating unduly restrictive language in OCC's By-Law governing adjustments that might impede equitable adjustments in certain extraordinary situations, by clarifying the provisions of that By-Law and the effect of determinations thereunder, and by publishing stated policies dealing with adjustments for certain recurrent types of transactions.

B. Self-Regulatory Organization's Statement on Burden on Competition

OCC does not believe that the filing will have any impact on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were not and are not intended to be solicited by OCC with respect to the filing, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning for foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by June 24, 1986.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 28, 1986.

Western State Production Co., Inc.; Order of Suspension of Trading

May 29, 1986.

It appears to the Securities and Exchange Commission that there is a lack of adequate current information concerning the affairs of Western State Production Co., Inc.

Therefore, it is ordered, pursuant to section 12(k) of the Securities Exchange Act of 1934, that trading in the securities of Western State Production Co., Inc., over-the-counter or otherwise, is suspended for the period from 10:00 a.m. (EST) on Thursday, May 29, 1986 through midnight (EST) on Saturday, June 7, 1986.

By the Commission.

Shirley Hollis,

Acting Secretary.

[CM-8/972]

Shipping Coordinating Committee; Meeting

The National Committee for Prevention of Marine Pollution (NCPMP) (a subcommittee of the Shipping Coordinating Committee) will conduct an open meeting on July 2, 1986 at 9:30 AM in Room 2415 at Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC.

The purpose of the meeting will be a general review of the agenda items to be considered at the Twenty-third session of the Marine Environment Protection Committee (MEPC) of the International Maritime Organization (IMO) to be held July 7-11, 1986. Proposed U.S. positions of MEPC agenda item issues will be discussed.

The major items of discussion will be the following:

1. Proposed revisions, with a view toward ratification of optional Annexes III, IV, and V of the International Conventioon of the Prevention of Pollution from Ships, 1973, as modified by the Protocal of 1978 relating thereto (MARPOL 73/78). The MEPC at is 22nd session agreed in principle to a revised text of Annex III (Regulations of the Prevention of Pollution by Harmful Substances Carried by Sea in Package Form) wich provides for implmentation of Annex III provisions through the International Maritime Dangerous Goods (IMDG) Code.

Discussions will focus on the impact of Annex III requirements on existing packaging, marking/labeling and stowage requirements under SOLAS and the IMDG Code for packaged dangerous goods which have been dtermined to be marine pollutants. The criteria for determining marine pollutants under Annex III will also be addressed.

2. Uniform interpretations of Annex I (Regulations for the Prevention of Pollution by Oil) and Annex II (Regulations for the Control of Pollution by Noxious Liquid Substances in Bulk) of MARPOL 73/78.

4. Enforcement of pollution conventions.

5. Inter-related work of other Committees and Subcommittees.

Following this meeting, at 1:30 PM the NCPMP will conduct a special meeting to ascertain the desirability of U.S ratification of Annex V (Regulations for the Prevention of Pollution by Garbage from ships) to MARPOL 73/78. Notice of this special NCPMP meeting was published in the Federal Register on April 18, 1986 (51 FR 13310).

Members of the public may attend both meetings up to the seating capacity of the rooms.

For further information of for documentation pertaining to the NCPMP meeting, contact either Lieutenant Commander D.B. Pascoe or Lieutenant G.T. Jones, U.S. Coast Guard Headquarters (G-WER-3), 2100 Second Street, SW., Washington, DC 20593; Tel: (202) 426-9573.

Dated: May 28, 1986.

Richard C. Scissors,

Chairman, Shipping Coordinating Committee.

Federal Highway Administration

Environmental Impact Statement: Nashua, NH

AGENCY: Federal Highway Administration, DOT.

ACTION: Notice of Intent.

SUMMARY: The Federal Highway Administration is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed project in the City of Nashua in New Hampshire.

FOR FURTHER INFORMATION CONTACT: (1) For the Federal Highway Administration (FHWA), William F. O'Donnell, Area Engineer, Telephone: (603) 224-3365, Federal Highway Administration, 55 Pleasant Street, Room 219, Concord, NH 03301, or Frederic C. Murphy, Chief, Environmental Services Section, Telephone: (603) 271-3791, The State of New Hampshire Department of Transportation, John O. Morton Building, Concord, NH 03301.

SUPPLEMENTARY INFORMATION: The FHWA in cooperation with the New Hampshire Department of Transportation and the City of Nashua, will prepare an environmental impact statement (EIS) on a proposal to provide traffic and air quality relief to the Nashua CBD in the vicinity of the current Main Street crossing of the Nashua River.

The proposed action is anticipated to include a new Nashua River bridge westerly of Main Street with approach roadways connecting downtown Nashua in the vicinity of West Hollis Street with Broad Street in the vicinity of Exit 6 on the F. E. Everett Turnpike. The proposed roadway would likely be a 4-lane controlled access facility of about 1.5 miles in length.

This improvement is considered necessary to accommodate projected traffic demand and to assist in the alleviation of carbon monoxide air quality violations documented along Main Street. Alternatives under consideration include:

1. Various locations of a new roadway and bridge.
2. Variations in the cross-section including number of lanes and degree of access control.
3. Improvements to the existing highway system, and
4. Taking no action.

The Scoping Process will consist of individual meetings with those agencies believed to have an interest in the study area and potential social, economic and environmental factors affected by the proposed action. These meetings will be initiated in July of 1986. A single formal scoping meeting of all agencies is not planned.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments and questions concerning these proposed actions and the EIS should be directed to the FHWA or the New Hampshire Department of Transportation personnel noted above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The provisions of OMB Circular No. A-95 regarding State and clearinghouse review of Federal and federally-assisted programs and projects apply to this program.)

Issued on: May 23, 1986.

Vincent F. Schimmoller,
Division Administrator, Concord, New Hampshire.

FEDERAL COMMUNICATIONS COMMISSION

May 29, 1986.

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Thursday, June 5, 1986, which is scheduled to commence at 9:30 a.m., in Room 856, at 1919 M Street NW., Washington, DC.

Agenda, Item No., and Subject

General—1—Title: Amendment of Subpart H, Part 1 of the Commission's Rules and Regulations Relating to Ex Parte Communications and Presentations in Commission Proceedings. Summary: FCC proposes changes to Subpart H, Part 1 of the Commission's rules relating to ex parte communications and presentations governing Commission proceedings.

Mass Media—1—Title: Petitions to deny applications for transfer of control of RCA Corporation and its subsidiaries, including National Broadcasting Company, from its stockholders to the General Electric Company, filed by Wilbert A. Tatum, Western Slope Communications, Ltd., Aspen Channel 3 Television, Inc., and Anthony R. Martin-Trigona. An informal objection was filed by John S. Shipp, III. Summary: The Commission will consider the petitions to deny filed by Tatum, Western Slope, Aspen and Martin-Trigona, in which they allege that the proposed merger violates Sections 222 and 314 of the Communications Act, that RCA may be in violation of Sections 217 and 508 of the Act, that NBC has violated § 73.658(b) of the Commission's Rules by refusing a new work affiliation, and that GE does not have the requisite character qualifications to be a licensee. The Commission will also consider the informal objection filed by Shipp, which alleges that NBC has engaged in racial discrimination.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Judith Kurtich, FCC Office of Congressional and Public Affairs, Telephone number (202) 254-7674.

Issued: May 29, 1986.

Federal Communications Commission.

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

ACTION: Notice of meeting to be held pursuant to the Government in the Sunshine Act (5 U.S.C. 552b).

STATUS: Open. The Council also will hold an executive session to discuss pending litigation.

TIME AND DATE: June 10–12, 1986, 9:00 a.m.

PLACE: Elkhorn Lodge at Sun Valley, Ketchum, Idaho.

MATTERS TO BE CONSIDERED:

- Staff Presentation on Salmon and Steelhead Planning Paper
- Staff Presentation on Research Issue Paper
- Preliminary Council Action on Hydropower Responsiblity for Salmon and Steelhead Losses in the Columbia River Basin
- Briefing and Public Comment on Applications to Amend Columbia River Fish and Wildlife Program: [1]
  - —Water budget accounting (Application 304(a)(2)(CBFWC)
  - —Spill levels (Applications 403/404(b)/CBFWC and 1504/CBFWC)
  - —Transportation (Applications 404(b)(17)/COE and 1504(32.2)/COE)
  - —Intertie access (Application 1504 (42.3)/CBFWC–5)
  - —Institutional processes (Institutional portions of applications 304(a)–(d)/CBFWC, 304(b)–(c)/CBFWC, 403/404(b)/CBFWC, 1504/CBFWC)
- Public Comment and Council Decision on Draft Process for Evaluating Petitions to Enter Rulemaking [2]
- Public Comment on Impact of Oil and Gas Price Changes on the Energy Plan
- Staff Presentation and Public Comment on Council FY 87–88 Budget
- Council Business.

Public comment will follow each item.

FOR FURTHER INFORMATION CONTACT: Ms. Bess Atkins, (503) 222–5161, or toll-

[1] Applicants will be asked to explain their applications and respond to questions from the Council members. Opportunities for public comment will follow. For copies of the applications listed, call Judy Allender in the Council offices (1–800–222–3355 in Idaho, Montana and Washington, and 1–800–452–2324 in Oregon only).

[2] It is difficult to predict how long the fish and wildlife agenda items will take, especially the presentations and public comments on amendment applications. The Council will not take up the power planning or budget agenda items (#5, 6 and 7) before 1:30 p.m. on June 11.

Department of Commerce

National Oceanic and Atmospheric Administration

50 CFR Part 402

Interagency Cooperation—Endangered Species Act of 1973, as Amended; Final Rule

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 402

Interagency Cooperation—Endangered Species Act of 1973, as Amended; Final Rule

AGENCIES: Fish and Wildlife Service, Interior; National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Commerce.

ACTION: Final rule.

SUMMARY: This final rulemaking establishes the procedural regulations governing interagency cooperation under section 7 of the Endangered Species Act of 1973, as amended (the "Act"). The Act requires Federal agencies, in consultation with and with the assistance of the Secretaries of the Interior and Commerce, to insure that their actions are not likely to jeopardize the continued existence of endangered or threatened species or result in the destruction or adverse modification of the critical habitat of such species. The Endangered Species Act Amendments of 1978, 1979, and 1982 (the "Amendments") changed the consultation requirements of section 7. This final rulemaking amends the existing rules governing section 7 consultation by implementing the changes required by the Amendments and by incorporating other procedural changes designed to improve interagency cooperation.

EFFECTIVE DATE: July 3, 1986.

FOR FURTHER INFORMATION CONTACT: Marvin E. Moriarty, Acting Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240 (703–235–2771); or Charles Karnella, Protected Species Division, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce, Washington, D.C. 20235 (202–634–7461).

SUPPLEMENTARY INFORMATION:

Background

On January 4, 1978, the Department of the Interior, through the United States Fish and Wildlife Service (FWS), and the Department of Commerce, through the National Marine Fisheries Service (NMFS), established procedures for the Act's consultation process by implementing the interagency cooperation requirements of section 7 (50 CFR Part 402, "1978 rule"). The consultation process is designed to assist Federal agencies in complying with the requirements of section 7 and provides such agencies with advice and guidance from the Secretary on whether an action complies with the substantive requirements of section 7.

The Secretaries of the Interior and Commerce (the "Secretary") share responsibilities for conducting consultations pursuant to section 7 of the Act. Generally, marine species are under the jurisdiction of the Secretary of Commerce and all other species are under the jurisdiction of the Secretary of the Interior. Authority to conduct consultations has been delegated by the Secretary of the Interior to the Director of the FWS and by the Secretary of Commerce to the Assistant Administrator for Fisheries, NMFS, National Oceanic and Atmospheric Administration.

Section 7(a)(1) of the Act authorizes Federal agencies, in consultation with and with the assistance of the Secretary of the Interior or Commerce, depending on the species involved, to utilize their resources in furtherance of the purposes of the Act by carrying out programs for the conservation of endangered species and threatened species ("listed species") listed pursuant to section 4 of the Act.

Section 7(a)(2) of the Act requires Federal agencies, in consultation with and with the assistance of the Secretary, to insure that any action authorized, funded, or carried out by such agency is not likely to jeopardize the continued existence of any listed species or result in the destruction or adverse modification of habitat of such species which has been designated as critical ("critical habitat"). Although Federal agency authority and responsibility under section 7 have remained virtually intact from the 1973 Act, the Amendments made significant procedural changes in the section 7 consultation procedures.

The 1978 Amendments formalized the process for the issuance of the Secretary's opinion ("biological opinions"), and required that the opinion include "reasonable and prudent alternatives" in cases where the proposed Federal action, in the opinion of the Secretary, would jeopardize the continued existence of a listed species or result in the destruction or adverse modification of its critical habitat. The 1978 Amendments also added section 7(c), requiring the preparation of biological assessments in appropriate instances. section 7(d) of the Act, also added by the 1978 Amendments, prohibits a Federal agency or any involved permit or license applicant, after initiation of consultation, from making an irreversible or irretrievable commitment of resources which would foreclose the adoption of any reasonable and prudent alternatives.

Perhaps the most significant part of the 1978 Amendments was the creation of the Endangered Species Committee, which is authorized to grant exemptions from the requirements of section 7(a)(2) in appropriate cases. Regulations governing the submission of exemption applications and consideration of such applications by the Endangered Species Committee are presently codified at 50 CFR Parts 450–453. Although this final rule on consultation procedures does not deal directly with exemptions, good faith adherence to the consultation requirements of section 7 is a statutory prerequisite for entry into the exemption process.

The 1979 Amendments slightly altered the Federal agency's substantive obligation under section 7(a)(2) from insuring that its action "does not jeopardize" listed species or adversely modify the critical habitat of such species to insuring that its action "is not likely to jeopardize" such species or critical habitat. Congress expressly provided that the consultation and resultant biological opinion be based upon the "best scientific and commercial data available." These changes made the consultation process more flexible and established a reasonable information standard to be followed by the NMFS and FWS (the "Service") and other Federal agencies. The 1979 Amendments added a requirement that all Federal agencies confer with the Secretary on all actions that are likely to jeopardize the continued existence of proposed species or result in the destruction or adverse modification of proposed critical habitat.

The 1982 Amendments also established several new processes under section 7. First, a new subsection 7(b)(4) allows for the issuance of an "incidental take statement" along with a biological opinion. This "incidental take statement" operates to exempt the Federal agency and any permit or license applicant involved from the section 9 "taking" prohibitions under the Act *if* the subsequent implementation of the action is consistent with the terms and conditions of the incidental take statement.

Second, the 1982 Amendments provide an opportunity for permit or license applicant involvement in all

phases of the consultation procedures. A prospective permit or license applicant may request Federal agencies to initiate consultation in advance of filing for any needed license or permit, *if* they have reason to believe that their proposed actions may affect listed species or critical habitat. This new provision, under section 7(a)(3), for "early consultation" allows a prospective applicant the opportunity to discover, and attempt to resolve, potential endangered or threatened species conflicts early in the planning stage of the proposed action—a time at which alterations in project plans could involve much less expense and delay.

Further involvement of the applicant in the consultation procedures is provided by the requirement that the applicant be involved in time extensions. Congress amended section 7(c) to require the Federal agency to give written notice to the applicant explaining why any extension of the biological assessment deadline is needed. If formal consultation under section 7(a)(2) is extended by the Service and the Federal agency for up to 60 days, the Service must provide the applicant with a written explanation of the reasons for extension. Any extension past 60 days must be approved by the applicant. Clearly, the permit or license applicant plays an active role in the consultation process. The final rule recognizes this increased role of the applicant while retaining the requirement that formal communications flow between the Federal agency and the Service during the consultation process.

In order to implement these Amendments to section 7 and to otherwise improve the interagency cooperation process, the Service published a proposed rule on June 29, 1983 (48 FR 29990–30004). Although the Service originally specified a 60-day comment period for these revised section 7 regulations, the comment period was extended until September 30, 1983. The Service received approximately 70 comments from other Federal agencies, State governmental agencies, private organizations, and other individuals and entities on the proposed rule.

After careful consideration of these comments, the Service has modified the regulations to clarify the consultation process and to improve the overall organization of the regulations. These technical changes are more fully explained in the section-by-section analysis below and were made to accommodate concerns raised in the public comments.

General Comments

The majority of the comments received on the proposed rule focused on particular regulatory provisions or concepts. These specific comments are discussed in the section-by-section analysis. However, several commenters expressed general concerns with the proposed rule or addressed matters that went beyond the scope of the proposal.

These general comments ranged from praise for the comprehensiveness of the proposal to criticism for the proposal's alleged failure to require the level of analysis and protection mandated by the Act. The Service believes that this final rule properly and accurately implements the Amendments to the Act and affords the protection mandated by section 7.

The House of Representatives Committee on Merchant Marine and Fisheries ("House Committee"), which oversees the implementation of the Act, submitted comments on the proposed rule. The Committee commended the Service in its efforts to translate complex legislation into agency policy and noted specific areas that it believed did not conform to the legislative intent. These matters have been clarified in the final rule.

One commenter was concerned that the proposed rule confused the informal (nonmandatory) consultation components with the formal (required) components of the consultation process. To clarify this matter, the Service has distinguished optional procedures from required procedures in the final rule. For example, the conference procedures (§402.10) are required for Federal actions that are likely to jeopardize proposed species or proposed critical habitat and the formal consultation procedures (§402.14) are required for actions that may affect listed species or critical habitat. Additionally, biological assessments (§402.12) are required for "major construction activities." Early consultation (§ 402.11) and informal consultation (§402.13) are optional procedures and are clearly designated as such in the final rule.

Concerned about increased paperwork burdens and potential time commitments resulting from the proposal, one commenter complained that the proposed rule is burdensome, unnecessary, and unacceptable. The commenter noted that additional protection for listed species or their habitat would not result from these alleged increases in administrative burdens, and it urged that currently used processes be maintained. The Service emphasizes that the proposal was not intended to increase in any way the paperwork burden of Federal agencies or any other participant in the consultation process. Moreover, the purpose of the proposal was to implement the Amendments to the Act in such a way as to streamline the consultation process while maintaining the protections afforded species under section 7. The concern of the commenter has been addressed to the extent possible by the Service's effort to clarify the consultation process in this final rule. Because section 7 imposes certain requirements on Federal agencies, any burdens recognized in this final rule are a creature of statutory law as implemented by these regulations.

Two commenters asserted that the Act protects habitat only when it is designated as the critical habitat of a listed species and, therefore, the Service must identify areas of critical habitat for all listed species to assure adequate protection. It is true that the Service has not designated critical habitat for all listed species. The Service has consistently taken the position that it is not prudent to designate critical habitat for a species if to do so would increase the risk that the species might be taken or would otherwise not benefit the species. *See* 50 CFR 424.12(a). However, the commenters ignore the fact that section 7 protections attach to both designated critical habitat and to each individual of a listed species within the jurisdiction of the United States or on the high seas. An action could jeopardize the continued existence of a listed species through the destruction or adverse modification of its habitat, regardless of whether that habitat has been designated as "critical habitat." Thus, the failure of the Service to designate critical habitat for a given species does not automatically mean that its habitat is without protection.

Two States commented that Federal agencies charged with implementing the Act should recognize and cooperate with the States in resolving water resource issues within the context of section 7. Consistent with the Department's "good neighbor" policy, one commenter encouraged the Service to actively include affected States in any consultation process. The Service intends to cooperate with all State and local agencies to resolve water resource issues consistent with the requirements of the Act. The Service stands ready to receive any and all comments, data, or other input from any affected States that are interested in a particular section 7 consultation. However, consultation takes place between the Service, the Federal agency and, where applicable, a Federal permit or license applicant.

Several commenters stated that the proposal goes beyond the scope of the Act, thereby placing unjustifiable burdens on applicants and Federal agencies. They claimed that the rules would usurp Federal agency authority. One commenter questioned the ultimate authority of the Service to issue binding procedural regulations under section 7. In no way does the Service intend to use the consultation procedures of section 7 to establish substantive policy for Federal agencies. The Service performs strictly an advisory function under section 7 by consulting with other Federal agencies to identify and help resolve conflicts between listed species and their critical habitat and proposed actions. As part of its role, the Service issues biological opinions to assist the Federal agencies in conforming their proposed actions to the requirements of section 7. However, the Federal agency makes the ultimate decision as to whether its proposed action will satisfy the requirements of section 7(a)(2). The Service recognizes that the Federal agency has the primary responsibility for implementing section 7's substantive command, and the final rule does not usurp that function. The Service is satisfied that the final rule is within the scope of the authority provided in the Act.

Moreover, the Service is responsible for interpreting section 7 and for establishing a consultation process that is both uniform and consistent with statutory requirements. This issue was addressed in the preamble to the 1978 rule:

> The FWS and NMFS are authorized under the Act to issue such regulations as they deem appropriate for the conservation of listed species. The two Services believe that these procedural regulations promote the conservation of listed species by implementing a uniform general framework as the starting point for consultation. Once the mandatory consultation has taken place, however, the ultimate responsibility for determining agency action in light of section 7 still rests with the particular Federal agency that was engaged in consultation. In this fashion, a standardized consultation process is established which preserves ultimate agency administrative control over its activities or programs.

43 FR 870, 871 (Jan. 4, 1978). These procedural regulations do not dictate results but prescribe a process by which the Service will consult in keeping with the Act.

Several commenters stated that Congress did not intend that the Service interpret or implement section 7, and believed that the Service should recast the regulations as "nonbinding guidelines" that would govern only the Service's role in consultation. The Service notes that Congress reviewed with approval the section 7 regulations issued on January 4, 1978, when deliberating over the 1978 Amendments to the Act. *See* H.R. Conf. Rep. No. 1804, 95th Cong., 2d Sess. 18 (1978). Also, the Service was urged by the House Committee, through its comments on the proposed rule, to press forward with the issuance of this final rule. The Service is satisfied that it has ample authority and legislative mandate to issue this rule, and believes that uniform consultation standards and procedures are necessary to meet its obligations under section 7. However, the Service is aware that some Federal programs may require a modified consultation process, and therefore the Service has provided for the issuance of counterpart regulations under § 402.04.

Several general comments were received regarding programmatic adjustments and coordination. One commenter suggested that the Service maintain cumulative summaries of consultation activities in the Washington Office. The Service maintains copies of all biological opinions and monitors the issuance of biological opinions in an effort to ensure consistency and accuracy of findings. The Service submits that current review mechanisms are adequate and that, although the maintenance of cumulative consultation summaries might be useful, the increased costs are not justified.

Another commenter urged increased public participation in the consultation process, including: (1) Public notice of each request for consultation; (2) public notice of the agenda for each consultation; (3) public notice of consultation results; (4) public comment periods; and, (5) prescribed rights to appeal by the public. Nothing in section 7 authorizes or requires the Service to provide for public involvement (other than that of the applicant) in the "interagency" consultation process. Moreover, due to the statutory time constraints imposed on the consultation procedures, it would not be practicable to implement such detailed public participation measures. Public participation may be provided within the Federal agency's decisionmaking process. However, that is a function of the agency's regulations or substantive legislation and not an issue to be raised in the context of consultation.

Finally, several questions were raised as to what rules will apply to pending consultations once the final rule becomes effective. The Service does not anticipate any dramatic change in procedure or additional burdens on Federal agencies because the statutory changes to section 7 have been in effect throughout the development of the final rule. When this rule becomes effective, all pending and future consultations must comply with the requirements of these regulations. The Service will cooperate with the Federal agencies and any applicants to ensure that there are no undue delays in ongoing consultations.

Section-by-Section Analysis

The following portion of the preamble explains the final rule, covering the substantive issues of each section, noteworthy modifications from the proposed rule, significant changes from the 1978 rule, and responses to public comments. To assist the reader, Table 1 presents a citation to each subsection of the proposed rule with appropriate cross-references to the location of that provision in the final rule and in the 1978 rule.

Subpart A—General

Section 402.01 Scope.

This section describes the purpose and scope of these regulations. Section 402.01 of the proposed rule contained an introductory paragraph and five subsections that were largely repetitive of other sections of the rule. These repetitive passages have been deleted from the final rule, and minor editorial corrections have been made.

Several commenters noted that, although § 402.01 acknowledges the language of section 7(a)(1) of the Act, no guidance is provided to enable Federal agencies to meet their conservation responsibilities under the Act. Claiming that the rules are silent as to Federal agency management programs required for the recovery of listed species, one commenter advised the Service to add a statement in the rule that would insure that Federal agencies address recovery as well as detrimental effects through consultation. According to another commenter, this statement may include a request that Federal agencies issue policies and procedures to implement their authority under section 7(a)(1).

The Service notes that it is beyond the scope of these regulations to address how other Federal agencies should implement and exercise their authority to carry out conservation programs for listed species under section 7(a)(1). However, the Service stands ready to assist any Federal agency in developing and carrying out conservation programs. The Service cautions that all Federal actions including "conservation programs" are subject to the consultation requirements of section 7(a)(2) if they "may affect" listed species or their critical habitats. If the Service agrees, through informal consultation, that the action is not likely to adversely affect the species, then formal consultation is not required [see § 402.13(a)–(b)]. Each Federal agency has the responsibility to implement its authority under section 7(a)(1). Further, any conservation program must comply with applicable permit requirements to the extent that such actions involve the taking of listed species. "Take," as defined in the Act, means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.

The 1978 rule extended the scope of section 7 beyond the territorial limits of the United States to the high seas and foreign countries. The proposed rule cut back the scope of section 7 to the United States, its territorial sea, and the outer continental shelf, because of the apparent domestic orientation of the consultation and exemption processes resulting from the Amendments, and because of the potential for interference with the sovereignty of foreign nations.

Several commenters asserted that the rules should continue to have extraterritorial effect. The scope of these regulations has been enlarged to cover Federal actions on the high seas but has not been expanded to include foreign countries. The Service finds that, because it already has jurisdiction under section 9(a)(1)(C) of the Act to regulate the taking of a listed fish or wildlife species on the high seas by all persons subject to the jurisdiction of the United States, concomitant jurisdiction under section 7 is implicit from Congressional concern that compliance with a section 7 incidental take statement not result in a taking violation under section 9(a)(1)(C), as provided in section 7(o)(2).

Although consultations on Federal actions in foreign countries will not be conducted under this rule, the Service maintains its strong commitment to the preservation of species and habitat worldwide. The Service will continue to list species which are found outside of United States jurisdiction when they are determined to be endangered or threatened.

Furthermore, Congress, in the International Environment Protection Act of 1983, 22 U.S.C. 2151q, made a finding that "the extinction of animal and plant species is an irreparable loss with potentially serious environmental and economic consequences for developing and developed countries alike." Accordingly, it places the preservation of species "through limitations on the pollution of natural ecosystems, and through the protection of wildlife habitats" as an "important objective of the United States development assistance." In furtherance of this policy, an Interagency Task Force was established to develop a national strategy for the protection and conservation of biological diversity in developing countries. The task force did not specifically recommend that international assistance activities be subject to consultation requirements, but did cite section 7(a)(2) in recommending that Federal agencies "should continue to adopt policies withholding support for certain types of projects that degrade or destroy fragile or protected lands." Until enacted by Congress, however, the recommendations of the task force will not be implemented in these regulations for the reasons stated above.

One commenter urged the Service to change the standard for initiating a section 7(a)(4) conference from "likely to jeopardize" to "would adversely affect." The regulation tracks the statute, and the Service lacks the authority to make the requested change. The same commenter noted that the section 7(d) sentence referred to a "*would* avoid jeopardizing" standard. (Emphasis theirs.) Again, the Service adopts the regulation as in keeping with the statutory standard.

Another commenter stated that biological opinions need only be required after formal consultation under section 7(a)(2) of the Act and that this should be clarified in the rule. The Service disagrees because the statute requires that a "written statement" containing the Secretary's opinion be issued after the conclusion of both early and formal consultation. The rule has been amended slightly to clarify this requirement.

The commenter also requested that the sentence in proposed § 402.01(d) dealing with section 7(d) be amended by adding "measures" after the phrase "reasonable and prudent alternative[s]" to bring the regulation in line with the statute. The Service declines to make this change because it would tend to confuse "reasonable and prudent alternatives" that are included in jeopardy biological opinions with "reasonable and prudent measures" that are included in an incidental take statement under section 7(b)(4) of the Act. The proposed language describing the section 7(d) prohibition accurately implements the Act and is adopted in this final rule.

Section 402.02 Definitions.

This section sets out definitions of terms that are used throughout these regulations. As noted in Table 1, many definitions have been added to those included in the 1978 rule. Only comments which specifically addressed the definitions used in these regulations are discussed in this section. These terms are further discussed as they pertain to the consultation procedures in the appropriate, subsequent sections.

A definition of "Act" has been added to the final rule. It refers to the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

The definition of "action" parallels the former definition of "activities or programs," a term that predated the Amendments. Several changes have been made in the definition of "action" to accommodate public comments: First, the definition is expanded to cover activities occurring on the high seas. (*See* § 402.01 segment of the Preamble.) Second, the phrase "actions that are intended to conserve listed species or their habitat" was restored from the 1978 rule because of the decision to require Service review of all Federal actions that may affect listed species or their critical habitat. (*See* § 402.14 segment of the Preamble.) The Service declines to define further or to delete the reference to actions that "indirectly cause modifications to the land, water, or air" in this definition. The concept of indirect effects is adequately addressed in the discussion of "cumulative effects" and "effects of the action."

The definition of "action area" is adopted from the proposed rule. Several commenters criticized the vagueness or apparent expansiveness caused by the reference to indirect effects in this definition. The definitions of "cumulative effects" and "effects of the action" further clarify the scope of "indirect effects."

The Service is not able to define specific spatial and temporal limits for the concept of indirect effects that would satisfy every conceivable situation, and believes that sufficient understanding of the term exists so that confusion will not occur. "Action area" is not limited to the immediate area involved in a Federal action.

"Applicant," an abbreviated term including all permit or license applicants, was defined in the proposed rule because of the increased role of permit or license applicants in the consultation process. Although the Act defines "permit or license applicant" in section 3(12), the Act's definition is of limited use in the consultation context because it focuses on the exemption process under section 7. The definition in the proposed rule broadly defines "applicant" as "any person who requires formal approval or authorization from a Federal agency as a prerequisite to conduct the action." Thus, applicants would include those seeking permits, licenses, leases, letters of authorization, and any other form of authorization or approval issued by a Federal agency as a prerequisite for carrying out the action.

One commenter suggested that the definition of applicant be amended to allow prospective permit applicants to participate in section 7 consultations involving the promulgation of regulations governing permit issuance. The applicant (or prospective applicant) is involved in the consultation process as a result of a specific permit or license application. The applicant may provide input regarding its concerns in the Federal agency's rulemaking process through the Administrative Procedure Act, 5 U.S.C. 551 *et seq.* Further, a prospective applicant could request early consultation through the Federal agency under § 402.11 of this rule on its prospective application during the course of agency rulemaking, if it desires early notice of potential conflicts and if it meets the requirements of these

BEST COPY AVAILABLE

regulations. This would involve interaction with the Service, but it would be limited in scope to the prospective application for the permit at issue, not a general consultation on the pending rulemaking. In response to another comment, the Service takes the position that it will not expand "applicant" to include those seeking funding from Federal agencies, unless the request for funding is coupled with a requirement that the person obtain Federal approval or authorization as a prerequisite for carrying out the action for which funding is sought. Finally, one commenter asked that the scope of the definition be expanded to include corporations, Federal agencies, and all other legal entities. The Service believes that the use of the word "person" in the definition satisfies the commenter's concern because of the broad definition of that term in section 3(13) of the Act. To clarify this point, the Service added a reference to the Act's definition of "person" in the definition of "applicant" in the final rule.

The definition of "biological assessment" in the final rule, derived from §§402.02 and 402.12(b)(4)(ii) of the proposed rule, clarifies that the assessment must include an evaluation of potential impacts. One commenter criticized the "vagueness" of the definition of "biological assessment" in the proposed rule, stating that it was unclear as to how a Federal agency would determine which species or critical habitat may be in the action area and how the agency would evaluate potential effects. The Service believes that this definition is adequate and that the process-oriented format in §402.12 of the regulations adequately explains the scope and procedure of the biological assessment requirement.

The proposed definition of "biological opinion" has been adopted in these final rules. A biological opinion is the document that states the Service's opinion as to whether or not the Federal action is likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat. One commenter suggested a third possible conclusion for biological opinions: "insufficient information to issue an opinion." The commenter argued that such a conclusion would eliminate the risk that the Service takes when issuing an opinion based on arguably inadequate data. The Service declines to add this third option. The legislative history of the Act is clear in requiring the Service to make a decision on the issue of likely jeopardy at the conclusion of formal consultation. The Service will not sidestep this obligation, but instead will conclude either "jeopardy" or "no jeopardy" based on the best available data.

The definition of "conference" has been adopted as proposed. One commenter suggested that the conference not include recommendations to minimize or avoid adverse effects since they are not required by section 7(a)(4) of the Act. The commenter believed that such recommendations might result in legal action if not adopted. The Service, however, believes it has the responsibility not only to identify impacts but also to identify measures that would reduce those impacts.

The definition of "conservation" contained in the proposed rule was derived from the Act's definition in section 3(3). One commenter, characterizing the Service's interpretation of "conservation" as opposing the purposes of the Act and potentially encouraging the "further decline" of listed species, urged the Service to adopt the strict language of the statutory definition. The Service's definition in the proposed rule in no way discouraged recovery. In fact, the proposed definition tracked the statute except for its interpretation of "the point at which the measures provided pursuant to this Act are no longer necessary" as being equivalent to "the point at which [the species] may be removed from the Lists . . . ." The basic goal of the Act is to recover listed species through conservation measures. Bringing a species to the point at which the Act's protective measures are no longer necessary is the same as bringing the species to the point at which delisting is appropriate. However, to avoid any misunderstanding, the Service has deleted the definition from the final rule and will rely solely on the definition contained in section 3(3) of the Act. The Service declines specifically to include habitat modification (improvement or restoration), "off-site mitigation," captive propagation, and species reintroduction in the list of conservation methods and procedures, as suggested by certain commenters. Such activities are already adequately provided for in the Act's definition.

The term "conservation recommendations" was introduced in the proposed rule and explains the Service's role in helping agencies meet their section 7(a)(1) responsibilities. Several commenters feared that the Service would employ conservation recommendations to require Federal agencies to reformulate their actions that had received "no jeopardy" biological opinions. This is not the purpose of conservation recommendations. They are nonbinding suggestions that a Federal agency may elect to implement in its proposed action. These recommendations should be consistent with the general scope, magnitude, and duration of a Federal action that is not likely to jeopardize a listed species or destroy or adversely modify its critical habitat. The Service, in answering the concerns noted above, is satisfied that it has clarified its position and that the regulatory definition should not be deleted. The Service has chosen to retain this definition with limited, technical changes because it believes that the opportunity to provide conservation recommendations, including minor design modifications, may minimize possible adverse effects and may avoid future section 7 conflicts for subsequent Federal actions in the same action area.

One commenter confused "conservation recommendations" with "reasonable and prudent alternatives" and believed that recommendations to *reduce* adverse impacts would violate section 7(a)(2), absent the granting of an exemption. The obligation of Federal agencies under section 7(a)(2) is to insure that the actions they authorize, fund, or carry out are not likely to *jeopardize* listed species or destroy or adversely modify their critical habitat. A showing of "adverse effect" does not necessarily violate section 7(a)(2), because the jeopardy standard is the ultimate barrier through which Federal agencies may not pass in conducting their actions. "Reasonable and prudent alternatives" represent avenues of fulfilling the action without violating the jeopardy standard. "Conservation recommendations" involve voluntary measures that the Federal agency has the discretion to undertake to avoid or reduce adverse effects of a proposed action that otherwise complies with the provisions of section 7(a)(2).

The definition of "consultation process" has been deleted from the final rule because it tended to confuse the statutory requirements and optional processes and because it added little to the public's understanding of the process. The definition in the proposed rule could have led persons to believe that early consultation and informal consultation are required, sequential steps of the overall consultation process. As discussed above, the only required components of the consultation process are a "conference" for proposed species, a "formal consultation" for listed species, and a biological assessment for "major construction activities."

The "critical habitat" definition contained in the proposed rule only referred to those sections of 50 CFR Parts 17 and 226 that contain the lists of those areas so designated. The mechanics of the designation process are more properly considered under the section 4 regulations (50 CFR Part 424). For purposes of determining whether any of their actions is likely to destroy or adversely modify critical habitat, Federal agencies involved in section 7 consultations need only be aware of those areas that have been designated by the Service as critical habitat. Two commenters requested that a definition of critical habitat be included in the final rule. The Service notes that the requested definition is contained in the Act and need not be repeated here.

"Cumulative effects" and "effects of the action" are defined in § 402.02 of the final regulations. Under § 402.14(g) (3) and (4) of the final rule, the Service will consider both the "effects of the action" subject to consultation and "cumulative effects" of other activities in determining whether the action is likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of critical habitat.

In determining the "effects of the action," the Director first will evaluate the status of the species or critical habitat at issue. This will involve consideration of the present environment in which the species or critical habitat exists, as well as the environment that will exist when the action is completed, in terms of the totality of factors affecting the species or critical habitat. The evaluation will serve as the baseline for determining the effects of the action on the species or critical habitat. The specific factors that form the environmental baseline are given in the definition of "effects of the action," as requested by some commenters.

"Effects of the action" include the direct and indirect effects of the action that is subject to consultation.

"Indirect effects" are those that are caused by the action and are later in time but are still reasonably certain to occur. They include the effects on listed species or critical habitat of future activities that are induced by the action subject to consultation and that occur after that action is completed. In *National Wildlife Federation* v. *Coleman*, 529 F.2d 359 (5th Cir. 1976), the Court of Appeals for the Fifth Circuit found that "indirect effects" which can be expected to result must be considered under section 7 of the Act. In that case, the court enjoined completion of a highway because the Department of Transportation failed to consider the effects to the endangered sandhill crane from future private development that would result from construction of the highway. The Service will consider the effects to listed species from such future activities that are reasonably certain to occur under the analysis of "indirect effects." The Service's approach will be consistent with *National Wildlife Federation* v. *Coleman*, and the Service declines to narrow the scope of its review (as requested by one commenter) in light of existing case law.

Effects of the action also include direct and indirect effects of actions that are interrelated or interdependent with the proposal under consideration. Interrelated actions are those that are part of a larger action and depend on the larger action for their justification; interdependent actions are those that have no significant independent utility apart from the action that is under consideration. As noted by one commenter, the "but for" test should be used to assess whether an activity is interrelated with or interdependent to the proposed action.

One commenter urged the Service to exclude Federal actions that have completed consultation from the environmental baseline unless it can be shown that the actions are reasonably certain to occur. The Service declines to adopt this suggestion. In issuing its biological opinion on an action, the Service's finding under section 7(a)(2) entails an assessment of the degree of impact that action will have on a listed species. Once evaluated, that degree of impact is factored into all future section 7 consultations conducted in the area. These impacts will continue to be considered as part of the environmental baseline unless the Service receives notice from the Federal agency that the proposed action will not be implemented or unless the biological opinion on the proposed action is no longer valid because reinitiation of consultation is required.

In response to one comment, the Service notes that Federal actions that have proceeded through early consultation and that have received "no jeopardy" preliminary biological opinions should be factored into the environmental baseline. These actions, to be eligible for early consultation, had to be nonspeculative, feasible actions, and, because the preliminary biological opinion can later be confirmed as a final biological opinion, this initial review and conclusion by the Service must be considered in other section 7 consultations.

The term "cumulative effects" means those effects on the species caused by other projects and activities unrelated to the action under consultation that the Service will consider in formulating its biological opinion on the subject action. One commenter opposed the proposed definition of cumulative effects by arguing that the Act does not require an analysis of cumulative effects in a section 7 consultation. Citing section 7(c), the commenter noted that biological assessments may be limited to an examination of effects of "such action" on listed species. The commenter urged the Service to strike cumulative effects analysis from this rule because few Federal agencies have the capability to recognize or assess cumulative effects of State or private actions contemporaneously with conducting section 7 consultation. According to the commenter, the Service, as the expert on current status of listed species, should keep watch on these State and private activities that come on line in a particular action area. The Service responds that a Federal agency, when evaluating the environmental impacts of a proposed action, must comply with NEPA. Since this compliance includes an analysis of cumulative effects, the Service believes that it is the Federal agency's responsibility to develop this information. The cumulative effects analysis conducted in compliance with the broad definition under NEPA may be submitted to the Service by the Federal agency when initiating formal consultation. The Service can use this analysis and apply its narrower definition of cumulative effects when analyzing whether a proposed action, along with cumulative effects, violates section 7(a)(2) of the Act.

Other commenters, while not opposing the applicability of cumulative effects analysis to section 7 consultations, believed that the proposed scope of "cumulative effects" and "effects of the action" were too narrow. These commenters generally suggested that cumulative effects should include the effects of all reasonably foreseeable future Federal, State, and private actions. They stated that this scope would be more in line with that mandated under NEPA and argued that any lesser review could detrimentally affect endangered species. The commenters adamantly opposed any limitation on the foresight employed by the Service or Federal agencies that they believed would result from the proposal's construction of cumulative effects.

Section 7 consultation will analyze whether the "effects of the action" on listed species, plus any additional,

cumulative effects of State and private actions which are reasonably certain to occur in the action area, are likely to jeopardize the continued existence of that species. Based on this analysis, the Federal agency determines whether it can proceed without exceeding the jeopardy standard. If the jeopardy standard is exceeded, the proposed Federal action cannot proceed without an exemption. This is a substantive prohibition that applies to the Federal action involved in the consultation. In contrast, NEPA is procedural in nature, rather than substantive, which would warrant a more expanded review of cumulative effects. Otherwise, in a particular situation, the jeopardy prohibition could operate to block "nonjeopardy" actions because future, speculative effects occurring after the Federal action is over might, on a cumulative basis, jeopardize a listed species. Congress did not intend that Federal actions be precluded by such speculative actions.

Future Federal actions proposed for the same area would have to be separately evaluated under section 7 and could not occur unless they were able, in their own right, to avoid jeopardizing the continued existence of the affected species or destroying or adversely modifying critical habitat. Since all future Federal actions will at some point be subject to the section 7 consultation process pursuant to these regulations, their effects on a particular species will be considered at that time and will not be included in the cumulative effects analysis. However, those future State or private actions (*i.e.*, no Federal agency involvement) that are "reasonably certain to occur" must be factored into section 7(a)(2) evaluations. The Service agrees that cumulative effects that are reasonably certain to occur will be considered in determining the likelihood of jeopardy. The final rule is amended accordingly, to clarify the duty to consider cumulative effects.

One commenter thought that the "reasonably certain to occur" standard was far too narrow and that it should be amended to cover actions where proposals have been made, and implementation schedules have been established. This suggestion would open the door for speculative actions to be factored into the "cumulative effects" analysis, adding needless complexity into the consultation process and threatening potential Federal actions which pose minimal adverse impacts of their own with possible "jeopardy" opinions due to speculative, State or private projects that may never be implemented. For State and private actions to be considered in the cumulative effects analysis, there must exist more than a mere possibility that the action may proceed. On the other hand, "reasonably certain to occur" does not mean that there is a guarantee that an action will occur. The Federal agency and the Service will consider the cumulative effects of those actions that are likely to occur, bearing in mind the economic, administrative, or legal hurdles which remain to be cleared. The Service declines to alter its "cumulative effects" definition to include State or private actions that are not likely to occur.

One issue was raised concerning the application of cumulative effects analysis to water projects. A commenter contended that State and private projects that possess senior water rights under State water law and that can "reasonably be expected to occur" concurrently with the Federal action should be considered as cumulative effects. The Service notes that any State or private project (*i.e.*, no Federal agency involvement) that is reasonably certain to occur must be considered during the analysis of cumulative effects. Further, the Service believes that Federal actions, whether authorized, funded, or carried out by Federal agencies, that possess senior water rights should be considered while analyzing the effects of the action. In order to determine the effects of the action when a water project is the subject of consultation in a State which follows the prior appropriation doctrine, the project's operation plan should indicate the priority of the project's water rights under State law and account for the future effects of senior conditional water rights.

On a related matter, the Associate Solicitor's opinion on the scope of cumulative effects cited in the proposed rule provided, in part, that only those effects of other projects that are reasonably certain to occur *prior* to the completion of the Federal action subject to consultation under section 7(a)(2) should be considered during formal consultation. This statement has been interpreted by some to exclude from cumulative effects analysis those future State and private actions that, while "reasonably certain to occur," would not be completed *before* the completion of the Federal action subject to consultation. Such an interpretation places undue emphasis on the use of the word "prior" while ignoring the central concept that the Associate Solicitor's opinion intended to project: that a proposed State or private activity be "reasonably certain to occur" in order to be taken into account during cumulative impact analyses. If such a State or private project satisfies the "reasonable certainty" test, then it should be considered in the cumulative impact analysis, even if it would go on line sometime after completion of the federally authorized, funded, or carried out project which was the subject of consultation. To the extent that the Associate Solicitor's opinion created the opposite impression, the Service takes this opportunity to clarify this point.

Moreover, as suggested by some commenters, and for the reasons outlined above, the Service has deleted its reference to the Interior Department position on "cumulative effects" in 88 I.D. 903 (1981) in the definition section. The Service disagrees with the commenter who stated that the citation to the legal opinion in the proposed definition denied the public meaningful comment on these regulations. The policy was widely known, and it was explained in the preamble to the proposed rule. The Associate Solicitor's opinion on "cumulative effects" is published in Interior Decisions, a publication available to the general public. Finally, the opinion does not represent a policy change subject to Administrative Procedure Act (APA) informal rulemaking proceedings. It represented Interior's legal interpretation of the scope of "cumulative effects" under section 7, adopted and published in 1981 in keeping with APA requirements. 5 U.S.C. 552(a). Therefore, no reproposal is needed on this issue.

The definition of "designated non-Federal representative" is adopted from the proposal in part. First, in response to a comment, the Service explains that the non-Federal representative may conduct informal consultations (§ 402.13) and/or prepare biological assessments (§ 402.12). However, Federal agencies cannot delegate their role in initiating formal consultation, a conference, or early consultation. The second sentence of the proposed definition has been deleted, but a new § 402.08 has been added to further explain the role of the designated non-Federal representative.

The proposed definitions of "destruction or adverse modification" and "jeopardize the continued existence of" received a lot of attention from commenters. Both definitions contained, as did the 1978 rule, the phrase "survival and recovery." The final rule retains the language of the proposed definitions, except for the changes noted below. Also connected with these terms is the definition of "recovery." The "recovery" of a listed species means that the status

of the species has improved to the point at which it may be removed from the Lists of Endangered and Threatened Wildlife and Plants.

The principal controversy involving the "jeopardy" and "destruction or adverse modification" definitions was that, under the proposed rule, to find that an action is likely to jeopardize a listed species or result in the destruction or adverse modification of critical habitat, the Service must identify detrimental impacts to "both the survival and recovery" of the listed species. The conjunction "and" was used in the 1978 rule's definitions of these phrases, but the word "both" was added by the proposed rule to emphasize that, except in exceptional circumstances, injury to recovery alone would not warrant the issuance of a "jeopardy" biological opinion. The Service adopts these definitions substantially without change from the proposed rule; this does not represent a change in policy, as one commenter charged, because the Service has internally interpreted the "jeopardy" standard as requiring detrimental impacts to the continued existence of a species under a joint survival and recovery concept. Other Federal agencies are assured that the same "jeopardy" standard under which their actions have been evaluated in the past will be continued under this final rule.

Several commenters urged the Service to strike the "and" and insert "or" in the definitions of "jeopardy" and "destruction or adverse modification." They argued that injury to recovery for an already depleted species would require the issuance of a jeopardy opinion. They also remarked that the Service's position disregarded the conservation requirements of the Act, failed to adequately protect critical habitat, operated to weaken or nullify recovery efforts, and otherwise violated the purposes and policies of the Act.

These commenters misconstrued the Service's role in conducting consultations under section 7(a)(2) of the Act. The purpose of consultation is to identify conflicts between proposed Federal actions and the "jeopardy" standard of section 7(a)(2). The "continued existence" of the species is the key to the jeopardy standard, placing an emphasis on injury to a species' "survival." However, significant impairment of recovery efforts or other adverse effects which rise to the level of "jeopardizing" the "continued existence" of a listed species can also be the basis for issuing a "jeopardy" opinion. The Service acknowledges that, in many cases, the extreme threats faced by some listed species will make the difference between injury to "survival" and to "recovery" virtually zero.

One commenter disagreed that actions adversely affecting survival of a species will also always adversely affect its recovery. The commenter did not cite examples where an action that jeopardized "survival" of a species would not jeopardize its "recovery." The Service is not aware of any examples and believes that it would be very difficult to recover a species whose survival had been placed in jeopardy. The very concept of "jeopardy" is that a Federal agency should not authorize, fund, or carry out an action that would injure a listed species' chances for survival to the point that recovery is not attainable. If survival is jeopardized, recovery is also jeopardized. As noted above, though, these concepts are generally considered together in analyzing effects, and it is difficult to draw clear-cut distinctions.

The concept of "survival" is discussed above, but is not defined in the Act or in these regulations. Two commenters felt that "survival" should be defined in the regulations, and one urged the Service to adopt the following specific definition:

> "Survival" for a species means retention of a sufficient number of individuals and/or populations with necessary habitat to insure that the species will keep its integrity in the face of genetic recombination and known environmental fluctuations.

The Service agrees with the criteria set out in the above definition, but declines to adopt a regulatory definition for "survival" because this concept varies widely among listed species. The Service will apply the statutory standard of jeopardy to the continued existence of a species on a case-by-case basis, taking into account the particular needs of and the severity and immediacy of threats posed to a listed species. The Service is not attempting to predetermine the results of any future consultations by announcing these interpretations of the "jeopardy" standard, but instead is emphasizing what "jeopardy" is and how it should be applied in the section 7(a)(2) process.

One commenter urged the Service to go further and forbid any Federal action to proceed, regardless of a "no jeopardy" finding, if the proposed action would adversely affect the recovery of a listed species. Numerous commenters cited sections 2(c)(1), 3(3), and 7(a)(1) of the Act as authority for the Service to ban Federal agency actions that "violate the requirement to conserve endangered species."

The commenters misinterpret the statutory changes which the Amendments have made to section 7, and they misconstrue court decisions which have noted the apparent "heightened" responsibility of the Secretary. The Service will undertake programs for the conservation of listed species and will consult with other Federal agencies attempting to do the same. The Service will not, nor does it have the authority to, mandate how or when other Federal agencies are to implement their responsibilities under section 7(a)(1), nor is the Service authorized to issue a biological opinion under section 7(a)(1) of the Act. Section 7(a)(1) has a limited purpose under the Act: to authorize Federal agencies to factor endangered species conservation into their planning processes, regardless of other statutory directives.

In contrast, section 7(a)(2) contains the mandatory "jeopardy" standard. The prohibitory features of section 7, and the exemption process added by the 1978 Amendments, focus on the provisions of section 7(a)(2). Although there is no express legislative history directly weighing and comparing the relative strengths of section 7(a)(1) with 7(a)(2), there can be no doubt that Congress considered the jeopardy standard of section 7(a)(2) as being the substantive cornerstone of section 7:

> The term "is likely to jeopardize" is used because the *fundamental* obligation of section 7(a) of the act is that Federal agencies insure their actions do not jeopardize the continued existence of an endangered or threatened species.

S. Rep. No. 151, 96th Cong., 1st Sess. 4 (1979) (emphasis added). Congress intended that the "jeopardy" standard be the ultimate barrier past which Federal actions may not proceed, absent the issuance of an exemption. The commenters' argument would require Federal actions to halt if they failed to conserve listed species, a result clearly not intended by Congress. Congress intended that actions that do not violate section 7(a)(2), or actions receiving an exemption from the requirements of that subsection, be allowed to proceed.

Commenters argued that it would be a violation of section 7(a)(1) for the Service to issue a "no jeopardy" biological opinion for a proposed Federal action that would have an adverse effect on the recovery of a listed species. As previously stated, the Service lacks authority to issue biological opinions under that subsection, and the Act does not mandate particular actions to be taken by Federal agencies to implement 7(a)(1). Furthermore, adverse effects not

rising to the level of "jeopardizing the continued existence" of a listed species cannot be the basis for issuing a jeopardy opinion.

The Service disputes two commenters' assertions that "the Service now proposes to allow the 'continued existence' of a listed species to reach a state of likely jeopardy." The Service has followed and will continue to follow the policy of strictly applying the jeopardy standard of section 7(a)(2) in the consultation process. The Service has not and will not relax the statutory standard.

One commenter stated that limiting the definition of "destruction or adverse modification" to critical habitat is illogical. This limitation is mandated by the strict language of section 7(a)(2) and cannot be altered by the Service, although habitat destruction can be the basis for a jeopardy opinion in appropriate cases.

Another commenter requested that examples be given of actions that might indirectly alter critical habitat. The Service responds with the following examples of indirect alteration of critical habitat (which is not intended as an exclusive list): ground water pumping that occurs on land adjacent to the critical habitat area, but nevertheless diminishes essential ground water levels within the critical habitat; air pollution created by an action not occurring directly on the critical habitat area that causes a deterioration of essential air quality levels in the critical habitat; contamination of water supply within the critical habitat caused by release of toxic substances outside of the critical habitat area; etc.

In the definition of "jeopardize the continued existence of," one commenter suggested the word "could" be substituted for "would" in the phrase "would be expected, directly or indirectly, to reduce appreciably the likelihood of . . . the survival and recovery of listed species . . . ." Such a change would be an unwarranted deviation from the language of the 1978 rule in light of subsequent Amendments to the Act. The Service retains the substance of the proposed language, but does delete the phrase "or otherwise adversely affecting the species" because, as several commenters suggested, the phrase is confusing and adds nothing to the definition.

In response to several comments, the Service has modified the definition of "recovery" to make it clear that recovery is not attained until the threats to the species as analyzed under section 4(a)(1) of the Act have been removed. The protective measures provided for listed species under the Act are no longer needed if endangered or threatened status is no longer applicable to a species under section 4(a)(1).

The definition of "Director" has been modified by the addition of the phrase "or his authorized representative" after "the FWS regional director" and "Assistant Administrator for Fisheries" to accommodate present and future delegations of authority to carry out certain consultation responsibilities. Although the Minerals Management Service requested that all Outer Continental Shelf (OCS) section 7 biological opinions issued by the FWS be signed by the Washington Office, the authority to sign such opinions will remain with the regional offices because they have been staffed specifically to conduct all interagency consultations and to sign the resulting biological opinions.

The term "early consultation" was included in the proposed rule pursuant to the provisions of section 7(a)(3). This section authorizes the Service to consult with Federal agencies at the request of prospective applicants, prior to the submission of the permit or license application to that Federal agency. The definition has been modified to reference the appropriate section of the Act.

One commenter requested that, instead of using the term "early consultation," the Service refer to this process as "consultation on behalf of prospective applicants." The commenter was concerned that, by calling this pre-application process "early consultation," the Service would fail to alert Federal agencies and applicants of the need to determine impacts to endangered or threatened species early in the planning stages of all of their actions, regardless of whether the consultation is early, informal, or formal. The Service retains the label "early consultation" due to its convenience, its frequent use in the committee reports on the 1982 Amendments, and its common acceptance within and outside the Service. The Service believes that the language provided in § 402.14(a), advising Federal agencies to review their actions at the earliest possible time, provides adequate safeguards to address the commenters' concerns.

The definition of "Federal agency" has been deleted since it is defined in section 3(7) of the Act. The Service declines to expand the statutory definition to accommodate one commenter's concern. The statutory definition adequately provides notice that all departments, agencies, and instrumentalities of the United States come within the scope of section 7. The Service will not interpret this term further in the final rule.

The definition of "formal consultation" has been modified to specify that it is the consultation required under section 7(a)(2) of the Act. Other minor, technical changes have also been made. The phrase "after it has been determined, through informal consultation with the Service, that its action may adversely affect listed species or critical habitat" has been deleted from the proposed definition because, as recommended by some commenters, informal consultation is strictly an optional process. Although the Federal agency may elect to enter into informal consultation to determine if formal consultation is required, the Federal agency can initiate formal consultation any time that it determines its action may affect listed species or critical habitat.

"Further discussion" was an optional process included in the proposed rule. It provided the Federal agency and any applicant the opportunity to continue consultation after the issuance of a biological opinion in order to discuss with the Service any reasonable and prudent alternatives and any conservation recommendations. Recommendations and alternatives could be refined or developed during these discussions, and consultation would terminate with the Federal agency's written notice of its final decision on the action. Because of concerns expressed by commenters, this provision contained in proposed § 402.16 has been deleted from the final rule.

Although several commenters supported this provision, many opposed further discussion contending that it is unnecessary, that all reviews and discussions should occur prior to the issuance of the biological opinion, that it extends consultation beyond the statutory time limits, and that it lacks statutory authority. Although the process was optional, some commenters believed that there was an implication that the Federal agency or applicant would have a duty to engage in further discussion.

Although further discussion has been deleted, the Service is available to discuss the biological opinion, any reasonable and prudent alternatives, and any conservation recommendations with the Federal agency and any applicant on an informal basis. If revisions to the opinion are necessary, consultation can be reinitiated and a revised opinion issued.

"Incidental take" has been clarified in the final rule as those takes that result from, but are not the purpose of,

carrying out an otherwise lawful activity conducted by the Federal agency or the applicant. As requested by one commenter, the Service explains that otherwise lawful activities are those actions that meet all State and Federal legal requirements except for the prohibition against taking in section 9 of the Act. The Service believes that the definition, as clarified in the final rule, is adequate.

The definition of "informal consultation" has been clarified in the final rule to indicate that it is an optional process that includes all discussions, correspondence, etc., between the Service, Federal agency, and designated non-Federal representative prior to formal consultation. To address one commenter's concerns, "if required" has been included after "formal consultation" to clarify that formal consultation is not always required after informal consultation. Through informal consultation, a Federal agency may determine that formal consultation is not required.

The definition of "listed species" is adopted as proposed. Contrary to the concern of one commenter, aquatic invertebrates are not excluded from this definition, because all listed species in 50 CFR 17.11–17.12 are specifically included.

The definition of "major construction activity" was included in the definition of biological assessment in the proposed rule and is adopted substantially as proposed. As suggested by many commenters, it has been made a separate definition. Whether a Federal action is a major construction activity, as defined in these regulations, is the standard used for determining whether a Federal agency must prepare a biological assessment. A "major construction activity" is defined as a construction project (or other undertaking having similar physical impacts) that is a major Federal action significantly affecting the quality of the human environment for purposes of NEPA. The term encompasses dams, buildings, pipelines, roads, water resource developments, channel improvements, and other such undertakings which significantly modify the physical environment.

A vast array of comments were received concerning the scope of a major construction activity that requires the preparation of a biological assessment. Several commenters noted that only major Federal actions requiring the preparation of an environmental impact statement (EIS) pursuant to NEPA should require the preparation of a biological assessment under section 7(c) of the Act. Other commenters argued that assessments can only be required for major Federal actions involving construction activities, and suggested that the phrase "or other undertakings having similar physical impacts" be eliminated from the definition. Four commenters thought that the standard in the proposed rule was too narrow, because the limitation to major Federal actions, and/or the limitation to construction projects and other undertakings having similar physical impacts, were arbitrary and without legal basis. The Service has adopted the definition of major construction activity as proposed for the reasons set out below.

The legislative history of section 7(c) of the Act plainly focused the mandatory duty to prepare biological assessments on "major Federal actions . . . designed primarily to result in the building or erection of dams, buildings, pipelines and the like." H.R. Conf. Rep. No. 697, *supra*. The two-pronged regulatory test adopted in this rule—major Federal action *and* construction project (or other undertaking having *similar* physical impacts)—clearly tracks the quoted language from the Conference Report to the 1979 Amendments. The Service will not require biological assessments for projects that are not major Federal actions for purposes of NEPA. Further, the Service will not require biological assessments for actions that do not involve construction or activities having physical impacts similar to construction, such as dredging, blasting, etc. This limitation derives support from the 1979 Conference Report reference to actions designed *primarily to result* in the building or erection of various projects. These other "potentially destructive activities," H.R. Rep. No. 1625, *supra*, having physical impacts similar to construction projects, will require the preparation of an assessment, but only if they are major Federal actions for purposes of NEPA.

The Service declines to limit the scope of the definition of a major construction activity to major Federal actions involving construction projects, because other potentially destructive activities that are major Federal actions may have similar physical impacts and should be included. The Service is confident that the courts will be able to apply this standard consistent with the Act and the legislative history.

Contrary to the belief of one commenter, the Service has not abrogated its authority under section 7(c). That commenter urged the Service to change this rule by requiring biological assessments "for actions that, taking into consideration cumulative effects, may be 'potentially destructive.' " Citing a February 1980 legal opinion issued by the Assistant Solicitor for Fish and Wildlife, Department of the Interior, the commenter noted that cumulative effects may trigger the requirement that an assessment be prepared, although the Service must defer to the Federal agency's decision on whether a major Federal action exists. Contending that Congress would have used the word "shall" instead of "may" in the last sentence of section 7(c)(1) if it had intended that assessments be required only for major Federal actions for purposes of NEPA, the commenter argued that the definition of "major construction activity" should be expanded:

> "Major Construction activity" means any planned, temporary, or permanent physical modification to the environment. Examples of such projects include but are not limited to, dredging, drilling, filling, mining, site preparation, road construction, the erection of structures such as dams and buildings, or any other potentially destructive activities.

The commenter's suggested language goes well beyond the above-cited legislative history of the Act which clearly limited the biological assessment requirement to major Federal actions within the meaning of NEPA that are construction projects or that involve similar physical impacts. Further, the legal opinion of the Assistant Solicitor cited by the commenter does not support the commenter's argument because that opinion dealt with cumulative effects of a proposed *construction* project and a basic rule of NEPA case law that cumulative impacts of an action can trigger the requirement that an EIS be prepared. Thus, the basic elements of this rule's requirements—major Federal action (*e.g.*, EIS, or the functional equivalent, required) *and* construction project (or activity involving similar physical impacts)—were assumed to be appropriate standards by the Assistant Solicitor. The use of the word "may" instead of "shall" in section 7(c) means nothing more than Congressional intent that the duty to coordinate these review processes is discretionary with the Federal agency.

As requested by one commenter, the final definition clearly states that an action must be both a major Federal action for purposes of NEPA *and* a construction project (or other activity involving similar impacts). Therefore, it plainly follows that, although dams, pipelines, etc. are construction activities, a biological assessment is not

required unless the action is also a major Federal action.

Two commenters argued that OCS leasing, exploration, and development/production activities should be exempt from the section 7(c) requirement because such an analysis is presently covered by NEPA compliance as addressed in the Outer Continental Shelf Lands Act. Other commenters agreed with the Service that biological assessments would be required for development/production activities on the OCS, and, generally, would not be required for leasing and exploration activities that do not involve a significant modification of the physical environment. The Service adopts its position as proposed, because no exemption exists under section 7(c) if a biological assessment is required for an action. In some instances, OCS exploration activities may require the preparation of a biological assessment; *e.g.*, major Federal action involving exploration through construction of artificial gravel islands. However, in most cases major Federal exploration activities on the OCS will involve the drilling of test wells, actions that will not require the preparation of assessments.

The definition of "preliminary biological opinion" is adopted as proposed.

The definition of "proposed critical habitat" is adopted as proposed with the addition of the phrase "or revised" after "designated." The commenter that suggested this correction accurately noted that proposals may be made to designate or revise critical habitat under section 4 of the Act.

The definition of "proposed species" is adopted as proposed.

"Reasonable and prudent alternatives" is defined in the final rule. Section 7(b) of the Act requires the Service to include reasonable and prudent alternatives, if any, in a "jeopardy" biological opinion. An alternative is considered reasonable and prudent only if it can be implemented by the Federal agency and any applicant in a manner consistent with the intended purpose of the action, and if the Director believes it would avoid the likelihood of jeopardizing the continued existence of listed species or resulting in the destruction or adverse modification of critical habitat of such species. Further, the Service should be mindful of the limits of a Federal agency's jurisdiction and authority when prescribing a reasonable and prudent alternative. An alternative, to be reasonable and prudent, should be formulated in such a way that it can be implemented by a Federal agency consistent with the scope of its legal authority and jurisdiction. However, the Service notes that a Federal agency's responsibility under section 7(a)(2) permeates the full range of discretionary authority held by that agency; *i.e.*, the Service can specify a reasonable and prudent alternative that involves the maximum exercise of Federal agency authority when to do so is necessary, in the opinion of the Service, to avoid jeopardy. The Service recognizes that economic and technological feasibility are factors to be used in developing reasonable and prudent alternatives, as requested by one commentar. The definition of "reasonable and prudent alternatives" has been amended to reflect these considerations. If there are no alternatives that meet the definition of "reasonable and prudent alternatives," the Service will issue a "jeopardy" biological opinion without alternatives.

Two commenters stated that reasonable and prudent alternatives should include mitigation measures designed to reduce adverse effects, *i.e.*, conservation recommendations. One of those commenters urged the Service to limit the scope of recommended alternatives to those "consistent with the scope, magnitude, and duration of the project as well as the extent of its adverse effects." First, because there is a distinction between "reasonable and prudent alternatives" (that satisfy section 7(a)(2)) and "conservation recommendations" (that are authorized by section 7(a)(1)), the Service declines to include conservation measures within the scope of the definition. Second, the Service agrees that reasonable and prudent alternatives should be consistent with the intended purpose of the action and should therefore be economically and technologically feasible, but the Service cannot limit its range of choices to the criteria suggested by the commenter. Reasonable and prudent alternatives must cover the full gamut of design changes that are economically and technologically feasible for an action, independent of who is sponsoring the action.

Two commenters asked that "reasonable and prudent measures" be defined, and the Service has inserted a definition in the final rule. This addition clarifies the distinction between "reasonable and prudent alternatives" included in a "jeopardy" biological opinion and "reasonable and prudent measures" provided in an incidental take statement. The Service agrees with several commenters that reasonable and prudent measures are not the same as reasonable and prudent alternatives. Substantial design and routing changes—appropriate only for alternatives to avoid jeopardy—are inappropriate in the context of incidental take statements because the action already complies with section 7(a)(2). The commenter that advocated an "alternatives" approach for reasonable and prudent measures misapplied the legislative history of the 1982 Amendments. Reasonable and prudent measures were intended to minimize the level of incidental taking, but Congress also intended that the action go forward essentially as planned. Therefore, the Service believes that they should be minor changes that do not alter the basic design, location, duration, or timing of the action. The section 7 obligations of Federal agencies are not expanded by the application of reasonable and prudent measures, which strictly govern the scope of the section 9 exemption for incidental takings.

The definition of "Service" is adopted as proposed.

Section 402.03 Applicability.

This section, which explains the applicability of section 7, implicitly covers Federal activities within the territorial jurisdiction of the United States and upon the high seas as a result of the definition of "action" in §402.02. The explanation for the scope of the term "action" is provided in the discussion under §402.01 above.

Section 402.04 Counterpart Regulations.

The Service has retained the counterpart regulations section of the 1978 rule as the new §402.04 that authorizes the drafting of joint counterpart regulations by Federal agencies and the Service. "These counterpart regulations would allow individual Federal agencies to 'fine tune' the general consultation framework to reflect their particular program responsibilities and obligations." 43 FR 870, 871 (Jan. 4, 1978).

Counterpart regulations must be published first as proposed rules with a minimum 60-day public comment period. Such counterpart regulations must retain the overall degree of protection afforded listed species required by the Act and these regulations. Changes in the general consultation process must be designed to enhance its efficiency without eliminating ultimate Federal agency responsibility for compliance with section 7. As long as the general consultation process is used as a starting point, Federal agencies can anticipate little difficulty in securing approval of the Service for counterpart regulations.

One Federal agency commented that the counterpart regulation process is a time-consuming alternative. The Service admits that informal rulemaking takes time and effort, but believes that the "fine tuning" that could occur through the development of counterpart regulations might, in the long run, provide a solid return in time and resources saved through the use of a more compatible consultation procedure.

Section 402.05 Emergencies.

Section 402.05 provides a modified consultation procedure for the Service to respond to emergency situations. This provision applies to situations involving acts of God, casualties, disasters, national defense or security emergencies (added to the rule in response to public comments), etc.

Upon request by the Federal agency, the Service may carry out consultation through procedures other than those provided under these regulations, as long as such emergency procedures are consistent with sections 7(a)–(d) of the Act. This allows, for example, consultation through informal means (*e.g.*, a telephone call) and, therefore, rapid responses to emergency situations.

Several commenters suggested that specific procedures should be set out to provide guidance to Federal agencies facing emergency situations. One commenter suggested that consultation could be initiated informally, such as through a telephone call, and the Service could then communicate its information and recommendations over the telephone. Because of the severe time constraints inherent in an emergency, this informal approach is the method the Service anticipates will be used by a Federal agency to conduct a consultation for a *bona fide* emergency. One commenter felt that minimum requirements should include "documentation of the nature of the emergency and justification for an expedited consultation." The Service agrees and has required, in a new paragraph (b) to this section, that the nature of the emergency and the justification for using an expedited process be documented and forwarded to the Service. However, the Service has not required that this be done during the emergency or expedited consultation, as this may not always be possible. The new paragraph (b) requires that the Federal agency conduct an "after the fact" consultation. The Service will evaluate the information submitted by the Federal agency, *i.e.*, the nature of the emergency actions, justification for the expedited consultation, and an evaluation of the impacts to listed species and critical habitat, and issue a biological opinion including the information and recommendations given during the emergency consultation. This will serve not only to document fully the consultation, but may assist the Federal agency in responding to similar emergencies.

One commenter argued that, when dealing with a fire, flood, earthquake, or storm, there is not enough time or opportunity for a Federal agency to undertake consultation through an alternate process determined by the Director to be consistent with section 7. The Service notes that the utmost flexibility is needed to handle the most extreme emergencies and believes that the informal process outlined in this section would satisfy the commenter's concern for the availability of prompt consultation and decisionmaking in emergency situations.

The Service further recognizes that it is sometimes necessary to take immediate steps to contain, limit, or alleviate an emergency in order to protect health, safety, and welfare prior to initiating any form of consultation. However, the Service would like to stress the fact that its early involvement is important in order to take advantage of its expertise in minimizing the effects of emergency response activities on endangered and threatened species. Federal agencies must exercise discretion when responding to an emergency as to when to consult with the Service. This will depend on the nature of the emergency and the actions that are immediately required. The Federal agency should contact the Service as soon as practicable, keeping in mind the informal nature of emergency consultation and Service expertise in minimizing the impacts of emergency response activities on endangered and threatened species.

Section 402.06 Coordination with Other Environmental Reviews.

This section on coordination with other environmental reviews contains paragraphs (a) and (b) of §402.10 and paragraph (c) of §402.17 of the proposed rule. The substance of these paragraphs has been adopted, but the format has been altered.

These regulations, following the 1978 rule, allow Federal agencies to coordinate their consultation, conference, and biological assessment responsibilities under the Act with the agency's responsibilities under other statutes such as NEPA (42 U.S.C. 4321 *et seq.*) or the Fish and Wildlife Coordination Act (FWCA, 16 U.S.C. 661 *et seq.*). The Service encourages Federal agencies to coordinate these responsibilities, but believes it is preferable to allow Federal agencies to do so in a manner that best conforms to their particular actions and which they believe is most efficient. Therefore, the sentences in the proposed §402.10(b) stating that biological assessments *should* be incorporated into the documents required by other statutes (such as NEPA) have been dropped from the final rule.

Several commenters applauded these paragraphs because the coordination of environmental reviews would reduce duplication of paperwork and save time. One commenter requested guidance on how a NEPA review of endangered species issues should be conducted. The Service is not in a position to provide criteria that will ensure adequate NEPA compliance on endangered species issues. The Service suggests that the commenter contact the Council on Environmental Quality, the agency in charge of NEPA compliance, to obtain such information.

Another commenter expressed concern that, in simplifying the consultation process, safeguards should be used to avoid potential abuse and substantive problems. The commenter feared that, without safeguards, NEPA compliance might be construed as being less necessary on endangered species matters. The Service is also concerned that it retain sufficient review capability to identify potential conflicts between proposed Federal actions and listed species. Therefore, it has slightly altered its consultation procedures in this final rule to ensure that all Federal actions that "may affect" listed species receive some degree of review under informal or formal consultation.

The concluding sentences of paragraph (a) emphasize that although, for example, a biological assessment can be incorporated into an EIS, the procedures of these regulations also must be satisfied to ensure adequate and timely analyses during the section 7 consultation process. These sentences also express the intent of the Service to avoid a fragmented analysis of environmental concerns through the Service's direct efforts to provide a coordinated review. The Service declines to delete these sentences as requested by several commenters.

Under paragraph (b), the Service agrees with a comment that the biological opinion should be stated in the final environmental impact statement or environmental assessment. A statement of the opinion may be a summary of its findings and conclusions, contrary to the fear of one commenter that the entire opinion must be repeated

in the text of the NEPA document. The Service does feel that the entire opinion should be attached as an exhibit to the NEPA document if completion time permits.

Section 402.07 Designation of Lead Agency.

This section, which governs the designation of a lead agency, is adopted from § 402.10(d) of the proposed rule. One commenter requested that the section be amended so that only the lead agency is required to notify the Director that it will be conducting consultation on behalf of itself and all other cooperating agencies. The Service has adopted this suggestion.

Section 402.08 Designation of Non-Federal Representative.

A new § 402.08 has been added to the final rule to clarify the role of the designated non-Federal representative and was derived from §§ 402.02 and 402.12 (a) and (b)(5) of the proposed rule. Because the designated non-Federal representative may or may not be the applicant, there is a difference in the role the representative can play in the consultation. If the representative is not the applicant, the information-gathering functions, through informal consultation (§ 402.13) and/or through the preparation of a biological assessment (§ 402.12), is the full extent of its participation. However, if the representative is an applicant, its role in consultation is two-fold. As the representative, it may conduct the information-gathering functions identified above; as the applicant, it may continue its participation into formal consultation.

If an applicant is involved and does not desire to be the designated non-Federal representative, the Federal agency and the applicant must agree on the party to be designated. The Director shall be notified, in writing, if a non-Federal entity has been designated to represent the Federal agency for the informal consultation or biological assessment procedures.

One commenter stated that prior notice to the Director of the designation of a non-Federal representative is unnecessary. The Service disagrees because there is a legitimate need for it to be certain of the Federal agency's concurrence in the representation. However, the Service notes that there is a degree of flexibility here; *i.e.*, designation in advance for a continuous action or for a group of related actions is acceptable. In response to one comment, the Service agrees that the designated non-Federal representative may only submit a species list under the biological assessment procedures (§ 402.12) if the Federal agency has, previously to or simultaneously with this notice, provided its written designation to the Director.

Another commenter questioned the Service's authority to conduct informal consultations with non-Federal representatives in place of the Federal agencies. The Service acknowledges that the Federal agency must retain the responsibility to initiate formal consultation along with its ultimate responsibility to ensure that its actions are not likely to jeopardize listed species, but the designation of a representative by the Federal agency to conduct informal consultation does not lessen these responsibilities or eliminate the Federal agency's duty to review its actions. Instead, the designation of a representative allows the Federal agency to coordinate all of its environmental reviews, thereby saving time and resources to obtain a single, comprehensive analysis of the action and its potential impacts. The agency must still review the work product and independently reach its own conclusions and decisions. The representative does the ground work (data compilation and synthesis); the Federal agency cannot delegate its duty to review, analyze, and formally consult.

Concerned that a conflict of interest could exist if applicants were allowed to be designated as non-Federal representatives, one commenter cited 40 CFR 1506.5(c) (NEPA regulation) as authority for eliminating applicants from the field of potential representatives. The Service declines to make the suggested change for the following reason. Section 7(c)(2) itself recognizes that exemption applicants (including permit or license applicants) may prepare biological assessments in cooperation with the Service and under the supervision of the Federal agency. This express statutory opportunity for "interested parties" (as applicants would always be) to prepare biological assessments runs counter to the NEPA rule and shows the clear Congressional intent in favor of full applicant involvement in the section 7 process. Although applicants may fill the role of non-Federal representatives, the ultimate responsibility for compliance with section 7 remains with the Federal agency. In response to one commenter, the regulations have been changed to eliminate the requirement that the Federal agency "participate in the preparation" of the biological assessment. The Service believes that the Federal agency may fulfill its responsibilities by providing guidance and supervision, and by independently reviewing and evaluating the work product of the applicant. Responsibility for carrying out negotiations with the Service may not be delegated to the applicant/representative, as suggested by this commenter. In addition, Federal agencies cannot delegate their role in initiating formal consultation, conference, or early consultation.

Section 402.09 Irreversible and Irretrievable Commitment of Resources.

Section 7(d) of the Act provides that, after initiation of consultation required under section 7(a)(2), the Federal agency and any applicant shall make no irreversible or irretrievable commitment of resources with respect to the Federal action which has the effect of foreclosing the formulation or implementation of any reasonable and prudent alternatives that would avoid violation of section 7(a)(2). This prohibition does not apply to actions affecting proposed species or proposed critical habitat. This mandatory restriction on commitment of resources is set out in § 402.09 of the final rule (formerly § 402.11 of the proposal). In response to comments, the language of the proposed rule was corrected to conform more closely to section 7(d). Another commenter requested that the sentence dealing with section 7(d) be amended by adding "measures" after the phrase "reasonable and prudent alternative[s]" to bring the regulation in line with the statute. The Service declines to make this change because it would tend to confuse "reasonable and prudent alternatives" that are included in jeopardy biological opinions with "reasonable and prudent measures" that are included in an incidental take statement under section 7(b)(4) of the Act. The proposed language describing the section 7(d) prohibition accurately implements the Act and is adopted in this final rule.

The proposed rule addressed the duration of the section 7(d) prohibition as follows:

> This requirement exists until: a "no jeopardy" biological opinion is issued by the Service . . .; the Federal agency adopts reasonable and prudent alternatives; or an exemption is granted under section 7(h).

Proposed rule, 48 FR 29990, 30000 (June 29, 1983), *proposed to be codified at* 50 CFR 402.11. Several commenters asked for a clarification or expansion of these criteria that terminate section 7(d) restrictions. Noting that the Act is silent as to when the section 7(d) prohibition ceases, one commenter contended that the prohibition should end when consultation is terminated. Another commenter, concerned that the proposed language would deprive Federal

agencies of the responsibility and authority to determine compliance with section 7(a)(2), urged the addition of a fourth criterion that would terminate the section 7(d) prohibition if "the Federal agency determines that its proposed action will not jeopardize the continued existence of endangered and threatened species or adversely affect critical habitat." Another commenter went further and urged the Service to adopt other criteria where Federal agency compliance with section 7(a)(2) would remove the section 7(d) restriction. Two other commenters felt that the second criterion—adoption of reasonable and prudent alternatives—must be restricted to those recommended by the Service. They opposed allowing the Federal agency to formulate its own "reasonable and prudent alternatives" without Service approval in order to avoid the prohibition of section 7(d).

The commenters raise valid concerns that illustrate the need to reexamine the duration of the prohibition against the irreversible and irretrievable commitment of resources. First, the Service recognizes that, although its biological opinions issued by authority of section 7(b) are entitled to great deference, the ultimate decision of whether to proceed with an action in light of section 7 responsibilities rests with the Federal agency. The proposed language did preempt Federal agency discretion by placing an agency that disagreed with the conclusion of the Service's biological opinion in the awkward position of facing section 7(d) restrictions on its action, even though it had determined through its own analysis that the section 7(a)(2) standards were satisfied. Second, case law indicates that section 7(d)'s proscriptive force continues while Federal agency efforts to conform its action to the requirements of section 7(a)(2) are "ongoing." *See North Slope Borough* v. *Andrus*, 642 F.2d 589, 611 n.143 (D.C. Cir. 1980); *Conservation Law Foundation of New England, Inc.* v. *Andrus*, 623 F.2d 712, 714 n.1 (1st Cir. 1979). The final rule has been amended to provide that the section 7(d) prohibition is in force during consultation and continues until the requirements of section 7(a)(2) are satisfied.

Therefore, if a Federal agency receives a "no jeopardy" biological opinion from the Service or chooses any reasonable and prudent alternative recommended by the Service, the requirements of section 7(a)(2) are met and the section 7(d) prohibition expires. If the Federal agency disagrees with a "jeopardy" biological opinion or chooses an alternative not provided by the Service based on its own analysis, then the validity of the Federal agency's "no jeopardy" finding will decide whether section 7(a)(2) has been satisfied and whether section 7(d) no longer applies. If it is later determined that the finding is not valid, the Federal agency would be taking the risk of noncompliance with the Act.

Finally, one commenter asked that this section be amended to require Federal agencies to give written notice to the Service verifying that neither it nor any applicant involved has made any irreversible or irretrievable commitment of resources during consultation. The Act does not provide such authority, except arguably in the exemption process. A mandatory section 7(d) notice has not been adopted in this final rule regarding consultation procedures because section 7(d) is strictly prohibitory in nature and not consultative.

Subpart B—Consultation Procedures

There are five primary components within the section 7 consultation procedures—conference, early consultation, biological assessment, informal consultation, and formal consultation. Of these, only conference, formal consultation, and biological assessments may be required. Although a Federal agency may elect to use several of these procedures, they do not represent a mandatory, sequential process. As requested by one commenter, the following is a brief abstract of each component of the consultation process.

If a Federal agency determines that its action is likely to jeopardize the continued existence of any *proposed* species or result in the destruction or adverse modification of *proposed* critical habitat, the Federal agency is required to "confer" with the Service under §402.10. The purpose of a conference is to identify and resolve potential conflicts between an action and proposed species or critical habitat. The Service will make advisory recommendations on ways to minimize or avoid adverse effects. If the proposed species or proposed critical habitat is subsequently listed or designated, respectively, then the Federal agency must consider whether formal consultation under §402.14 is required.

"Early consultation" is an optional process that may be requested through the Federal agency by a prospective applicant to determine whether its proposed action is likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of critical habitat. Early consultation occurs prior to a formal application for a Federal permit or license. Such early consultation is conducted between the Service and the Federal agency in cooperation with the prospective applicant. At the request of the prospective applicant, early consultation is initiated by the Federal agency responsible for issuing the permit or license and is generally conducted and concluded in the manner prescribed for "formal consultation." If the action is a "major construction activity," the biological assessment requirement of §402.12 must be satisfied before early consultation is initiated. After concluding early consultation, the Service will deliver its preliminary biological opinion to the Federal agency and the prospective applicant.

After formal application is made for the permit or license but before its issuance, the Federal agency should submit to the Service a written request that the preliminary biological opinion be confirmed as a final biological opinion under section 7(a)(2). If the Service determines that no significant changes have occurred in either the proposed action or the information available since early consultation, no new impacts are anticipated, and no new species have been listed or critical habitat designated since early consultation, it will confirm that the preliminary biological opinion remains accurate and shall be treated as a final biological opinion issued under section 7(b) of the Act. Consultation will terminate in accordance with §402.14(*l*). However, if the Service is unable to confirm the preliminary biological opinion due to any of the reasons outlined in §402.11, formal consultation on that action must be initiated under §402.14.

"Biological assessment" requirements apply to all major construction activities as defined in these regulations. Even if not required, Federal agencies may voluntarily prepare a biological assessment to assist them in fulfilling their section 7 responsibilities. Also, any person who wishes to apply for an exemption may voluntarily prepare such an assessment in cooperation with the Service and under the supervision of the appropriate Federal agency.

A biological assessment contains information concerning listed or proposed species or designated or proposed critical habitat that may be present in the action area and an evaluation of any potential effects of the action on such species and habitat. A biological assessment should be used in determining whether formal consultation or a conference is required.

"Informal consultation" includes all the contacts (discussions, correspondence, etc.) between the Federal agency or its designated non-Federal representative and the Service that take place prior to the initiation of any necessary formal consultation. Informal consultation may be used by the Federal agency in determining whether formal consultation under §402.14 or a conference under §402.10 is required.

"Formal consultation" is required under section 7(a)(2) of the Act. A Federal agency must initiate formal consultation if it determines that its action "may affect" any listed species or its critical habitat unless it determines through informal consultation or biological assessment procedures, with the written concurrence of the Service, that its action "is not likely to adversely affect" such species or habitat. If the action is a "major construction activity," the biological assessment requirement must be satisfied before formal consultation may begin. Formal consultation is concluded within 90 days or extended in accordance with the provisions of §402.14. Within 45 days after concluding formal consultation, the Service will deliver its biological opinion stating whether or not the action is likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat. If formal consultation results in a "jeopardy" biological opinion, reasonable and prudent alternatives, if any, will be included in the opinion.

These procedures are discussed more fully below, together with the sections governing post-consultation responsibilities of Federal agencies and the factors that require reinitiation of formal consultation. Specific public comments are treated on a section-by-section basis.

Section 402.10 Conference on Proposed Species or Proposed Critical Habitat.

The 1979 Amendments added the requirement in section 7(a)(4) that Federal agencies confer with the Service on any Federal action that is likely to jeopardize the continued existence of any *proposed* species or result in the destruction or adverse modification of *proposed* critical habitat. The purpose of this requirement is to identify and resolve potential conflicts between an action and proposed species or proposed critical habitat at an early point in the decisionmaking process. Conferences will be conducted on an informal basis between the Federal agency and the Service. The Service will make recommendations, if any, to minimize or avoid adverse effects of the action on proposed species or proposed critical habitat. These recommendations are advisory in nature, because the "jeopardy" prohibition of section 7(a)(2) does not apply until the species is listed or the critical habitat is designated. However, the Federal agency and any applicant should give serious consideration to implementing the recommendations since, if the species is later listed or critical habitat designated, the Federal agency must review its action, regardless of its stage of completion, to determine whether consultation is required. In certain instances the Federal agency and the Service may conduct the conference in such a thorough manner that it would satisfy the consultation requirements of section 7(a)(2) if the proposed listing or designation is subsequently completed.

The conference procedures are not repetitive of work performed in the preparation of a biological assessment, as suggested by three commenters. First, the conference requirement applies to all Federal actions, while the biological assessment requirement only applies to actions that are "major construction activities." Second, the conference requirement applies to proposed species and proposed critical habitat, whereas biological assessments are required only when listed species or critical habitat may be present in the action area (although proposed species or proposed critical habitat should be covered in the assessment if they also may be present in the action area). Thus, the conference process fills the need to alert Federal agencies of possible steps that the agency might take at an early stage to adjust their actions to avoid jeopardizing a proposed species. The Service strongly encourages the implementation of the recommendations so the action would not violate section 7(a)(2) if the species is listed or the critical habitat designated.

After reviewing a biological assessment or other available information, the Service may determine that a conference is required for the proposed species or proposed critical habitat. A sentence has been added to the new paragraph (b) of §402.10 [proposed §402.13(a)] to point out the Service's responsibility to request a Federal agency to confer after a review of available information. The last sentence of the proposed paragraph (a) has been deleted since the new §402.08 clearly defines the role of the designated non-Federal representative. The Service declines to take the position that it can "require" the initiation of a conference, because the Federal agency bears the ultimate responsibility to assess the likelihood of jeopardy to proposed species by its actions. However, the Service will vigilantly review biological assessments and other available information and fulfill its duty to make Federal agencies aware of their responsibilities under the Act.

The Service emphasizes the need for Federal agencies to confer because such efforts may not only minimize or avoid injury to proposed species but might also prevent the halting of an action if the species is subsequently listed:

> Obviously, Federal agencies irreversibly committing resources and foreclosing alternatives to an action that is likely to jeopardize a proposed species do so with the risk that the species will eventually be formally listed and the prohibitions of section 7 will become applicable. The conferees do not believe that any Federal agency or permittee should make any irreversible or irretrievable commitments of resources for the purpose or with the intent of foreclosing otherwise reasonable alternatives or in order to secure an exemption pursuant to section 7(h).
>
> H.R. Conf. Rep. No. 697, 96th Cong., 1st Sess. 13 (1979).

There is no requirement that Federal agencies confer with the Service on species that are candidates for listing proposals. However, for the reasons identified by Congress in the Conference Report to the 1979 Amendments on proposed species, the Service encourages Federal agencies to confer informally on candidate species when deemed appropriate to avoid jeopardy and to avoid potential economic loss through project modification if the species is later listed.

Several specific changes were recommended for proposed paragraph (a) [paragraphs (a) and (b) in the final rule]. One commenter felt that the reference to "potential endangered species conflicts" was too restrictive. The Service agrees that the proposed rule might have been construed so as to exclude threatened species. Therefore, the sentence has been adjusted to refer to all potential conflicts.

One commenter urged the Service to change the standard for initiating a section 7(a)(4) conference from "likely to jeopardize" to "would adversely affect." The regulation tracks the statute. The Service lacks the authority to make the requested change.

Several commenters urged the Service to make provisions for applicant involvement in the conference process. The Service agrees, and has added language in paragraphs (a), (c), and (e) of §402.10 to ensure that applicants have an opportunity to participate in the

conference, and that they receive a copy of the conclusions documented by the Service.

Another commenter asked that time limits be established for the conference process. The Service declines to establish time limits for the conference requirement. The timing of the section 7(a)(4) process is, in part, dictated by the progress of the proposed rulemaking to list a species or to designate critical habitat. Regardless of any time limits that the Service could establish, the conference requirement expires and consultation is required if the listing or critical habitat designation becomes final. The Service finds no reason to impose rigid time frames for conferences.

Paragraph (c) defines the nature and content of the conference. Basically, a "conference" involves informal discussions on the identification and possible avoidance or minimization of potential adverse effects to proposed species or proposed critical habitat from a Federal action. The reference to "informal discussions" should not be confused with "informal consultation," which is a distinct, but optional, component of consultation.

The Service declines to modify paragraph (c) by changing "advisory" recommendations to "conservation" recommendations, as suggested. Such a change may confuse conference with formal consultation, the required procedure in which discretionary "conservation recommendations" may be given. The Service also declines to adopt suggested provisions that would (1) require advisory recommendations to be made in every conference, (2) force the Service to notify the Federal agency of the date on which a final decision will be made on a listing proposal, or (3) require the Service to initiate emergency rulemaking proceedings to list a species or designate critical habitat if the Federal action is likely to jeopardize the species. Although required, conference is an informal process that has no substantive force. To force every conference into a regimented structure would be counterproductive and contrary to the intent of the Act. When appropriate, the Service will make advisory recommendations on ways to avoid or minimize adverse effects to proposed species or proposed critical habitat. During the conference, the Service will apprise the Federal agency of the progress of the listing or critical habitat proposal and will attempt to notify the Federal agency when the listing or critical habitat proposal becomes final. Emergency rulemaking is provided for under section 4(b)(7) of the Act and will be used if appropriate under the circumstances.

One commenter suggested that the conference involve all of the steps of formal consultation, but on an informal basis so that if the listing becomes final, the conclusions and recommendations derived from the conference could be adopted as a final biological opinion. In some cases, a thorough, well-prepared conference might elucidate sufficient conclusions and recommendations to serve as the biological opinion, upon the final listing of a species. While section 7(a)(4) does not require Federal agencies to follow the section 7(a)(2) process for proposed species or proposed critical habitat, or specifically provide for the conversion of conference "conclusions and recommendations" into a final biological opinion [in contrast to explicit authority under section 7(b)(3)(B) for the conversion of preliminary biological opinions into final biological opinions], such a procedure is available to the Federal agency and the Service in appropriate instances.

If the information necessary to conduct a formal consultation is available at the conference stage, and if a formal procedure is deemed appropriate by both the Federal agency *and* the Service, the conference may be conducted through a procedure equivalent to formal consultation; the results, or opinion, derived from a "formal" conference may be adopted as the biological opinion when the proposed listing or designation is completed. It should be noted that the conference conclusions and recommendations would only be adopted as the biological opinion in those instances where no new data are developed, including that developed during the rulemaking process on the proposed listing or designation of critical habitat, and no changes to the Federal action are made which would alter the content of that opinion. By providing procedures which allow for a more extensive conference that may later be adopted as the biological opinion, the Service does not intend to expand upon the requirements of section 7(a)(4). Rather, this procedure is an option available to the Federal agency and the Service to help avoid conflicts and expedite consultation if the proposed species or critical habitat is listed or designated. Therefore, a new paragraph (d) is added to this final rule to acknowledge the availability of a "formal" conference procedure.

Paragraph (e) of §402.10 discusses the documentation of the results of the conference. If the action involves only proposed species or proposed critical habitat, a copy of the recommendations will be forwarded by the Service to the Federal agency and any applicant. If an action also involves formal consultation on listed species or critical habitat, the Service will provide the recommendations on proposed species or proposed critical habitat with the biological opinion. As requested by some commenters, the final rule has been clarified to state that the conclusions of a conference will be provided with the biological opinion rather than made an integral part of ("consolidated in") the opinion. The Service does not intend that the informal nature of the conference be changed or that any of the requirements of formal consultation under section 7 be imposed on Federal agencies with respect to proposed species or proposed critical habitats unless the Federal agency specifically requests a more formal procedure. Early initiation of these discussions increases the chances of resolution of potential conflicts.

Section 402.11 Early Consultation.

The 1982 Amendments added a provision to the consultation process [section 7(a)(3)] designed to identify and to minimize, early in the planning stage of an action, potential conflicts between the action and listed species. These early consultation provisions authorize the Service to consult with Federal agencies at the request of and in cooperation with prospective applicants regarding the impact of proposed actions on listed species or critical habitat. These provisions are incorporated into the final regulations in §402.11 (§402.14 of the proposed rule). The intent of this provision is to involve the Service and State and local planning and conservation entities in the planning stages of actions. The Service believes that early consultation will be helpful in establishing a mechanism for early resolution of potential conflicts. Congress did not intend that this provision be used to authorize consultation for speculative or remote actions but rather only on actions which are likely to occur. The regulations require prospective applicants to provide sufficient information describing the project, its location, the scope of activities associated with it, and the anticipated impacts to listed species to enable the Federal agency and the Service to conduct meaningful early consultations.

The opportunity for an early consultation should expedite the permitting and other regulatory processes associated with actions requiring Federal authorizations.

Contrary to the interpretation of one commenter, early consultation is not a required process, but rather is an optional step that a prospective applicant can take to factor in section 7 considerations during the initial planning stage. Although early consultation contains most of the features of formal consultation, the Service declines to adopt the suggestion to place the early consultation provisions within the formal consultation section as a "special case." Early consultation, unlike formal, is not required and occurs before any application for a permit or license is filed, whereas formal consultation is a post-application process when applicants are involved. These differences are significant and merit the separation of these distinct processes into separate sections. However, because of the extensive similarities in the procedures for early and formal consultation, the final rule has been substantially modified in format to reference appropriate paragraphs in §402.14 (formal consultation) to avoid repetition of these common features. Although this has greatly shortened the early consultation section, the requirements and procedures have not been altered substantively.

One commenter was confused over the parameters of early consultation and informal consultation (§402.13). Informal consultation is a post-application process, as is formal consultation; early consultation is a pre-application process. There is no overlap. Designated non-Federal representatives can carry out informal consultation, and they can also carry out the biological assessment process if an assessment is required during the early consultation. Although only Federal agencies conduct early consultation directly with the Service, non-Federal representatives may continue to play a role in the data-gathering function of consultation.

Several commenters believed that proposed §402.14 took away the prospective applicant's right to request early consultation and to make the initial determination of possible impacts to listed species or critical habitat. The proposed rule preserved the prospective applicant's right to request early consultation but provided the Federal agency with the responsibility for determining impacts to listed species or critical habitat. In response to comments, the final rule has been rearranged to clarify the primary role of the applicant in making the initial determination and request to the Federal agency. However, the applicant's rights under section 7(a)(3) of the Act are not unqualified, and the ultimate burden is on the applicant to meet certain threshold criteria.

Paragraph (a) of §402.11 outlines the purpose of early consultation and is adopted substantially as proposed in §402.14(b) and the first sentence of §402.14(c). The legislative history is clear that the prospective applicant must be involved to the greatest extent practicable in every aspect of the early consultation process. H.R. Conf. Rep. No. 835, 97th Cong., 2d Sess. 26 (1982). One commenter expressed concern that it may not be possible to have the applicant involved in every meeting and telephone call between the Federal agency and the Service. Therefore, acknowledging the practical limitations on involving the applicant in all consultation contacts (but still recognizing the need for continuous communication with the applicant), the second sentence of paragraph (a) now reads that the prospective applicant should be involved "throughout" (instead of "in every aspect of") the consultation process.

Paragraph (b) of §402.11 sets out the threshold conditions that must be satisfied before early consultation can be initiated and is derived from proposed §402.14(c). As suggested by one commenter, the prospective applicant's request for early consultation should be made in writing to the Federal agency.

The "may adversely affect" threshold for initiating early consultation has been expanded to "may affect." This action was taken because the more restrictive standard unnecessarily limited access to this early review procedure, especially since at the early planning stage of an action the exact nature of a possible effect could be difficult to define.

Section 402.14(c) of the proposal established that the Federal agency ensure that the following conditions be met prior to initiation of early consultation:

(1) there must be a definitive proposal outlining the action and its effect;

(2) it must be shown that the action is technologically, administratively, and legally feasible;

(3) it must be shown that the applicant possesses adequate economic resources to conduct the action; and

(4) it must be shown that the applicant possesses some property interest in the proposed site on which the action will occur.

Numerous comments were received on these criteria. Three commenters urged the Service to strike all four conditions because of their unreasonableness and the Service's lack of authority to impose them on applicants. Other commenters criticized conditions (2) and (3) due to their ambiguity. Contending that enforcement of these conditions would preclude early consultation in many cases, the commenters noted that the information needed to meet these conditions is not available at the time that early consultation is most useful. The commenters also attacked condition (4), regarding the need to show an ownership interest in land, because early consultation would normally occur prior to the selection of an exact location for the project. Two commenters stated that conditions (1) and (2) are adequate for screening serious actions. One commenter suggested that only two criteria be addressed in determining eligibility for early consultation: scope of the project, and possible effects on listed species.

The Service was given explicit authority in section 7(a)(3) of the Act to issue guidelines that would prevent speculative or undefined actions from triggering early consultation.

> The Committee expects that the Secretary will exclude from such early consultation those actions which are remote or speculative in nature and to include only those actions which the applicant can demonstrate are likely to occur . . . . The Committee further expects that the guidelines will require the prospective applicant to provide sufficient information describing the project, its location, and the scope of activities associated with it to enable the Secretary to carry out a meaningful consultation.
>
> H.R. Rep. No. 567, 97th Cong., 2d Sess. 25 (1982).

The final rule retains proposed condition (1) that requires the nature and effect of a prospective action to be defined. Without adequate information, early consultation would be meaningless. Proposed condition (2) has been modified in the final rule to require that the prospective applicant certify that it intends to implement its proposal, if authorized. This will prevent highly speculative actions from entering early consultation. The Service believes that these two conditions are reasonable and will allow Federal agencies and the Service to focus their attention on concrete, feasible actions through meaningful, early consultations.

Proposed conditions (3) and (4) described above have been deleted. The Service agrees that these conditions went beyond the normal pre-application information-gathering practices of Federal agencies and that they might have discouraged early consultations unnecessarily.

Paragraph (c) of §402.11 is adopted from proposed §402.14(a) and the introductory paragraph of proposed §402.14(d). This paragraph governs initiation of early consultation by the Federal agency if the prospective applicant complies with paragraph (b).

Paragraph (d) of §402.11 governs the procedures for conducting early consultation. To eliminate unnecessary regulatory language, this paragraph cross-references the items in §402.14(c)–(j), since the general consultation requirements are the same as for formal consultation. The proposed rule repeated these requirements in §402.14 (d) through (i).

One commenter argued that the Service exceeded its authority in proposed paragraph (d)(3) by telling Federal agencies how to meet their responsibilities by requiring Federal agencies to involve the applicant in the data-gathering function. Although this is not included in the final rule, the Federal agency has an underlying responsibility to involve the applicant in every aspect of the early consultation to the extent possible. Moreover, the applicant may be the primary source of data used in the consultation.

If the action is a major construction activity, then a biological assessment must be prepared in accordance with §402.12 before the request for early consultation is submitted, as is required for formal consultation. This is a change from proposed §402.12(b)(10), which made the biological assessment optional during early consultation. The Service agrees with the comment that, for major construction activities, a meaningful early consultation must include the preparation of a biological assessment because the preliminary biological opinion issued after early consultation may be confirmed as the final biological opinion. Therefore, if early consultation is requested for a major construction activity, the Federal agency must complete a biological assessment under §402.12 prior to submitting its request for early consultation.

The time limits and extension provisions for formal consultation are incorporated by reference as the requirements for early consultation. Several commenters felt that the "mutually agreed upon" language of the proposal [§402.14(e)] was too loose and that definitive time limits were needed. The Service agrees and has adopted the time limits for formal consultation to apply to early consultation as well. The Service notes that, for major construction activities, the time period will not begin to run until the biological assessment under §402.12 is completed. Because time deadlines have been adopted, there is no need to require a written notice that consultation has been concluded, as requested by one commenter.

Proposed §402.14(i) concerned requests by the Service for additional data, and did not require the addition of a written notice procedure for obtaining an extension. This is now required, as requested by one commenter, by incorporating the formal consultation requirements.

Proposed §402.14(f) recognized that the Service's responsibilities during early consultation are the same as those that exist during formal consultation. The final rule retains this provision by reference. The Service is opposed to limiting the scope of its analysis of impacts during early consultation, and it is also opposed to limiting the free flow of communication among it, the Federal agency, and the applicant. Therefore, the comment suggesting that draft preliminary biological opinions not be released to the Federal agency or the prospective applicant is rejected. This is not an issue that can be dealt with on an ad hoc basis, depending on the program experience with particular agencies or regions. The policy behind early consultation is clear: full involvement of all parties, including the prospective applicant, to identify and eliminate conflicts at the earliest possible stage of a project.

Paragraph (e) of §402.11 provides that the contents and conclusions of a preliminary biological opinion are the same as for a biological opinion issued after formal consultation in §402.14(i). One commenter stated that biological opinions need only be issued after formal consultation under section 7(a)(2) of the Act and that this should be clarified in the rule. The Service disagrees because a "written statement" containing the Secretary's opinion is required to be given after the conclusion of both early and formal consultation. However, there is an important difference in these two types of opinions: the former has no independent, operative significance, while the latter states the Service's "final" judgment on the impacts of an action. The preliminary biological opinion, issued after the conclusion of early consultation, has no operative force until it is later confirmed by the Service under section 7(b)(3)(B) of the Act, just before the action is to be taken.

One commenter said that it is inappropriate to include an incidental take statement with a preliminary biological opinion. The Service believes that input on incidental take is essential to adequately assist the applicant in planning its action. It would be unfair to force the applicant to wait until the time for confirmation of the preliminary biological opinion to receive its first notice on the terms and conditions that must be complied with and the amount and extent of permissible incidental take. No harm results to the species by providing this statement in the preliminary biological opinion because, as stated in the rule, it does not constitute a permit to take. The "taking" exemption under section 7(o)(2) does not occur until the preliminary biological opinion is later confirmed as a final opinion under §402.11(f).

Paragraph (f) of §402.11 is adopted from proposed §§ 402.15(b) and 402.18(a). This paragraph acknowledges that, if certain findings are made by the Service, a preliminary biological opinion may be confirmed as a final biological opinion after formal application for a Federal license or permit is made. The rule requires the Service to make its decision on confirmation within 45 days after receipt of the Federal agency's request. As requested by one commenter, both the request and the Service's response must be in writing.

Section 402.12 Biological Assessment.

This section explains the biological assessment requirements under section 7(c) of the Act and the process that must be followed in its preparation. The requirement that biological assessments be prepared in advance of certain consultations under section 7(a)(2) was added by the 1978 Amendments. Although the Service has, as a matter of agency practice, been requiring the preparation of biological assessments in appropriate cases under the authority of section 7(c), this final rule consolidates all regulatory requirements pertaining to biological assessments.

The proposed rule addressed the biological assessment provisions in §§402.01(c) and 402.12(b). In response to public comments, the Service has merged these sections in the final rule into § 402.12. The new format clarifies the requirements and procedures for preparing biological assessments. Although the organization of these provisions has been changed substantially, the substance of the regulation is, except for minor amendments, the same as that presented in the proposed rule.

The informal consultation and biological assessment processes were both presented in §402.12 of the proposed rule. This confused several commenters who believed that biological assessments could only be performed in conjunction with informal consultations. To eliminate this

confusion, the biological assessment provisions are placed in a separate section, immediately before informal consultation. Although a Federal agency may prepare a biological assessment while involved in informal consultation with the Service, there is no requirement that it do so.

References to conference, early consultation, and formal consultation in proposed §402.12 (b)(7) (third through fifth sentences) and (b)(10) have been deleted because cross-references to the biological assessment requirement have been inserted in §§402.10, 402.11, and 402.14 to explain the interrelationship of these processes.

The purpose of a "biological assessment," as stated in §402.12(a), is to evaluate the potential effects of the action on listed or proposed species or designated or proposed critical habitat and determine whether any such species and habitat are likely to be adversely affected by the action. Biological assessments are designed to assist Federal agencies in "determining whether section 7(a)(2) consultation should be initiated by identifying endangered or threatened species that may be present in the area affected by their proposed project and by identifying the impacts of those projects on such species." H.R. Rep. No. 697, 96th Cong., 1st Sess. 14 (1979). Such assessments are designed to promote the "early discovery of and elucidation" of potential endangered and threatened species conflicts with proposed agency actions. These reviews should take place well before the agency exercises its discretion to authorize, fund, or carry out an action. H.R. Rep. No. 1625, 95th Cong., 2d Sess. 20 (1978).

One commenter asked that a reference be inserted for preparation of "preliminary biological assessments." The Service does not require advance review of draft biological assessments; the requested procedure would add to statutory requirements. Therefore, the addition has not been made.

Section 402.12(b)(1) of the final rule acknowledges that the Act exempts from the biological assessment requirement those actions for which contracts were let or construction was started on or before the effective date of the 1978 Amendments. One commenter argued that the assessment requirement must not be retroactive, but should apply only to current actions as of the issuance of the final rule. The Service must follow the Act on this point and adopt the rule as proposed. This will not operate to the disadvantage of any Federal agency involved in a section 7 consultation, because the Service has been requiring the preparation of biological assessments since the effective date of the 1978 Amendments.

Section 402.12(b)(1) also recognizes that virtually any Federal agency, State or local agency, private organization, or individual (potential exemption applicants) may voluntarily prepare a biological assessment consistent with the procedures set forth in this section to assist it in fulfilling its section 7 responsibilities. One commenter urged the Service to delete the sentence referring to voluntary preparation of assessments in proposed §402.12(b)(1) because consultation is terminated if a biological assessment is not *required*. The commenter's statement is only true for an action if no listed species or critical habitat are present in the proposed action area. The placement of that sentence in the proposed rule was confusing, and thus the final rule has been clarified. The Service would like to make it clear, however, that whether a biological assessment is required or voluntary bears no relation to whether a conference or formal consultation is required under §§402.10 or 402.14, respectively. The assessment is a tool used to identify impacts to species or habitat so that a decision can be made as to whether a proposed action is likely to adversely affect listed species or critical habitat. The biological assessment can be used to determine whether a conference or formal consultation is required.

The Act provides that any person who may wish to apply for an exemption from the requirements of section 7(a)(2) may voluntarily conduct such an assessment, in cooperation with the Service and under the supervision of the appropriate Federal agency. These potential exemption applicants must follow the procedures described in §402.12. Under section 7(h)(2), an exemption is not permanent unless a biological assessment has been prepared. A permanent exemption remains in force for a particular Federal action regardless of the listing of additional species in the action area, whereas an ordinary exemption is limited to the species involved in the section 7 consultation. Paragraph (b)(1) acknowledges these statutory provisions.

Therefore, the Service retains the flexibility inherent in paragraph (b)(1) that allows for the preparation of biological assessments in those instances where they are not specifically required by this rule. Although requested by another commenter, the Service declines to set guidelines for the exercise of discretion by other Federal agencies or applicants on the decision to voluntarily prepare assessments.

Paragraph (b)(2) has been added in response to public comments. The limitation in section 7(c)(1) of the Act on entering contracts or starting construction on an action while the preparation of a biological assessment is pending has been included in these regulations. This construction restriction applies to all actions involving the preparation of a biological assessment.

The fact that a biological assessment is not required for all actions does not mean that listed or proposed species or designated or proposed critical habitat receive less protection. Federal agencies still have an obligation to review all of their actions to determine whether formal consultation under §402.14 is required. In addition, Federal agencies must confer on actions that are likely to jeopardize the continued existence of proposed species or result in the destruction or adverse modification of proposed critical habitat.

One commenter asked that Federal agencies be required to document any finding of "no effect" on listed species or critical habitat for actions not involving the preparation of a biological assessment. The Service has no authority to impose such a requirement, but does encourage Federal agencies to use their NEPA documentation to illustrate their analysis of Endangered Species Act issues.

The Service reserves the right to request that an agency prepare a biological assessment. One commenter questioned the right of the Service to request assessments when such are not otherwise required by the Act. Another commenter feared that the Service would routinely request field studies with many of the characteristics of biological assessments, regardless of the action's potential effects, the acceptability of a general field reconnaissance, or the obligation of the Service to provide guidance and data. The Service's request for a biological assessment or for field studies is not of mandatory effect; a Federal agency may reject any such request. The Service recognizes that consultation involves a two-way flow of information. It will always strive to provide data that are available and to assist in designing or in conducting studies (within budgetary constraints and available staffing) or in gathering data through consultation.

Paragraph (c) of §402.12 covers the request by a Federal agency for a species list from the Service. This paragraph was adopted from §402.12(b)(1) (first sentence) of the proposed rule. Paragraph (d) of §402.12

involves the Director's issuance of a species list. This paragraph was adopted from § 402.12(b)(2) of the proposed rule.

The biological assessment process begins when a Federal agency decides that its action is a major construction activity, as discussed in these regulations, or it decides that it will voluntarily prepare a biological assessment. The Federal agency or the designated non-Federal representative requests information on whether listed or proposed species or designated or proposed critical habitat may be present in the action area. Within 30 days of receipt of that inquiry, the Director will respond with a list of any such species and critical habitat that may be present, as well as the available data (or references thereto). This may include recommendations for studies or surveys that may assist in the preparation of the biological assessment.

Contrary to the contentions of several commenters, the request for a species list is mandatory under section 7(c) for any major construction activity, unless the Federal agency forwards its own list for the Director's concurrence as explained below. This is not a burdensome requirement, even for apparent "no effect" actions, since the entire process, including the Director's response that no listed species or critical habitat occurs in the action area, may be carried out without delay through the NEPA process.

In response to comments, the final regulations explicitly allow the Federal agency or the designated non-Federal representative to proceed with the preparation of the biological assessment prior to receiving a species list from the Service. In this situation, the Federal agency or the designated non-Federal representative is required to notify the Director in writing as to the species and critical habitat that are being included in the assessment. As recommended by three commenters, the Service will respond to this notification in writing within 30 days as to whether it concurs with the species and critical habitat to be covered in the biological assessment.

One commenter suggested that an applicant should have an opportunity to informally request a species list to assist it during the planning stage of a project. Then, if the applicant begins preparation of a biological assessment within 90 days of receipt of this "informal" list, the commenter thought that the Service should not amend the list at a later time. The commenter appears to be advocating an opportunity for early consultation, which is provided for under § 402.11 of this final rule.

Nevertheless, the request that a species list not be modified once issued might backfire on the applicant, because § 402.14 requires consultation on all listed species and critical habitat that may be affected by a Federal action. Even if a species is inadvertently omitted from the species list and biological assessment, the Act nevertheless requires that it must be considered in satisfying the requirements of section 7(a)(2). Thus, the sooner the Service notifies the applicant of additional species to be included in a required biological assessment, the sooner the consultation will be completed.

In addition to listed or proposed species or designated or proposed critical habitat, the Service will include candidate species in the species list. Candidate species are those species being considered for listing but not yet the subject of a proposed rule. This will inform the Federal agency and any applicant of potential proposals for listing. Candidate species have no legal status and are accorded no legal protection under the Act, and thus the Federal agency need not include them in a biological assessment. However, should a candidate species become proposed or listed prior to completion of the action, a conference or formal consultation may be required.

Several commenters asked that species lists be "site-specific" and not regional in scope. One of these commenters urged the Service to include only species actually known or believed to occur in the action area. The Service agrees that the species list should be tailored to the action area and that field personnel should take care that the list is not overinclusive. However, the Act requires the Service to provide a list of all listed or proposed species that "may be present" in the action area. Thus, migratory species that "may be present" at some point within the action area must be included in the species list.

Another commenter said that the Service should include only species in the list that it believes may be affected by the action. This approach is not consistent with section 7(c), which requires a disclosure of all species that "may be present" in the action area. The comment would also eliminate the Federal agency's right to make an initial evaluation of possible effects to each species.

One commenter's conclusion that a determination of no adverse effect after receipt of the species list, but before preparation of the assessment, eliminates the need to prepare the assessment and concludes consultation is erroneous. The biological assessment is used to determine whether an activity "is likely to adversely affect" listed species or critical habitat. Consultation does not conclude unless the Service concurs in writing with the finding of the biological assessment indicating that the action is not likely to adversely affect listed species or critical habitat.

The Service has clarified paragraph (d)(1) to accommodate the concern of the House Committee that biological assessments not be required on major construction activities affecting proposed species or proposed critical habitat only. However, if a species list includes both listed and proposed species, each must be considered in the biological assessment as required by section 7(c) of the Act.

Concerned that the Federal agency should receive all information during the assessment process, one commenter asked that the species list be delivered to both the Federal agency and its designated non-Federal representative due to the agency's responsibility to supervise the preparation of the assessment. The Service declines to include this requirement in the rule, but will forward a copy to the Federal agency, if requested. It is the Federal agency's responsibility to decide whether it wants to designate a non-Federal representative, and if one is designated, the species list will be sent to the representative as requested by the Federal agency.

Several commenters suggested that the Service's ability to recommend "necessary" studies or surveys would contravene the "best available scientific and commercial data" standard of section 7(a)(2). The Service agrees that the proposed language may have implied that additional studies or surveys were required or necessary to complete the assessment. Therefore, the sentence is changed to state that the Service may recommend studies or surveys that it believes would assist in the preparation of the assessment. A new sentence is also added to clarify that such a recommendation is not to be construed as the Service's opinion that the Federal agency has failed to satisfy the information standard of section 7(a)(2) of the Act. This change preserves the Service's prerogative to request further studies if deemed appropriate, while recognizing the ultimate responsibility of the Federal agency to secure the best available data. Two commenters suggested that the request for studies be limited to studies necessary to locate and assemble already existing data. The Service declines to so limit the scope of studies it may request.

Paragraph (e) of § 402.12 is carried over from § 402.12(b)(3) of the proposal.

It requires a party preparing a biological assessment to verify its species list with the Service if, after 90 days from the receipt of or concurrence with the species list, it has yet to commence the preparation of the assessment. A written verification, as suggested by one commenter, is not required since that would be tantamount to issuing a second species list, contrary to the informal nature of this verification step. The Federal agency may, on its own, document the verification received under this paragraph in its administrative record. As requested by one commenter, the Service has distinguished the initiation of the biological assessment time period (time of receipt of or concurrence with a species list) from the point at which actual preparation of the assessment is begun.

Based on comments received, a new paragraph (f) entitled "contents" has been added. Some commenters argued that Federal agencies should be required to include certain minimum research methods or activities in the preparation of a biological assessment. One commenter suggested that preparers of biological assessments should:

(a) conduct a scientifically sound on-site inspection of the area affected by the action, which must, unless otherwise directed by the Service, include a detailed survey of the area to determine if listed or proposed species are present or occur seasonally and whether suitable habitat exists within the area for either expanding the existing population or potential reintroduction of populations;

(b) interview recognized experts on the species at issue, including those within the Fish and Wildlife Service, the National Marine Fisheries Service, State conservation agencies, universities and others who may have data not yet found in scientific literature;

(c) review literature and other scientific data including recovery plans if available to determine the species' distribution, habitat needs, and other biological requirements;

(d) review and analyze the effects of the action on the species, in terms of individuals and populations, including consideration of the indirect and cumulative effects of the action on the species and habitat;

(e) analyze alternate actions that may provide conservation measures; and

(f) conduct any studies necessary to fulfill the requirements of (a) through (e) above.

The Service agrees that assessments should be as complete and thorough as possible, but declines to impose strict minimum standards that all biological assessments must satisfy. The above-listed activities, which may be performed in preparing an assessment, are endorsed by the Service as items that a model assessment would include. However, the nature of the Federal action may not warrant carrying out all of these research activities or studies, and some of the steps may not be technologically feasible in certain cases. Therefore, the new paragraph (f) only contains suggestions of what a Federal agency may include in a biological assessment.

One commenter asked the Service to explain the difference between the degree of information needed in a biological assessment and the degree of information needed to initiate formal consultation when the action does not require the preparation of an assessment. In both cases the overall information standard is the same: "best scientific and commercial data available." The difference arises in the process. If a biological assessment is prepared, it must include not only the data but also a synthesis of the data involving an analysis of the effects of the action. Basically, the assessment serves as an analytical instrument and can be used by the Federal agency "to build its case" as to whether a particular action is likely to adversely affect a listed species or its critical habitat. If the Service concurs with a determination of "not likely to adversely affect," then formal consultation is not required. If an assessment is not required, the Federal agency need only submit data to the Service to initiate formal consultation pursuant to § 402.14(c).

Paragraph (g) of §402.12, which deals with the authority to incorporate earlier biological assessments by reference as the assessment for a current proposal, is adopted from the last two sentences of proposed §402.12(b)(1). In those instances where a proposed Federal action is identical, or very similar, to a previous action for which a biological assessment was prepared, the Federal agency may not need to prepare a new biological assessment.

One commenter requested that language be added to clarify that a previous biological assessment being incorporated by reference could have been part of a prior EIS or area-wide assessment. The Service declines to make the change noting that the form of the previous biological assessment (whether in an EIS or other document) has no bearing on whether it meets the conditions for incorporation by reference.

In response to comments, the conditions that must be met for incorporation by reference are clarified. The biological assessment requirement may be fulfilled by incorporating by reference the earlier biological assessment and supporting data into a written certification that: (1) the proposed action involves similar impacts to the same species in the same geographic area; (2) no new species have been listed or proposed or critical habitat designated or proposed for the action area; and (3) the biological assessment has been supplemented with any relevant changes in information.

Condition (1) has been expanded to allow incorporation by reference if the proposed action involves similar impacts (rather than no new impacts). The term "or administrative unit" has been deleted as it is substantially the same as "geographic area." The Service adds "for the action area" at the end of condition (2) to clarify the scope of the certification. Finally, condition (3) is changed to allow Federal agencies to incorporate a former biological assessment by reference while supplementing it with any relevant changes in information. This change clarifies the intent behind this paragraph.

Paragraph (h) of §402.12, which cross-references permit requirements under the Act that may apply to the preparation of a biological assessment, is adopted as proposed in §402.12(b)(4)(i). The Service believes that the references in the rule are adequate to alert Federal agencies and/or designated non-Federal representatives of the need to consider applicable permit requirements, rather than include the appropriate section 10 permit requirements in these regulations, as suggested by one commenter. Certain field work might involve the take (*i.e.*, harassment, harm, etc.) of listed species which, absent a permit, would violate sections 9 or 4(d) of the Act. To avoid possible violations, the Federal agency or non-Federal representative should apply for and obtain a section 10 permit for such field work. Those individuals carrying out field studies or other research without a permit during the section 7 consultation process are subject to the prohibitions of the Act and other applicable wildlife laws. The Service emphasizes that permits should be obtained if takings of any listed species are anticipated.

Paragraph (i) of §402.12 specifies the time period for completing a biological assessment and sets out the requirements for any needed extension. This paragraph is taken substantially from §402.12(b)(6) of the proposed rule.

Two commenters asked that the rule require written notices of all extensions, regardless of whether an applicant is involved. A written notice from the Federal agency to the applicant is required if an extension is agreed upon between the Service and the Federal agency, and such written notice must be provided by the Federal agency prior to

the expiration of the 180-day time period. However, the Service declines to require a written notice if an applicant is not involved in the consultation, because responsibility for the preparation and completion of the biological assessment rests with the Federal agency. The Service will defer to the needs and judgment of the Federal agency which can document the extension in its administrative record.

Another commenter asked that the Service explain that the 180-day time period begins on the date of receipt of the species list (or the date of receipt of the Director's concurrence with the Federal agency species list). This change has been made since it clarifies when the time period begins and is consistent with the intent of this paragraph.

As noted above, if an applicant is involved, the 180-day period may not be extended unless the agency provides the applicant, before the close of the 180-day period, with a written statement setting forth the estimated length of the proposed extension and the reasons why an extension is necessary. The applicant has no remedy to expedite the preparation of the biological assessment under section 7(c) of the Act. Thus, the 180-day time period is subject to an indefinite extension at the Federal agency's prerogative. The Service lacks statutory authority to impose an appeal process to review extensions, as requested by two commenters.

Paragraph (j) of §402.12, which requires the submission of completed biological assessments to the Director for review, is adopted from proposed §402.12(b)(4)(iii). In response to two comments, the Director will make a written response within 30 days after receiving the complete assessment as to whether or not the Service concurs with the findings in the assessment. This change provides Federal agencies with a written record acknowledging the Service's receipt of the biological assessment and indicating the results of the Service's review.

A new sentence is added to this paragraph to clarify that the Federal agency may initiate formal consultation concurrently with the submission of the assessment to the Director.

In response to one comment, the Service declines to substitute "Service" for "Director" in this paragraph. It is important that the Director or his authorized representative directly receive the biological assessment for review so that a timely review can be facilitated.

Paragraph (k) of §402.12, governing the use of a completed biological assessment, is derived from §402.12(b)(7) of the proposed rule. Once the biological assessment has been completed, the Federal agency must consider whether formal consultation should be initiated or if a conference is necessary. Three commenters noted that a written notice of concurrence should be issued by the Director if the Service agrees with the Federal agency's finding that its action is not likely to adversely affect listed species or critical habitat (*i.e.*, the Service concurs in writing that formal consultation is not needed). This comment has been accommodated by appropriate changes to paragraphs (j) and (k).

The proposed §402.12(b)(5), "Assistance from other sources," has not been included in the biological assessment section of the final rules. The substance of this paragraph has been included in the final §402.08 dealing with designated non-Federal representatives. The first two sentences have been deleted since a Federal agency may obtain assistance from any source to aid in the preparation of a biological assessment (or other aspect of consultation), and it does not need to be authorized in these regulations. One commenter suggested that the Service be included as a source of information; however, assistance from the Service is already included in appropriate sections of the regulations.

Section 402.13 Informal Consultation.

Informal consultation is an optional procedure that includes all contacts between the Service and the Federal agency or the designated non-Federal representative prior to formal consultation, if required. It is designed primarily to except from the formal consultation process those proposed actions which, upon further informal review, are found not likely to adversely affect a listed species or critical habitat. If the Service concurs with such a determination, formal consultation is not required. The final rule is adopted largely by combining proposed §§ 402.12(a), 402.15(c), and 402.15(i)(1), into one composite statement of the purpose and scope of informal consultation.

Several commenters disagreed on the scope of informal consultation. One commenter felt that informal consultation should include all dialogue between the Service, the Federal agency, and any designated non-Federal representative in determining whether formal consultation is required. Another commenter recommended that informal consultation be available if listed species are found in the action area. The Service believes that informal consultation encompasses all of these communications between the Service, the Federal agency, and the designated non-Federal representative, as well as others. The Service is available for informal consultation at any time; the decision on whether to seek informal consultation is that of the Federal agency. The Service agrees that, if requested as a part of informal consultation, it should participate in NEPA scoping meetings.

The Service declines to specify uniform levels of contact that must be followed in conducting informal consultations. Existing relationships between the Service's field or regional offices and particular Federal agencies mandate maximum flexibility. The present system is working well and efficiently addresses the needs of other Federal agencies, and it is therefore retained.

Because informal consultation is an optional process that is under the control of the Federal agency as to its initiation and duration, the Service declines to require notices of initiation and/or termination. Such a step would merely place paperwork burdens on the Federal agency in an otherwise voluntary process.

As noted in §402.12, biological assessments are required for major construction activities. To clarify a procedural point, the Service notes that the biological assessment process may be conducted simultaneously with informal consultation if desired by the Federal agency, or the Federal agency may choose to undertake the biological assessment without any informal consultation. Whether or not a biological assessment is required, the Federal agency may choose to enter into informal consultation.

In response to many comments, the Service has made numerous adjustments throughout these regulations to eliminate references to informal consultation as a prerequisite to formal consultation. The Service agrees that such a process would not be workable, both as a result of limited consultation resources and the need to respect Federal agency program discretion. As previously noted, the proposed rule required formal consultation if the action "may adversely affect" listed species or critical habitat. "Beneficial" actions were excused from formal consultation if the Service concurred during the mandatory informal consultation. Since informal consultation has been made strictly an optional process in this final rule, the Service retains, from the 1978 rule, the "may affect" trigger for formal consultation in §402.14 of the final rule.

Under this final rule, if a Federal agency determines that its action "may affect" listed species or critical habitat, then formal consultation is required unless an exception applies. One exception is that a Federal agency may, through informal consultation, utilize the expertise of the Service to evaluate the agency's assessment of potential effects or to suggest modifications to the action to avoid potential adverse effects. If, as a result of informal consultation, the Federal agency determines, and the Service concurs, that the action (or modified action) is "not likely to adversely affect" listed species or critical habitat, then formal consultation is not required. The consultation process would terminate with the written concurrence of the Service. Therefore, through this informal consultation process, those activities which are found to have beneficial, discountable, or insignificant effects upon listed species or their critical habitats could be deemed to be in compliance with section 7(a)(2) without formal consultation. If a "not likely to adversely affect" determination cannot be made during informal consultation, then formal consultation is required for those Federal actions that "may affect" listed species or their critical habitat.

In short, the final rule retains the general requirement for formal consultation if the Federal agency determines that its action "may affect" listed species or critical habitat. The Federal agency may, however, through voluntary informal consultation with the Service, forego formal consultation and promptly implement actions that the agency and the Service agree are not likely to adversely affect listed species or critical habitat. The Service finds that this reformulation of the consultation process is not significantly different from the current practice, except that, as a result of informal consultation, biological opinions will no longer be required for actions that "are not likely to adversely affect" listed species or critical habitat.

The Service could not accommodate all concerns expressed on this issue. Two commenters contended that the "may adversely affect" standard for initiating formal consultation yielded too much discretion to action agencies. They stated that such a threshold would shift the benefit of the doubt from one in favor of the listed species to one in favor of the Federal agency's action. Noting the Service's expertise on wildlife issues, the commenter urged the Service to reverse this shift. As noted above, the Service did not intend to reverse the burden of proof with the focus on "adverse effects." The goal is to reduce procedural barriers for actions which the Service believes are not likely to have an adverse effect, while retaining full protection for listed species or critical habitat. The changes noted above address these commenters' concern. However, other commenters who suggested a shift in the burden of proof cannot be accommodated. The commenters that urged a "would adversely affect" standard for triggering formal consultation, a standard that might be interpreted as requiring a showing of effects that destroy or adversely modify critical habitat or are likely to jeopardize the continued existence of listed species, are requesting a trigger for formal consultation that the Service believes is too close to the "jeopardy" standard of section 7(a)(2). The threshold for formal consultation must be set sufficiently low to allow Federal agencies to satisfy their duty to "insure" under section 7(a)(2). Therefore, the burden is on the Federal agency to show the absence of likely, adverse effects to listed species or critical habitat as a result of its proposed action in order to be excepted from the formal consultation obligation.

The Service believes that informal consultation is extremely important and may resolve potential conflicts (adverse effects) and eliminate the need for formal consultation. Through informal consultation, the Service can work with the Federal agency and any applicant and suggest modifications to the action to reduce or eliminate adverse effects. If a Federal agency modifies its action so that the action is not likely to adversely affect listed species or critical habitat, then formal consultation is not required.

Section 402.14 Formal Consultation.

These regulations require Federal agencies to review their actions to determine whether they "may affect" listed species or critical habitat. Formal consultation procedures must be initiated if such a situation exists, unless, with the written concurrence of the Service, the Federal agency determines through informal consultation and/or through the biological assessment process that its action is not likely to adversely affect listed species or critical habitat. As noted above in regard to § 402.13, the final rule adopts the "may affect" standard of the 1978 rule, with a special provision allowing actions "not likely to adversely affect" to by-pass the formal consultation process as a result of informal consultation with the Service.

Paragraph (a) of § 402.14 sets out the requirements for formal consultation. This paragraph is a composite of paragraphs (a) and (k) of proposed § 402.15. Paragraph (b), which sets out the exceptions to the initiation requirement of (a), was taken primarily from proposed §§ 402.12(b)(7) and 402.15 (b) and (c).

The Service declines to substitute "may" for "shall" in describing the Federal agency's responsibilities in paragraph (a), as requested by one commenter. Federal agencies have an obligation under section 7(a)(2) of the Act to determine whether their actions may affect listed species and whether formal consultation is required under these regulations. However, the Service does not intend to mandate the timing of this review, which is solely at the discretion of the Federal agency. Early review of its actions is to the advantage of the Federal agency so that compliance with section 7 can be attained without undue delays to its action.

Paragraph (a) also includes a provision for the Director to request a Federal agency to enter into consultation. Two commenters asked that the final rule empower the Director to require a Federal agency to consult. Although the Service will, when appropriate, request consultation on particular Federal actions, it lacks the authority to require the initiation of consultation. The determination of possible effects is the Federal agency's responsibility. The Federal agency has the ultimate duty to ensure that its actions are not likely to jeopardize listed species or adversely modify critical habitat. The Federal agency makes the final decision on whether consultation is required, and it likewise bears the risk of an erroneous decision.

The last sentence of proposed § 402.15(a), dealing with Service assistance to Federal agencies, has been deleted as it is more appropriately addressed in the preamble. The Federal agency may obtain information and advice from the Service, but this is a supplement to, and not a substitute for, formal consultation. The Service believes that there should be a continuous dialogue between the Service and the Federal agency involving the exchange of information and assistance as part of the formal consultation.

Unless a Federal agency chooses to avail itself of the exceptions in paragraph (b), it must initiate formal consultation if its proposed action "may affect" listed species or critical habitat. Any possible effect, whether beneficial, benign, adverse, or of an undetermined character, triggers the formal consultation requirement, as suggested

by one commenter. However, although informal consultation is not required, a Federal agency may use that process and/or the biological assessment process to remove an action that "is not likely to adversely affect" listed species or critical habitat from the formal consultation requirement.

Proposed paragraph (c), a "no adverse effect" exception, was attacked as weakening the Act. One commenter remarked that this procedure unrealistically allows Federal agencies to determine the presence of a "detrimental effect," through informal consultation, when the precise objective of formal consultation is to reach that same goal. The Service does not agree, because formal consultation is conducted to determine if an action is likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat. Adverse effects may exist without constituting jeopardy. However, the Service has changed the trigger for formal consultation to "may affect" with certain exceptions contained in paragraph (b).

The exceptions in paragraph (b) are derived from the "will not adversely affect" exception in proposed §402.15(c) and from the confirmation of the preliminary biological opinion in proposed §402.15(b). The first exception is modified to "not likely to adversely affect" to make the biological assessment provisions compatible with the formal consultation provisions. Under section 7(c) of the Act, a biological assessment is completed to facilitate compliance with the consultation provisions of section 7(a)(2) by identifying whether any species or critical habitat is "likely to be affected." If the Federal agency determines, with Service concurrence, that its action is not likely to adversely affect any listed species or critical habitat, there is no need for formal consultation.

Imposing the time delays and information responsibilities of formal consultation on such actions would not provide any additional protection to listed species or critical habitat and may discourage interagency cooperation. Regulatory flexibility is appropriate here to eliminate undue burdens. By requiring the Service's "written concurrence" with a "not likely to adversely affect" finding as a prerequisite to invoking the exception to formal consultation, the Service believes it has retained adequate review authority through informal consultation. If the information made available during informal consultation is not sufficient to make this determination, formal consultation is required. The case of *Romero-Barcelo* v. *Brown*, 643 F.2d 835 (1st Cir. 1981), *rev'd on other grounds sub nom. Weinberger* v. *Romero-Barcelo*, 456 U.S. 305 (1982), does not preclude this change. That decision interpreted the 1978 rule but did not set a minimum threshold for initiation of formal consultation under the Act. Paragraphs (a) and (b), as adopted, are totally within the statutory authority of the Service.

The other exception to the general formal consultation requirement is the confirmation of a preliminary biological opinion as the final biological opinion. If early consultation takes place, the Service will issue a preliminary biological opinion. When the prospective applicant applies for a Federal permit or license, the Federal agency may request that the Service confirm the preliminary biological opinion as the final biological opinion that would have been issued after formal consultation. If the Service reviews the proposed action and finds no significant changes in the action as planned and no significant changes in the information used during early consultation, such a confirmation will be issued. Consultation is required if the preliminary biological opinion is not confirmed.

Paragraph (c) of §402.14 specifies the required contents of a request for formal consultation. This paragraph is adopted substantially from proposed §§402.12(b)(7) and 402.15(d).

According to one commenter, the information requirements of paragraph (c), which apply to all actions involved in formal consultation, lack statutory authority. The Service cites the obligation to use the "best scientific and commercial data available" and the overall responsibility to consult in good faith under section 7(a)(2) as ample authority for the information requirements. Proposed item (vi), requiring a list of Federal agencies that have jurisdiction in the action area and how they may be affected, is too broad since much of this information would be unrelated to the consultation. Other Federal actions that are interrelated or interdependent would be discussed along with the effects of the action. Therefore, this item is not included in the final rule. The remaining items are essential in determining the parameters of the action, the extent, duration, and severity of its impacts, and the effects of other actions in the action area. The Service retains these essential information requirements, although it has noted under subparagraph (5) that only "relevant" reports, including environmental impact statements, etc., need be supplied, because consultations will in most cases be completed prior to the production of final NEPA documentation for the subject action.

The concluding sentences of paragraph (c) permit Federal agencies, subject to the Director's approval, to tailor their requests for consultation to a particular segment of a comprehensive plan, so long as the effects of the action as a whole are considered. To clarify this passage, as requested by one commenter, the Service uses the example of the management, pursuant to a comprehensive plan, of a National Wildlife Refuge that is inhabited by a listed species. Section 7 consultation may be undertaken on a segment of that management program, such as big-game hunting, and a biological opinion will be issued on that phase of the program only. However, in formulating its biological opinion, the Service must consider the effects, including indirect effects, of the action as a whole, and cumulative effects of unrelated management programs in reaching the conclusion of "jeopardy" or "no jeopardy." The concluding passage of paragraph (c) illustrates the flexibility inherent in the formal consultation process and the care with which the protections of section 7 are preserved.

Paragraph (d) of §402.14 repeats the required information standard of section 7(a)(2): "best scientific and commercial data available." This paragraph is adopted essentially without change from proposed §402.15(d)(2), except that, pursuant to public comment, the Service changed "biological information" to "scientific and commercial data" to bring the language of the regulation in line with the Act. One commenter suggested that the phrase "or which can be developed during the consultation process" be removed from this paragraph. The Service has modified the wording to state that the information referred to in this paragraph is information that can be obtained during the consultation. We believe that information could become available at any time during the consultation, and such information should be submitted to the Service for its consideration. The legislative history of the 1979 Amendments supports this provision. H.R. Conf. Rep. No. 697, 96th Cong., 1st Sess. 12 (1979). The Service is satisfied that this paragraph adequately mandates the use of the best available scientific and commercial data, requires Federal agencies to supply this data at any time during formal consultation, and recognizes that this information requirement is a Federal agency

BEST COPY AVAILABLE

responsibility—not an obligation of the Service.

Paragraph (d) of § 402.14 also adopts a portion of § 402.15(d)(3) of the proposed rule that requires the Federal agency to provide any applicant with the opportunity to participate in formal consultations, including submitting information for consideration during the consultation. The remainder of proposed § 402.15(d)(3) was deleted because it duplicated other parts of the final rule.

Paragraph (e) of § 402.14 establishes the time period for conducting formal consultations and explains the process for extending the consultation period. The paragraph is adopted substantially as proposed in § 402.15(e), with certain technical, clarifying amendments.

The Amendments changed the timing requirement on the conclusion of formal consultation from the 60 days originally established by the 1978 rule to a maximum of 90 days or to such time periods as discussed below. If an applicant is involved, the Service and the Federal agency may mutually agree to extend consultation for up to 60 additional days without the consent of the applicant, provided that the Service submits to the applicant, before the close of the initial 90-day period a written statement setting forth (1) the reasons why a longer period is required, (2) the information that is required to complete the consultation, and (3) the estimated date on which the consultation will be completed. A consultation involving an applicant cannot be extended for more than 60 days without the consent of the applicant. The biological opinion must be delivered to the Federal agency and any applicant promptly after the conclusion of formal consultation (within 45 days).

One commenter suggested that a provision be added that would require the Service to issue a notice concluding formal consultation with a finding that it has sufficient information to prepare a biological opinion. The Service declines to adopt this comment. At the end of the 90-day period (unless extended), the parties to the consultation realize that the Service has but 45 days to deliver its biological opinion to the Federal agency and any applicant. A mandatory notice of "sufficient information" might be, in some cases, misleading by creating the impression that additional information or studies may not be advisable. The Service must develop its biological opinion based upon the best scientific and commercial data available regardless of the "sufficiency" of that data. Therefore, the suggested change does not accurately reflect the legal framework within which the Service must operate.

The Service has defined the statutory directive to issue biological opinions "promptly after" the conclusion of formal consultation as requiring the delivery of a biological opinion to the Federal agency and any applicant within 45 days. Several commenters agreed with this stipulated deadline as long as the applicant retains some control over extensions. Other commenters felt that the 45-day period was excessive, and they argued that the opinion drafting period should either be worked out with mutually-agreeable extensions or the opinion should be issued by the end of the consultation period. The Service retains the 45-day drafting period as consistent with the statutory requirement and as a necessary time period to further refine biological opinions after the conclusion of formal consultation.

One sentence has been added to paragraph (e) to acknowledge the ability of the Service and the Federal agency, where no applicant is involved, to extend consultation for a mutually-agreeable time period. This clarification satisfies the request of one commenter.

Paragraph (f) of § 402.14, which governs Service requests for additional information, is adopted from § 402.15(j)(1) of the proposed rule. The Service declines to rename this paragraph "extension of consultation" because that topic is generally covered in paragraph (e).

In some cases, the Service may determine that additional information would enhance the formulation of its biological opinion. To cover this situation, the final rule adopts the procedures discussed by Congress in the legislative history of the 1979 Amendments. S. Conf. Rep. No. 607, 96th Cong., 1st Sess. 12 (1979). When additional data is believed to be advantageous, the Service will request an extension of formal consultation. When the Service requests such an extension, it will identify the types of additional data sought for assisting consultation. The Service will, to the extent practicable, and within existing budgetary and personnel restrictions, provide assistance in planning studies, furnishing relevant data, and providing recommendations that may be necessary to obtain the additional data. The responsibility for conducting and funding any studies, however, belongs to the Federal agencies or the applicant and not to the Service.

The comments received on this paragraph covered a wide spectrum of opinion as to the breadth of the Service's authority to request additional data. Some commenters questioned the statutory authority of the Service under this provision, and they erroneously interpreted the Service's ability to *request* additional data as the authority to *require* an extension of formal consultation to obtain such data. Their position was that additional data was not a valid reason for seeking an extension of formal consultation and that additional data should only be sought when obtaining it would not delay the consultation and when the Service is willing to fund the studies. Another commenter went further, suggesting that the request for additional data be treated as an extraordinary measure that should be invoked "reluctantly and only on rare occasions." The commenter said that the Service should affirmatively state that existing data is presumed to be adequate and that the Service bears the burden of demonstrating inadequacy before seeking additional data.

On the other end of the spectrum, several commenters faulted the Service for not requiring an extension so that additional data could be obtained under this paragraph. Citing the Federal agency's statutory duty to use the "best scientific and commercial data available" and the decision in *Roosevelt Campobello International Park Commission* v. *EPA*, 684 F.2d 1041 (1st Cir. 1982) ("*Pittston* case"), these commenters noted that Federal agencies are required by section 7(a)(2) to do "all that [is] practicable" to develop information for the consultation. *Pittston* case, *supra*. According to the commenters, the proposed rule gave too much discretion to Federal agencies in controlling the information used in the consultation process.

The Service adopts the proposed rule because it recognizes the need for an opportunity to request additional data while deferring to the Congressional intent that consultation have a definite end point. Additional data may be requested by the Service, but the Service is not relieved of its duty to issue a biological opinion unless appropriate time extensions are obtained under paragraph (e).

However, Federal agencies and applicants are cautioned that they bear the burden under section 7(a)(2) to show that they have obtained the best available scientific and commercial data. This is not the Service's burden or obligation, but the Service does have the responsibility to alert the Federal agency and any applicant of areas where additional data would provide a better information base from which to

formulate a biological opinion. This advice from the Service is intended to help the Federal agency to better satisfy its duty to *insure* that its action is not likely to jeopardize listed species or adversely modify critical habitat.

A Service request for additional data will not be used as a vehicle for burdening applicants with unnecessary studies and inordinate delays, as feared by one commenter. As in the *Pittston* case, these requests will be limited to readily obtainable data that would assist the Service in formulating its biological opinion. In paragraph (f), as in *Pittston*, a distinction must be made between requests for special research projects and requests for routine, customary data collection activities. Moreover, paragraph (f) does not take the final decision regarding the acquisition of additional data away from the Federal agency. The agency still has the discretion to reject the Service's request for additional data provided it is not arbitrary or capricious in doing so. The paragraph has been clarified to state that the Federal agency, when collecting additional data, shall do so to the extent practicable and within the timeframe of the agreed upon extension.

The Service, in requesting additional data, will not comment as to the overall adequacy of the Federal agency's data. It is the agency's burden to obtain credible data. The Service's request for additional data, just as the Federal agency's inability to complete any agreed upon collection of data, should not be interpreted as evidence that the Federal agency has failed to meet the information standard of section 7(a)(2); it would merely represent the Service's belief that the additional data would improve the consultation data base so that it could issue the best biological opinion possible. The Service, therefore, has added language to the final rule to clarify this provision.

As discussed above, if an extension is not agreed to in accordance with paragraph (e), the Service shall issue a biological opinion based on the best scientific and commercial data made available during the consultation. The Conference Report to the 1979 Amendments states that in this situation, the Federal agency has a continuing responsibility to make a reasonable effort to develop additional data. H.R. Conf. Rep. No. 697, 96th Cong., 2d Sess. 12 (1979). By initiating informal consultation with the Service at an early stage of the development of a proposed action, the Federal agency would, in most cases, minimize the need to request an extension of formal consultation because of a lack of data.

In formulating its biological opinion, the Service must provide the "benefit of the doubt" to the species concerned, H.R. Conf. Rep. No. 697, *supra*, at 12. In addition, a biological opinion must be developed within the consultation timeframe based upon the best scientific and commercial data available. Though requested by several commenters, the Service is not authorized to condition its "no jeopardy" opinions with "safeguards" or to issue "may jeopardize" opinions in retaliation for an agency refusal to extend consultation or to develop additional data.

The Service was requested to publish availability notices for biological opinions to facilitate public participation in the conservation of listed species. For the reasons noted previously in response to a general comment, the Service declines to impose such a requirement on itself as an amendment to paragraph (f).

Paragraph (g) of §402.14, which sets out the Service's responsibilities during formal consultation, is adopted from proposed §402.15(f) with only minor changes to clarify the Service's responsibilities. The public comments concerning paragraph (g) focused on the fifth item: the responsibility to discuss the availability of reasonable and prudent alternatives. The Service is committed to working closely with Federal agencies and any applicants in the development of reasonable and prudent alternatives. However, the Service is unable to agree that a draft reasonable and prudent alternative should be excluded from the biological opinion if the Federal agency disagrees as to its reasonableness, as suggested by one commenter. The Service will, in most cases, defer to the Federal agency's expertise and judgment as to the feasibility of an alternative. Nevertheless, in those instances where the Service disagrees with a Federal agency's assessment of the reasonableness of its alternatives, the Service must reserve the right to include those alternatives in the biological opinion if it determines that they are "reasonable and prudent" according to the standards set out in the definition in §402.02; the Service cannot abdicate its ultimate duty to formulate these alternatives by giving Federal agencies control over the content of a biological opinion.

Paragraph (g) provides for Federal agency and applicant review of the basis for any finding contained in draft biological opinions, including the availability of reasonable and prudent alternatives. Four commenters requested that the final rule clarify whether an applicant was entitled to receive a copy of the draft biological opinion. The Service believes that the applicant should participate in the review and should receive a copy of the draft opinion from the Federal agency. The final rule includes this provision.

The release of draft opinions to Federal agencies and any applicants (through the Federal agency) facilitates a more meaningful exchange of information. Review of draft opinions may result in the development and submission of additional data, and the preparation of more thorough biological opinions. Two commenters opposed the release of draft biological opinions. Although they were supportive of open communication and mediation between the Service and the Federal agency during the consultation time period, the commenters opposed Federal agency review of draft opinions because agencies could bring pressure on the Service to modify a particular reasonable and prudent alternative or to convert the opinion's conclusion from "jeopardy" to "no jeopardy." If there were any discussions needed regarding the reasonable and prudent alternatives, noted the commenters, this could be done in "further discussion" after the issuance of the biological opinion. The Service disagrees that Federal agency review of draft biological opinions will result in "rewritten" biological opinions, unless valid biological reasons mandate a change. Federal agency review of draft opinions helps ensure the technical accuracy of the opinion, and may save time and resources by resolving these issues early. The Service believes that the availability of draft biological opinions is a meaningful process and has retained it in the final rule. As noted previously in the "Definitions" section, "further discussion" has been deleted from this rule. Thus, through the discussions between the Service and the Federal agency and any applicant during formal consultation and the provision to review draft biological opinions, the exchange of information for the development of reasonable and prudent alternatives is sufficient.

The proposed rule stated that the 45-day deadline for delivery of the final biological opinion would be suspended while the Federal agency retained the draft opinion. Several commenters complained that such a suspension would violate the statutory deadlines for concluding formal consultation and that the applicant would be powerless to force an end to the consultation. Although the proposed rule provided

that, "[i]f the draft biological opinion is not returned to the Service within a reasonable period of time, the Service will issue a final biological opinion," the Service agrees that the meaning of "a reasonable period of time" requires clarification. Therefore, to accommodate these comments, the Service now requires the Federal agency to secure the applicant's written consent to an extension for a specified time period if the 45-day deadline is to be suspended while the draft opinion is under review. If no extension is agreed to, the biological opinion will be issued within 45 days of the conclusion of formal consultation.

Another commenter suggested that the Service be required to deliver its biological opinion within the Federal agency's NEPA timeframe so that the biological opinion can be included without delaying the release of the agency's NEPA document. The Service will attempt to coordinate all environmental reviews with the consultation. However, special timing problems under other Federal statutes, or failure to enter into the consultation process early in the planning stage of an action, is not a justification for altering the required timeframe established under the Act. If a particular Federal agency needs special procedures to handle its consultation responsibilities, the Service urges the development of counterpart regulations under § 402.04.

Paragraph (g) has also been modified to reflect that the Service, in formulating its biological opinion, any reasonable and prudent alternatives, and any reasonable and prudent measures, will use the best scientific and commercial data available and will give appropriate consideration to any beneficial actions taken by the Federal agency or applicant including any actions taken prior to the initiation of consultation.

Paragraph (h) of § 402.14, which deals with the contents of a biological opinion, is adopted with minor, technical corrections from proposed § 402.15 (g)-(h). The final rule distinguishes that information or material which will be included in a biological opinion from that which will be provided with a biological opinion.

The biological opinion will include: (1) a summary of the information on which the opinion is based; (2) a detailed discussion of the effects of the action on listed species or critical habitat; and (3) the Service's opinion as to whether the action is likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of critical habitat. The biological opinion will conclude that either: (1) the action is not likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat (a "no jeopardy" biological opinion), or (2) the action is likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat (a "jeopardy" biological opinion).

If a "jeopardy" biological opinion is issued, the Service must identify and include reasonable and prudent alternatives, if any, that will avoid jeopardy and that the Federal agency or applicant can implement. If the Service is unable to develop reasonable and prudent alternatives, it will indicate that, to the best of its knowledge, there are no such alternatives that would satisfy the standard of section 7(a)(2).

Paragraph (i) of § 402.14, which governs incidental taking under section 7(b)(4) of the Act, is adopted essentially as proposed in § 402.19. This paragraph is included in the formal consultation section of the final rule because of the direct relationship between final biological opinions and incidental take statements.

The 1982 Amendments changed section 7(b) to include provisions concerning incidental taking of species. The new provisions included in sections 7(b)(4) and 7(o)(2) of the Act are designed to resolve the situation where a Federal agency or an applicant has been advised, through a biological opinion, that the proposed action or the adoption of the reasonable and prudent alternative(s), will not violate section 7(a)(2) of the Act, but the proposed action (or adopted alternative) will result in taking individuals of a listed species incidental to the action. The new provision states that, if the action complies with specified terms and conditions, the resulting incidental take will not be a violation of any "taking" prohibitions established by section 4(d) or 9(a)(1) of the Act.

As noted in the public comments, the availability of an "incidental" taking exemption through the section 7 consultation process is a welcome clarification made by the 1982 Amendments. However, many commenters requested additional guidance on this subject, and several felt that the proposed rule was cumbersome and burdensome. The Service believes that the following discussion will clarify the incidental take provision and explain the incentives for compliance with sections 7(a)(2) and 7(b)(4) of the Act.

If an agency action receives a "no jeopardy" biological opinion, or if the Federal agency adopts any reasonable and prudent alternative provided in a "jeopardy" biological opinion, then the action may proceed in compliance with section 7. An incidental take statement will be provided with the biological opinion when the activity may incidentally take individuals of a listed species but not so many as to jeopardize their continued existence. If the action proceeds in compliance with the terms and conditions of the incidental take statement, then any resulting incidental takings are exempt from the prohibitions of section 4(d) or 9 of the Act. No permit is required of the Federal agency or any applicant in carrying out the action, as one commenter contended. The biological opinion, plus the incidental take statement, operate as an exemption under section 7(o)(2) of the Act. However, this exemption is limited to actions taken by the Federal agency or applicant that comply with the terms and conditions specified in the incidental take statement. Compliance with these terms and conditions is mandatory to qualify for the exemption from section 4(d) or 9 of the Act. "Actions that are not in compliance with the specified measures . . . remain subject to the prohibition against takings that is contained in section 9." S. Rep. No. 418, 97th Cong., 2d Sess. 21 (1982). Therefore, the Service cannot make these terms discretionary, as urged by one commenter.

Paragraph (i)(1) states that, where incidental takings may occur, the Service will provide with the biological opinion to the Federal agency and applicant a written statement that: (i) specifies the impact, *i.e.*, amount or extent, of such anticipated incidental take of the species that does not violate section 7(a)(2), (ii) specifies those reasonable and prudent measures necessary or appropriate to minimize such impact, (iii) sets forth the terms and conditions, including, but not limited to, reporting requirements, that must be complied with by the Federal agency or any applicant in order to implement the reasonable and prudent measures specified under (ii) above, and (iv) specifies the procedures to be used to handle or dispose of any individuals of a species actually taken. Several comments were received on these elements of the incidental take statement.

Because, in some cases, exact numerical limits on the amount of permissible incidental taking will be difficult to determine, the Service may, in accordance with (i)(1)(i), specify the extent of anticipated take that will not violate section 7(a)(2) of the Act. The impact of a particular action may only

be predictable in terms of the extent of land or marine area that may be affected. Precise numbers of individuals that may be taken are preferable to descriptions of the extent of disruption and will be provided when they can be computed. However, the Service reserves the flexibility in the rule so that the most appropriate standard for an individual consultation can be used. The Service declines to endorse the use of numerical amounts in all cases over the use of descriptions of extent, because for some species loss of habitat resulting in death or injury to individuals may be more deleterious than the direct loss of a certain number of individuals. Likewise, the Service declines to incorporate into the final rule the comment that would focus take levels on population numbers and recovery plan guidelines, if available. One commenter suggested that two figures or levels be specified: "the expected and the acceptable amount or extent" of take. This approach offers the benefit of giving a "caution" signal to Federal agencies or applicants as they approach a possible problem with the incidental takings resulting from the action. Steps could be taken to correct the course of the action before the threshold of reinitiation (level of maximum anticipated take) is exceeded. The Service recognizes the merit of this approach but does not require that it be followed under the final rule because it may not be appropriate for all Federal actions.

Paragraph (i)(1)(ii) states that the incidental take statement shall specify those reasonable and prudent measures necessary to minimize the level of incidental take. For the reasons discussed under the definition of reasonable and prudent measures, the Service has added a new paragraph (i)(2) to the final rule to clarify that reasonable and prudent measures may only involve minor changes that do not alter the basic design, location, duration, or timing of the action. Should the Service believe that the way to minimize the incidental takings is through research, an explanation of how such research will accomplish this will be included. Any research-related reasonable and prudent measure shall be subject to the limitations in paragraph (i)(2).

Paragraph (i)(1)(iii) provides that reporting requirements must be included in the terms and conditions of an incidental take statement. As explained in paragraph (i)(3), these reporting requirements will be tailored to the nature of the particular Federal action and will, to the extent possible, be limited to existing reporting requirements.

Under 50 CFR 13.45 (FWS) and 222.23(d) (NMFS), there are provisions concerning reporting requirements for any taking of threatened or endangered species. These reporting requirements are not limited to annual reports, and may vary in accordance with the particular needs of the species as set forth in the incidental take statement. Congress did not prohibit the imposition of new reporting requirements, contrary to the assertion of one commenter.

Another commenter said that the disposal procedures in item (i)(1)(iv) should refer to "specimens" taken, not to species taken. The Service has accommodated the commenter's concern by inserting "individuals of a species" in item (iv).

Paragraph (i)(4) requires the Federal agency or the applicant to immediately request reinitiation of formal consultation if the specified amount or extent of incidental take is exceeded. One commenter argued that the Service is allowing the "jeopardy" ceiling to be exceeded in (i)(4). The Service disagrees; however, the Service agrees that the amount or extent of take should not be set at the threshold of likely jeopardy. If the establishment of such a high taking level were necessary to cover all impacts of a proposed action, it is questionable whether the issuance of a "no jeopardy" opinion is appropriate. It is not expected that the level of incidental take anticipated for most "no jeopardy" actions would come close to the section 7(a)(2) barrier.

Congress recognized this in the House Report to the 1982 Amendments:

> If the specified impact on the species is exceeded, the Committee expects that the Federal agency or permittee or licensee will immediately reinitiate consultation since the level of taking exceeds the impact specified in the initial section 7(b)(4) statement. In the interim period between the initiation and completion of the new consultation, the Committee would not expect the Federal agency or permittee or licensee to cease all operations unless it was clear that the impact of the additional taking would cause an irreversible and adverse impact on the species.

H.R. Rep. No. 567, 97th Cong., 2d Sess. 27 (1982). Exceeding the level of anticipated taking does not, by itself, require the stopping of an ongoing action during reinitiation of consultation. The Federal agency must make this ultimate decision, taking into consideration the prohibitions of sections 7(a)(2) and 7(d). Further, the Service will enforce the taking prohibitions of section 4(d) or 9 if the continuation of an action, after the anticipated level of incidental take has been reached, results in additional takings of listed species.

This provision for incidental take in no way affects a Federal agency's responsibility under section 7(a)(2) to ensure that its action is not likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of critical habitat. The Service agrees with one commenter that the basis for the conclusion that incidental take will not violate section 7(a)(2) should be included with the biological opinion.

Paragraph (j) specifies that the Service may provide any conservation recommendations with the biological opinion. Several commenters objected to the inclusion of conservation recommendations in the biological opinion, and questioned whether these recommendations were to have binding force. The comment submitted by the House Committee summarized these concerns:

> While the proposed regulations conform to the statute regarding the recommending of "reasonable and prudent alternatives" only where jeopardy is found, they also inject a totally new concept referred to as "conservation recommendations." Although we do not argue with the appropriateness of wildlife agencies recommending measures that could be taken to lessen a project's impact on endangered or threatened species, it should be made clear in the regulations that failure to abide by these recommendations does not result in a violation of section 7(a)(2) of the Act. In addition, while the language of section 7(a)(1) does direct all Federal agencies to "utilize their authorities in furtherance of the purposes of [the Act] by carrying out programs for the conservation of endangered species and threatened species", we do not believe that it was intended that section 7(a)(1) require developmental agency actions to be treated as conservation programs for endangered or threatened species. We also do not believe that all of the conservation recommendations of the Secretary have to be followed for this requirement to be met. Such an interpretation would render the much debated provisions of section 7(a)(2) redundant and essentially meaningless and bring about endless litigation.
>
> Accordingly, we suggest that any conservation recommendations be transmitted to action agencies separate from biological opinions and that the regulations state plainly that failure to accept or implement the recommendations does not constitute a violation of section 7 of the Act.

The Service agrees with the Committee's comments and has amended the proposed rule accordingly. Discretionary conservation recommendations will be provided with the biological opinion as a separate statement rather than as an integral part

of the opinion. In this rule, conservation recommendations [402.14(j)] are discussed separately from biological opinions [402.14(h)]. A sentence has been added at the conclusion of paragraph (j) to emphasize the advisory, non-binding nature of conservation recommendations.

Paragraph (k) of § 402.14, which deals with incremental steps, is adopted with minor, technical changes from proposed § 402.15(j)(2). Paragraph (k) applies, at the option of the Federal agency, in situations where a statute authorizes the Federal action to be taken in incremental steps. Such circumstances existed in *North Slope Borough* v. *Andrus*, 642 F.2d 589 (D.C. Cir. 1980), involving development of oil and gas resources on the OCS and possible impacts to the bowhead whale. In view of this decision, these regulations provide that a Federal agency may proceed with incremental steps toward completion of the entire action if: (1) the biological opinion does not conclude that the incremental step would violate section 7(a)(2); (2) the Federal agency continues consultation with respect to the entire action and obtains biological opinions, as required, for each incremental step; (3) the Federal agency fulfills its continuing obligation to obtain sufficient data upon which to base the final biological opinion on the entire action; (4) the incremental step does not violate section 7(d) of the Act concerning irreversible or irretrievable commitment of resources; and (5) there is a reasonable likelihood that the entire action will not violate section 7(a)(2) of the Act.

In response to one comment, the Service acknowledges that the incremental step process can only be invoked at the option of the Federal agency, regardless of the Service's preference. If the Federal agency chooses not to use the incremental step process, the Service must render its biological opinion for the entire action.

Several commenters thought that this provision should be deleted. Some thought the subject should be handled through counterpart regulations or limited strictly to Outer Continental Shelf Lands Act cases. Another commenter stated that the incremental step approach is ill-advised because it is difficult to halt a project at its final stage after substantial resources have been invested. Finally, two commenters criticized the approach as a vehicle granting the Service veto power at any stage of the Federal action.

Paragraph (k) is retained in the final rule for several reasons. First, the Service adopts paragraph (k) because it provides a viable consultation approach sanctioned by the court in *North Slope Borough* v. *Andrus, supra*. The Service has clarified the final rule to show that it will not deprive a Federal agency of the opportunity to consult on incremental steps if requested. Second, the risk of section 7(a)(2) and 7(d) noncompliance should not be diminished because the incremental step approach is used. Monetary investments or other actions that do not foreclose the adoption of reasonable and prudent alternatives do not violate section 7(d). If a "jeopardy" opinion is issued at any step of the overall action, a prompt remedy can be sought through the exemption procedure. Third, consulting in incremental steps can be a valuable tool for developing information as an action progresses.

Oil and gas development on the OCS is a multistaged, long term action that provides a good example of the utility of an incremental step consultation. The Federal action occurs in discrete stages: the lease sale, exploration activities, and development/production activities. Any analysis of the impacts of development/production would be mere speculation without knowing what tracts will be leased and without the information on the extent of the petroleum reserves discovered during the exploration phase. As the scope and location of the ultimate action is further refined, the Federal agency will have the opportunity to conduct studies designed to determine the effects of that particular action in that particular area.

The Service is sympathetic to the commenter's concern that applicants might face an arduous series of consultations under paragraph (k), whereas a prompt consultation on the entire action would avoid a series of reviews by the Service. The Service reminds applicants that they may, in appropriate instances, avail themselves of the early consultation procedure to obtain a preapplication review of the remaining steps of the Federal action.

Under paragraph (k), biological opinions concluding "no jeopardy," or Service concurrence letters finding that a step "is not likely to adversely affect," must eventually cover each step of the incremental process. This does not mean that separate opinions must be issued for each step—several steps may be covered in one opinion (*e.g.*, OCS leasing and exploration activities)—but instead that each step must eventually satisfy section 7(a)(2) of the Act. A "jeopardy" opinion issued at any stage not only applies to that step but to the entire project as well. Once a "jeopardy" opinion is issued (unless the Federal agency adopts a reasonable and prudent alternative provided by the Service), paragraph (k) is inapplicable and the ordinary consultation process applies, allowing access to the exemption process. The commenter that contended that this approach is tantamount to a usurpation of Federal agency statutory authority ignores the fact that this process is at the option of the Federal agency and that the net effect of the Service's action is to cause the consultation to revert to a treatment of the action as a whole. The Federal agency may disagree with the Service's "jeopardy" finding, but it cannot continue to consult on an incremental basis on remaining steps in the action.

One commenter insisted that an action can be halted only if new information that was not previously known becomes available during a later stage of the incremental step consultation. However, the Service's responsibility to determine "jeopardy" or "no jeopardy" places no weight on when, where, or how data that is of compelling force in its analysis were developed. The Service cannot ignore data and permit a listed species to become jeopardized because someone "missed" a piece of information during an earlier step of the consultation. One of the criteria for reinitiation of formal consultation is whether new information reveals effects of the action that may affect a listed species or critical habitat in a manner or to an extent not previously considered. Therefore, incremental step consultations are not the only consultations subjected to this requirement.

Finally, one commenter objected to the requirement for obtaining sufficient data, noting an alleged absence of statutory authority. Again, paragraph (k) is not a creature of statute, but instead was developed so that consultations could be initiated and focused on a step-by-step review of segmented Federal actions—especially those where, in the absence of additional information, the final determination of "likely jeopardy" for the entire action would be highly speculative if consultation were not limited to the initial step or steps. The development of sufficient information is crucial to the ultimate success of the incremental step process, and, therefore, cannot be eliminated from the rule. The Federal agency must have sufficient information to show that its action is not likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat.

Section 402.14(l) covers the termination of formal consultation. Adopted from proposed § 402.15(l)(2)–(4), paragraph (l) was retained in the section

on formal consultation because §402.14 is the primary mandatory procedure of Part 402.

The proposed rule provided that consultation terminated with the issuance of a "no jeopardy" opinion unless further discussion took place, and, if a "jeopardy" opinion was issued, consultation terminated with the Service's receipt of the Federal agency's decision on the action. This notice requirement was criticized by several commenters as unnecessary and as extending consultation beyond the legal timeframe. As discussed under the "Definitions" section above, further discussion has been deleted as a formal step in the consultation process. Further, to accommodate the concerns, consultation terminates with the issuance of the biological opinion, whether "jeopardy" or "no jeopardy." However, the Service believes that the Federal agency notice of final action with respect to "jeopardy" opinions represents a minimal burden and has retained it under §402.15—"Responsibilities of Federal agency following issuance of a biological opinion." The Service agrees that a copy of the NEPA record of decision would meet the notice provisions of §402.15(b); the Service disagrees that this approach causes problems with NEPA compliance.

Finally, one commenter suggested that written notice be required to terminate consultation if a Federal agency or applicant decides to cancel plans for the action that is the subject of the consultation. The Service agrees that a written notice of termination is preferred, and has adopted the commenter's suggestion in paragraph (l)(2).

Section 402.15 Responsibilities of Federal Agency Following Issuance of a Biological Opinion.

Following the receipt of the Service's biological opinion, the Federal agency will make its final decision on the action. Section 402.15 describes the steps that the Federal agency should take after consultation is concluded. Paragraphs (a) and (c) of this section are adopted substantially without change from proposed §402.17. Paragraph (b) is adopted from proposed §402.15(i)(3) (last sentence).

Several commenters asked that the Federal agency be required to provide a statement of its reasons if it has chosen to disregard the Service's biological opinion. The Service declines to implement this request, because it remains the responsibility of each Federal agency to insure that it is in compliance with section 7(a)(2) and that it has established an administrative record for a given activity which demonstrates such compliance.

Federal courts have accorded Service biological opinions great deference. It, therefore, is incumbent upon a Federal agency to articulate in its administrative record its reasons for disagreeing with the conclusions of a biological opinion. But this is a matter which is primarily controlled under the provisions and judicial interpretations of the Administrative Procedure Act, not these regulations. Thus, the requested modification would add nothing that is not already required as a matter of administrative law.

Paragraph (c) points out the availability of an exemption process if the Federal agency determines that its proposed action cannot comply with section 7(a)(2). Although not covered in §402.15, the applicant may also pursue an exemption if it receives a final denial of its application as a result of a "jeopardy" biological opinion. The Service disagrees with one commenter that the applicant may seek an exemption if the Federal agency issues the permit or license with conditions related to section 7 considerations. The Act requires a final agency denial, and the issuance of a "jeopardy" biological opinion on the action, as predicates for an applicant's entry into the exemption process. See sections 3(12) and 7(g)(1) of the Act.

Section 402.16 Reinitiation of Formal Consultation.

Reinitiation of formal consultation is required in certain instances as specified in §402.16. The reinitiation requirement applies only to actions that remain subject to some Federal involvement or control. In the case where a permit or license had been granted, reinitiation would not be appropriate unless the permitting or licensing agency retained jurisdiction over the matter under the terms of the permit or license or as otherwise authorized by law.

In response to one comment, the Service notes its lack of authority to require Federal agencies to reinitiate consultation if they choose not to do so. Nevertheless, the Service shall request reinitiation when it believes that any condition described in this section applies.

Pursuant to several public comments, several minor changes have been made to §402.16 (proposed §402.18). Proposed paragraph (a), dealing with nonconfirmation of preliminary biological opinions, was deleted since it is more properly covered in the discussion of early consultation. The standard for reinitiation on incidental take statements is clarified in new paragraph (a). Paragraph (c) is clarified to show that changes to the action that do not cause effects different from or additional to those considered in the biological opinion will not require reinitiation of formal consultation.

Summary

The Amendments made significant changes in the consultation requirements of section 7, and the Service believes that a consistent response by the Federal agencies to those Amendments, as implemented by this final rule, will facilitate successful compliance with section 7 of the Act. The Service believes that these regulations will serve as an effective tool for the early resolution of potential conflicts involving listed species.

The primary authors of this final rule are Michael Young and Nancy Sweeney, Department of the Interior; Patricia Carter, Patricia Montanio, and Michael Gosliner, Department of Commerce.

The Department of the Interior, as lead agency in the development of these regulations, has prepared an environmental assessment in conjunction with this rulemaking. On the basis of the environmental assessment, it has been determined that this is not a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969 (implemented at 40 CFR Parts 1500–1508). Therefore, an environmental impact statement need not be prepared. These procedural regulations simply provide a uniform approach for consultation required by section 7 of the Act. Compliance with the procedures in these regulations will not have any significant, direct, or indirect adverse environmental impact. It also has been determined that these regulations do not constitute major rules as defined in Executive Order 12291. The Department of the Interior has certified, under the terms of the Regulatory Flexibility Act (5 U.S.C. 601), that these regulations will not have a significant economic impact on a substantial number of small entities. The regulations are directed at Federal actions. The costs to small entities are those involved with timing and data gathering, if requested by the Federal agency. Even if the costs were passed on, the analysis under the Regulatory Flexibility Act has concluded that they are not substantial. The Department has determined that these rules do not contain "collection of information" or recordkeeping

requirements as defined by the Paperwork Reduction Act. The analyses under Executive Order 12291; the Regulatory Flexibility Act, and NEPA are available to the public at the Office of Endangered Species, U.S. Fish and Wildlife Service, at the address listed above.

List of Subjects in 50 CFR Part 402

Endangered and threatened wildlife, Fish, Intergovernmental relations, Plants (agriculture).

Regulation Promulgation

Accordingly, the Service revises 50 CFR Part 402 to read as follows:

PART 402—INTERAGENCY COOPERATION—ENDANGERED SPECIES ACT OF 1973, AS AMENDED

Subpart A—General

Sec.

402.01 Scope.
402.02 Definitions.
402.03 Applicability.
402.04 Counterpart regulations.
402.05 Emergencies.
402.06 Coordination with other environmental reviews.
402.07 Designation of lead agency.
402.08 Designation of non-Federal representative.
402.09 Irreversible or irretrievable commitment of resources.

Subpart B—Consultation Procedures

402.10 Conference on proposed species or proposed critical habitat.
402.11 Early consultation.
402.12 Biological assessment.
402.13 Informal consultation.
402.14 Formal consultation.
402.15 Responsibilities of Federal agency following issuance of a biological opinion.
402.16 Reinitiation of formal consultation.

Authority: 16 U.S.C. 1531 *et seq.*

Subpart A—General

§ 402.01 Scope.

(a) This Part interprets and implements sections 7(a)–(d) [16 U.S.C. 1536(a)–(d)] of the Endangered Species Act of 1973, as amended ("Act"). Section 7(a) grants authority to and imposes requirements upon Federal agencies regarding endangered or threatened species of fish, wildlife, or plants ("listed species") and habitat of such species that has been designated as critical ("critical habitat"). Section 7(a)(1) of the Act directs Federal agencies, in consultation with and with the assistance of the Secretary of the Interior or of Commerce, as appropriate, to utilize their authorities to further the purposes of the Act by carrying out conservation programs for listed species. Such affirmative conservation programs must comply with applicable permit requirements (50 CFR Parts 17, 220, 222, and 227) for listed species and should be coordinated with the appropriate Secretary. Section 7(a)(2) of the Act requires every Federal agency, in consultation with and with the assistance of the Secretary, to insure that any action it authorizes, funds, or carries out, in the United States or upon the high seas, is not likely to jeopardize the continued existence of any listed species or results in the destruction or adverse modification of critical habitat. Section 7(a)(3) of the Act authorizes a prospective permit or license applicant to request the issuing Federal agency to enter into early consultation with the Service on a proposed action to determine whether such action is likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat. Section 7(a)(4) of the Act requires Federal agencies to confer with the Secretary on any action that is likely to jeopardize the continued existence of proposed species or result in the destruction or adverse modification of proposed critical habitat. Section 7(b) of the Act requires the Secretary, after the conclusion of early or formal consultation, to issue a written statement setting forth the Secretary's opinion detailing how the agency action affects listed species or critical habitat. Biological assessments are required under section 7(c) of the Act if listed species or critical habitat may be present in the area affected by any major construction activity as defined in § 404.02. Section 7(d) of the Act prohibits Federal agencies and applicants from making any irreversible or irretrievable commitment of resources which has the effect of foreclosing the formulation or implementation of reasonable and prudent alternatives which would avoid jeopardizing the continued existence of listed species or resulting in the destruction or adverse modification of critical habitat. Section 7(e)–(o)(1) of the Act provide procedures for granting exemptions from the requirements of section 7(a)(2). Regulations governing the submission of exemption applications are found at 50 CFR Part 451, and regulations governing the exemption process are found at 50 CFR Parts 450, 452, and 453.

(b) The U.S. Fish and Wildlife Service (FWS) and the National Marine Fisheries Service (NMFS) share responsibilities for administering the Act. The Lists of Endangered and Threatened Wildlife and Plants are found in 50 CFR 17.11 and 17.12 and the designated critical habitats are found in 50 CFR 17.95 and 17.96 and 50 CFR Part 226. Endangered or threatened species under the jurisdiction of the NMFS are located in 50 CFR 222.23(a) and 227.4. If the subject species is cited in 50 CFR 222.23(a) or 227.4, the Federal agency shall contact the NMFS. For all other listed species the Federal Agency shall contact the FWS.

§ 402.02 Definitions.

"Act" means the Endangered Species Act of 1973, as amended, 16 U.S.C. 1531 *et seq.*

"Action" means all activities or programs of any kind authorized, funded, or carried out, in whole or in part, by Federal agencies in the United States or upon the high seas. Examples include, but are not limited to: (a) actions intended to conserve listed species or their habitat; (b) the promulgation of regulations; (c) the granting of licenses, contracts, leases, easements, rights-of-way, permits, or grants-in-aid; or (d) actions directly or indirectly causing modifications to the land, water, or air.

"Action area" means all areas to be affected directly or indirectly by the Federal action and not merely the immediate area involved in the action.

"Applicant" refers to any person, as defined in section 3(13) of the Act, who requires formal approval or authorization from a Federal agency as a prerequisite to conducting the action.

"Biological assessment" refers to the information prepared by or under the direction of the Federal agency concerning listed and proposed species and designated and proposed critical habitat that may be present in the action area and the evaluation potential effects of the action on such species and habitat.

"Biological opinion" is the document that states the opinion of the Service as to whether or not the Federal action is likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat.

"Conference" is a process which involves informal discussions between a Federal agency and the Service under section 7(a)(4) of the Act regarding the impact of an action on proposed species or proposed critical habitat and recommendations to minimize or avoid the adverse effects.

"Conservation recommendations" are suggestions of the Service regarding discretionary measures to minimize or avoid adverse effects of a proposed action on listed species or critical habitat or regarding the development of information.

"Critical habitat" refers to an area designated as critical habitat listed in 50 CFR Parts 17 or 226.

"Cumulative effects" are those effects of future State or private activities, not involving Federal activities, that are reasonably certain to occur within the action area of the Federal action subject to consultation.

"Designated non-Federal representative" refers to a person designated by the Federal agency as its representative to conduct informal consultation and/or to prepare any biological assessment.

"Destruction or adverse modification" means a direct or indirect alteration that appreciably diminishes the value of critical habitat for both the survival and recovery of a listed species. Such alterations include, but are not limited to, alterations adversely modifying any of those physical or biological features that were the basis for determining the habitat to be critical.

"Director" refers to the Assistant Administrator for Fisheries for the National Oceanic and Atmospheric Administration, or his authorized representative; or the Fish and Wildlife Service regional director, or his authorized representative, for the region where the action would be carried out.

"Early consultation" is a process requested by a Federal agency on behalf of a prospective applicant under section 7(a)(3) of the Act.

"Effects of the action" refers to the direct and indirect effects of an action on the species or critical habitat, together with the effects of other activities that are interrelated or interdependent with that action, that will be added to the environmental baseline. The environmental baseline includes the past and present impacts of all Federal, State, or private actions and other human activities in the action area, the anticipated impacts of all proposed Federal projects in the action area that have already undergone formal or early section 7 consultation, and the impact of State or private actions which are contemporaneous with the consultation in process. Indirect effects are those that are caused by the proposed action and are later in time, but still are reasonably certain to occur. Interrelated actions are those that are part of a larger action and depend on the larger action for their justification. Interdependent actions are those that have no independent utility apart from the action under consideration.

"Formal consultation" is a process between the Service and the Federal agency that commences with the Federal agency's written request for consultation under section 7(a)(2) of the Act and concludes with the Service's issuance of the biological opinion under section 7(b)(3) of the Act.

"Incidental take" refers to takings that result from, but are not the purpose of, carrying out an otherwise lawful activity conducted by the Federal agency or applicant.

"Informal consultation" is an optional process that includes all discussions, correspondence, etc., between the Service and the Federal agency or the designated non-Federal representative prior to formal consultation, if required.

"Jeopardize the continued existence of" means to engage in an action that reasonably would be expected, directly or indirectly, to reduce appreciably the likelihood of both the survival and recovery of a listed species in the wild by reducing the reproduction, numbers, or distribution of that species.

"Listed species" means any species of fish, wildlife, or plant which has been determined to be endangered or threatened under section 4 of the Act. Listed species are found in 50 CFR 17.11–17.12.

"Major construction activity" is a construction project (or other undertaking having similar physical impacts) which is a major Federal action significantly affecting the quality of the human environment as referred to in the National Environmental Policy Act [NEPA, 42 U.S.C. 4332(2)(C)].

"Preliminary biological opinion" refers to an opinion issued as a result of early consultation.

"Proposed critical habitat" means habitat proposed in the Federal Register to be designated or revised as critical habitat under section 4 of the Act for any listed or proposed species.

"Proposed species" means any species of fish, wildlife, or plant that is proposed in the Federal Register to be listed under section 4 of the Act.

"Reasonable and prudent alternatives" refer to alternative actions identified during formal consultation that can be implemented in a manner consistent with the intended purpose of the action, that can be implemented consistent with the scope of the Federal agency's legal authority and jurisdiction, that is economically and technologically feasible, and that the Director believes would avoid the likelihood of jeopardizing the continued existence of listed species or resulting in the destruction or adverse modification of critical habitat.

"Reasonable and prudent measures" refer to those actions the Director believes necessary or appropriate to minimize the impacts, *i.e.*, amount or extent, of incidental take.

"Recovery" means improvement in the status of listed species to the point at which listing is no longer appropriate under the criteria set out in section 4(a)(1) of the Act.

"Service" means the U.S. Fish and Wildlife Service or the National Marine Fisheries Service, as appropriate.

§402.03 Applicability.

Section 7 and the requirements of this Part apply to all actions in which there is discretionary Federal involvement or control.

§402.04 Counterpart regulations.

The consultation procedures set forth in this Part may be superseded for a particular Federal agency by joint counterpart regulations among that agency, the Fish and Wildlife Service, and the National Marine Fisheries Service. Such counterpart regulations shall be published in the Federal Register in proposed form and shall be subject to public comment for at least 60 days before final rules are published.

§402.05 Emergencies.

(a) Where emergency circumstances mandate the need to consult in an expedited manner, consultation may be conducted informally through alternative procedures that the Director determines to be consistent with the requirements of sections 7(a)–(d) of the Act. This provision applies to situations involving acts of God, disasters, casualties, national defense or security emergencies, etc.

(b) Formal consultation shall be initiated as soon as practicable after the emergency is under control. The Federal agency shall submit information on the nature of the emergency action(s), the justification for the expedited consultation, and the impacts to endangered or threatened species and their habitats. The Service will evaluate such information and issue a biological opinion including the information and recommendations given during the emergency consultation.

§402.06 Coordination with other environmental reviews.

(a) Consultation, conference, and biological assessment procedures under section 7 may be consolidated with interagency cooperation procedures required by other statutes, such as the National Environmental Policy Act (NEPA) (42 U.S.C. 4321 *et seq.*, implemented at 40 CFR Parts 1500–1508) or the Fish and Wildlife Coordination Act (FWCA) (16 U.S.C. 661 *et seq.*). Satisfying the requirements of these other statutes, however, does not in itself relieve a Federal agency of its

obligations to comply with the procedures set forth in this Part or the substantive requirements of section 7. The Service will attempt to provide a coordinated review and analysis of all environmental requirements.

(b) Where the consultation or conference has been consolidated with the interagency cooperation procedures required by other statutes such as NEPA or FWCA, the results should be included in the documents required by those statutes.

§ 402.07 Designation of lead agency.

When a particular action involves more than one Federal agency, the consultation and conference responsibilities may be fulfilled through a lead agency. Factors relevant in determining an appropriate lead agency include the time sequence in which the agencies would become involved, the magnitude of their respective involvement, and their relative expertise with respect to the environmental effects of the action. The Director shall be notified of the designation in writing by the lead agency.

§ 402.08 Designation of non-Federal representative.

A Federal agency may designate a non-Federal representative to conduct informal consultation or prepare a biological assessment by giving written notice to the Director of such designation. If a permit or license applicant is involved and is not the designated non-Federal representative, then the applicant and Federal agency must agree on the choice of the designated non-Federal representative. If a biological assessment is prepared by the designated non-Federal representative, the Federal agency shall furnish guidance and supervision and shall independently review and evaluate the scope and contents of the biological assessment. The ultimate responsibility for compliance with section 7 remains with the Federal agency.

§ 402.09 Irreversible or irretrievable commitment of resources.

After initiation or reinitiation of consultation required under section 7(a)(2) of the Act, the Federal agency and any applicant shall make no irreversible or irretrievable commitment of resources with respect to the agency action which has the effect of foreclosing the formulation or implementation of any reasonable and prudent alternatives which would avoid violating section 7(a)(2). This prohibition is in force during the consultation process and continues until the requirements of section 7(a)(2) are satisfied. This provision does not apply to the conference requirement for proposed species or proposed critical habitat under section 7(a)(4) of the Act.

Subpart B—Consultation Procedures

§ 402.10 Conference on proposed species or proposed critical habitat.

(a) Each Federal agency shall confer with the Service on any action which is likely to jeopardize the continued existence of any proposed species or result in the destruction or adverse modification of proposed critical habitat. The conference is designed to assist the Federal agency and any applicant in identifying and resolving potential conflicts at an early stage in the planning process.

(b) The Federal agency shall initiate the conference with the Director. The Service may request a conference if, after a review of available information, it determines that a conference is required for a particular action.

(c) A conference between a Federal agency and the Service shall consist of informal discussions concerning an action that is likely to jeopardize the continued existence of the proposed species or result in the destruction or adverse modification of the proposed critical habitat at issue. Applicants may be involved in these informal discussions to the greatest extent practicable. During the conference, the Service will make advisory recommendations, if any, on ways to minimize or avoid adverse effects. If the proposed species is subsequently listed or the proposed critical habitat is designated prior to completion of the action, the Federal agency must review the action to determine whether formal consultation is required.

(d) If requested by the Federal agency and deemed appropriate by the Service, the conference may be conducted in accordance with the procedures for formal consultation in § 402.14. An opinion issued at the conclusion of the conference may be adopted as the biological opinion when the species is listed or critical habitat is designated, but only if no significant new information is developed (including that developed during the rulemaking process on the proposed listing or critical habitat designation) and no significant changes to the Federal action are made that would alter the content of the opinion. An incidental take statement provided with a conference opinion does not become effective unless the Service adopts the opinion once the listing is final.

(e) The conclusions reached during a conference and any recommendations shall be documented by the Service and provided to the Federal agency and to any applicant. The style and magnitude of this document will vary with the complexity of the conference. If formal consultation also is required for a particular action, then the Service will provide the results of the conference with the biological opinion.

§ 402.11 Early consultation.

(a) *Purpose.* Early consultation is designed to reduce the likelihood of conflicts between listed species or critical habitat and proposed actions and occurs prior to the filing of an application for a Federal permit or license. Although early consultation is conducted between the Service and the Federal agency, the prospective applicant should be involved throughout the consultation process.

(b) *Request by prospective applicant.* If a prospective applicant has reason to believe that the prospective action may affect listed species or critical habitat, it may request the Federal agency to enter into early consultation with the Service. The prospective applicant must certify in writing to the Federal agency that (1) it has a definitive proposal outlining the action and its effects and (2) it intends to implement its proposal, if authorized.

(c) *Initiation of early consultation.* If the Federal agency receives the prospective applicant's certification in paragraph (b) of this section, then the Federal agency shall initiate early consultation with the Service. This request shall be in writing and contain the information outlined in § 402.14(c) and, if the action is a major construction activity, the biological assessment as outlined in § 402.12.

(d) *Procedures and responsibilities.* The procedures and responsibilities for early consultation are the same as outlined in § 402.14(c)–(j) for formal consultation, except that all references to the "applicant" shall be treated as the "prospective applicant" and all references to the "biological opinion" or the "opinion" shall be treated as the "preliminary biological opinion" for the purpose of this section.

(e) *Preliminary biological opinion.* The contents and conclusions of a preliminary biological opinion are the same as for a biological opinion issued after formal consultation except that the incidental take statement provided with a preliminary biological opinion does not constitute authority to take listed species.

(f) *Confirmation of preliminary biological opinion as final biological opinion.* A preliminary biological opinion may be confirmed as a

biological opinion issued after formal consultation if the Service reviews the proposed action and finds that there have been no significant changes in the action as planned or in the information used during the early consultation. A written request for confirmation of the preliminary biological opinion should be submitted after the prospective applicant applies to the Federal agency for a permit or license but prior to the issuance of such permit or license. Within 45 days of receipt of the Federal agency's request, the Service shall either: (1) confirm that the preliminary biological opinion stands as a final biological opinion; or (2) if the findings noted above cannot be made, request that the Federal agency initiate formal consultation.

§ 402.12 Biological assessments.

(a) *Purpose.* A biological assessment shall evaluate the potential effects of the action on listed and proposed species and designated and proposed critical habitat and determine whether any such species or habitat are likely to be adversely affected by the action and is used in determining whether formal consultation or a conference is necessary.

(b) *Preparation requirement.* (1) The procedures of this section are required for Federal actions that are "major construction activities"; provided that a contract for construction was not entered into or actual construction was not begun on or before November 10, 1978. Any person, including those who may wish to apply for an exemption from section 7(a)(2) of the Act, may prepare a biological assessment under the supervision of the Federal agency and in cooperation with the Service consistent with the procedures and requirements of this section. An exemption from the requirements of section 7(a)(2) is not permanent unless a biological assessment has been prepared.

(2) The biological assessment shall be completed before any contract for construction is entered into and before construction is begun.

(c) *Request for information.* The Federal agency or the designated non-Federal representative shall convey to the Director either (1) a written request for a list of any listed or proposed species or designated or proposed critical habitat that may be present in the action area; or (2) a written notification of the species and critical habitat that are being included in the biological assessment.

(d) *Director's response.* Within 30 days of receipt of the notification of, or the request for, a species list, the Director shall either concur with or revise the list or, in those cases where no list has been provided, advise the Federal agency or the designated non-Federal representative in writing whether, based on the best scientific and commercial data available, any listed or proposed species or designated or proposed critical habitat may be present in the action area. In addition to listed and proposed species, the Director will provide a list of candidate species that may be present in the action area. Candidate species refers to any species being considered by the Service for listing as endangered or threatened species but not yet the subject of a proposed rule. Although candidate species have no legal status and are accorded no protection under the Act, their inclusion will alert the Federal agency of potential proposals or listings.

(1) If the Director advises that no listed species or critical habitat may be present, the Federal agency need not prepare a biological assessment and further consultation is not required. If only proposed species or proposed critical habitat may be present in the action area, then the Federal agency must confer with the Service if required under § 402.10, but preparation of a biological assessment is not required unless the proposed listing and/or designation becomes final.

(2) If a listed species or critical habitat may be present in the action area, the Director will provide a species list or concur with the species list provided. The Director also will provide available information (or references thereto) regarding these species and critical habitat, and may recommend discretionary studies or surveys that may provide a better information base for the preparation of an assessment. Any recommendation for studies or surveys is not to be construed as the Service's opinion that the Federal agency has failed to satisfy the information standard of section 7(a)(2) of the Act.

(e) *Verification of current accuracy of species list.* If the Federal agency or the designated non-Federal representative does not begin preparation of the biological assessment within 90 days of receipt of (or concurrence with) the species list, the Federal agency or the designated non-Federal representative must verify (formally or informally) with the Service the current accuracy of the species list at the time the preparation of the assessment is begun.

(f) *Contents.* The contents of a biological assessment are at the discretion of the Federal agency and will depend on the nature of the Federal action. The following may be considered for inclusion:

(1) The results of an on-site inspection of the area affected by the action to determine if listed or proposed species are present or occur seasonally.

(2) The views of recognized experts on the species at issue.

(3) A review of the literature and other information.

(4) An analysis of the effects of the action on the species and habitat, including consideration of cumulative effects, and the results of any related studies.

(5) An analysis of alternate actions considered by the Federal agency for the proposed action.

(g) *Incorporation by reference.* If a proposed action requiring the preparation of a biological assessment is identical, or very similar, to a previous action for which a biological assessment was prepared, the Federal agency may fulfill the biological assessment requirement for the proposed action by incorporating by reference the earlier biological assessment, plus any supporting data from other documents that are pertinent to the consultation, into a written certification that:

(1) The proposed action involves similar impacts to the same species in the same geographic area;

(2) No new species have been listed or proposed or no new critical habitat designated or proposed for the action area; and

(3) The biological assessment has been supplemented with any relevant changes in information.

(h) *Permit requirements.* If conducting a biological assessment will involve the taking of a listed species, a permit under section 10 of the Act (16 U.S.C. 1539) and Part 17 of this Title (with respect to species under the jurisdiction of the FWS) or Parts 220, 222, and 227 of this Title (with respect to species under the jurisdiction of the NMFS) is required.

(i) *Completion time.* The Federal agency or the designated non- Federal representative shall complete the biological assessment within 180 days after its initiation (receipt of or concurrence with the species list) unless a different period of time is agreed to by the Director and the Federal agency. If a permit or license applicant is involved, the 180-day period may not be extended unless the agency provides the applicant, before the close of the 180-day period, with a written statement setting forth the estimated length of the proposed extension and the reasons why such an extension is necessary.

(j) *Submission of biological assessment.* The Federal agency shall

submit the completed biological assessment to the Director for review. The Director will respond in writing within 30 days as to whether or not he concurs with the findings of the biological assessment. At the option of the Federal agency, formal consultation may be initiated under §402.14(c) concurrently with the submission of the assessment.

(k) *Use of the biological assessment.* (1) The Federal agency shall use the biological assessment in determining whether formal consultation or a conference is required under §402.14 or §402.10, respectively. If the biological assessment indicates that there are no listed species or critical habitat present that are likely to be adversely affected by the action and the Director concurs as specified in paragraph (j) of this section, then formal consultation is not required. If the biological assessment indicates that the action is not likely to jeopardize the continued existence of proposed species or result in the destruction or adverse modification of proposed critical habitat, and the Director concurs, then a conference is not required.

(2) The Director may use the results of the biological assessment in (i) determining whether to request the Federal agency to initiate formal consultation or a conference, (ii) formulating a biological opinion, or (iii) formulating a preliminary biological opinion.

§ 402.13 Informal consultation.

(a) Informal consultation is an optional process that includes all discussions, correspondence, etc., between the Service and the Federal agency or the designated non-Federal representative, designed to assist the Federal agency in determining whether formal consultation or a conference is required. If during informal consultation it is determined by the Federal agency, with the written concurrence of the Service, that the action is not likely to adversely affect listed species or critical habitat, the consultation process is terminated, and no further action is necessary.

(b) During informal consultation, the Service may suggest modifications to the action that the Federal agency and any applicant could implement to avoid the likelihood of adverse effects to listed species or critical habitat.

§ 402.14 Formal consultation.

(a) *Requirement for formal consultation.* Each Federal agency shall review its actions at the earliest possible time to determine whether any action may affect listed species or critical habitat. If such a determination is made, formal consultation is required, except as noted in paragraph (b) of this section. The Director may request a Federal agency to enter into consultation if he identifies any action of that agency that may affect listed species or critical habitat and for which there has been no consultation. When such a request is made, the Director shall forward to the Federal agency a written explanation of the basis for the request.

(b) *Exceptions.* (1) A Federal agency need not initiate formal consultation if, as a result of the preparation of a biological assessment under §402.12 or as a result of informal consultation with the Service under §402.13, the Federal agency determines, with the written concurrence of the Director, that the proposed action is not likely to adversely affect any listed species or critical habitat.

(2) A Federal agency need not initiate formal consultation if a preliminary biological opinion, issued after early consultation under §402.11, is confirmed as the final biological opinion.

(c) *Initiation of formal consultation.* A written request to initiate formal consultation shall be submitted to the Director and shall include:

(1) A description of the action to be considered;

(2) A description of the specific area that may be affected by the action;

(3) A description of any listed species or critical habitat that may be affected by the action;

(4) A description of the manner in which the action may affect any listed species or critical habitat and an analysis of any cumulative effects;

(5) Relevant reports, including any environmental impact statement, environmental assessment, or biological assessment prepared; and

(6) Any other relevant available information on the action, the affected listed species, or critical habitat.

Formal consultation shall not be initiated by the Federal agency until any required biological assessment has been completed and submitted to the Director in accordance with §402.12. Any request for formal consultation may encompass, subject to the approval of the Director, a number of similar individual actions within a given geographical area or a segment of a comprehensive plan. This does not relieve the Federal agency of the requirements for considering the effects of the action as a whole.

(d) *Responsibility to provide best scientific and commercial data available.* The Federal agency requesting formal consultation shall provide the Service with the best scientific and commercial data available or which can be obtained during the consultation for an adequate review of the effects that an action may have upon listed species or critical habitat. This information may include the results of studies or surveys conducted by the Federal agency or the designated non-Federal representative. The Federal agency shall provide any applicant with the opportunity to submit information for consideration during the consultation.

(e) *Duration and extension of formal consultation.* Formal consultation concludes within 90 days after its initiation unless extended as provided below. If an applicant is not involved, the Service and the Federal agency may mutually agree to extend the consultation for a specific time period. If an applicant is involved, the Service and the Federal agency may mutually agree to extend the consultation provided that the Service submits to the applicant, before the close of the 90 days, a written statement setting forth:

(1) The reasons why a longer period is required,

(2) The information that is required to complete the consultation, and

(3) The estimated date on which the consultation will be completed.

A consultation involving an applicant cannot be extended for more than 60 days without the consent of the applicant. Within 45 days after concluding formal consultation, the Service shall deliver a biological opinion to the Federal agency and any applicant.

(f) *Additional data.* When the Service determines that additional data would provide a better information base from which to formulate a biological opinion, the Director may request an extension of formal consultation and request that the Federal agency obtain additional data to determine how or to what extent the action may affect listed species or critical habitat. If formal consultation is extended by mutual agreement according to §402.14(e), the Federal agency shall obtain, to the extent practicable, that data which can be developed within the scope of the extension. The responsibility for conducting and funding any studies belongs to the Federal agency and the applicant, not the Service. The Service's request for additional data is not to be construed as the Service's opinion that the Federal agency has failed to satisfy the information standard of section 7(a)(2) of the Act. If no extension of formal consultation is agreed to, the Director will issue a biological opinion

using the best scientific and commercial data available.

(g) *Service responsibilities.* Service responsibilities during formal consultation are as follows:

(1) Review all relevant information provided by the Federal agency or otherwise available. Such review may include an on-site inspection of the action area with representatives of the Federal agency and the applicant.

(2) Evaluate the current status of the listed species or critical habitat.

(3) Evaluate the effects of the action and cumulative effects on the listed species or critical habitat.

(4) Formulate its biological opinion as to whether the action, taken together with cumulative effects, is likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat.

(5) Discuss with the Federal agency and any applicant the Service's review and evaluation conducted under paragraphs (g)(1)–(3) of this section, the basis for any finding in the biological opinion, and the availability of reasonable and prudent alternatives (if a jeopardy opinion is to be issued) that the agency and the applicant can take to avoid violation of section 7(a)(2). The Service will utilize the expertise of the Federal agency and any applicant in identifying these alternatives. If requested, the Service shall make available to the Federal agency the draft biological opinion for the purpose of analyzing the reasonable and prudent alternatives. The 45-day period in which the biological opinion must be delivered will not be suspended unless the Federal agency secures the written consent of the applicant to an extension to a specific date. The applicant may request a copy of the draft opinion from the Federal agency. All comments on the draft biological opinion must be submitted to the Service through the Federal agency, although the applicant may send a copy of its comments directly to the Service. The Service will not issue its biological opinion prior to the 45-day or extended deadline while the draft is under review by the Federal agency. However, if the Federal agency submits comments to the Service regarding the draft biological opinion within 10 days of the deadline for issuing the opinion, the Service is entitled to an automatic 10-day extension on the deadline.

(6) Formulate discretionary conservation recommendations, if any, which will assist the Federal agency in reducing or eliminating the impacts that its proposed action may have on listed species or critical habitat.

(7) Formulate a statement concerning incidental take, if such take may occur.

(8) In formulating its biological opinion, any reasonable and prudent alternatives, and any reasonable and prudent measures, the Service will use the best scientific and commercial data available and will give appropriate consideration to any beneficial actions taken by the Federal agency or applicant, including any actions taken prior to the initiation of consultation.

(h) *Biological opinions.* The biological opinion shall include:

(1) A summary of the information on which the opinion is based;

(2) A detailed discussion of the effects of the action on listed species or critical habitat; and

(3) The Service's opinion on whether the action is likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of critical habitat (a "jeopardy biological opinion"); or, the action is not likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of critical habitat (a "no jeopardy" biological opinion). A "jeopardy" biological opinion shall include reasonable and prudent alternatives, if any. If the Service is unable to develop such alternatives, it will indicate that to the best of its knowledge there are no reasonable and prudent alternatives.

(i) *Incidental take.* (1) In those cases where the Service concludes that an action (or the implementation of any reasonable and prudent alternatives) and the resultant incidental take of listed species will not violate section 7(a)(2), the Service will provide with the biological opinion a statement concerning incidental take that:

(i) Specifies the impact, i.e., the amount or extent, of such incidental taking of the species;

(ii) Specifies those reasonable and prudent measures that the Director considers necessary or appropriate to minimize such impact;

(iii) Sets forth the terms and conditions (including, but not limited to, reporting requirements) that must be complied with by the Federal agency or any applicant to implement the measures specified under (ii) above; and

(iv) Specifies the procedures to be used to handle or dispose of any individuals of a species actually taken.

(2) Reasonable and prudent measures, along with the terms and conditions that implement them, cannot alter the basic design, location, scope, duration, or timing of the action and may involve only minor changes.

(3) In order to monitor the impacts of incidental take, the Federal agency or any applicant must report the progress of the action and its impact on the species to the Service as specified in the incidental take statement. The reporting requirements will be established in accordance with 50 CFR 13.45(FWS) and 222.23(d)(NMFS).

(4) If during the course of the action the amount or extent of incidental taking, as specified under paragraph (i)(1)(i) of this Section, is exceeded, the Federal agency must reinitiate consultation immediately.

(j) *Conservation recommendations.* The Service may provide with the biological opinion a statement containing discretionary conservation recommendations. Conservation recommendations are advisory and are not intended to carry any binding legal force.

(k) *Incremental steps.* When the action is authorized by a statute that allows the agency to take incremental steps toward the completion of the action, the Service shall, if requested by the Federal agency, issue a biological opinion on the incremental step being considered, including its views on the entire action. Upon the issuance of such a biological opinion, the Federal agency may proceed with or authorize the incremental steps of the action if:

(1) The biological opinion does not conclude that the incremental step would violate section 7(a)(2);

(2) The Federal agency continues consultation with respect to the entire action and obtains biological opinions, as required, for each incremental step;

(3) The Federal agency fulfills its continuing obligation to obtain sufficient data upon which to base the final biological opinion on the entire action;

(4) The incremental step does not violate section 7(d) of the Act concerning irreversible or irretrievable commitment of resources; and

(5) There is a reasonable likelihood that the entire action will not violate section 7(a)(2) of the Act.

(l) *Termination of consultation.* (1) Formal consultation is terminated with the issuance of the biological opinion.

(2) If during any stage of consultation a Federal agency determines that its proposed action is not likely to occur, the consultation may be terminated by written notice to the Service.

(3) If during any stage of consultation a Federal agency determines, with the concurrence of the Director, that its proposed action is not likely to adversely affect any listed species or critical habitat, the consultation is terminated.

§402.15 Responsibilities of Federal agency following issuance of a biological opinion.

(a) Following the issuance of a biological opinion, the Federal agency shall determine whether and in what manner to proceed with the action in light of its section 7 obligations and the Service's biological opinion.

(b) If a jeopardy biological opinion is issued, the Federal agency shall notify the Service of its final decision on the action.

(c) If the Federal agency determines that it cannot comply with the requirements of section 7(a)(2) after consultation with the Service, it may apply for an exemption. Procedures for exemption applications by Federal agencies and others are found in 50 CFR Part 451.

§402.16 Reinitiation of formal consultation.

Reinitiation of formal consultation is required and shall be requested by the Federal agency or by the Service, where discretionary Federal involvement or control over the action has been retained or is authorized by law and:

(a) If the amount or extent of taking specified in the incidental take statement is exceeded;

(b) If new information reveals effects of the action that may affect listed species or critical habitat in a manner or to an extent not previously considered;

(c) If the identified action is subsequently modified in a manner that causes an effect to the listed species or critical habitat that was not considered in the biological opinion; or

(d) If a new species is listed or critical habitat designated that may be affected by the identified action.

Dated: December 12, 1985.

William P. Horn,

Assistant Secretary for Fish and Wildlife and Parks.

Dated: January 30, 1986.

William G. Gordon,

Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration.

Part III

Department of the Interior

Minerals Management Service

Outer Continental Shelf Sulphur and Salt Leasing in the Gulf of Mexico; Notice

4310-MR

UNITED STATES
DEPARTMENT OF THE INTERIOR
MINERALS MANAGEMENT SERVICE
Gulf of Mexico
Outer Continental Shelf (OCS) Sulphur and Salt Leasing
Request for Comments

Purpose of Notice

This Notice advises all interested parties of a possible sulphur and salt lease sale in the Gulf of Mexico and requests expressions of interest, information, and any general comments.

If it is decided to proceed with planning for a sale, the next step in the process is a Call for Information and Nominations which will be published in the Federal Register. Final delineation of the area for possible leasing would be made at a later date only after compliance with established departmental procedures, all requirements of the National Environmental Policy Act of 1969 (40 CFR 1501.7), and the Outer Continental Shelf Lands Act (OCSLA), as amended (43 U.S.C. 1331 et seq.).

Summary

The Secretary of the Interior is authorized under the OCSLA, as amended, to issue leases for oil, gas, sulphur, and other minerals on the OCS. The Department now seeks expressions of interest and information from industry, Federal Agencies, State and local governments, and other interested parties concerning a preliminary proposal to hold a sulphur offshore lease sale in the Gulf of Mexico. Comments are also requested on a preliminary proposal to lease salt to be used in the extraction of sulphur.

Sulphur leasing and mining are not new to the Gulf of Mexico Region. Sulphur was mined onshore from salt domes in the late 1800's, and the first underwater sulphur was mined from beneath Lake Peigneur, Louisiana; in 1932. The first Federal offshore sulphur leases were offered offshore Louisiana in 1954. A sulphur lease offering offshore Texas was held in 1965, and one other offering was conducted for offshore Louisiana in 1969. A total of 59 leases were awarded, only 4 of which are currently active. The first offshore sulphur mining operation began production in 1960 at Freeport Sulphur Company's Grand Isle Block 16 Mine in waters offshore Louisiana which are now under State jurisdiction. Freeport's second mine, the Caminada Mine, opened in 1968, but operations were suspended in 1969 because of decreased demand. This mine is located in Federal waters in Blocks 16, 17, 22, and 23, Grand Isle Area. Freeport Sulphur Company submitted a Unit Development Operations Coordination Document and Environmental Report in May 1985 for reactivation of the facility. The final Environmental Assessment (No. U-402) was completed in July 1985, and the plan was approved in August 1985. Work is currently underway to reactivate the Caminada Mine. Note that two salt leases, no longer active, were awarded in sales in 1960 and 1967.

The possibility of a Deep Stratigraphic Test Program is currently under consideration.

Description of Area

The general area covered by this Notice includes the central and western portions of the Gulf of Mexico between approximately 86° W. longitude on the east and approximately 97° W. longitude on the west and extends from the Federal-State boundary seaward to approximately 26° N. latitude. The entire area is offshore Texas, Louisiana, Mississippi, and Alabama and is divided into two general areas--the Central Gulf of Mexico and the Western Gulf of Mexico. However, only one sulphur and/or salt lease sale, which may involve parts of both areas, is being considered at this time.

The following list comprises the Leasing Maps and the OCS Official Protraction Diagrams used in identifying the two areas. (It is recognized that the areas appropriate for a sulphur lease sale will comprise a relatively small portion of the Central and Western Gulf.)

1. Central Gulf of Mexico

Leasing Maps

Outer Continental Shelf Leasing Maps - Louisiana Nos. 1 through 12.
This set of 27 maps sells for $17.00.

Outer Continental Shelf Official Protraction Diagrams

Official Protraction Diagrams and Leasing Maps, referred to above, may be purchased from the Public Information Unit, Gulf of Mexico Region (telephone (504) 838-0519). Address: P.O. Box 7944, Metairie, Louisiana 70010

Instructions to Commenters

Information is requested on the following specific items in relation to sulphur and/or salt leasing. Respondents are advised that the names of commenters become a matter of public record as do comments offered in response to this Notice. It is suggested that responses to the first item below which are considered proprietary by the respondent be clearly identified so that they may be safeguarded accordingly.

Comments are requested on the following specific items:

1. Areas which might be included in a Call for Information and Nominations if it is deemed appropriate to proceed.
2. Technology proposed for exploration and production.
3. Technology proposed for transporting production to shore.
4. Suggested lease conditions.
5. Suggested size of lease.
6. Suggested lease terms.
7. The limits of water depth and mine depth beyond which the Frasch process is technologically infeasible. The extent to which these depth limits are a function of economics. Specify appropriate water depth and mine depth limits as well as limitations as to distance from shore for sulphur leases.
8. The need for a prelease Deep Stratigraphic Test Program and the preferred timing for it to be accomplished, e.g., prior to the identification of the Federal proposal or the Notice of Sale.
9. Conflicts anticipated in the event a tract is leased with sulphur/salt rights and oil and gas rights; i.e., can two lessees coexist on the same tract without operational conflicts?
10. Data and information available concerning the current and projected sulphur market and the importance of potential OCS sulphur resources.

Schedule for Responses

Expressions of interest and other information must be received within 45 days after the publication of this Notice. This information should be submitted to the Regional Supervisor, Leasing and Environment, Gulf of Mexico Region, P.O. Box 7944, Metairie, Louisiana 70010. Envelopes should be marked "Comments on Sulphur/Salt Leasing."

As stated earlier in this Notice, if it is decided to proceed with planning for a sale, the next step in the process is a Call for Information and Nominations which will be published in the Federal Register. Final delineation of the area for possible leasing would be made at a later date only after compliance with established departmental procedures, all requirements of the National Environmental Policy Act of 1969 (40 CFR 1501.7), and the OCSLA, as amended. Subject to a decision to proceed with a sulphur/salt lease sale, a final Notice of Sale will be published in the Federal Register detailing areas to be offered for competitive bidding, stating the terms and conditions for leasing and announcing the location, date, and time bids will be received and opened.

For further information, contact Harold Sieverding, Regional Supervisor, Leasing and Environment, at (504) 838-0755, or Chris Oynes, Chief, Offshore Leasing Management Division, at (202) 343-6906.

Because the adjacent States of Texas, Mississippi, and Louisiana have expressed an interest in leasing of sulphur in their submerged lands the Minerals Management Service has agreed to facilitate their initial information-gathering as to industry interest in such lands. Commenters who are interested in areas for sulphur and/or salt leasing or who wish to comment on the questions listed above for State lands offshore any of the above States are urged to reply directly to those States at the addresses shown below. Note that the protection for data considered proprietary may differ between the Federal Government and the States, and the Federal Government will not afford protection of information provided directly to any State.

Texas Addressee:

Dr. E. G. Wermund
Associate Director
Bureau of Economic Geology
P.O. Box X, University Station
Austin, Texas 78713

Mississippi Addressees:
(Send comments to both)

42 CFR Parts 405 and 412

[BERC-353-P]

Medicare Program; Changes to the Inpatient Hospital Prospective Payment System and Fiscal Year 1987 Rates

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: We are proposing to amend the Medicare regulations governing the inpatient hospital prospective payment system to implement necessary changes arising from legislation and our continuing experience with the system and also from certain recommendations of the Prospective Payment Assessment Commission. Included in these proposed changes is our plan for incorporating capital payments into the prospective payment rates.

In addition, we are proposing changes in the methods, amounts, and factors necessary to determine prospective payment rates for Medicare inpatient hospital services. These changes would be applicable to discharges occurring on or after October 1, 1986. We are also setting forth our proposal for determining the rate-of-increase limits (target amounts) for hospitals excluded from the prospective payment system.

DATE: To be considered, comments must be mailed or delivered to the appropriate address, as provided below, and must be received by 5:00 p.m. on July 3, 1986.

ADDRESS: Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services. Attention: BERC-353-P, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, DC.;

or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to file code BERC-353-P. Comments received timely will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in Room 309-G of the Department's offices at 200 Independence Ave., SW., Washington, DC., on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone: 202-245-7890).

FOR FURTHER INFORMATION CONTACT: Linda Magno, (301) 594-9343.

SUPPLEMENTARY INFORMATION:

I. Background

A. Summary of the Implementation of the Prospective Payment System

Under section 1886(d) of the Social Security Act (the Act), enacted by the Social Security Amendments of 1983 (Pub. L. 98-21) on April 20, 1983, a prospective payment system for Medicare payment of inpatient hospital services was established effective with hospital cost reporting periods beginning on or after October 1, 1983. Under this system, Medicare payment is made at a predetermined, specific rate for each discharge. All discharges are classified according to a list of diagnosis-related groups (DRGs).

We published an interim final rule in the Federal Register (48 FR 39752) on September 1, 1983 to implement the prospective payment system effective with hospital cost reporting periods beginning on or after October 1, 1983. Technical corrections for that rule were issued on October 19, 1983 (48 FR 48467).

In particular, we identified the prospective payment rates to be used for the first year of the transition period. We issued a final rule (49 FR 234) on January 3, 1984 to make changes resulting from our consideration of public comments that were received in response to the interim final rule. Technical corrections for that rule were issued on June 1, 1984 (49 FR 23010).

As a result of our first year of experience with the prospective payment system and to accommodate changes resulting from the enactment of the Deficit Reduction Act of 1984 (Pub. L. 98-369) on July 18, 1984, we published a final rule on August 31, 1984 (49 FR 34728) that further revised the prospective payment regulations. In addition, we made changes in the methods, amounts, and factors necessary to implement the second year of the transition period. Technical corrections on that final rule were issued on October 15, 1984 (49 FR 40167).

On March 29, 1985, we published a final rule (50 FR 12740) that redesignated the prospective payment regulations under a new 42 CFR Part 412. These regulations were previously located in 42 CFR 405.470 through 405.477.

Taking into consideration the recommendations made by the Prospective Payment Assessment Commission (ProPAC) under the authority of section 1886(d)(4)(D) of the Act, we published a final rule on September 3, 1985 (50 FR 35646) to implement the third year of the transition period. Technical corrections on that final rule were issued on October 28, 1985 (50 FR 43570). However, beginning on September 30, 1985, Congress enacted a series of statutory extensions of the hospital payment rates that were in effect on September 30, 1985. The effect was to delay implementation of the September 3, 1985 final rule with the result that the revised payment rates for hospitals covered by the prospective payment system, the rate-of-increase limits for hospitals excluded from that system, and the amendments to the limits on the count of interns and residents in § 412.118 (f)(2) and (f)(3), all of which were originally scheduled to be effective on October 1, 1985, were postponed through April 30, 1986. We notified the public about these extensions (50 FR 40651 and 49930, and 51 FR 4166) and, after the President signed the Consolidated Omnibus Budget Reconciliation Act of 1985 (Pub. L. 99-272) into law on April 7, 1986, we issued an interim final rule with comment period on May 6, 1986 (51 FR 16772), to effectuate new Federal fiscal year (FY) 1986 hospital payment rates effective for discharges occurring on or after May 1, 1986 for prospective payment hospitals and for cost reporting periods beginning on or after October 1, 1985 for hospitals excluded from the prospective payment system.

To implement sections 9101 through 9105, and 9112 of Pub. L. 99-272, we announced the following in the May 6, 1986 interim final rule:

- A one-half of one percent increase in Federal and hospital-specific payment rates and the rate-of-increase limits for inpatient hospital services.
- A one-year extension of prospective payment system transition period except for hospitals located in the State of Oregon.
- Prospective application of the revised hospital wage index.
- Payments to hospitals for indirect costs of medical education.
- Payments for hospitals that serve a disproportionate share of low-income patients.
- Indirect teaching adjustment for certain clinics.

The comment period for the interim final rule ends on June 5, 1986. We plan to address timely comments on both the interim final rule and this proposed rule in the final rule that will follow this proposed rule.

BEST COPY AVAILABLE

B. Major Contents of This Proposed Rule

This proposed rule would be effective for the fourth year of operation of the prospective payment system. Following is a summary of the major changes that we are proposing to make to the system:

1. Incorporation of Capital Payments into the Prospective Payment System

Under section 1886(a)(4) of the Act, capital-related costs are excluded from the definition of "operating costs of inpatient hospital services" for cost reporting periods beginning before October 1, 1986. Because this requirement of the statute to distinguish between capital-related costs and other operating costs expires with cost reporting periods beginning on or after October 1, 1986 and in the absence of further legislation on this matter, we are proposing to incorporate capital-related costs into the prospective payment system effective with cost reporting periods beginning in FY 1987. Our proposed changes and the rationale for them are set forth in section II of this preamble.

2. Rebasing and Reweighting of the Hospital Market Basket

We are proposing to recompute the hospital market basket using data from a more recent base year (that is, "rebasing" the market basket). We are also proposing to recalculate the weights of each of the components of the hospital market basket (that is, "reweighting" the market basket cost categories) to reflect the—

- Inclusion of capital payments into the prospective payment system;
- Expansion in the number of market basket cost categories; and
- Revision of certain price proxies used to monitor the rate of inflation in the market basket.

The proposed changes are discussed in section III of this preamble. The market basket category weights would change not only because of the inclusion of capital but also due to rebasing, which reflects hospital changes in the purchase of goods and services used to furnish care.

3. Other Decisions and Regulations Changes

In section IV of this preamble, we discuss several decisions and current provisions of the regulations in 42 CFR Parts 405 and 412, not discussed elsewhere in this rule, as follows:

- Elimination of periodic interim payments;
- Establishment of a base period for hospitals newly subject to the rate-of-increase ceiling;
- Extension of the exclusion of alcohol/drug hospitals and units;
- Hospitals in redesignated rural counties which are surrounded on all sides by urban counties;
- Changes to referral center criteria;
- Retention of transfer policy; and
- Changes to the DRG classification system.

4. Determining Prospective Payment Rates and Rate-of-Increase Limits

In the addendum to this proposed rule, we set forth proposed changes to the methods, amounts, and factors for determining the FY 1987 prospective payment rates. We are also proposing new target rate percentages for determining the rate-of-increase limits for FY 1987 for hospitals excluded from the prospective payment system.

5. Market Basket Discussion

In Appendix A, we provide a technical discussion of the data sources used to estimate the market basket relative weights and the choice of price proxies.

6. Impact Analysis

In Appendix B, we set forth an analysis of the impact that the proposed changes described in this rule would have on affected entities.

7. Discussion of ProPAC Recommendations

ProPAC is directed by section 1886(d)(4)(D) of the Act to make recommendations to the Secretary with respect to adjustments to the DRG classification and weighting factors and to report to Congress with respect to its evaluation of any adjustments made by the Secretary.

ProPAC is also directed, by the provisions of section 1886(e)(2) and (e)(3) of the Act, to make recommendations to the Secretary on the appropriate percentage change factor to be used in updating the average standardized amounts beginning with Federal FY 1988 and thereafter. These recommendations are due to the Secretary no later than the first day of April before the beginning of each fiscal year. The statute requires that ProPAC, in making its recommendations, take into account changes in the hospital market basket, hospital productivity, technological and scientific advances, the quality of health care provided in hospitals, and long-term cost effectiveness in the provision of inpatient hospital services.

Under section 1886(e)(5) of the Act, we are required to publish the report of the ProPAC recommendations for FY 1987 as a part of this proposed rule. The report may be found in Appendix C of this proposed rule. The recommendations, and the actions we are proposing to take with regard to them (when an action is recommended), are discussed in detail in the appropriate sections of this preamble and in the addendum to this proposed rule. Those recommendations that are not specifically relevant to matters presented below are discussed in section V of this preamble. For the benefit of the reader and in order to provide some perspective on the overall nature of the ProPAC recommendations, we briefly summarize them here and indicate generally where they are discussed.

- *Update Factor:*

—Recommendation 1: Amount of the Update Factor.

For FY 1987 the standardized amounts should be updated by the projected increase in the hospital market basket; minus a combined policy target adjustment factor (referred to by ProPAC as a discretionary adjustment factor) for scientific and technological advancement, productivity, and site substitution; plus an allowance for the estimated increase in real case-mix complexity during FY 1986; and minus adjustments for the correction of market basket forecast errors in FY 1986 and the observed change in the case-mix index in FY 1986. (Addendum, section II.A.)

- *Policy Target Adjustment Factors:*

—Recommendation 2: Allowance for Scientific and Technological Advancement and Productivity Goals, and Site of Care Substitution.

For the FY 1987 prospective payment rates, the combined allowance in the policy target adjustment factor for scientific and technological advancement, productivity improvement, and substitution in the site of service from inpatient to out-of-hospital settings should be set at minus 1.4 percent. (Addendum, section II.A.)

—Recommendation 3: Allowance for Real Case-Mix Change.

Real changes in case mix associated with changes in the characteristics of patients, rather than better coding of medical records, should be reflected in the prospective payments. The adjustment for real case-mix change should reflect both shifts in patients among the DRG categories and changes in the mix of patients within DRG categories. For the FY 1987 prospective

payment rates, the adjustment for real case mix should be set at a plus 0.9 percent. (Addendum, section II.A.)

• *Excluded Hospitals:*

—Recommendation 4: Update Factor for Excluded Hospitals.

In addition to the projected increase in the market basket (corrected for forecast errors), hospitals and hospital distinct part units excluded from the prospective payment system should receive an adjustment of minus 0.8 percent for productivity, and scientific and technological advancement goals. (Addendum, section III.C.)

• *Capital Payments:*

—Recommendation 5: Including Capital in the Prospective Payment System.

Beginning in FY 1987, the Secretary should initiate a transition to all-inclusive prospective prices that combine operating and capital cost components in a single prospective payment per case for hospitals. (Preamble, section II.E.)

—Recommendation 6: Capital Payment Method.

ProPAC recommends that we should make an adjustment to the standardized amounts for capital payments consisting of a Federal portion and a hospital-specific portion. The Federal portion of capital payments should be included as a fixed percentage add-on to the standardized amounts beginning in FY 1987. The Secretary should revise the hospital market basket as soon as possible to include capital components, as appropriate data become available, but no later than FY 1988. (Preamble, section II.E.)

—Recommendation 7: Level of Capital Payment.

For FY 1987, the level of capital payments, to be added to the standardized amounts, should be calculated based on average actual construction costs for FY 1985 projected forward, and average actual equipment costs for FY 1983 projected forward using current capital rules for distinguishing fixed plant and fixtures from moveable equipment. (Preamble, section II.E.)

—Recommendation 8: Capital Payment Transition.

There should be no transition period for the capital-related costs of moveable equipment. For the capital-related costs of fixed plant and fixtures, the transition period should be seven to ten years. The hospital-specific portion of capital payments should be based on the hospital's actual capital cost during each year of the transition. Capital payments for return on equity should be included in the hospital-specific portion of capital payments during the transition period only. (Preamble, section II.E.)

• *Adjustments to the Payment Formula:*

—Recommendation 9: Disproportionate Share Hospital Adjustment.

An adjustment to the prospective payment rates for hospitals serving a disproportionate share of low-income patients should be implemented as soon as possible. The adjustment, which should be similar to the adjustments under congressional consideration, should not change the total aggregate dollar amount paid to all hospitals. (Preamble, section V)

—Recommendation 10: Improving the Definition of Hospital Labor Market Areas.

The Secretary should improve the definition of hospital labor-market areas for FY 1987, if possible, but no later than FY 1988. For urban areas, the improved definitions should account for a greater amount of the wage variation between inner-city and suburban hospitals. For rural areas, the improved definitions should account for a greater amount of the wage variation between different rural areas within each State and between States. The implementation of improved definitions should not result in any change in aggregate hospital payments. (Preamble, section V)

—Recommendation 11: Rural Hospitals.

The Secretary should complete and publish congressionally mandated studies as soon as possible to determine whether changes in payment policies affecting rural hospitals, or other prospective payment modifications, are necessary. (Preamble, section V)

• *Medicare Cost Data:*

—Recommendation 12: Earlier Availability of Medicare Cost Data.

The Secretary should continue making cost data available as soon as possible as part of an ongoing effort, and should consider alternative strategies for sampling hospital cost data. (Preamble, section V)

• *Recalculating the Standardized Amount:*

—Recommendation 13: Recalculating the Standardized Amounts.

The Secretary should recalculate the standardized amounts using cost data that reflect hospital behavior under the prospective payment system to determine the update factor or to rebase the standardized amounts. (Addendum, section II.A.)

• *Recalibrating the DRG Weights:*

—Recommendation 14: Recalibrating the DRG Weights.

The DRG weights should be recalibrated annually in order to reflect the use of new technologies and other practice pattern changes affecting the relative use of hospital resources among DRGs. (Addendum, section II.C.)

• *Beneficiary Concerns:*

—Recommendation 15: Beneficiary and Provider Information.

The Secretary should provide more and better written information about the prospective payment system to beneficiaries and providers of services. (Preamble, section V)

—Recommendation 16: Notice to Beneficiaries of Rights.

Beneficiaries should be made aware of the process of reconsideration and appeal of a hospital denial of further inpatient services. They should be informed not to accept any oral communication to the effect that they must leave the hospital because their "coverage" has "run out" or because there is a limit on the number of days "allowed" by Medicare for a DRG. (Preamble, section V)

—Recommendation 17: PRO Episode of Care Review.

The focus of Peer Review Organization (PRO) quality of care review should be, to the extent possible, on the entire episode of care. The PRO's review should include, in addition to the period of hospitalization, the quality of care (and outcome) related to the overall episode of illness, including, if appropriate, skilled nursing or home health care. (Preamble, section V)

—Recommendation 18: PRO Review of Outpatient Surgery and Procedures.

PROs should be required to monitor outpatient surgery and procedures that used to be performed on an inpatient basis, particularly those which have been denied payment on preadmission review. (Preamble, section V)

—Recommendation 19: Recalculating the Inpatient Hospital Deductible.

The Secretary should seek a legislative change to the formula for computing the inpatient hospital deductible so that the annual increase in the deductible is more consistent with the annual per-case increase in Medicare payments to hospitals. Because the proportion of costs of inpatient hospital care borne by Medicare beneficiaries has inappropriately increased as a result of significant declines in length of stay experienced since the beginning of the prospective payment system, this proportion should be lowered to its calendar year 1983 level. (Preamble, section V)

• *Patient Classification and Case Mix:*

—Recommendation 20: Improving the Measurement of Hospital Case Mix.

While ProPAC believes that the DRG system is currently the most appropriate of the available measures of hospital case mix and should be retained in principle, resource use varies considerably within some DRGs. Therefore, ProPAC intends to continue its analysis of individual DRGs and to undertake a systematic evaluation of the entire system. (Preamble, section V)

—Recommendation 21: Process for Maintaining and Updating ICD–9–CM Codes.

The Secretary should establish a mechanism for maintaining and updating the International Classification of Diseases, 9th Revision, Clinical Modification (ICD–9–CM) diagnosis and procedure codes in a timely and effective manner. This process should include adequate educational support for all users. (Preamble, section V)

—Recommendation 22: Modification of ICD–9–CM Codes for Payment Purposes.

The Secretary should ensure that modifications of the ICD–9–CM diagnosis and procedure codes for payment purposes strictly adhere to coding rules and guidelines. In order to maintain the integrity and uniformity of the coding system, while allowing flexibility for payment purposes, the process for interpretation and assignment of existing ICD–9–CM codes should be assigned to one authorized group. (Preamble, section V)

—Recommendation 23: Interim Solution for Coding Problems.

The Secretary should establish an interim mechanism to allow identification of cases and appropriate DRG assignment when ICD–9–CM codes cannot be updated in a timely manner. (Preamble, section V)

• *DRG Classifications and Weighting Factors*

—Recommendation 24: Adjustment of the Labor Portion of the Standardized Amounts for Some DRGs Involving Expensive Devices.

The labor-related and nonlabor-related portions of the standardized amounts should be adjusted for DRGs with a high percentage of cases involving expensive devices. The new portions should more closely reflect the labor-related and nonlabor-related shares of costs for cases in DRGs No. 39 (lens procedures with or without vitrectomy), 104 (cardiac valve procedure with pump and with cardiac catheterization), 105 (cardiac valve procedure with pump and without cardiac catheterization), 209 (major joint and limb reattachment procedures), 471 (bilateral or multiple major joint procedures of the lower extremity), and the newly defined DRGs (see recommendations 25 through 28) for pacemaker implantation and replacement, implantable defibrillators, and penile prostheses. These adjustments should be made so that total hospital payments remain unchanged. The current labor-related and nonlabor-related portions of the standardized amounts should be calculated from data derived from HCFA's study of the labor portion of costs by DRG. If those data are incomplete, the portions should be calculated from available data on the charges and costs of medical supplies. The Secretary should study the need for similar adjustments in all DRGs. (Preamble, section V)

—Recommendation 25: Reclassification of Pacemaker Cases Based on Type of Device.

The DRGs involving implantation of cardiac pacemakers (currently DRGs 115 through 118) should each be restructured into two DRGs, one for cases involving dual-chamber or functionally similar pacemakers, and one for cases involving other single-chamber pacemakers. New ICD–9–CM procedure codes should be created to distinguish between these types of cases. A mechanism should be established to evaluate the appropriateness of all implants involving dual-chamber or functionally similar pacemakers. (Preamble, section V)

—Recommendation 26: Reclassification of Pacemaker Replacement Cases.

The cases involving replacement of a permanent cardiac pacemaker, except those with myocardial infarction, congestive heart failure, or shock, should be reassigned to DRGs that include only pacemaker replacements. (Preamble, section V)

—Recommendation 27: Implantable Defibrillator.

Implantable defibrillator cases should be assigned to a unique DRG. The labor portion and nonlabor portion of the standardized amounts should be adjusted for this new DRG to reflect the labor-related and nonlabor-related shares of costs for these cases. (Preamble, section V)

—Recommendation 28: Penile Prostheses.

Prior to recalibration, cases involving the implantation of a penile prosthesis should be removed from DRG 341 and reassigned to a unique DRG. The labor portion and nonlabor portion of the standardized amounts should be adjusted for this new DRG to reflect the labor-related and nonlabor-related shares respectively of costs for these cases. (Preamble, section V)

—Recommendation 29: Additional Payment for Magnetic Resonance Imaging.

For a period of three years, Medicare should pay hospitals an additional amount for each covered magnetic resonance imaging (MRI) scan performed on an inpatient Medicare beneficiary in a hospital under the prospective payment system. Under existing capital payment policy, the add-on for FY 1987 should be $124 for each scan performed in institutions in which Medicare pays for the capital costs of an MRI scanner and $282 for each scan performed in a hospital on a beneficiary who is a patient of another hospital. (The reason for the increased payment in this situation is that the hospital without an MRI scanner would receive a bill from the hospital that actually performs the scan. The charge would include both an operating component and a capital component.) In FY 1988 and FY 1989 the add-on amounts for all hospitals should be recalculated to reflect any change in the average cost of an efficiently produced scan. (Preamble, section V)

—Recommendation 30: Extracorporeal Shock Wave Lithotripsy.

Cases in which extracorporeal shock wave lithotripsy is the principal procedure should temporarily be removed from DRG 324 and reassigned to DRG 323. The payments and costs for all cases in this DRG should be monitored to determine the appropriateness of prospective payments for operating costs. A unique DRG should be identified for this procedure. (Preamble, section V)

—Recommendation 31: Lymphomas and Leukemias.

Cases currently assigned to DRGs involving lymphoma, leukemia, and other related diagnoses (DRGs 400 through 404) should be reclassified into one of five newly defined DRGs. The new DRGs should allow a unique DRG for acute leukemia cases not involving a major operative procedure, eliminate age as a criterion for DRG assignment, and modify present classification based on operative procedure, complications, and comorbidity. Other ways of further improving these DRGs should continue to be explored. (Preamble, section V)

—Recommendation 32: Upper Extremity Procedures.

Cases involving procedures of the upper extremity that are currently classified in DRGs 223, 224, 228, and 229 should be reassigned based on anatomical location and the presence of complications and/or comorbidities, or systemic collagen vascular disease or implantation of joint prostheses. Nonsurgical hip fracture cases currently being assigned to DRGs 223, 224, 228, and 229 should be reassigned to the appropriate medical DRG. (Preamble, section V)

• *Data Development and Research:*

—Recommendation 33: Maintaining a Commitment to Data Development and Research on the Prospective Payment System.

The Secretary should continue to devote substantial resources to data development and research for monitoring and improving the prospective payment system and understanding its effects on the health care system. Studies mandated by Congress should be completed and made public, and new studies that analyze more recent data should be designed and initiated as soon as possible. (Preamble, section V)

II. Basis of Payment for Capital Under the Prospective Payment System

A. Introduction

We are proposing to change the regulations that apply specifically to the way in which certain hospital inpatient pass-through costs, collectively designated as capital-related costs (excluding payments to proprietary hospitals to provide them with a reasonable rate of return on equity capital), will be treated for Medicare program payment purposes effective with hospital cost reporting periods beginning on or after October 1, 1986. Pursuant to section 9107 of Pub. L. 99–272, payment for the return on equity capital also will be modified. These changes will be addressed in a separate rule-making document.

Capital-related costs under Medicare principles include depreciation, interest, taxes, insurance and similar expenses (defined further in § 405.414) for plant, fixed and moveable equipment. Under current Medicare reimbursement rules, payment for capital-related costs is on a reasonable cost basis (§ 405.402), both for hospitals subject to and excluded from the prospective payment system.

For prospective payment system hospitals, capital-related costs are not included in the prospective payment amount per discharge established for inpatient hospital services. These costs are excluded or "passed-through" (§ 412.113). For hospitals not subject to the prospective payment system, capital-related costs are excluded from the Pub. L. 97–248 ceiling on the rate of hospital cost increases because these costs are also excluded from the definition of inpatient operating costs subject to the limitation. This rule would eliminate the previous distinction maintained between capital-related and operating costs only for Medicare inpatient hospital services provided by hospitals subject to the prospective payment system for cost reporting periods beginning on or after October 1, 1986. We refer the reader to the discussion in section II.C.8. of the preamble regarding our proposed treatment of capital-related costs for Medicare inpatient hospital services for hospitals and hospital units excluded from the prospective payment system.

B. Background

Section 1886(a)(4) of the Act, as amended by section 601(a)(2) of the Social Security Amendments of 1983 (Pub. L. 98–21) and section 9107 of Pub. L. 99–272, states:

> For purposes of this section, the term "operating costs of inpatient hospital services" includes all routine operating costs, ancillary service operating costs, and special care unit operating costs with respect to inpatient hospital services as such costs are determined on an average per admission or per discharge basis (as determined by the Secretary). Such term does not include costs of approved educational activities, costs of anesthesia services provided by a certified registered nurse anesthetist, a return of equity capital, or, *with respect to costs incurred in cost reporting periods beginning prior to October 1, 1986, other capital-related costs, as defined by the Secretary.* (Emphasis added.)

The first statutory distinction between capital-related costs and total Part A hospital inpatient operating costs was made with the enactment of Pub. L. 98–21. Prior to that time capital-related costs were identified and treated separately for Medicare payment purposes only by regulatory exclusion from the inpatient routine operating cost limits (that is, section 223 limits under Pub. L. 92–603, for cost reporting periods beginning on or after July 1, 1979) and the Pub. L. 97–248 inpatient total operating cost limits and rate-of-increase limits. Section 601(a)(2) of Pub. L. 98–21, however, amended subsection 1886(a)(4) of the Act, specifying that the term "operating costs of inpatient hospital services" did not include costs that are defined by the Secretary as capital-related costs, but this exclusion of capital-related costs applies only to cost reporting periods beginning prior to October 1, 1986. Capital-related costs were, therefore, excluded from costs that are incorporated into the prospective payment system, State hospital reimbursement control systems or the Pub. L. 97–248 limits under section 1886 of the Act; they are instead subject to cost reimbursement provisions under section 1861(v).

Section 1886(d)(1)(A) of the Act establishes the prospective payment system as the sole basis for paying for "operating costs of inpatient hospital services (as defined in subsection (a)(4))" for hospital subject to that system. Since the definition of operating costs includes capital-related costs for cost reporting periods beginning October 1, 1986, or later, the Department lacks authority to continue reimbursement for capital-related costs on a cost reimbursement basis after that date. Because the current prospective payment rates were not set at levels designed to cover capital-related costs as well as operating costs as previously defined, we are proposing in this rule to establish prospectively-determined capital-related payment rates.

There are three provisions related to capital-related costs contained in Pub. L. 98–21 in addition to the revised definition of operating costs. The first is subsection 601(a)(3), which expresses congressional intent to incorporate capital-related costs into the prospective payment system and suggests the possibility that costs for newly obligated capital expenditures might be treated differently from previously obligated capital costs. Next, section 601(e) added subsection 1886(g)(1) to the Act, which applies if Congress fails to enact legislation relating to capital-related costs prior to October 1, 1986, and which prohibits payment of capital-related costs for hospital inpatient services resulting from capital expenditures obligated after September 30, 1986 unless the State has an agreement with the Secretary under section 1122 of the Act, and the State recommends approval for the capital expenditure. Another provision, section 603(a)(1), required the Secretary to study, develop and report to the Congress on the methods and proposals for legislation by which capital-related costs could be included within the prospective payment system.

This interim decision by Congress to continue cost-based reimbursement of capital-related expenses was based on the recognition that further study was desirable before these costs could be incorporated into the prospective payment system. Thus, under the provisions contained in Pub. L. 98–21, Congress included the requirement that the Secretary study capital-related costs and report to Congress on options for

including capital into the prospective payment system. The study was to be comprehensive and explore all options "including broadening the DRG payment to include a capital component, establishment of limits modeled on section 223 of Pub. L. 92–603 applicable to capital costs only, and the setting of limits on a statewide basis." This legislative history reflects congressional intent that the Secretary's report include specific recommendations "on the method and proposals for legislation by which capital-related costs, such as return on net equity . . . can be included within the prospective payment amounts" (quotation from House Report No. 98–25, Part 1, March 4, 1983).

A comprehensive report ("Hospital Capital Expenses: A Medicare Payment Strategy for the Future") containing the analyses and recommendations for incorporating hospital inpatient capital-related costs along with all other operating costs into the prospective payment system was submitted to Congress on March 14, 1986. That report forms the basis for this revision to the previous regulations that governed the treatment of capital-related costs. In the interim, however, capital-related costs are being reimbursed in accordance with the Medicare principles of reasonable cost reimbursement. As we noted in the March 14th report, we believe that amounts for capital can be appropriately included in the DRG payments. We believe that such a change in Medicare policy for capital would be a major step toward a more rational, less interventionist role for government in its capacity as a major third party payor. A primary purpose would be to assure that Medicare payments for capital are distributed to hospitals on an equitable basis directly related to their care of Medicare patients, while simultaneously correcting for the major shortcomings of cost reimbursement.

C. Proposed Changes to Capital Payment

1. Hospitals Subject to the Prospective Payment System

Although the statute (section 1886(a)(4) of the Act) simply incorporates capital-related costs into the definition of operating costs, we are proposing to use our exceptions and adjustments authority under section 1886(d)(5)(C)(iii) of the Act to create transition provisions and other refinements that will improve the equity of the system. The objective of this proposal is to set a Federal per-case payment for capital-related costs, initially as a separate component of the standardized amounts which would, after completion of the transition, be incorporated into the prospective payment standardized amounts as an integral part of the nonlabor portion for urban and rural areas. We propose to accomplish this by providing a four-year transition period, effective with cost reporting periods beginning on or after October 1, 1986, leading to fully national capital payment rates. During each year of the phase-in period, payments to hospitals would be based on a combination of a Federal capital rate and a hospital-specific capital rate. The proposed schedule for the phase-in period to national capital payment rates is indicated for each component in the following table:

For cost reporting periods beginning in Federal fiscal year—	Hospital-specific rate (percent)	Federal portion (percent)
1987	80	20
1988	60	40
1989	40	60
1990	20	80
1991 on	0	100

We are proposing to add new §§ 412.65 through 412.67 to describe the new payment policy.

A four-year phase-in to fully national rates should ease the transition from the virtually unlimited cost pass-through approach. We recognize that this new payment approach could require hospitals to rethink their investment strategies in light of market conditions. Indeed, the intent of incorporating capital into operating costs as a single payment amount is to eliminate the disparate incentives created by paying a fixed amount for noncapital operating costs and a variable, largely unlimited, amount for capital costs. We believe that four years is a reasonable time period for a transition to full national payment rates. The incentives to substitute capital-related items and services for other operating costs in the inpatient hospital setting must be neutralized at the earliest reasonable time. The phase-in period for capital-related costs follows the same pattern established for the prospective payment system transition, which we believe provides adequate time to adjust inpatient operations.

2. Determination of Federal Capital Payment Rates

We propose to compute the Federal capital-related rate using audited hospital inpatient capital-related cost data from Medicare cost reports for reporting periods beginning on or after October 1, 1982 and before October 1, 1983 (that is, Federal FY 1983). These are the latest audited cost reports available for this purpose. Capital-related costs are defined in accordance with § 405.414 and include depreciation, interest, taxes, insurance, and similar expenses for plant, fixed and moveable equipment. The FY 1983 base-year capital cost data used to develop the Federal capital-related rates include all allowable inpatient capital-related costs incurred in providing services to Medicare beneficiaries in prospective payment hospitals.

a. *Adjustment to Capital-Related Base-Year Cost Data.* Medicare reimbursement principles require that interest expense on indebtedness be reduced by interest income earned from any source, except for interest income earned on funded depreciation. However, we believe that it is appropriate to offset interest income earned on funded depreciation from the calculation of the average capital-related cost per discharge. Currently, the exclusion of the offset for interest income on funded depreciation encourages equity versus debt financing of capital investments. We believe that this incentive is no longer appropriate because the prospective payment system provides sufficient incentives to encourage prudent acquisition of capital assets without the need for additional equity. Therefore, the capital-related costs used to develop the Federal rates will be reduced by an estimated amount which reflects interest income earned on funded depreciation. Because the necessary data to compute the amount of this offset are not available from the FY 1983 Medicare cost reports used to calculate the Federal capital-related rates, we are proposing to use an estimate derived from a special data element collected and audited for a sample of FY 1984 cost reports for this purpose.

b. *Calculation of Standardized Federal Capital Related Amounts.* Section 1886(d)(2) of the Act specifies the manner in which the Secretary must determine the national and regional prospective payment rates for the operating costs of inpatient hospital services. Because section 1886(a)(4) of the Act will no longer provide sufficient authority to exclude capital-related costs from the definition of inpatient operating costs effective with cost reporting periods beginning on or after October 1, 1986, we would follow the same rules for deriving Federal Capital-related rates, essentially as prescribed in section 1886(d)(2) of the Act, for purposes of consistency and facilitating the eventual merger of all operating cost components into the Federal rates. This section requires that base-period cost

data be developed and modified in several ways (that is, inflated, standardized, grouped into payment cells, and averaged) to generate an average standardized amount per discharge for each payment area, that is, urban and rural, for each census division and the nation. In order to remain consistent with the prospective payment rules governing the transition from regional to national Federal rates, the Federal capital-related rate for discharges in Federal FY 1987 would be a blend of Federal regional (50 percent) and national (50 percent) rates. For discharges occurring in Federal FY 1988 and onward, the full national rate would be applicable. It should be noted, however, that we are not proposing special treatment for hospitals in Oregon with respect to the transition, as contained in section 9102(d)(4) of Pub. L. 99-272. Table 1 of section IV of the addendum contains the regional and national Federal capital-related standardized amounts.

Step 1—Average Capital-Related Cost Per Discharge. Audited Medicare inpatient capital-related costs for each of the approximately 4,000 hospitals for cost reporting periods beginning in Federal FY 1983 were obtained. The resulting Medicare cost was then converted to yield an average capital-related cost per discharge.

The average capital-related cost per discharge was then reduced by a factor of 10 percent, which represents the estimated amount of capital-related cost attributable to interest income earned on funded depreciation by prospective payment hospitals in Federal FY 1983. The percentage figure used was derived by dividing the Medicare share of interest income by the total Medicare capital-related cost for each of a selected sample of prospective payment hospitals for their FY 1984 cost report year. These hospital ratios were then averaged within each cell used to stratify the sample, and the resultant means were multiplied by the appropriate sample weights to obtain a nationally representative ratio for all prospective payment system hospitals. That figure, then, represents the average ratio of interest income off set to total capital-related costs for all prospective payment hospitals in the aggregate. There is no basis to expect that this ratio would vary substantially from year to year. As a result, the ratio based on FY 1984 cost report data represents the best information available to us to make this adjustment.

Step 2—Updating. The capital-related costs per discharge computed in step 1 were updated through FY 1988 to bring them to a common time period since the Federal standardized amounts would apply to discharges occurring during Federal FY 1987.

(a) The base-year capital-related cost per discharge was inflated through the end of Federal FY 1988 using the historical and projected calendar year annual rates of increase in the capital component of the hospital market basket in order to be consistent with the prospective payment methodology for all other operating costs. The rates of inflation used were as follows:

Calendar year	Inflation rate
1983	6.8
1984	6.7
1985	5.8
1986 (forecasted)	3.8

Step 3—Standardization. After the capital-related costs were inflated through September 30, 1986; they were further standardized to remove the effects of known sources of variation in hospital costs that are subsequently recognized in the computation of each hospital's prospective payment rate. Because capital-related costs would be considered as other *nonlabor* standardized amounts, each hospital's capital-related costs would be standardized for the effects of case mix, indirect medial education costs, and the higher costs of treating a disproportionate share of low-income patients. The costs would not be standardized for an area wage adjustment because such an adjustment is necessary only for the labor portions of standardized amounts. In addition, because Alaska and Hawaii have a higher cost-of-living compared to other States, the capital-related costs for hospitals in these two States were also standardized by an appropriate cost-of-living factor. Each of these adjustments is discussed below.

(i) *Case Mix.* The standardization necessary to neutralize capital-related costs for the effects of hospital differences in case-mix was accomplished by dividing each hospital's inflated capital-related cost per discharge by that hospital's case-mix index. Tables 3a and 3b of section IV of the addendum contain the case-mix index values used for this purpose. The case-mix indexes were calculated using the DRG weighting factors contained in Table 5 of the September 3, 1985 final rule (50 FR 35722 through 35735). We computed each hospital's case-mix index by multiplying the weighting factor for each DRG by the number of its Medicare discharges classified in that DRG for Federal FY 1985, summing the products for each DRG and dividing that result by the hospital's total number of Medicare discharges for that period. (We note that FY 1985 case-mix indexes are based on the best data available for the most recent year in which billing information is reasonably complete.)

(ii) *Indirect Medical Education Costs.* After adjusting each hospital's capital-related cost per discharge for inflation and case-mix, we divided each hospital's cost by 1.0 plus the indirect medical education adjustment factor set forth in section 9104(a) of Pub. L. 99-272, and the percentage add-on for hospitals that serve a disproportionate share of low-income patients as described below. (For a detailed explanation of the basis for the revisions in the computation of the adjustment for indirect medical education costs, see the interim final rule of May 6, 1986 (51 FR 16775)). The formula for deriving the indirect medical education adjustment factor is as follows:

$$2 \times \left[\left(1 + \frac{\text{interns and residents}}{\text{beds}}\right)^{.405} - 1\right]$$

Example: Based on a hospital's prospective payment data for its cost reporting period in FY 1984, a hospital has an intern and resident-to-bed ratio of .2. Its adjustment factor equals:

$$2 \times [(1+.2)^{.405} - 1] = 2 \times (.07663) = .15327$$

This hospital's indirect medical education adjustment factor is .1533. Therefore, the factor used to standardize its capital-related costs for indirect medical education activities is 1+.1533 or 1.1533.

(iii) *Disproportionate Share.* After determining each hospital's capital-related cost per discharge for indirect medical education, we add to that figure an adjustment factor representing the percentage add-on for hospitals that serve a disproportionate share of low-income patients. In order to standardize each hospital's capital-related cost per discharge, we divide each cost by 1.0

plus the total of the indirect medical education and disproportionate share adjustment factors. This additive procedure would be used in order to be consistent with the way in which we calculate the payment amounts.

Section 9105 of Pub. L. 99-272 added a new section 1886(d)(5)(F) to the Act to require additional payments for these hospitals. Therefore, we believe it is essential to exclude from capital costs per discharge the higher payments that will be made to disproportionate share hospitals. Thus, we have adjusted the standardized capital-related rates in the same manner that the Federal rates for other operating costs are adjusted for disproportionate share payments (see section II.A. of the addendum). For an explanation of the criteria that a hospital must meet in order to qualify for an additional payment as a disproportionate share hospital and the amount of the disproportionate share add-on, see the May 6, 1986 interim final rule (51 FR 16776). In determining the disproportionate share adjustment factors for purposes of standardizing the capital-related costs, we used available data on the percentage of Medicaid days from Medicare cost reports with cost reporting periods beginning in Federal FY 1984 and the percentage of SSI/Medicare days for FY 1984 derived from matching FY 1984 SSI eligibility files to Medicare FY 1984 PATBILL records. These factors would be updated in the final rule using the percentages derived by matching FY 1985 SSI/Medicare days to FY 1985 Medicare PATBILL records.

(iv) *Cost-of-Living Factor for Alaska and Hawaii.* Section 1886(d)(5)(C)(iv) of the Act authorizes the Secretary to provide for such adjustments as deemed necessary to take into account the unique circumstances of hospitals located in Alaska and Hawaii. Under the prospective payment system, hospitals in these two States are entitled to increased payments for the nonlabor component of the regional and national rates. Because we view capital-related costs as nonlabor expenses, we believe it is appropriate to standardize the capital-related cost per discharge for hospitals in Alaska and Hawaii by a factor that reflects the higher cost of living in these States. Accordingly, we divided the capital-related cost per discharge values for hospitals in Alaska and Hawaii by adjustment factors contained in the table below. These values are based on data obtained from the U.S. Office of Personnel Management.

Cost-of-Living Adjustment Factors, Alaska and Hawaii Hospitals

Alaska—all areas	1.25
Hawaii:	
Oahu	1.225
Kauai	1.175
Maui	1.20
Molokai	1.20
Lanai	1.20
Hawaii	1.15

Step 4—Computation of urban and rural averages. We computed separate averages of the capital-related standardized amounts from Step 3 for urban and rural hospitals (as defined in § 412.62(f)), nationally and for each census division. (We note that rural referral centers, as defined in § 412.96, would be paid the urban capital payment rate in the same manner as they are currently paid the urban Federal rate under the prospective payment system (§ 412.96 (d) and (e).) We believe that rural referral centers have capital expenditures similar to urban hospitals. Therefore, we are proposing to revise § 412.96 (d) and (e) to pay rural referral centers the urban capital payment rate.)

Step 5—Reduction for outliers. We reduced each of the average capital-related standardized amounts in Step 4 by the estimated proportion of total prospective payments that are for outlier cases.

Step 6—Indirect Medical Education Payment Equality Factor. We adjusted each of the average capital-related standardized amounts in Step 5 by the appropriate indirect medical education payment equality factor. This adjustment, which is required under section 9104(b) of P.L. 99-272, is further explained, and the factors stated, in section II.A.4.d of the Addendum.

Table I of Part IV of the addendum contains the rates thus determined. There may be changes in these rates to the extent additional cost report data are available at the time we prepare the final rule.

We are also considering an alternative method for developing the Federal capital-related payment amounts. Under this alternative, the updated capital-related cost per discharge, reduced for interest income on funded depreciation, would not be standardized for each hospital's indirect medical education adjustment factor, for disproportionate share payments, or possibly for case mix. We would, however, continue to apply the cost-of-living adjustment for hospitals located in Alaska and Hawaii. Thus, after the capital-related costs were updated and divided by the cost-of-living adjustment factors and possibly by the case-mix for each hospital, we would compute national and regional urban and rural average capital-related amounts. The effect of making payments under this alternative approach would be that the average Federal capital-related amount would, in essence, not be adjusted by a hospital's indirect medical education factor, its disproportionate share factor, or possibly the DRG weighting factor. Unlike the proposed method, which would provide increased capital payments for teaching hospitals and disproportionate share hospitals, this alternative would provide that all hospitals in a particular payment cell (urban or rural by region) would receive the same Federal capital payment per discharge, or, if the capital costs per case are standardized by each hospital's case-mix index, a payment that varied only with the DRG weighting factor for each discharge. We specifically invite comments on the appropriateness of using this alternative to construct the Federal national and regional capital-related payment amounts and of paying such amounts without adjusting them by the indirect medical education and disproportionate share adjustment factors of the DRG weighting factor.

3. Determination of Hospital Specific Capital-Related Payment Rates

The hospital-specific portion of the capital-related payment during the transition period would be made by comparing the amount of a hospital's capital-related costs in a base year (its hospital-specific capital-related rate), updated through each year of the transition with the total amount of its actual capital-related expenditures in each transition year. The lesser of the two amounts would determine the hospital-specific capital-related payment for inpatient services in each phase-in year. Computing the hospital-specific capital-related rate would be the first step in this process.

The hospital-specific capital-related rate would consist of the allowable capital-related cost per discharge during a base year, Federal FY 1986. Thus, the hospital-specific capital-related rate would be calculated on the basis of each hospital's audited inpatient capital-related costs from hospital cost reporting periods beginning on or after October 1, 1985 and before October 1, 1986. These inpatient capital-related costs are defined in accordance with § 405.414, and exclude costs representing the allowable return on equity capital for prospective payment proprietary hospitals. Payment for the

return on equity capital will be treated as provided under section 9107 of Pub. L. 99-272. Section 9107 of Pub. L. 99-272 amended section 1886(g)(2) of the Act to provide for a three-year phase-out of the allowance for a return on equity capital for inpatient hospital services, effective with cost reporting periods beginning on or after October 1, 1986. This provision does not incorporate return on equity capital into inpatient operating costs. Therefore, we are not proposing to include a return on equity capital in the prospective payment system. The return on equity capital provisions in section 9107 of P.L. 99-272 will be addressed in another rulemaking document.

a. *Calculation of Capital-Related Hospital-Specific Rate.* The computation of the capital-related hospital-specific rate conforms to the calculation of the hospital-specific portion of the prospective payment rates for other inpatient operating costs first described in the interim final rule establishing the prospective payment system published on September 1, 1983 (see 48 FR 39773). A base-year cost per discharge is calculated and standardized to eliminate variation attributable to the hospital's Medicare case mix to derive the applicable amount per discharge to be used in computing the capital-related hospital-specific rate.

The base-year capital-related cost per discharge will be computed using fully audited capital cost data from the Medicare cost report for the 12-month (or 52-53 weeks) reporting periods beginning on or after October 1, 1985 and before October 1, 1986. The base-year capital costs include all allowable inpatient capital-related costs incurred in providing services to Medicare beneficiaries, as defined in accordance with § 405.414.

If a hospital has a base-year cost reporting period of other than 12 months, the capital-related cost from the latest and longest cost reporting period in the base period will be used to establish the necessary capital-related cost per case. The resulting cost per discharge would be adjusted by the applicable update factor to trend forward the cost per case to the same point as the other, standard 12-month base periods for further, appropriate updating (see step 4 below).

Step 1. For each hospital, determine the total audited Medicare inpatient capital-related costs for the base year pursuant to §§ 405.414 and 412.113(a), and divide the Medicare inpatient capital-related base-year costs by that hospital's number of reported Medicare discharges in that period to obtain an average capital-related cost per discharge.

Step 2. Divide the capital-related cost per discharge computed in step 1 by that hospital's case-mix index obtained from Table 3a or 3b of section IV of the addendum.

b. *Capital-Related Hospital Specific Payment Determination.* The capital-related hospital-specific payment amount would be computed from the following formula:

$$\text{Capital-Related Hospital-Specific Rate} \times \text{Prospective Payment Update Factor} \times \text{Transition \% for Capital Hospital-specific rate} \times \text{DRG Weight}$$

We are proposing that for each of the transition years, each hospital's total hospital-specific capital-related payments would be equal tothe lesser of—

- The sum of its capital-related hospital-specific amounts for the applicable cost reporting period, as determined by the above steps; or
- The total of its actual allowable Medicare inpatient capital-related costs for the applicable transition year times the applicable capital-related hospital-specific transition percentage.

Hospitals that increase their capital expenses per discharge during the transition would be paid their capital-related prospective payment. Those that decrease their capital expenses per discharge will be paid their actual costs.

4. New Hospitals

For purposes of incorporating capital payments into the prospective payment system, new hospitals would be paid on the basis of the full Federal capital-related rate (that is, there would be no capital-related phase-in period for these facilities). To qualify, a new hospital would have to meet one of the following requirements:

- The hospital—

—Is newly participating in the Medicare program (under present and previous ownership); and

—Does not have a complete 12-month cost reporting period ending on or before September 30, 1986; or

- The hospital meets the new ownership and bed occupancy requirements described in § 412.74(a)(2).

We are proposing to add a new § 412.66(g) to reflect this change.

5. Capital Expenditure Agreements

Section 1886(g)(1) of the Act provides that, if legislation concerning payment for capital-related costs for inpatient hospital services is not enacted before October 1, 1986, no payment may be made for capital-related costs of capital expenditures (as defined in section 1122(g) and except as provided in section 1122(j) of the Act) for inpatient hospital services in a State, if such expenditures are obligated after September 30, 1986, unless the State has an agreement with the Secretary under 1122(b) of the Act and under such agreement the State recommended approval of the capital expenditure. The conference report accompanying Pub. L. 98-21 (H.R. Rep. No. 98-47 at p. 189) expressing Congress's expectation with respect to this provision states, "However, if the Secretary has implemented a system of prospective payment for capital without legislative action and the mandatory section 1122 capital planning approval provision has gone into effect, the conferees intend that the Secretary will adjust the prospective payment for capital to reflect a disapproval project under section 1122."

We are opposed to the concept of imposing health planning requirements on the hospital industry such as those required under section 1122 of the Act since inclusion of capital payments into the prospective payment system will remove the incentive to substitute capital expenditures for operating components and provide a payment amount neutralized with respect to such incentives.

Because our capital payment proposal provides that the hospital-specific portion of the capital payment would be determined on a retrospective basis, we do not propose to adjust hospital-specific capital payments under this provision. However, capital-related costs for such disapproved expenditures would be considered nonallowable costs for Medicare cost reporting purposes.

In adjusting the Federal portion of the capital-related prospective payment amount, we are proposing that the adjustment be determined as a percentage of the total disapproved capital expenditures to total capital assets. For example, if a hospital has a disapproved capital expenditure of $1,000,000 and total capital assets of $10,000,000, the Federal portion of the capital-related prospective payments would be reduced by 10 percent. If the expenditure is demonstrated to be

completely unrelated to inpatient hospital services, no adjustment would be applied.

We are proposing to add a new § 412.65(b) to describe these requirements.

6. Sole Community Hospitals

Section 1886(d)(5)(C)(ii) of the Act requires the Secretary to take into account the special needs of sole community hospitals (SCHs) by using a special payment formula for hospitals so classified. In our effort to make capital-related payments consistent with the other provisions of the prospective payment system, we would apply the same prospective payment rate blends to SCHs provided in § 412.92(d) in making capital-related payments to SCHs for their cost reporting periods beginning on or after October 1, 1986. Thus, we would pay SCHs the capital-related payment rates for all discharges occurring in cost reporting periods beginning on or after October 1, 1986 at:

- 25 percent of the Federal capital-related standardized regional rate as determined in the foregoing discussion; plus
- 75 percent of its capital-related hospital-specific rate as determined in the above manner;
- Disregard the blending of Federal and hospital-specific capital-related rates applicable to all other hospitals; and
- Apply the additional payment provisions appropriate to SCHs under the prospective payment system pursuant to § 412.92(e) to include capital-related payment adjustments.

We are proposing to include this treatment of SCHs in a new § 412.67(h) and revise § 412.92 to reflect this change.

7. Hospitals and Units Not Subject to the Prospective Payment System

Under section 1886(b)(4)(A) of the Act, the Secretary may provide for exceptions to the method for determining the amount of payment to hospitals as he deems appropriate.

We believe that payments for capital-related costs of hospitals and units excluded from the prospective payment system should continue to be reimbursed on a reasonable cost basis. That is, for a limited time, we would not incorporate capital-related costs into the definition of "inpatient operating costs" for those facilities, using the Secretary's exception authority under section 1886(b)(4)(A) of the Act.

All other things being equal, we believe that capital costs ought to be included in the target rates of hospitals excluded from the prospective payment system. In fact, as discussed elsewhere in this document, section 1886(a)(4) of the Act requires that capital-related costs be included in the definition of inpatient operating costs for cost reporting periods beginning on or after October 1, 1986. However, the difference in reimbursement methods between the prospective payment system and excluded hospitals results in major differences in the way we believe hospitals will operate once capital is included in the definition of operating costs.

Prospective payment system hospitals are paid on the basis of a price per discharge. Under this system, we have no concern over how the hospital uses the payment it receives from the Medicare program (provided, of course, that the quality of care furnished to Medicare beneficiaries does not suffer). In fact, we encourage hospitals to be efficient by allowing them to keep the difference between their costs and the Medicare payment. Adding a capital component to the price per discharge provides each hospital a sum that represents payment for its capital expenditures. However, based on its needs, a hospital can use this payment in any way it chooses, consistent with the continuing provision of quality medical care.

Hospitals excluded from the prospective payment system, on the other hand, continue to be paid based on the actual reasonable costs they incur in furnishing services to Medicare beneficiaries subject to a rate of increase limitation. Adding a capital component to their target rates could produce conditions and incentives that are not in keeping with the Medicare program's emphasis on the efficient provision of quality care. For example, a hospital with a fully depreciated asset base in its base year would have little or nothing added to its target rate for capital costs. In the near future, when it must purchase new expensive assets to replace the fully depreciated assets, its target rate would most likely not be sufficient to account for the costs of the new assets. The hospital then would be faced with the necessity of reducing other expenditures in order to stay within its target rate (at the possible expense of a reduction in the quality of care), or it would be faced with seeking an exception, a time-consuming and administratively burdensome process.

On the other hand is the situation of a hospital that purchases major assets in its base year. The capital component of its target rate would be comparatively large. However, as the assets are depreciated year-by-year, its target rate would continue to be adjusted by an update factor, leading to an unnecessarily high target rate vis-a-vis the costs actually required to maintain an efficient facility. This situation could lead the hospital to engage in inefficient practices, since it would be reimbursed its actual costs up to its target rate. Or, the provider could qualify for an even larger incentive payment year-by-year, without making any increasing gains in efficiency.

Due to the above potential scenarios, we are proposing, for a limited time, to grant an exception to hospitals and units excluded from the prospective payment system. Their capital costs would continue to be paid on a reasonable cost basis. However, we note that it is our intention to establish an alternative to reasonable cost reimbursement for the cpaital-related costs of these excluded facilities.

D. Additional Provisions Under Consideration

Any prospective payment policy incorporating capital into the standardized amounts should, at the end of the transition, provide for a flow of total payments sufficient to cover current patient care operations of efficiently operated hospitals and to provide adequate funds to permit modernization, replacement, and expansion as needed to replenish the current stock of capital. Not every hospital needs to modernize or wholly replace itself every year, or even every five years. But the prospective payment system should be sufficient over the longer term (for example, 15–30 years) to permit necessary recapitalization in addition to the provision of current patient care services.

While the post-transition standardized prospective payment rates can be set to adequately compensate for the total capital and non-capital inpatient expenditures of efficiently operated facilities, the capital payment transition period will be a critical time for hospitals to adjust their operations and plans in preparation for a single comprehensive payment mechanism. As a result, even at the time of this publication, we are also considering several options to the preceding mechanisms for incorporating capital-related expenditures into the prospective payment system. The intent in considering these options is to ease the transition from cost-based reimbursement for all inpatient hospital capital-related expenditures and to assist any hospitals disadvantaged to a degree substantially in excess of the majority of hospitals during the phase-in period. The options under review fall into five main categories; however, two

or more combinations of alternatives may have to be considered or revised together since all of the options interact with each other. These alternatives, about which we are requesting comments regarding possible adoption in the final rule, are as follows:

- Transition rates that differentiate between plant and fixed equipment versus moveable equipment.
- Hospital-specific portion determined by using a rolling base year.
- Exception procedures for severely disadvantaged hospitals that would provide an adjustment to payments to certain hospitals which can document that their capital-related inpatient operating costs are in excess of their total capital-related payments to a degree that exceeds a prescribed threshold (for example, two times the capital-related Federal standardized rate).
- Lengthening the phase-in period.
- Variation in blending other than straight-line declining percentages.
- Occupancy rate adjustment to Medicare inpatient capital-related costs in the base year or years for purposes of determining capital payments.

Alternatives to Avoid Sudden and Severe Disruptions. We are seriously considering a capital proposal which would deal separately with long-term capital (plant and fixed equipment) and shorter term capital (moveable equipment), with a longer transition period to national rates for long-term capital and an immediate move to national rates for moveable equipment. This structure would be combined with a rolling base, possibly including taking into account low occupancy rates, for the hospital specific portion of long-term capital and an exceptions pool to provide relief to hospitals meeting specified exception criteria. Adoption of a proposal such as this would be designed to reduce the estimated savings of the basic proposal by about 25–30 percent. Additional funds for hospital capital may be needed in the short run to avoid sudden and severe disruption of hospital expectations.

1. Transition Rates Distinguishing Plant and Fixed Equipment From Moveable Equipment

Under this alternative, two categories of capital items would be treated differently in incorporating capital-related costs into the prospective payment system. Rather than bringing all capital item expenditures under the prospective payment system in the same fashion, the differences in cost, longevity and relative ease of substitution of items by services generally applicable to movable equipment from those factors for plant and fixed equipment would be addressed. Whereas plant and fixed items usually have much higher costs associated with them, require longer term commitments of money, and reduce hospital management flexibility to adjust or substitute for them, moveable equipment costs generally offer much shorter time-frames and lower cost factors which management can act on in a shorter period. As a result we are considering the possibility of including immediately all moveable equipment costs in the Federal prospective payment rates from the beginning of the transition period and providing a blend of Federal and hospital-specific amounts only for plant and fixed equipment during a lengthened transition. The amount included in the Federal rates would be based on the relative national percentage breakdown these two categories as estimated from cost reports and applied to all hospitals regardless of an individual hospital's actual ratio of plant and fixed equipment costs to their moveable equipment costs. Our objective in taking this approach would be to provide a transition period only for that portion of the costs for which hospitals require long time periods to adjust their operations and plans.

A variation on this approach would be to pay hospitals based on the costs reported in their 1988 cost reports for plant and fixed equipment related to debt service (principal and interest) and lease costs. Depreciation, as it is currently defined would not be paid on a hospital-specific basis. The actual allowable principal, interest and lease costs would have to be determined on a hospital by hospital basis, and payment could be continued either for the life of the asset or for a defined period of time. Thus, we would include all moveable equipment costs and the remainder of costs from fixed equipment and plant (after excluding the actual principal, interest and lease costs) in the standardized Federal rate. The basis for the hospital-specific payment would be limited to the hospital's actual debt service expenses for fixed equipment and plant. This approach would recognize the costs of debt and long term leases related to long-term obligations. However, funded depreciation as it is currently paid would not continue since it represents payment for replacement of plant and fixed equipment. This approach has the advantage that it provides for payment of existing hospital obligations related to plant and fixed equipment, allowing for a smoother transition to the per case payment system, and resolves a definitional issue of defining "old" capital. However, disadvantages include the need to significantly revise hospital cost reports, alter established accounting principles concerning depreciation, and perhaps adding administrative complexity to the existing system.

We have identified several problems that must be addressed before we could proceed with such approaches. Primarily, the data available from the Medicare cost reports are insufficient for purposes of making an exact distinction between plant and fixed equipment, and moveable equipment. The information in Medicare cost reports, for example, provides no identification of capital which is directly assigned to cost centers, whether interest is related to fixed or moveable equipment, and so forth. Those estimates that are available from other sources vary greatly, and generally use definitions of capital items that differ somewhat from Medicare.

A national proportion, of course, could be set based on adjusting cost report data for undesignated capital-related costs that are directly assigned. We might also give consideration to using American Hospital Association (AHA) data and AHA's classification of useful lives of assets, and data from other sources. Likewise, in order to pay a hospital-specific amount based on this distinction from current cost report data, the rules currently applied to define these two capital categories in program instructions (the Provider Reimbursement Manual, HCFA Pub. 15–1, sections 104.2 and 104.3 as distinct from sections 104.4 and 104.5) would have to be applied on a consistent basis from the hospital-specific base-year categories to all existing and new items and services during the transition period. This would be necessary to maintain the original proportions established to set the capital-related rate for plant and fixed equipment.

We believe that this phase-in approach could represent, administratively, a more complex system but would be beneficial in recognizing the difference between planning for and incurring the two types of capital expenditures and the different effects of the prospective payment system on hospital decisions regarding these cost components. Moveable equipment is purchased and turned over more frequently than plant or fixed equipment. Thus, hospitals which have invested highly in moveable equipment would not be as adversely affected by incorporating that component into the standardized capital-payment rates

immediately as they would be in the case of plant and fixed equipment. We believe that the majority of costs for moveable equipment acquired prior to implementation of the prospective payment system have been recovered already, reducing the need for a transition period for this component, as prospective payments would support future purchases. In fact, immediate inclusion of moveable item costs into the prospective payment system would provide funds for hospitals that have not been able to afford such purchases in the past.

While the two major components of capital items suggest a logical distinction be made in treatment for purposes of incorporating capital-related costs into the prospective payment system, the feasibility of doing so must be considered preminently in any decision on this option. On the other hand, hospital managers could simplify their budgeting process since they would know exactly how much payment would be received for moveable equipment and address more clearly the longer term planning and debt aspects of plant and fixed equipment. Similarly, we could address more readily concerns that may arise in a transition to fully standardized capital-related payments with a more homogeneous capital-related component limited to plant and fixed equipment. Unlike moveable equipment, for example, fixed equipment and plant costs continue for extended periods. Thus, hospitals would be more clearly in need of a longer transition period to enable them to meet the costs of such capital projects that they are currently engaged in or recently completed. Other remedies for hospitals significantly disadvantaged by phasing in a standardized rate for long-term capital items would be more readily targeted by other adjustments we could devise to assist them as well, such as an exceptions process. Comments on these interactive aspects of this proposal are specifically solicited.

2. Alternative Payment Bases—Rolling Base Year

Rather than paying the base year capital-related cost per discharge trended forward by inflation, the actual cost for each year could be used in making the hospital-specific portion of the blended amount in each transition year. The goal of this approach is to provide recognition for capital-related costs in the same manner as the hospital must do in meeting actual current expenses during the transition. Since hospitals may have made commitments for capital items and services in the immediate past which will bring added expenses during the transition, this approach would address the actual changes from year-to-year during the phase-in period.

We are concerned that use of a rolling base year, while addressing actual market place activity in a cost reimbursement mode, may have additional disadvantages. It may act as an incentive to hospitals to continue to substitute capital purchases for other operating cost components as appears to have been the case during the period while capital-related costs were a pass-through and paid under cost reimbursement principles. This would reduce incentives for hospitals to review and revise their past practices.

We would assume that hospital managers will not make extensive capital commitments when eventually faced with fully standardized payments if a rolling base-year calculation method were used. Also, the rolling base-year approach would better recognize the increased capital costs that a hospital may have committed itself to prior to implementation of the proposed changes on capital policy. Using a rolling base, however, continues to insulate providers, at least partially, from the risk inherent in assuming new financial obligations. During transition, a hospital continues to get a proportion of its costs, regardless of how prudent the acquisition is in light of changing Medicare program rules.

Of course, use of actual costs during transition would ease problems associated with long-term debt commitments that hospitals incur for capital-related items and services. This option would also be simpler to administer and ease the transition for more hospitals than it would disadvantage.

3. Transitional Exception Process for Hospitals Disadvantaged by Phasing Capital-Related Payments Into the Prospective Payment System

Under this option, we would consider a procedure to provide additional capital payments, or an increased level of payment, to hospitals that are financially disadvantaged by the change-over from cost reimbursement to average standardized payments for capital-related items and services. It has been suggested that within certain parameters such hospitals could be assisted from the pool of funds available for capital payments in order to meet their obligated capital-related expenditures when the capital-related payments fall substantially below the capital-related costs.

We believe that a reasonable approach to address this problem could be to provide an exception procedure for qualifying hospitals.

Under this approach an exception process would be established pursuant to the general authority granted to the Secretary under section 1886(d)(5)(C)(iii) of the Act to provide for exceptions and adjustments to prospective payment amounts as is deemed appropriate. The amounts to be paid under the capital payment exception process would be funded by a reserve of funds obtained by reducing the average standardized capital-related payment rates by a percentage sufficient to generate a pool equal to the amount estimated to be paid to hospitals meeting the exception criteria. This manner of assuring funds for eligible hospitals would be based on the comparable provisions in the law under section 1886(d)(2)(E) of the Act for similar payments made for routine operating cost outliers, and the general interest of the Congress and the Administration to maintain payment equity in new prospective payment system program initiatives. The amount of the reserve would be determined by an estimate of the expected amount of exceptions that would be granted based on the criteria for eligibility that is promulgated. We would anticipate a reduction of 5–10 percent in the capital-related standardized amounts for this process.

The criteria that we anticipate would be pertinent to easing a disadvantaged hospital's financial situation during the transition period would be specified within the following parameters:

(a) The first criterion that we would apply would be a test of the overall financial condition of the hospital. This would be done by setting a debt/equity ratio threshold that the hospital must meet before it could be eligible for any additional payment or rate adjustment. We believe that a ratio of current assets to current liabilities which exceeds 200 percent for the applicable hospital fiscal year would be an appropriate level for this threshold but we seek suggestions for a different level that can be strongly supported.

(b) Another criterion that a hospital would be required to meet in order to be eligible for an additional capital-related payment, or adjustment to its rates, would be a capital-related expense versus capital payment difference which exceeds a specified threshold. In a given transition year, based on its audited cost report, only those hospitals with inpatient per discharge capital-related costs in excess of 200 percent of the Medicare adjusted standardized capital payment for their payment area (region and urban and rural location) in that

fiscal year would be considered further. In determining the actual allowable capital-related expenses to be used in comparing the capital-related cost per discharge to the applicable capital payment rate, only costs associated with capital-related items and services that were obligated before a specified cut-off date, for example, before January 1, 1986, would be considered. We invite comments on the elements of this criterion that we have specified, that is the level (200 percent) of inpatient per discharge capital-related costs and the date (January 1, 1986) by which obligations must have been made.

(c) The final criterion we establish would be to consider the hospital's actual allowable total Medicare inpatient operating costs (including capital-related costs) for the applicable fiscal year, based on its audited cost report for that period, in comparison with its total payments under the prospective payment system provisions applicable to that period. We would condition approval of any additional payment or rate adjustment for capital-related items and services on whether the combined Medicare inpatient operating cost to payment ratio of each facility was negative before approving any adjustment for the capital-related component.

A hospital would have to meet all of the above criteria before an exception could be granted to its capital payments. Thus, for example, if the criteria suggested above were employed as stated, a hospital would have to have a ratio of current assets to liabilities of 200 percent or more, per discharge capital-related costs at least twice their capital-related standardized amount and total inpatient cost per discharge in excess of their total prospective and pass-through payment per discharge (capital and non-capital payments per case) in order to be considered for an adjustment under this option.

We believe that these criteria are essential as a minimum set of standards to measure the appropriateness of the need for a hospital which requests an exception to its capital-related transition payments and provide equitable treatment to all classes of hospitals regardless of location, size or other situational factors. The type of criteria selected should not undermine the overall program goals established for the prospective payment system with respect to inpatient operating costs subject to this program. Thus, these rules have been considered because they would not require reverting back to reasonable cost reimbursement rules and procedures, add significant reporting requirements, nor interfere with the intent to make Medicare inpatient payments neutral with respect to inherent incentives for management to substitute capital items and services for other operational approaches to providing service. We also believe it is extremely important to assure that hospitals that are benefiting from prospective payments for non-capital operating costs under the prospective payment system do not receive an additional advantage because only one component of the facility's inpatient operation far exceeds the average cost of other facilities in its payment areas.

We recognize that under this exception process and the criteria we would use, not all hospitals for which the standardized capital payment level is initially less than required to meet their total capital-related expense obligations will be assisted. In particular, there will be hospitals that will marginally miss meeting the criteria. However, without recourse to a methodology which, de facto, would return the program to a surrogate cost reimbursement basis, it would be administratively infeasible and excessively costly to address each hospital's situation uniquely in an incremental fashion. Such an approach clearly would subvert the expressly stated congressional intent in establishing the prospective payment system, that is, to move toward a fully prospective payment for inpatient hospital operating costs.

While we are aware that making provisions for such an adjustment for capital payments will reduce the average Federal payment rate that the majority of hospitals will be paid, we believe this method is reasonable and supportable within the context of the prospective payment system. We expect that reduction of the average capital payment rate would not exceed ten percent of the rates under this provision. The rate reduction would not affect the hospital-specific payment to each hospital and that component of the blend will be higher in the early years of the transition. Furthermore, at the time the exception process reduction ceases, the reserve would be returned to the pool of prospective payment system funds.

We believe that along with the broad authority of the Secretary to provide for such adjustments and exceptions, the pattern established by law in providing for special outlier payments for the non-capital operating costs associated with long-stay or high-cost cases (which called for a special mechanism so that some hospitals are not significantly disadvantaged by such cases) clearly applies to such a major additional component of operating costs as capital-related expenses represent. Thus, providing for an exception process and the pool of funds necessary to administer it appears to be the most equitable and reasonable approach to this problem.

In order to assure the actuarial soundness of the adjustments provided under this approach, we would limit the amount that could be paid to a hospital eligible for the exception. We anticipate that the additional payments or adjustments would be limited to a percentage of the excess of determined costs above the payment cut-off level, with an additional test to assure that the adjustment under this exception would not increase the total of Medicare inpatient hospital payments above total Medicare inpatient hospital costs in the pertinent cost reporting period.

4. Lengthening the Capital Payment Transition Period

Our proposal currently would result in a four-year declining straight-line blend for the hospital-specific portion and Federal rate components, although we are considering a longer phase-in period than the four years stated in our proposal which conforms with the prospective payment phase-in for other operating components of inpatient costs. Our objective is to assure that facilities have adequate time to adjust and plan for standardized capital payments that are fully integrated into total operating Federal-level rates of payment. While the non-capital operating expenses are being phased into the prospective payment system within four years, there are persuasive arguments supporting consideration for a longer transition for capital-related items and services. Those include the generally accepted fact that planning and commitments for capital-related expenditures are made well in advance of purchase or construction and represent a longer term and obligatory payout period. These factors limit the flexibility that organizations have to adjust to changes in revenues as quickly as can be expected in the case of most other operating cost components.

Nevertheless, such an approach could disadvantage many hospitals which have capital costs per case that would fall below the average standardized capital rates. In such cases, it is important to move ahead rapidly to replace their cost reimbursement payments, particularly where they need to begin replacement or expansion. A speedier transition, we believe, could

benefit many of those under-capitalized urban nonprofit and rural facilities. However, the apparent benefits must be weighed carefully in light of the inappropriate incentives of the current hospital-specific cost reimbursement policy which, as the basis of this entire program initiative, should be changed as quickly as possible. Of course, the anticipation of full incorporation of capital-related costs into the Federal standardized rates over a longer transition period should provide adequate incentive for hospitals to make adjustments to their planning and operations. Furthermore, we do not believe that any hospitals would be severely disadvantaged if this option is adopted.

This option appears to be less dependent on the remaining alternatives discussed here than those are on each other. Since lengthening the transition can be considered more directly related to the intractability of reducing or substituting other items and services for capital-related factors rather than the adequacy of the level of payment in this conversion process, it can be viewed as having less impact on the other options presented here.

5. Variations in Blending Federal and Hospital-Specific Rates During Transition

We are also reviewing the impact of using other than a straight-line declining blend for the hospital-specific rate in order to ease transition for hospitals whose capital-related expenses are substantially above the average due to recent construction, refinancing and other reasons. The objectives in this approach are to ease transition for such hospitals, recognizing the binding commitments made to their funds and recognize the distinction between other operating costs and the capital-related component.

Should a method of blending transition rates weighted toward increased hospital-specific portion percentages in the first years be warranted, we would increase the hospital-specific portion in the earlier years of transition so that those would roughly be double the respective later years of transition. Examples of this, varying according to length of transition period, are:

- 4-Year transition:

Year	Hospital-specific rate (percent)	Federal rate (percent)
1	80	20
2	70	30
3	50	50
4	30	70

- 7-Year transition:

Year	Hospital-specific rate (percent)	Federal rate (percent)
1	95	5
2	90	10
3	80	20
4	70	30
5	50	50
6	30	70
7	10	90

While we recognize that a blending weighted toward higher hospital-specific rates in the earlier years will help ameliorate the impact on hospitals with high capital-related costs per case and delay the advantage to a nearly equal proportion of hospitals below the average, we are most concerned that the former group will not have as much incentive to act quickly to adjust their capital-related component. This applies equally to the preceding option and, in concert, both may tend to delay appropriate action on the part of some facilities.

Further, if this option is selected, it may reduce or eliminate the need for other options (rolling base year, exception process) to be selected. We believe that use of several or all of the options presented here could be detrimental to the program's intent, that is, to increase hospital efficiency through more appropriate payment incentives and to establish a single payment per case as rapidly as is supportable.

6. Adjustment to Hospital-Specific Rates for Low Occupancy

The present proposal does not address situations in which some hospitals with low occupancy would be paid for their capital-related costs on the same basis as all other hospitals. Since some hospitals fall far below the average national levels for patient days per bed available and one of the major objectives of the prospective payment system is to provide incentives to reduce unused hospital beds available in this country, we believe this factor could be dealt with in developing the hospital-specific rate for such facilities. Whereas the Federal rates will provide incentives for overbedded hospitals to reduce unused resources, the hospital-specific portion of the capital payment blend during transition does not necessarily reinforce this incentive. This could be particularly onerous if the transition period were to be extended and a rolling base year used in computing the hospital-specific capital payment amount. As a result, we believe that a hospital-specific calculation based on a rolling base year could be changed to provide an adjustment when the occupancy rates are significantly below the national average. If, for example, the Secretary established the appropriate threshold at a total occupancy rate of 60 percent, when a hospital meets or falls below that threshold, the computation of the hospital-specific rate for that period would be modified as follows:

In determining the Medicare portion of the hospital's inpatient capital-related cost per diem in the cost report for the applicable period, we would inflate the number of total inpatient days in the cost reporting year by the percentage difference between the hospital's actual occupancy rate in that period and the 60 percent threshold to arrive at the cost per diem to be used in deriving its total inpatient capital-related cost for the period. Since that amount is used to establish the facility's total Medicare capital-related cost per case, an appropriate and proportional reduction in its rate per case would result in making the hospital capital payment for any such period. Thus, for example, a hospital with a 40 percent occupancy rate in a transition year would have its total inpatient days increased as though the hospital was operating at a 60% occupancy level, thereby reducing its cost per diem in the same proportion.

We believe this is a reasonable approach to build in an incentive for hospitals to reduce excess capacity. It is comparable to that which would exist on the Federal rate side of the capital payment rate and is necessary to such a balanced approach to immediately address this problem on a national level. We are, of course, particularly interested in the public's and industry's views on this method of dealing with this issue. Comments on this option should also focus on the appropriate threshold occupancy rate, which could be significantly different from the 60 percent level used in the example above.

E. ProPAC Recommendations on Capital Payment

The inclusion of capital into the prospective payment system represents one of the most significant changes to the system to date. The considerations regarded by ProPAC as most important in this process are that the capital payment system should—

—Provide for neutrality between capital and other operating expenditures;
—Reflect capital intensity variations across the DRGs and

—Contributes to controlling aggregate expenditures and the level of capital growth.

ProPAC devoted considerable attention to this area and made four specific recommendations.

1. Including Capital in the Prospective Payment System (Recommendation 5)

Beginning in FY 1987, the Secretary should initiate a transition to all-inclusive prospective prices that combine operating and capital-related cost components in a single prospective payment per case for hospitals.

ProPAC contends that retrospective cost-based reimbursement for capital-related costs lacks incentives for hospitals to minimize overall investment costs. Instead, it promotes insensitivity to interest rates and alternative financing methods. In addition, some hospitals may have invested in capital to produce services that exceed the demands of the inpatient hospital services market.

The combination of the Medicare prospective payment system and the capital pass-through has introduced additional distorted incentives to substitute capital for labor or other operating costs. As a result, a hospital that substitutes capital-related costs for operating costs (and assumes the risk of additional capital acquisition) receives more in total Medicare payments (that is, hospitals receive fixed DRG payments plus increased cost reimbursement for capital-related expenditures) than a hospital that does not substitute capital-related costs for operating costs due to the fact that the former is paid on a total allowable cost basis, while the latter is a standardized (that is, limited) amount of payment in all cases.

ProPAC strongly believes that the capital payment policy adopted should provide neutrality in capital-related cost and operating cost trade-offs. The payment method should not favor either capital-related or operating costs. Instead, it should encourage hospital managers to choose the optimal combination of those cost components. An all-inclusive payment rate would allow individual providers the flexibility to make what they consider to be the most cost-effective decisions based on the unique characteristics of their institutions.

We agree with the ProPAC views set forth describing the—

- Problems associated with paying for capital-related costs under cost-based reimbursement;
- Benefits of incorporating capital-related costs into an all-inclusive prospective payment rate; and
- Necessity of making this change at the earliest feasible time.

We also agree with the ProPAC observation that use and payment for capital-related cost items and services in inpatient and outpatient settings could overlap, and thereby result in unintended hospital practices and payment strategies. However, we believe that the ProPAC recommendations would not alleviate these concerns in a manner that is measurably more effective than the proposals we are presenting in this document for incorporating capital-related costs into the prospective payment system.

2. Capital Payment Method (Recommendation 6)

ProPAC recommends that the Federal portion of capital payments should be calculated as a fixed percentage add-on to the standardized amounts beginning in FY 1987 and that the Secretary should immediately develop capital components to be added to the hospital market basket. When appropriate data become available, the components of prospective payments should be recalculated to reflect the addition of capital costs. The results of this recomputation should be implemented as soon as possible, but no later than FY 1988.

Rather than using a percent add-on, we are proposing to use a fixed amount add-on to the prospective payment standardized rate for capital-related services. We would use this method since we have actual capital-related expenses from audited cost reports for the applicable base year. Furthermore, this approach conforms to the method used to develop the Federal rates for other operating costs when we implemented the prospective payment system. It should also be noted, that based on ProPAC's recommendations for setting the level of capital-related payments, separate trending and index factors also would be required. Differing factors for plant and fixed equipment, and movable equipment would be necessary because proxies for those items from manufacturing to interest rates would vary. Thus, we do not believe that full integration of the payment components could be accomplished during the phase-in period under any mechanism which deals with the components of capital-related items and services independently and involves a transition period to merge capital-related costs with all other operating costs. Only after the transition period would all operating cost components be merged into one, indistinguishable payment rate.

3. Level of Capital Payment (Recommendation 7)

ProPAC recommends that capital payment should be added to the Federal portion of the prospective payment rates for hospital accounting years beginning in FY 1987 in the following steps:

- For building and fixed equipment, average actual Medicare capital-related costs per discharge for FY 1985, projected forward to FY 1987 by an index of construction capital costs.
- For movable equipment, average actual Medicare capital costs per discharge for hospital cost reporting year FY 1983, projected forward to FY 1987 by an index of equipment capital costs.
- The proportion attributed to moveable equipment should be the lesser of the FY 1983 proportion or 40 percent.

ProPAC's basis for a capital-related payment mechanism distinguishes between plant and fixed equipment and moveable equipment. We believe ProPAC's approach represents a reasonable position, one which we have explored as well based on suggestions from the hospital industry and others during the past three years. However, we have not incorporated this approach in our proposal but will continue to consider it as a possible option pending further review of the data available, the potential complexity of this approach, and the comments received on this option before we make a final decision.

A national proportion could be set based on consideration of American Hospital Association (AHA).

ProPAC estimates that its proposal for the level of capital payment combined with the transition period will result in savings of approximately $8 billion over current pass-through payments during the next five years. For a more detailed discussion of the cost savings and impact of our proposed changes for capital payment, we refer the reader to the Regulatory Impact Analysis in Appendix B of this document.

4. Capital Payment Transition (Recommendation No. 8)

ProPAC recommends that the transition to Federal capital payments under the prospective payment system should begin in FY 1987 in accordance with the following provisions:

- There should be no transition for moveable equipment. All payments for moveable equipment should be included as a fixed percentage add-on to the Federal standardized amounts beginning in FY 1987.

• Payment for plant and fixed equipment should be phased in as a fixed percentage add-on to the Federal standardized amounts over a seven- to ten-year period on a straight line basis.

• For plant and fixed equipment, the hospital-specific capital payment portions should be based on the actual costs incurred during each year of the transition.

• During the transition, the Federal portion for plant and fixed equipment should be updated each year by an index of construction costs.

• The addition of capital to the Federal standardized amounts should reflect base-year treatment of return on equity and interest offsets. Return on equity payments should be added to the hospital-specific portion of operating costs. Once the transition to fully national rates for operating payments ends, there should be no hospital-specific payment for return on equity.

As noted in the explanation and discussion to the preceding recommendation, this approach is being assessed further by us in our consideration of alternative methods for incorporating capital-related costs into the prospective payment system.

ProPAC recommends that the addition of capital to the Federal standardized amounts should reflect base-year treatment of return on equity and interest offsets. Section 9107 of Pub. L. 99–272 precludes addressing return on equity payments as part of the capital-related payment being incorporated into the prospective payment system. As we indicated earlier, the changes to return on equity capital provision in section 9107 will be addressed in another rulemaking document.

III. Proposed Rebasing and Reweighting of the Hospital Market Basket

A. Background

For cost reporting periods beginning on or after July 1, 1979, we developed and adopted a hospital input price index (that is, the hospital "market basket") in establishing the limits on hospitals' routine operating costs (44 FR 31802). The percentage change in the market basket reflects the average change in the price of goods and services purchased by hospitals to furnish inpatient care. Traditionally, we have used the market basket to adjust hospitals' cost limits by an amount that reflects the average increase in the prices of the goods and services used to furnish routine care. This approach linked the increase in the cost limits to the efficient utilization of resources.

With the inception of the prospective payment system on October 1, 1983, we have continued to use the market basket to update each hospital's 1981 inpatient operating cost per discharge used in establishing the FY 1984 standardized payment amounts. In addition, the projected change in the market basket is one of the integral components of the update factor by which the FY 1984 prospective payment rates were updated for FY 1985 and FY 1986. An explanation of the market basket used to develop the prospective payment rates was published in the **Federal Register** on September 1, 1983 (48 FR 39764). For additional background information on the market basket index, we refer the reader to the article by Freeland, Anderson, and Schendler, "National Hospital Input Price Index," *Health Care Financing Review*, Summer 1979, pp. 37–51.

The market basket is a Laspeyres or fixed-weight price index constructed in two steps. First, a base period is selected and the proportion of total expenditures accounted for by designated spending categories is calculated. These proportions are called cost or expenditure weights. In the second step, a rate of increase for each spending category is multiplied by the expenditure weight for that category. The sum of these products for all cost categories yields the percentage change in the market basket, an estimate of price change for a fixed quantity of purchased goods and services.

The market basket is described as a fixed-weight index because it answers the question of how much more it would cost at a later time to purchase the same mix of goods and services that was purchased in the base period. The effects on total expenditures resulting from changes in the quantity or mix of goods and services purchased subsequent to the base period are not considered. For example, shifts in the furnishing of a certain type of inpatient care to an outpatient setting might affect the volume of inpatient goods and services purchased by the hospital but would not be factored into the market basket.

The market basket that is currently in effect reflects base-year data from 1977 in the construction of the cost weights. In its April 1, 1985 report to the Secretary (described in Appendix C of our June 10, 1985 proposed FY 1986 prospective payment update (50 FR 24446)), ProPAC suggested that the market basket cost weights should be recalculated or "rebased" at least every five years or more frequently if significant changes in the weights occur.

We agree that it is desirable to rebase the market basket cost weights periodically in order to reflect changes in the mix of goods and services that hospitals purchase (hospital inputs) in furnishing inpatient care. The five-year interval that ProPAC recommended coincides with the frequency of a survey conducted by the Department of Commerce, Bureau of Economic Analysis, on industry input consumption. This survey, most recently described in the report, "The Detailed Input-Output Structure of the U.S. Economy, 1977", contains a detailed source of information on hospital input expenditures. In the September 3, 1985 final rule (50 FR 35684), we stated that we were in the process of developing rebased market basket cost weights that would reflect later data. We also stated that we would consider revising the market basket cost weights if additional costs, such as capital-related costs, were incorporated into the prospective payment system.

B. Rebasing and Reweighting the Market Basket Index

In this rule we are proposing to use a revised market basket in developing the FY 1987 update factor of the prospective payment rates. The new market basket would be revised as follows:

• We would rebase to reflect 1982, rather than 1977, cost data.

• We would expand the number of market basket cost categories from 14 to 32.

• We would add four categories for capital-related costs.

• We would modify certain variables used as the price proxies for some of the cost categories.

In developing the revised market basket, we reviewed hospital expenditures for the market basket cost categories. Preliminary data on hospital expenditures for the seven major operating expense categories (wages and salaries, employee benefits, professional fees and contracted nurses, depreciation, interest, utilities, and a residual "all other" category) were collected using 1982 data on Medicare participating hospitals from the 1983 AHA's Annual Survey. The AHA data include capital-related expenditures. No adjustments were made for hospitals with missing or AHA-imputed values. We then determined, for each category, the proportion it represents of total inpatient cost. These proportions represent the revised market basket weights. This approach is consistent with the way those values were calculated in 1979 using 1977 data. AHA's Hospital Administrative Survey provided the weight for malpractice insurance premiums that, although a median value, approximates the average

derived from an analysis of malpractice premium cost data using preliminary Medicare cost report data. Weights for the sub-categories within the residual category less malpractice, and other capital-related items, and for sub-categories within utilities were derived by projecting forward the U.S. Department of Commerce, Bureau of Economic Analysis' 1977 Hospital input and output data to 1982 using appropriate price proxies.

This work resulted in the identification of 32 separate cost categories in the rebased market basket. The differences between these categories and the ones used for the current 1977 based categories are summarized in the table below, and are as follows:

- Capital-related items (that is, depreciation split into fixed and movable equipment, interest, and other capital-related) were determined.
- Motor gasoline was disaggregated under utilities.
- Photographic supplies, paper products, minor machinery and equipment, miscellaneous equipment, computer data processing services, telephone, blood services, postage, and all other labor-intensive services and nonlabor-intensive services were made explicit under "all other products and services." A more detailed description of each category and respective price proxy is provided in Appendix A of this document.

TABLE A.—COMPARISON OF 1977 AND 1982 REBASED WEIGHTS AND COST CATEGORIES, INCLUDING CAPITAL

Expense categories	1977 market basket weights	Rebased 1982 market basket weights excluding capital	Rebased 1982 market basket weights including capital
1. Wages and salaries[1]	57.24	56.83	51.75
2. Employee benefits	8.22	8.90	9.08
3. Other professional fees	0.59	0.76	.70
4. Capital			7.22
a. Depreciation			4.16
(1) Fixed equipment			3.07
(2) Movable equipment			1.09
b. Interest			2.42
c. Other			.74
5. Energy and utilities	2.76	3.16	2.94
a. Fuel oil, coal, and other fuel	1.07	1.16	1.07
b. Electricity	0.77	1.09	1.01
c. Natural Gas	0.57	0.47	0.44
d. Motor gasoline		[2] 0.42	0.39
e. Water and sewage	0.36	0.03	0.03
6. Malpractice insurance	1.96	0.66	0.61
7. All other	29.23	29.79	27.66
All other products		21.05	19.50
a. Pharmaceuticals	2.82	4.10	3.80
b. Food	3.56	3.56	3.30
(1) Contract service	1.76	2.27	2.10
(2) Direct purchase	1.78	1.28	1.20
c. Chemicals and cleaning products	2.16	2.19	2.50
d. Surgical and medical instruments	2.03	2.36	2.20

TABLE A.—COMPARISON OF 1977 AND 1982 REBASED WEIGHTS AND COST CATEGORIES, INCLUDING CAPITAL—Continued

Expense categories	1977 market basket weights	Rebased 1982 market basket weights excluding capital	Rebased 1982 market basket weights including capital
e. Photographic supplies		[3] 2.28	2.10
f. Rubber and plastics	1.84	2.16	2.00
g. Paper products		[3] 1.19	1.10
h. Apparel	1.85	1.08	1.00
i. Minor machinery equipment		[3] 0.43	0.40
j. Miscellaneous products		[3] 0.76	0.70
All other services		8.74	8.10
a. Business services	4.70	3.02	2.80
b. Computer and data processing		[4] 1.40	1.30
c. Transportation and shipping	1.72	1.08	1.00
d. Telephone		[3] 0.76	0.70
e. Blood services		[3] 0.54	0.50
f. Postage		[3] 0.32	0.30
g. All other services: Labor intensive		[4] 0.97	0.90
h. All other services: Non-labor intensive		[4] 0.65	0.60
All other miscellaneous	8.75		

[1] In the rebased market basket, wages and salaries are composed of nine subcategories that correspond with the Employment Cost Index categories (Professionals and technicians, Managers, Sales, Clerical workers, Craft and kindred, Operatives except transport, Transport equipment operatives, Nonfarm laborers, and Service workers).

[2] This category was formerly incorporated into the original category—Fuel Oil, Coal, and Other Fuel.

[3] These categories were formerly incorporated into the original residual category, "All Other Miscellaneous."

[4] These categories were formerly incorporated into the original Business Services Category.

As shown in the table, the weights for a number of cost categories (current categories) declined from their 1977 level; namely, those weights for wages and salaries, malpractice insurance premiums, food at later stages of distribution, natural gas, water and sewerage, business services, transportation and shipping, and apparel. Weights for all the other categories increased.

The market basket weights published on September 1, 1983 (48 FR 39645) incorporate 1977 base-year cost-weights that were combined with differences in the rate of price proxy movements through 1981 to reflect their "relative importance" as a result of price changes in each variable. We have similarly adjusted the 1982 market basket cost weights shown above to reflect forecasted inflation through calendar year 1986. The 1986 relative importance weights for the rebased market basket cost categories are shown in Table 2 of section IV of the addendum.

In the September 1, 1983 interim final rule, for purposes of determining the labor-related portion of the standardized amounts, we summed the percentages of the labor-related items (that is, wages and salaries, employee benefits, professional fees, business services, and miscellaneous items) in the market basket (48 FR 39765). This summation resulted in a labor-related portion of the market basket of 79.15 percent and a nonlabor-related portion of 20.85 percent.

Sections 1886(d)(2)(H) and (d)(3)(E) of the Act require that, in making payments under the prospective payment system, the Secretary adjust the proportion (as estimated by the Secretary from time to time) of payments that are wage-related. Since the inception of the prospective payment system, we have considered 79.15 percent of costs to be labor-related. This percentage was derived by adding the 1981 relative importance weights of those categories from the hospital market basket that were considered labor-related (see 48 FR 39765 for a further explanation).

In connection with the rebasing and reweighting of the hospital market basket we have, under the authority of the applicable section of the statute cited above, re-estimated the labor-related share of the standardized amounts. Based on the relative weights (excluding capital) described in Table 2 of section IV of the addendum, the labor-related portion (based on wages and salaries, employee benefits, professional fees, business services, computer and data processing, blood services, postage, and all other labor-intensive services) would be 75.04 percent (and therefore subject to the hospital wage index adjustment) and the nonlabor-related portion would be 24.96 percent. To implement this change, effective with discharges occurring on or after October 1, 1986, we recomputed the labor-related and nonlabor-related shares of each hospital's base year costs used to establish the prospective payment rates, and then followed the procedures discussed in the September 1, 1983 interim final rule in order to obtain revised labor-related and nonlabor-related standardized amounts (see 48 *FR* 39765–39766).

The restandardized amounts in Table 1 of section IV of the addendum reflect the revised labor-related and nonlabor-related portions. It should be noted that, because of the revision of the labor and nonlabor proportions, the labor portions of the rates published in Table 1 of this proposed rule have decreased from those published in the May 6, 1986 interim final rule (51 FR 16778), even though they reflect the increase of 0.5 percent. Similarly, the nonlabor portions in Table 1 have increased more than 0.5 percent because they now are based on a nonlabor proportion which is greater than the nonlabor proportion reflected in the rates published on May 6, 1986.

C. Selection of Price Proxies

After the 1982 cost weights for the rebased market basket were computed, it was necessary to select appropriate wage and price proxies to monitor the rate of increase for each expenditure category. Most of the indicators are based on Bureau of Labor Statistics (BLS) data and are grouped into one of the following four BLS categories:

- *Producer price indexes*—Producer price indexes are used to measure price changes for goods sold in other than retail markets. They are the preferable proxies for goods that hospitals purchase as inputs as part of the process in producing their outputs. These indexes, which are fixed-weight, measure "price" change at the producer or intermediate stage of production.
- *Consumer price indexes*—Consumer price indexes measure change in the prices of final goods and services bought by the typical consumer. Similar to the producer price indexes, they are fixed-weighted. Because they do not represent the price faced by the producers, the consumer price indexes were used if no appropriate producer price index was available, or if the expenditure was more similar to that of retail consumers in general, rather than a purchase at the wholesale level.
- *Employment cost indexes*—Employment cost indexes measure the rate of change in employee wage rates per hour worked. These indexes are fixed-weight indexes and thus measure strictly the change in wage rate and are not affected by shifts in employment mix.
- *Average hourly earnings indexes*—Average hourly earnings indexes are used to weight the hourly earnings for various occupations within a given industry and, therefore, reflect a weighted employment mix for a particular industry. The average hourly earnings index series is calculated by dividing gross payrolls by total hours, and measures actual earnings rather than wage rates. It is a current-weight rather than a fixed-weight index, and thus reflects shifts in employment mix.

Our proposed price proxies for the rebased prospective payment system market basket are summarized in Table II of the addendum. For a more detailed explanation of each of the price proxies, we refer the reader to Appendix A of this document. However, because we are proposing to revise the price proxy substantially for the wages and salaries category (the highest-weighted category) of the market basket based on a model developed by HCFA, we are providing a separate discussion of the new price proxy for the wages and salaries portion of the rebased market basket. For purposes of this discussion, we refer to the revised wages and salaries price proxy as the HCFA hospital occupational index.

D. The HCFA Hospital Occupational Index

Wages and salaries represent the largest single component of the hospital market basket, accounting for 52 percent of overall inpatient costs. Currently, the market basket increases in hospital wages and salaries are measured by using the average hourly earnings index for the hospital industry (Standard Industrial Classification 806), a data series collected by BLS.

In its April 1, 1985 report to the Secretary, ProPAC observed (in Recommendation Nos. 4 through 6) that the average hourly earnings series do not separate changes in inflation from changes in the mix of hospital workers over time. That is, rapid increases in average hourly wages could reflect changes in skill mix instead of in wage rates. ProPAC also expressed concern that HCFA's use of a price change measure specific to the hospital industry for the wages and salaries category allows hospital behavior to unduly influence increases in the market basket. For example, if the average hourly earnings series rises at a relatively high rate (as it did under the cost-based reimbursement system prior to the prospective payment system), exclusive use of a hospital industry series would permit hospitals to increase wages at a faster rate than other industries, even when unwarranted. Conversely, if growth in hospital wages and salaries is slower compared to other industries (such as in response to the prospective payment system or other incentives for cost containment), the market basket would reflect this behavior, and could provide an incentive for restricting wage increases for hospital employees.

To address these concerns, ProPAC recommended that separate wage and salary categories for occupational groups should be created to take into account the broad changes in skill mix among managers, professionals, and other hospital workers. ProPAC suggested that changes in wages for these categories should be measured using a combination of internal and external proxies as follows:

- Managers and Administrators—Employment cost index.
- Professionals and Technicians—A 50–50 blend of the average hourly earnings for the hospital industry and the employment cost index for professionals and technicians.
- Other Hospital Workers—A 50–50 blend of the average hourly earnings for the hospital industry and the employment cost index for all private industries.

The issue of whether to use only an internal wage proxy (that is, one based exclusively on hospital wage and salary data), or a combination of internal and external (hospital and nonhospital) wage proxies, has been debated for some time. It is generally accepted that prices for most nonlabor hospital inputs are nondiscretionary or beyond the control of the hospital industry. To monitor price changes in these expenditure categories, external prices are used. Hospital wages and salaries, however, should not be considered totally beyond industry control since there are employee categories for which hospitals are the principal employer (for example, registered nurses).

By classifying hospital wages and salaries into specific broad-based occupational categories, it is possible to group wages and salaries into two groups, those for which an internal proxy is more appropriate, and those for which an external proxy is more appropriate. We believe we are refining ProPAC's recommendation by further disaggregating the mix of hospital workers into specific categories, and applying a combination of internal and external price proxies in the HCFA hospital occupational index.

HCFA's hospital occupational index groups hospital occupations into nine broad categories. For eight of these occupational groupings, we believe that hospitals compete for labor generally with employers outside the health sector. Accordingly, use of an employment cost index as an external price proxy for each occupation seems most appropriate. In the case of nurses' wages, especially those of registered nurses, as well as certain other health care technicians and professionals, the hospital market predominates, and this should be reflected in the use of an internal wage proxy. However, hospitals also compete with other industries to obtain certain other skilled professional and technical staff (for example, computer programmers). Therefore, for professional and technical workers, we believe a price proxy that reflects a 50–50 blend of internal and external wage increases is appropriate. The proxy for the wages and salaries component of the prospective payment system market basket reflects internal and external measures of price changes as follows:

HCFA HOSPITAL OCCUPATIONAL INDEX

Wages/salaries component 1982 market basket index	Wages/salaries percentage	Wage proxy
1. Professionals and technicians.	57.34	80-85 blend of: Average Hourly Earnings (Standard Industrial Classification (SIC) code 806) for nonsupervisory hospital workers; and employment cost index, wages and salaries, for professionals and technicians.
2. Managers	7.85	Employment cost index, wages and salaries, for managers and administrators.
3. Sales	.94	Employment cost index, wages and salaries, for sales workers.
4. Clerical workers	12.54	Employment cost index, wages and salaries, for clerical workers.
5. Craft and kindred	2.48	Employment cost index, wages and salaries, for craft and kindred workers.
6. Operatives except transport.	.89	Employment cost index, wages and salaries, for operatives except transport.
7. Transport equipment operatives.	.38	Employment cost index, wages and salaries, for transport equipment operatives.
8. Nonfarm laborers	.20	Employment cost index, wages and salaries, for nonfarm laborers.
9. Service workers	16.72	Employment cost index, wages and salaries, for service workers.
10. Total wages	100.00	Total weight for wages is 81.75.

We believe that the HCFA hospital occupational index would provide a more accurate and equitable basis for monitoring increases in the wages and salaries portion of the market basket, and that it responds to ProPAC's concern that the market basket should reflect labor market forces that are both internal and external to the hospital industry.

IV. Other Decisions and Proposed Changes to the Regulations

A. Elimination of Periodic Interim Payments (§ 405.454)

1. Background

Prior to implementation of the prospective payment system, all providers were reimbursed based on the lesser of the reasonable cost of services furnished to Medicare beneficiaries or the provider's customary charges for those services. Prospective payment hospitals currently continue to be reimbursed based on reasonable cost for certain expenses such as training nurses and allied health personnel. In addition, hospitals and hospital units excluded from the prospective payment system and most other providers are still reimbursed on the basis of reasonable cost.

Since actual reasonable cost cannot be determined until the end of a provider's cost reporting period, an interim rate, approximating actual cost as closely as possible, is determined by the intermediaries for each provider and interim payments are made during the year. These interim payments are required by section 1815(a) of the Act, which states that we must pay providers at least monthly during the cost reporting period, pending a final determination of cost on the basis of a submitted cost report and any necessary adjustments. The regulations that implement these policies are located at § 405.454. After receipt of the provider's cost report, the intermediary determines what the actual reimbursement for the period should have been and a retroactive adjustment is made.

There are two methods of interim reimbursement for inpatient hospital services for hospitals excluded from the prospective payment system. One method is based on actual bills submitted by the hospital. Under this method interim payments are calculated by applying a predetermined per diem amount to the number of days reflected on actual bills or by applying a predetermined percentage to the charges reflected on the actual bills submitted. The predetermined per diem amount or percentage factor applied to billed patient days or charges represents an estimate of the hospital's costs that will be incurred.

Under the second method, referred to as the periodic interim payment (PIP) method, interim payments are not based on individual bills. Instead, payment is based on the estimated annual costs attributable to estimated Medicare utilization of a hospital, and equal biweekly payments are made to hospitals without regard to the submission of individual bills. PIP has been available for inpatient hospital services since 1966. It was offered to qualified hospitals as an alternative to regular interim reimbursement, which requires submission of a bill to receive payment.

With either of these interim payment methods, any overestimation or underestimation of the hospital's actual costs, to the extent not adjusted during the year, is adjusted at the time of cost report settlement.

For those items or services reimbursed on a reasonable cost basis, we make interim payments to providers throughout the year based on the reasonable cost of the item or services furnished to beneficiaries during the year. Although the PIP method of interim payment is not based on actual bills submitted, a PIP provider must continue to submit bills for subsequent intermediary verification of the accuracy of the rate, as well as recording an individual's benefit utilization. The rate is reviewed twice per year for hospitals paid under the prospective payment system and at least quarterly for hospitals reimbursed on a reasonable cost basis. If necessary, as determined by the reviews, the rate is adjusted. Interim payments may be further adjusted at year end based on submitted cost reports.

Under the prospective payment system, hospitals are paid, for most of the Part A inpatient services they furnish, a prospectively determined amount for each discharge based on actual bills submitted. This amount constitutes final payment for each discharge claimed. Although no form of interim payment is necessary for hospitals operating under the prospective payment system, we extended the option to these hospitals to elect to receive PIP when the prospective payment system was implemented in order to avoid cash flow problems. Thus, § 405.454(m) provides that hospitals that meet the qualifications for receiving PIP set forth in § 405.454(j) may elect to receive this type of interim payment, which would be based on their estimated annual prospective payment amounts. In these circumstances, year-end reconciliation is required.

Payment for capital-related items [1] and those direct medical education costs that are payable on a reasonable cost basis continue to require interim payments pending a year-end reconciliation based on a cost report. These interim payments are determined by estimating the reimbursable amount for the year based on the previous year's experience and on information for the current year and dividing that amount into 26 equal payments made biweekly. In addition, the indirect teaching adjustment, if appropriate, is paid on a biweekly interim basis subject to final settlement. Biweekly payment for these items is the method of interim reimbursement required by current regulations (§ 405.454). Since a hospital

[1] As discussed above in section II, we are proposing to incorporate payments for capital-related costs into the prospective payment system via a four-year phase-in period, effective with cost reporting periods beginning on or after October 1, 1986. Those portions of the hospital's capital payments that continue to be reimbursed on a hospital-specific basis would also continue to be paid on an interim payment basis.

has no option as to the payment method for these items, the payments are not considered as part of the PIP method of payment.

As indicated above, our primary reason for offering PIP to hospitals paid under the prospective payment system was to ensure that hospitals would not experience cash-flow problems as they made the transition from cost-based reimbursement to prospective payment. We believed that implementation of a payment system that was new to both hospitals and intermediaries might have, in some cases, cause fluctuation or temporary interruption in payments to hospitals. Therefore, PIP was made available to qualified hospitals to ease the problems inherent in this start-up period.

2. Problems With PIP

Evidence indicates that the PIP method has become an increasingly needless and time-consuming burden for the intermediaries and that it results in the expenditures of considerable resources in attempting to identify and correct overpayments and underpayments. For example, because this payment method does not rely initially on submitted bills, changes in a provider's utilization are not identified as quickly as under the regular interim reimbursement method.

Eliminating PIP for all hospitals, that is, those reimbursed on the basis of reasonable costs and those subject to prospective payment, would allow intermediaries to utilize their resources more effectively to better control payments to hospitals, and all other providers. Furthermore, the proposed elimination would encourage hospitals to submit their bills on a more timely basis. Hospitals receiving PIP have less incentive to bill timely than hospitals not receiving PIP. The latter hospitals are required to submit a bill before receiving any payment. Therefore, we are proposing to revise § 405.454 (j) and (m) to eliminate PIP for all hospitals effective with discharges occurring on or after July 1, 1987.

We recognize that some hospitals may be adversely affected by such a major change as the elimination of PIP. In order to minimize any cash flow problems that may arise, and to allow hospitals sufficient lead time to adjust their billing practices, we are proposing to eliminate PIP effective with discharges occurring on or after July 1, 1987. In addition, the impact on hospital cash flows can be alleviated through the availability of accelerated payments for those delays resulting from an intermediary's operation or, in unusual circumstances, a hospital's operation.

PIP represents a general departure from customary business practice because it is a payment system unrelated to submitted bills. Its elimination would allow us to control Medicare payments in a more efficient and business-like manner. We do not expect that hospitals would have much difficulty adjusting their payment operations, and as previously indicated in the case of unexpected delays, accelerated payments are available to hospitals.

While we believe that the elimination of PIP is a reasonable and practical measure to take for all hospitals, it is particularly so for those hospitals subject to the prospective payment system. Our main purpose for extending PIP to prospective payment hospitals, that is, to ensure that the new system would not cause cash flow problems while hospitals became acclimated to the new system, has been served. By July 1, 1987, almost all hospitals under the prospective payment system will have operated under that system for at least three full years. Furthermore, we believe that interim payments made to hospitals in an attempt to approximate final payments are not appropriate, as a continuing practice, under a system that provides for final payment upon discharge based on submission of a bill. The entire legislative history of the public laws on which the prospective payment system is based underlines congressional intent concerning the *prospectivity* of the new system. With respect to hospitals that are excluded from the prospective payment system and reimbursed on a cost basis, we do not believe that PIP continues to be appropriate. Not only has it become very difficult and time consuming for intermediaries to ensure that accurate interim payments are made to these hospitals using the PIP method, but also, over the years, we believe that hospitals have become very capable of submitting timely and accurate claims. Similarly, intermediaries are able to process claims without undue delays.

Under our proposal, we would make payment to hospitals, based on submitted bills for payment not less often than monthly.

3. Exceptions to the Elimination of PIP

In eliminating PIP, there is one problem that we believe we need to address. Some prospective payment hospitals, particularly small rural hospitals, have experienced serious cash-flow shortages because of the unusually long lengths of stay of some Medicare patients. Without PIP, these hospitals would experience difficulties in recouping their expenses on a timely basis, because bills cannot be submitted until after the patients are discharged. In order to alleviate the cash flow problems that these hospitals encounter, we are proposing a form of interim payment to accommodate these situations. We are proposing to allow hospitals subject to the prospective payment system to request this payment if a patient has been in the hospital more than 45 covered days.

For these cases, payment would be made at the rate for the DRG that results from applying the GROUPER classification to the diagnosis, procedures, and other pertinent information, that are reported on the interim bill. (GROUPER is the computerized screening process used to determine the appropriate DRG for each discharge under the prospective payment system. Only one interim payment would be made per discharge. Any interim payment made would be applied against the final payment made for the discharge. This change would also be effective for discharges occurring on or after July 1, 1987. We believe that the proposed amount of the interim payment represents a fair compromise between the interests of the Medicare program in adhering to the principle of prospectivity in the new payment system and the interests of those hospitals that could be adversely affected, in terms of cash flow, by the elimination of PIP.

In addition to eliminating PIP for hospitals reimbursed on the basis of reasonable costs and for prospective payment hospitals, we are also proposing to eliminate this method of interim payment for hospitals receiving payment under a demonstration project authorized by section 402(a) of the Social Security Amendments of 1967 (Pub. L. 90-248) or section 222(a) of the Social Security Amendments of 1972 (Pub. L. 92-603). Also, we would extend this policy to those hospitals paid under State cost control systems authorized by sections 1814(b) or 1886(c) of the Act and approved by HCFA. However, these hospitals would be permitted to use a form of interim payment similar to PIP if that type of payment is specifically approved by HCFA. This might occur, for example, if that type of payment is considered to be an integral part of the demonstration or cost control system.

By definition, alternative payment systems authorized under the authorities described above provide for payments to be made on bases and methods that vary from those on which usual Medicare payment is made. For these systems, certain Medicare regulations and procedures may be waived

BEST COPY AVAILABLE

provided that, among other factors, payments made under the alternative payment systems will not exceed the amount of payments that would otherwise have been made by Medicare.

However, hospital demonstrations in general are designed to test new prospective-type payment methodologies. In addition, prospectivity is required for systems approved under the authority of section 1886(c)(3) of the Act. A main purpose of these prospective payment methodologies is to move away from traditional cost-based reimbursement that requires final settlement of costs at year end, a type of payment that by its very nature makes interim payment unnecessary. Instead, payment would be made based on submitted bills for payment not less often than monthly.

It is our opinion that interim payments for services payable on the basis of a prospectively determined rate are inconsistent with the purpose of a prospective payment system. Therefore, a prohibition against PIP for hospitals paid under the Medicare prospective system should not be waived for hospitals similarly receiving prospective payments under an alternative prospective system. However, we believe that an exception would be warranted if HCFA were satisfied with an alternative system in its entirety, including the integration of PIP-type payments as part of the total system. States that are interested in incorporating or retaining PIP as part of their alternative or demonstration methodology should address the necessity for this mechanism in light of the prospectivity requirements discussed above at the time of their application for approval or renewal of the system under the demonstration authority or section 1886(c) of the Act.

Payment for capital-related costs to the extent they are not included in operating costs, direct medical education and other inpatient hospital costs excluded from the prospective payment system would continue to be made biweekly on an interim payment basis under the provisions of §§ 405.454 (m)(3) and (m)(4).

6. Summary

In summary, we are proposing to revise § 405.454 to—

- Eliminate PIP for all hospitals effective with discharges occurring on or after July 1, 1987;
- Eliminate PIP for hospitals participating in demonstration projects or State cost control systems unless that type of payment is approved by HCFA as a part of the project or system; and
- Allow an interim payment to prospective payment hospitals for beneficiaries who remain in an inpatient status for more than 45 covered days.

B. Establishing a Base Period for Purposes of Determining the Rate-of-Increase Ceiling for Hospitals Excluded From the Prospective Payment System (§ 405.463)

Hospitals that are excluded from the prospective payment system and, at their option, cancer hospitals, are paid on a reasonable cost basis subject to the rate-of-increase ceilings under section 1886(b) of the Act and implementing regulations at § 405.463.

Section 405.463(b)(1) provides that each hospital's initial rate-of-increase ceiling will be based on allowable inpatient operating costs per case incurred—

- In the 12-month cost reporting period immediately preceding the first cost reporting period subject to the ceiling; or
- For short reporting periods (fewer than 12 months), the first 12-month period ending after October 1, 1982.

Concern was expressed as to the determination of the base period for hospitals excluded from the prospective payment system in States in which a demonstration project (sections 1814(b)(3) or 1886(c) of the Act) was terminating. We believe § 405.463(b)(1) should provide that each hospital's initial base period subject to the rate of increase ceiling is—

- The 12-month cost reporting period immediately preceding the first cost reporting period subject to the ceiling (for example, the base period would be January 1, 1985 through December 31, 1985 for a hospital paid under a demonstration project which terminates December 31, 1985); or
- Where the immediately preceding reporting period is a short cost reporting period (that is, less than 12 months), the base period will be the 12-month cost reporting period beginning on or after the date the hospital's exemption from the ceiling ends (for example, the base period would be the 12-month period beginning on or after January 1, 1986 for a hospital paid under a demonstration project which terminates December 31, 1985).

We are proposing to clarify § 405.463(b)(1) to correctly state the applicable base period initially subject to the rate-of-increase ceiling for hospitals with short cost reporting periods. We note that this revision would apply to both hospitals in a State with a demonstration project that is terminating (and for which the hospitals would continue to be excluded from the prospective payment system), and to hospitals which are no longer exempt from the ceiling as new providers (§ 405.463(f)(1)).

C. Extension of the Exclusion of Alcohol/Drug Hospitals and Units (§§ 412.23 and 412.32)

In the January 3, 1984 final rule, we developed a set of criteria for the exclusion of hospitals and distinct part units that specialize in alcohol/drug dependency treatment (49 FR 241). As provided in that rule under §§ 412.23(c) and 412.32, exclusion was to have terminated on October 1, 1985.

In the June 10, 1985 proposed rule, we proposed to revise §§ 412.23(c) and 412.32 to provide that the exclusion of hospitals and distinct part units that specialize in alcohol/drug dependency treatment would expire at the end of the hospital's cost reporting period that began before October 1, 1985 (50 FR 24387). We were also proposing simultaneously to reclassify and reweigh the alcohol and drug abuse DRGs (433 through 436) within the major diagnostic category (MDC) 20 (Substance Use and Substance Induced Organic Mental Disorders) to make an appropriate adjustment for alcohol/drug treatment services (50 FR 24370). However, in order to provide additional time to validate the newly constituted and weighted alcohol and drug abuse DRGs (433 through 437), we decided in the September 3, 1985 final rule to continue the exclusion for another year (that is, through cost reporting periods that began before October 1, 1986) pending further study and analysis (50 FR 35869).

The Department undertook a study to reabstract alcohol and drug abuse cases in order to validate the classification and weights of the DRGs. To date, the collection and analysis of survey data for the MDC 20 DRGs are not complete. Because we are unable definitively to assure the appropriateness of the alcohol and drug abuse DRGs, we have decided to further delay the end of the exclusion. We are continuing to gather and analyze the data to evaluate the new groupings we have developed. Until we have completed this study, we are proposing to review §§ 412.23(c) and 412.32 to extend the exclusion of alcohol/drug hospitals and units (that are currently excluded) for another year.

D. Hospitals in Redesignated Rural Counties Which Are Surrounded on All Sides by Urban Counties (§ 412.63)

Section 1886(d)(2)(D) of the Act requires that average standardized amounts per discharge be determined

BEST COPY AVAILABLE

for hospitals located in urban areas and rural areas of the nine census divisions and the nation. Under the prospective payment system, a hospital's payment rate is dependent, to some degree, on whether the county in which a hospital is located is designated as an urban area or as a rural area. The term "urban area" is defined as provided in section 1886(d)(2)(D) of the Act, in accordance with the Executive Office of Management and Budget's (EOMB's) designations, as a Metropolitan Statistical Area (MSA), a New England County Metropolitan Area (NECMA), or certain New England counties deemed to be urban areas under section 601(g) of Pub. L. 98–21 (42 U.S.C. 1395ww (note)). The term "rural area" means any area outside an urban area.

Section 1886(d)(8) of the Act, as added by section 2311(c) of Pub. L. 98–369, provides for an adjustment to the payment amounts for hospitals reclassified from urban to rural after April 20, 1983. Effective with hospital cost reporting periods beginning on or after October 1, 1983, a hospital that loses its urban status, as a result of an EOMB redesignation occurring after April 20, 1983, may qualify for special consideration by having its rural Federal rate phased in over a two-year period (§ 412.102).

Using our authority under section 1886(d)(5)(C)(iii) of the Act, to "provide by regulation for such other exceptions and adjustments" as are deemed appropriate, we are proposing to expand on the above provisions by recognizing the circumstances of a hospital located in a redesignated rural county that is surrounded on all sides by urban counties. Given the unique situation of such a hospital, we believe special consideration is warranted in order to ensure equitable treatment under the prospective payment system.

Therefore, effective with discharges occurring on or after October 1, 1986 we are proposing to consider a hospital as urban, for prospective payment purposes, if it meets all of the following criteria:

- The rural county in which the hospital is located must be surrounded on all sides by urban counties.
- The county in which the hospital is located was reclassified from an urban area to a rural area after April 20, 1983 (the date of enactment of Pub. L. 98–21).
- Based on the latest census data, at least 15 percent of employed workers in the county in which the hospital is located commute to the central county or counties of one of the adjacent areas. The term "central county," as defined by EOMB, is based on commuting patterns of employed workers. The 15 percent minimum commuting criterion is intended to establish the county's economic interaction with at least one of the adjacent MSAs. Given the fact that a county which is surrounded by a number of MSAs would likely interact economically, to some extent, with more than one urban area, we believe the minimum required commuting rate to one urban area should be low enough to account for this situation.

Hospitals that meet these criteria would be deemed urban for purposes of computing prospective payments, and would be reclassified into the MSA or NECMA in which it had been previously designated prior to the EOMB redesignation. We would revise § 412.63(b) to implement this provision.

We have identified one hospital located in Shiawassee County, Michigan that would qualify for special treatment under these provisions. Accordingly, that hospital located in Shiawassee County, Michigan would be reclassified into the Flint, Michigan MSA where it had been previously designated. (We note that Shiawassee County also had the highest commuting rate to the Flint MSA.) For wage index purposes, we would also consider Shiawassee County to be part of the Flint, Michigan MSA (see Table 4a of the addendum), and have recomputed the wage index to reflect this change.

As a matter of policy, we believe it is appropriate to adjust the standardized amounts in such a case. However, we are assessing the administrative implications of making such adjustments for purposes of this limited exception. Because we have not completed our assessment of administrative implications, we have not adjusted the standardized amounts in this proposed rule.

E. Referral Centers (§ 412.96)

In the August 31, 1984 final rule, we added an alternative set of criteria to § 412.96 (then § 405.476(g)) that expanded the definition of referral centers to encompass more rural hospitals. We also added a new paragraph to that section that provides for a triennial review of referral centers to determine if they continue to meet the criteria for a referral center. (See 49 FR 34740 for a detailed discussion of those revisions.) Under those alternative criteria, in order to qualify as a referral center, a hospital must meet two mandatory criteria (number of discharges and case-mix index) and at least one of three optional criteria (medical staff, source of inpatients, or volume of referrals), in addition to being located in a rural area.

1. Number of Discharges

The number of discharges criterion measures whether the hospital has a comparatively high number of cases. We established this criterion because virtually all discussions of rural referral centers in the legislative history contain references to "large hospitals," "very large acute care hospitals," and "large referral hospitals located in rural States." (129 Cong. Rec. S3224–26 (daily ed. Mar. 17, 1983)) Thus, in establishing the criteria to define rural referral centers, we included a standard to differentiate these larger facilities from rural hospitals of average size.

In the August 31, 1984 final rule (49 FR 34761), we set forth in § 412.96 (then § 405.476(g)) four different discharge criteria, one of which a hospital must meet, along with other criteria, in order to qualify as a referral center for cost reporting periods beginning on or after October 1, 1984. A hospital's number of discharges (excluding discharges from subprovider units) had to be at least equal to—

- 6,000 for the hospital's cost reporting period that ended in 1981;
- 6,000 for the hospital's most recently completed cost reporting period;
- The median number of discharges of urban hospitals for cost reporting periods ending in 1981 for the region in which the hospital is located for the hospital's cost reporting period that ended in 1981; or
- The median number of discharges of urban hospitals for cost reporting periods ending in 1981 for the region in which the hospital is located for the hospital's most recently completed cost reporting period.

In the September 3, 1985 final rule (50 FR 35689), we eliminated the two options that related to a hospital's number of discharges for its cost reporting period that ended in 1981. We did not believe that 1981 discharge data were relevant to a hospital's qualification for rural referral center status five or more years later. The two remaining options relate directly to the number of discharges in a hospital's most recently completed cost reporting period.

In addition, we did not update the 6,000 figure for number of discharges (the national value) in the September 3, 1985 final rule (50 FR 35675) because our discharge data for 1984 were incomplete and because it was not clear that hospitals serving as referral centers would have experienced the same decline in discharges as the nation as a whole. However, we believe that the number of discharges criterion should be

updated in this year's prospective payment notice because we believe that hospitals serving as referral centers have experienced a reduction in discharges similar to all other hospitals. These data reflect changes that have occurred since 1981, the year from which the initial discharge criteria were derived.

We are proposing to update the number of discharges criteria effective with cost reporting periods beginning on or after October 1, 1986. These proposed values are updated using the most current data available on discharges. We believe that it is necessary to update these values not only to enable new hospitals to qualify as referral centers, but also to provide current criteria against which existing referral centers can be measured during their triennial review to determine if they continue to qualify for special treatment on the basis of their number of discharges. We are also proposing to revise § 412.96 to describe the process we would use to calculate the number of discharges. The actual national and regional values would set forth in each year's annual notice of prospective payment rates as is currently required under § 412.96(c)(2).

To determine the change in the national and regional number of discharge values, we would use American Hospital Association (AHA) panel survey data available for the most recently completed fiscal year. We would compare the discharges from non-Federal short-term acute care general hospitals in that period to discharges in 1981. The percentage change (increase or decrease) would be used to update the 6000-discharge standard. The updated national and regional values would be effective for a hospital's most recently completed cost reporting period prior to the period for which it is applying for referral center status or for the period for which an existing referral center is being reviewed.

For both the national and regional discharge values, we reduced the 1981 standards as noted in the September 3, 1985 final rule (50 FR 35675–76) by 8.05 percent to reflect the national percentage change in the number of discharges from the year ending in September 1981 through the year ending in September 1985. The percentage is calculated from AHA panel survey data, which show that there were 37,840,257 admissions [1] to community hospitals [2] in FY 1981 and 34,783,931 admissions to community hospitals in FY 1985, an 8.05 percent decrease. Thus, the proposed national number of discharges criterion is computed by multiplying the 1981 discharge standard by .9195 (100.00 − 8.05 = 91.95), as follows:

6,000 times .9195 = 5,517

The same method (and percentage value of 8.05) is used to reduce each 1981 regional median urban discharge value.

Therefore, in addition to meeting other criteria, we are proposing that to qualify as a referral center or for purposes of the triennial review to retain rural referral center status, for cost reporting periods beginning on or after October 1, 1986, a hospital's number of discharges for its most recently completed cost reporting period would have to be at least—

- 5,517; or
- Equal to the median number of discharges for urban areas calculated by HCFA for the census region in which the hospital is located as indicated in the table below.

Region:	Median urban discharges
1	6,669
2	7,900
3	7,155
4	6,560
5	7,659
6	7,830
7	5,414
8	6,129
9	5,116

In addition, section 9105 of Pub. L. 99–272 amended section 1886(d)(5)(C)(i) of the Act to permit rural osteopathic hospitals to qualify for the rural referral center adjustment if they meet the case-mix index standard, one of the optional criteria, and if they have at least 3,000 discharges annually. This provision would apply to cost reporting periods beginning on or after January 1, 1986. Because of the small number of osteopathic hospitals, we are proposing not to establish regional standards under this provision. The 3,000 discharges figure would apply to all rural osteopathic hospitals nationwide and, for purposes of rural referral center recognition only, would apply to rural osteopathic hospitals recognized by the American Osteopathic Hospital Association.

We are proposing to revise § 412.96 to implement the provision for rural osteopathic hospitals in section 9105 of Pub. L. 99–272.

2. Case Mix Index

Section 412.96(c)(1) provides that HCFA will establish updated national and regional case-mix index values in each year's annual notice of prospective payment rates for purposes of determining referral center status. In the September 3, 1985 final rule (50 FR 35676), we calculated the national case-mix criterion as follows:

$$\frac{1.03 \times 1.108}{1.0105} = 1.1294$$

in which:

- 1.03 represented the 1981 case-mix index benchmark for complexity of cases treated in a facility;
- 1.108 represented the increase (10.8 percent) in the national average case-mix index since 1981, for discharges through the midpoint of the Federal fiscal year; and
- 1.0105 represented the reduction in the DRG relative weights for discharges occurring on or after October 1, 1984. (See the August 31, 1984 final rule (49 FR 34770).)

We used the same formula applied to each region's 1981 urban median case-mix value in determining the updated urban median case-mix values for FY 1986.

On the basis of hospital bills received in HCFA through March 1986, we have determined that the national average case-mix index has increased by 15.4 percent since 1981.

Using the same formula and currently available program data indicating a 15.4 percent increase in the national average case-mix index since 1981, we are proposing to update the national case-mix criterion as follows:

$$\frac{1.03 \times 1.154}{1.0105} = 1.1763$$

[1] Although the AHA data are based on the number of admissions, we believe that, in the aggregate, there is little, if any, difference between the number of admissions and the number of discharges over the course of a year.

[2] The term "community hospitals" encompasses, for the most part, hospitals subject to the prospective payment system. For purposes of the panel survey data, AHA defines community hospitals to be all non-Federal, short-term general and other special hospitals, excluding hospital units of other institutions, whose facilities and services are available to the public. Noncommunity hospitals are defined as Federal hospitals, long-term hospitals, hospital units of other institutions, psychiatric hospitals, hospitals for tuberculosis and other respiratory diseases, chronic disease hospitals, institutions for the mentally retarded, and alcoholism and chemical-dependency hospitals.

The same method (and percentage value of 15.4) is used to increase each 1981 regional median urban case-mix value.

Therefore, in addition to meeting other criteria, we are proposing that to qualify as a referral center, or for purposes of the triennial review for retention of referral center status, for cost reporting periods beginning on or after October 1, 1986, a hospital's case-mix index for the Federal fiscal year ending September 30, 1986 would have to be at least—

- 1.1763; or
- Equal to the median case-mix index for urban areas calculated by HCFA for the census region in which the hospital is located as indicated in the table below.

Region	Adjusted urban median case-mix
1	[illegible]
2	[illegible]
3	1.1839
4	1.1945
5	1.1904
6	1.1671
7	1.1169
8	[illegible]
9	[illegible]

The above numbers will be revised in the final rule to this proposed rule to the extent that additional bills are received for discharges through March 1986.

F. Changes to DRG Classifications and Weighting Factors

Under the prospective payment system, we pay for inpatient hospital services on the basis of a rate per discharge that varies by the DRG to which a beneficiary's stay is assigned. The formula used to calculate payment for a specific case takes an individual hospital's payment rate per case (comprised of a hospital-specific portion and an urban or rural Federal portion adjusted for area wages) and multiplies it by the weight of the DRG to which the case is assigned. Each DRG weight represents the average required to care for cases in that particular DRG relative to the national average resources consumed per case by the average hospital. Thus, cases in a DRG with a weight of 2.0 would, on average, require twice as many resources as the average case for the average hospital.

Congress recognized that it would be necessary to recalculate the DRG relative weights periodically to account for changes in resources consumption. In addition, Congress provided the Secretary with authority to reclassify services and procedures within the DRG system to take into account changes in medical technology and treatment patterns. Accordingly, section 1886(d)(4)(C) of the Act requires that the Secretary adjust the DRG classifications and weighting factors effective for discharges occurring in FY 1986 and at least every four fiscal years thereafter. These adjustments are made to reflect changes in resource consumption, treatment patterns, technology, and any other factors that may change the relative use of hospital resources. The intention of Congress was that we would make changes as often as needed to achieve the objectives of the prospective payment system, including the need to keep current with developments in the areas of coverage and medical technology. The proposed DRG reclassifications for discharges occurring on or after October 1, 1986 are set forth below.

The method of classifying cases into DRGs for payment under the prospective payment system involves a number of steps. The intermediary enters medical and other information contained in each patient's bill into its claims systems and subjects it to a series of automated screens called the Medicare Code Editor. These screens are designed to identify cases that require further review before classification into a DRG can be accomplished.

After screening through the Medicare Code Editor and any further development of the claims, cases are classified by GROUPER into the appropriate DRG. The GROUPER software program was developed as a means of classifying each case into the appropriate DRG on the basis of the diagnosis and procedure codes and demographic information, that is, sex, age, and discharge status. It is used both to classify past cases in order to establish the DRG weights and to classify current cases for payment.

During the initial operating period of the prospective payment system, we learned that the use of the DRG method of classification posed some operational challenges that we needed to address further. We issued a notice on March 13, 1986 (51 FR 8762) to propose a number of improvements to the DRG classification system and finalized the proposal elsewhere in this edition of the Federal Register. We will reflect those changes in a revised GROUPER program to be effective with discharges occurring on or after October 1, 1986.

Although we originally intended to limit modifications of the DRG classification system to a single annual notice, we have found that, at least for this year, such a practice is not appropriate. In response to the public's request, we proposed DRG changes early in the calendar year (March 13, 1986). However, ProPAC has made several recommendations concerning additional DRG classification changes. These recommendations were not presented until after publication of our proposed changes. Some of ProPAC's recommendations have merit and represent analysis of data that was not available to us or problems that were not raised to us. We do not believe it is appropriate to delay recognition of ProPAC's suggested changes on DRG classification issues until our next annual publication of classification changes simply because its report was made subsequent to our proposed changes. To do so would unnecessarily delay implementation of improvements to the system. Consequently, we are proposing to revise the reference to an annual notice in § 412.10(a), and to go forward with a second notice of proposed DRG classification changes that are included in this document.

We continue to believe it would be most beneficial to the industry to strive toward a single annual notice of DRG changes. We also believe it is appropriate to propose such changes prior to the proposed rule on prospective payment system changes required each June. We will attempt to work with ProPAC more closely in the future with a goal of better coordinating our efforts in this area so that we may eventually achieve a single annual notice of DRG classification changes.

1. DRG Logic Issues—DRG 385

We have been advised that it is common practice in hospitals to report the discharge status of a newborn discharged to foster care as "transfer-other". The GROUPER program assigns all newborns to a distinct DRG (DRG 385) if the discharge status is reported as "died or transferred", regardless of the type of transfer cited.

The intent of DRG 385 is to establish a unique classification for acutely ill newborns. We do not believe it is appropriate to use this classification for normal newborns simply because they were discharged to foster care. Consequently, we are proposing to revise the GROUPER logic for DRG 385 so that only cases with reported discharge status of died or transferred to an acute care hospital will be classified to this DRG. All other discharges for newborns would be classified into the appropriate DRGs (DRGs 386–391) within major diagnostic category (MDC) 15 based on their diagnosis and procedure codes. Since this is a low volume procedure for Medicare purposes, this classification change will not result in a change in the DRG

weighting factor, but would only affect future classification of cases to this DRG.

2. Burns

Throughout the past year we have received numerous letters advising us of difficulty with the classification of burn cases. ProPAC also has studied this issue, although it did not make a formal recommendation on this matter. (See Technical Appendixes to ProPAC's April 1, 1986 Report to the Secretary, pages 124–133.)

There appear to be numerous factors contributing to the high heterogeneity of the burn DRGs, and we agree with ProPAC that additional evaluation of MDC 22 (Burns) is necessary. However, we have found that significant improvement in the homogeneity of DRG 457, Extensive burns, can be achieved by further classifying extensive burn cases based on operating room procedures. Consequently, we are proposing to establish a new DRG for MDC 22. We are proposing to create DRG 472, Extensive burns with operating room procedure, that would include cases with a principal or secondary diagnosis of extensive burns (those currently classified in DRG 457) and any of the operating room procedures currently classified in DRGs 458, Non-extensive burns with skin grafts, and 459, Non-extensive burns with wound debridement and other operating room procedure. DRG 457 would be modified to specify this classification includes extensive burns without operating room procedure.

We will continue to study classification of cases in MDC 22. If we find further changes in this MDC are necessary, they will be proposed in a future DRG classification notice.

3. Surgical Hierarchy

Review of claims data and DRG relative weighting factors for DRGs has led us to conclude that revision of the surgical hierarchy of several MDCs is necessary. For the most part, the present hierarchy is based on clinical judgment and aged resource data. We have found that in some cases, the present hierarchy results in classification of cases with multiple surgical procedures to lower weighted DRGs because a less resource-intensive procedure is higher up in the hierarchy than another more resource-intensive procedure. Changes in practice patterns and technology have occurred since the surgical hierarchy was developed. The recalibration of the DRGs using FY 1984 claims data indicates current resource utilization for certain classes of surgical procedures is somewhat different than was common when the surgical hierarchy was developed.

We believe that cases showing multiple surgical procedures should be classified into the DRG that coincides with the most resource intensive procedure performed. Therefore, we are proposing to reorder the surgical hierarchy for MDCs 2, 3, 5, 6, 7, and 21 as set forth below:

MDC 2—Extraocular Procedures Except Orbit would be placed above Primary Iris Procedures.

MDC 3—Cleft Lip and Palate Repair and, Sinus and Mastoid Procedures (in that order) would be placed above Salivary Gland Procedures Except Sialoadenectomy.

MDC 5—Permanent Cardiac Pacemaker Implantation would be placed above Vascular Procedures.

MDC 6—Mouth procedures would be placed above Anal and Stomal Procedures.

MDC 7—Diagnostic Procedures would be placed above Biliary Tract.

MDC 21—Wound Debridements would be placed above Skin Grafts.

All of the changes discussed above, if adopted in the final rule to follow this proposed notice, would also be incorporated in the revised GROUPER program for FY 1987. In addition, the reclassifications would affect the weights of the DRGs from which and to which cases are being moved. We have estimated the revised weights wherever possible and reflected those estimated weights in the addendum to this proposed rule (Table 5).

However, because changes in the surgical hierarchy alter the order in which the GROUPER searches for surgical procedures upon which to base DRG assignments, the effects of the proposed surgical hierarchy changes could not be estimated, as the GROUPER must be entirely reprogrammed to incorporate the hierarchy changes. Since the proposed hierarchy changes are based on the fact that the current relative weights for DRGs in certain sections of the hierarchy are greater than the relative weights for DRGs higher up in the surgical hierarchy, adoption of the proposed surgical hierarchy changes should yield more homogeneous DRGs where multiple procedures are involved and currently result in assignment to a lower-weighted DRG than would occur if only the more resource-intensive procedure was performed. The following table lists the DRGs whose weights may be affected by the proposed surgical hierarchy change in each MDC:

MDC 2—DRGs 38, 40 and 41
MDC 3—DRGs 51, 52, 53 and 54
MDC 5—DRGs 106, 110, 111, 112, 115 and 116
MDC 6—DRGs 157, 158, 168 and 169
MDC 7—DRGs 193, 194, 195, 196, 197, 199, 199 and 200
MDC 21—DRGs 439 and 440

The revised GROUPER will permit us to re-group Medicare cases from the FY 1984 Part A Tape Bill (PATBILL) file in accordance with the manner in which they would be grouped for payment purposes beginning October 1, 1986. Accordingly, we propose to reweight the DRGs in the final rule so as to ensure that the reclassifications adopted result in neither increases nor decreases in aggregate Medicare payments. Reweighting is distinguished from recalibration in that it involves use of the same data base as was used for the weights currently in place, whereas recalibration entails the use of a different, more recent data base. Because reweighting is otherwise identical to recalibration, we note that the weights for DRGs in which no reclassification is made may be affected slightly.

Additional information pertaining to these changes may be obtained by writing to the following address:

HCFA, GROUPER CHANGES, P.O. Box 26661, Baltimore, Maryland 21207

G. Aortic Aneurysm Repair

Over the past several months, we have been investigating the issue of appropriate classification of complex aortic aneurysm repairs. Specifically, we have been attempting to evaluate the classification of aortic aneurysm repairs that involve both the thoracic and abdominal portions of the aorta. Heretofore, there has not been a mechanism within the ICD–9–CM classification system to clearly differentiate these procedures. Consequently, our ability to secure usable data for this evaluation has been significantly hampered.

We have just recently identified a number of cases involving this complex procedure and are beginning to evaluate the data. In addition, new ICD–9–CM codes have been approved that will allow more precise identification of the procedure in the future. We will continue to study the available data throughout the public comment period and may make an additional DRG classification change in the final rule. We specifically invite the public's suggestions and supporting documentation on appropriate classification of thoraco-abdominal aortic aneurysm repairs.

H. Transfer policy (§ 412.4)

Under cost reimbursement, there was no reason to distinguish between discharges and transfers of beneficiaries from one facility to another because all providers involved in the course of a patient's acute-care stay were reimbursed on a cost basis for the medically necessary care provided. However, the prospective payment system is intended to provide full payment, less applicable deductibles and coinsurance, for all inpatient services associated with the treatment of a particular diagnosis in an acute-care hospital. Since the discharge is the basis of payment, it became necessary to distinguish between discharges in which a patient has received complete treatment and discharges in which the patient is transferred to another acute-care hospital for related care. If a full DRG payment were made to each hospital involved in a transfer situation, we would pay at least twice as much under the prospective payment system for the transfer episode as would have been paid to a single hospital for identical care. We concluded that this would have provided a strong incentive to increase transfers and thereby unnecessarily endanger patients by needlessly increasing their exposure to risks of infection in different hospital settings or by the need to travel to a distant hospital. Therefore, the September 1, 1983 interim final rule contained a policy for payment in transfer situations in § 412.4(d) (then § 405.470(c)(4)). Under this policy, full payment is made to the final discharging hospital in a transfer situation. The transferring hospital is paid a per diem rate for each day of the stay, not to exceed the full DRG payment that would have been made if the patient had been discharged. This policy was based upon the assumption that a transferring hospital generally provides only limited services to stabilize a patient before the patient is transferred to a second hospital where the bulk of treatment is provided. The prospective payment rate paid is the rate specific to each hospital on the basis of the DRG under which the patient was treated in each hospital.

In response to the September 1, 1983 interim final rule, several commenters noted that the first few days of any hospitalization were the most resource intensive and that there were situations in which a patient is transferred after considerable resources are expended in the transferring hospital. However, in the absence of clear data to support this claim, we continued the per diem payment approch until we could gather data to evaluate transfers under the prospective payment system and develop an alternative payment under the DRG system. In addition, hospital experience in the first year of the prospective payment system clearly indicated that transferring hospitals occasionally incur costs sufficient to meet cost outlier thresholds. We therefore changed the policy in the August 31, 1984 final rule (§ 412.80(a)(2)) to allow cost outlier payments to qualifying transferring hospitals.

We anticipated that the per diem payment method combined with the required medical review of all transfers would discourage medically unecessary transfers between prospective payment system hospitals while still providing sufficient payment to all hospitals incurring costs for the care of appropriately transferred patients. On several occasions we stated that our goal was to find a way to make one payment for all the hospitals involved in caring for transfer cases.

In response to a comment received on the June 10, 1985 proposed rule, in which we reiterated our intention to go to a single payment system, we stated in the September 3, 1985 final rule (51 FR 35683) that "The single payment methodology will be developed only after we conduct a thorough review of the Part A Tape Bill (PATBILL) file to evaluate the distribution of costs in a transfer situation. The review will enable us to develop a transfer policy that would be designed to result in equitable payments among hospitals and to limit administrative difficulties."

We now have been able to use the 1984 PATBILL file to list the transfers included in the nearly 11 million 1984 bills received through April 28, 1985. About 60 percent of these bills were paid under the Pub. L. 97–248 limitations, and not the prospective payment system. Rather than eliminate pre-prospective payment system discharges from consideration, we decided to assume, for purposes of this analysis, that a transfer occurred in all cases in which the date of discharge from one hospital was the same as the date of admission to another hospital, where both hospitals were or would be subject to the prospective payment system. The contiguous hospital stays were considered as episodes of treatment, involving one or more transfers. We were able to identify over 188,000 of these episodes. The majority of these episodes (174,857 episodes, or 92.90 percent) represented treatment in only two hospitals. These two-hospital, or single-transfer, episodes formed the basic file for our analysis.

After a thorough review of the PATBILL data we have determined that at this time, it is not possible to develop a single payment policy that would be equitable or administratively feasible. These bill data indicate that transfer patterns do not follow our initial assumptions of transfer activity. Transfers represent a relatively small percentage of the total prospective payment episodes (less than 1.6 percent). The average length of stay for the transferring hospitals was fewer than 3 days in only 20 of the 424 DRG categories represented in the listing. These DRGs included only 601 episodes (0.34 percent of total single transfer episodes). The average length of stay in the transferring hospital exceeded the geometric mean length of stay for the DRG assigned to the transferring hospital stay in 328 categories, including 96,698 episodes (55.36 percent).

We are concerned, in light of these average lengths of stay for transfer cases, that transferring hospitals may keep patients longer than necessary in order to receive per diem payments up to the full DRG amount. We recognize, however, that what appeared to be long average lengths of stay in the transferring hospital may merely be the consequence of an artifact of our data base, which includes a substantial number of cases paid under the Pub. L. 97–248 limits. We would expect to find shorter average lengths of stay if our data base included only those cases in which the transferring hospital was already subject to the prospective payment system at the time of the transfer.

Thus, for the present time we have determined that a single payment based only on the DRG of one hospital would probably not be sufficiently high to be split equitably between the two hospitals based on the actual resources that each expended in the episode. Changing to a single DRG payment would result in a reduction in payments to those hospitals that most often transfer patients (frequently rural non-teaching hospitals), and those that most often receive patients (urban teaching hospitals). We do not think that an arbitrary reduction in payment to either group of hospitals would be justifiable merely to achieve a single payment solution.

An alternative to splitting one of the DRG amounts involved between two hospitals would be to develop a transfer DRG based upon a combination of the treatment provided in both hospitals. Presumably, day and cost outlier payments could be based on the combined number of medically

necessary days and allowable charges in the episode. Once again, we do not think that the goal of achieving one payment under the prospective payment system would justify the increased level of administrative complexity that would be involved in assigning a single DRG and payment rate for the combined stays in the transfer episode. The combination of experience in the two hospitals would not appropriately represent the resources involved because the same DRG is assigned in each hospital in only 18.7 percent of the transfer episodes identified in the data base. Of those episodes with different DRG assignments in the sending and the receiving hospital, 42.8 percent of the cases are assigned to DRGs in different major diagnostic categories and 37.1 percent of the cases change from a medical to a surgical DRG. We do not believe that the DRG coding system is set up to assign an appropriate DRG to a given set of diagnoses and procedures unless they have been reviewed and carried out by a single hospital. The treatment provided in each part of a transfer episode results in independent DRG assignments with relative weights representing the diagnoses and procedures identified by the hospital furnishing treatment during that portion of the episode. Similarly, outlier thresholds were based upon the lengths of stays and charges represented in single hospital stays. Unless we were to establish a completely independent computation of the payment amount for a combined DRG, the payment would have to be determined based upon the wage indexes and standardized amounts specific to each hospital. Such hospitals are often located in different urban/rural areas, and even in different census regions. Finally, it is likely that any specific "transfer" DRG would demonstrate a wide variation of charges in the cases assigned to the DRG. We do not believe it would be consistent with our efforts in refining the DRGs to reduce the variation in certain DRGs in order to establish a new DRG that contained a large amount of variation, and that would undoubtedly lead to payment inequities.

Furthermore, the fiscal intermediary would often be responsible for computing such a combined payment weeks after admission to the first hospital. The development of a combined single payment would seem to be a needless complication of the current system with no accompanying gain realized from the elimination of the per diem payment system in favor of one payment.

We do believe, furthermore, that the per diem system acts as a disincentive to inappropriate transfers between acute-care hospitals. The elimination of the per diem payment in transfer situations in favor of full DRG payments to transferring hospitals could result in the proliferation of multiple transfer situations, which now represent a very low percentage of the total transfer episodes reviewed (less than 7.3 percent).

In conclusion, since we are not persuaded at this time that the current transfer policy is inappropriate, and because we are concerned that a single transfer payment policy would not represent an improvement, we are not proposing to modify the current transfer policy as described in § 412.4. We will, however, continue to study and evaluate the transfer policy based on more recent data from prospective payment system hospitals to determine whether modifications may be necessary in the future.

V. Other ProPAC Recommendations

As required by law, we have reviewed the April 1, 1986 report submitted by ProPAC and have given its recommendations careful consideration in conjunction with the formulation of the proposals set forth in this document. The recommendations are discussed throughout this preamble and in the addendum to this proposed rule along with our proposals concerning the same issues. The remainder of the recommendations are discussed below.

A. Adjustments to the Payment Formula

ProPAC believes that the ways in which the prospective payment system formula distributes payments to hospitals are extremely important both to Medicare beneficiaries and to inter-hospital equity. Payments that are adequate on average may be inadequate for certain types of hospitals and the beneficiaries who depend on these hospitals.

1. Disproportionate Share Hospitals (Recommendation) No. 9

Recommendation—ProPAC recommends that an adjustment to the prospective payment rates for hospitals serving a disproportionate share of low-income patients should be implemented as soon as possible. This adjustment should specifically incorporate a definition and methodology in keeping with the character of the adjustments already being considered in Congress. This adjustment should not change the total aggregate dollar amount paid to all hospitals.

Response—Section 9105(a) of Pub. L. 99-272 added a new section 1886(d)(5)(F) to the Act to require that we make an additional payment for hospitals that serve a disproportionate share of low-income patients effective with discharges occurring on or after May 1, 1986. We implemented the payment provisions for disproportionate share hospitals in the May 6, 1986 interim final rule (51 FR 16768).

Section 9105(b) of Pub. L. 99-272 amended section 1886(d)(2)(C) of the Act to require that the standardized amounts be restandardized to reflect the disproportionate share adjustment provided in section 1886(d)(5)(F) of the Act. We are setting forth our proposed methodology for this restandardization in section II./A. of the addendum.

2. Improving the Definition of Hospital Labor-Market Areas (Recommendation No. 10)

Recommendation—The Secretary should improve the definition of hospital labor-market areas for FY 1987, if possible, and no later than FY 1988. For urban areas, the improved definitions should account for a greater amount of the wage variation between inner-city and suburban hospitals. For rural areas, the improved definitions should account for a greater amount of the wage variation between different rural areas within each State and between States. The implementation of improved definitions should not result in any change in aggregate hospital payments.

Response—We addressed a similar recommendation from ProPAC in the September 3, 1985 final rule (50 FR 35663–35664 and 35684–35685). In that final rule, we acknowledged that the current Metropolitan Statistical Areas (MSAs)/non-MSAs may not adequately recognize widely varying hospital labor market conditions, especially among counties classified as rural. We have been looking into possible alternative classification systems that would better define hospital labor markets. However, we believe that further research and study are required before alternative labor market definitions are specified.

Also, as we have noted before, section 1886(d)(2) of the Act defines an urban area as an area within an MSA as designated by OMB or within a similar area, as recognized under the regulations (§ 405.480) establishing limits on total inpatient operating costs under section 1886(a) of the Act. The designation of a county as urban or rural is based on whether or not a particular location qualifies as an MSA or New England County Metropolitan Area (NECMA). MSAs and NECMAs were the

only urban designations recognized under § 405.480 with respect to hospital cost limits. The criteria for MSA or NECMA status are not within our control. EOMB determines which areas qualify as MSAs or NECMAs and the effective date of their qualification is based on standards prepared by the Federal Committee on MSAs, which advises EOMB on metropolitan area definitions. (As discussed elsewhere in this document, the law provides the Secretary with a general exceptions and adjustments authority. We have not in the past used this authority to grant exceptions to the urban/rural criteria because we have no national, objective system of urban/rural designations other than the EOMB MSA designations. However, we are using this authority to grant urban status to a particular rural county effective October 1, 1986. The narrow criteria for this exception should be noted, as well as the fact that this county had previously been urban in the MSA system. We believe that even with this exception we are preserving the urban/rural distinctions based on MSA definitions.)

Section 9103(b) of Pub. L. 99–272 requires that we work with ProPAC to improve the definition of urban hospital labor-market areas. We are required to submit a report to Congress on this matter by May 1, 1987.

3. Rural Hospitals (Recommendation No. 11)

Recommendation—In the original prospective payment legislation of 1983 (Pub. L. 98–21), and the Deficit Reduction Act of 1984 (Pub. L. 98–369), Congress required the Secretary to study and report on a number of rural hospital issues. To date, none of these studies has been submitted to Congress. Preliminary studies by ProPAC suggest that there are potential problems in the way rural hospitals are treated under the prospective payment system. ProPAC urges the Secretary to complete and publish the congressionally mandated studies as soon as possible. If the results of the Secretary's studies indicate that changes in payment policies affecting rural hospitals are warranted, appropriate modifications to current policy, including legislative change, if necessary, should be implemented as soon as possible.

Response—We share ProPAC's concern about the relative vulnerability of rural hospitals under the prospective payment system, and have developed substantial information to describe the short run impact of the prospective payment system on rural hospitals. Our information, which is preliminary, would respond to the congressionally mandated studies in section 603 of Pub. L. 98–21 and section 2311 of Pub. L. 98–369. We will include this information in the 1985 annual report to Congress (due out this year) on the impact of the prospective payment system on classes of hospitals, beneficiaries, other payors for inpatient hospital services, and other providers.

Our preliminary information is based on the 1981 hospital cost data base that was used to implement the prospective payment system. We note, however, that the requisite hospital cost information needed to complete the studies is only now becoming available. Recently, we established two data bases for this purpose. We created a hospital cost report analytic file for cost reporting periods beginning on or after October 1, 1982 and before October 1, 1983. We also created a hospital cost report analytic file for cost reporting periods beginning on or after October 1, 1983 and before October 1, 1984 (the first year of the prospective payment system). It is our intention that the results of our analyses, which are to be completed by the end of this year, be made available to ProPAC and Congress upon completion.

B. Data Availability and Research

1. Earlier Availability of Medicare Cost Data (Recommendation No. 12)

Recommendation—ProPAC is pleased that the Secretary has taken steps to speed up the availability of Medicare cost report data from the first year of the prospective payment system. ProPAC recommends that making cost data available as soon as possible be an ongoing effort, since these data are vital both to assess the relationship between prospective payments and hospital costs and to analyze the costs of individual DRGs. As part of this ongoing effort, alternative strategies for sampling hospital cost data should be considered. The necessary additional resources should be allocated for timely processing of these data.

Response—We agree with ProPAC's recommendation that Medicare cost report data should be made available as soon as possible for prospective payment system evaluation purposes. We wish to note that it has been a longstanding policy of HCFA to respond promptly to all requests for information and data (including costs reports), subject to the requirements of the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a), and to assist interested parties in conducting research or special analyses. Public access to disclosable information maintained by the Federal government is guaranteed under the Freedom of Information Act.

Ideally, audited cost reports provide an important basis for an assessment of the relationship between prospective payments and hospital costs. However, ProPAC correctly recognized that there is a considerable lag time between the end of a hospital's cost reporting period and the availability of audited cost report information.

We expect the implementation of HCFA's Hospital Cost Report Information System (HCRIS) will do much to speed up the availability of cost report data in various stages of audit for assessing the prospective payment system.

Although HCRIS cost report data were not available in time for ProPAC to use in its deliberations for preparing their April 1, 1986 report, we are willing to provide both audited and unaudited cost report information from this system for ProPAC 's use.

We note that while cost report data may be used to monitor the impact on hospitals of the prospective payment system, one of the goals of the prospective payment system was to break the link between an individual hospital's own costs and its Medicare reimbursement. Furthermore, the cost data are not necessarily of as high quality as in the past because they affect a far smaller proportion of total hospital reimbursement. We question the value of spending our limited administrative resources on full-scale audits considering the anticipated minimal pay-back.

2. Maintaining a Commitment to Data Development and Research on the Prospective Payment System (Recommendation No. 33)

Recommendation—The Secretary should continue to devote substantial resources to data development and research for monitoring and improving the prospective payment system and understanding its effects on the health care system. Studies mandated by Congress already due should be completed and made public as soon as possible, and new studies that analyze more recent data should be designed and implemented as soon as possible. While ProPAC and other organizations will participate in this process, the major commitment to prospective payment system data development and research must reside with DHHS.

Response—We agree with ProPAC that data development and continuing research are vital to the maintenance of an equitable prospective payment system. As available resources permit,

we will devote our efforts to refining the prospective payment system through the identification and resolution of problems, and improving data bases for analysis.

C. Beneficiary Concerns

Quality of care under the prospective payment system has been a paramount concern of ProPAC since its inception. ProPAC believes that there are a number of ways in which the quality of care can be maintained or improved under the prospective payment system.

1. Beneficiary and Provider Information (Recommendation No. 15)

Recommendation—The Secretary should take immediate action to provide more and better written information about the Medicare prospective payment system to beneficiaries and providers of care. The Department should work with providers, beneficiaries, and associations of these groups to produce and disseminate this information. Associations of providers and beneficiaries should also increase their own efforts to educate and inform their members better about the Medicare prospective payment system.

Response—We agree with ProPAC that Medicare beneficiaries should be provided with clear and precise information about the prospective payment system. To that effect, we are preparing a new pamphlet on the prospective payment system due for release by late spring. The pamphlet, responding to comments from ProPAC and other interested parties, will provide Medicare beneficiaries a better understanding of the prospective payment system. Copies of the pamphlet will be made available to Medicare beneficiaries not only through the local Social Security district offices, but also through other distribution channels, such as the Administration on Aging Network and other beneficiary representative organizations.

2. Notice to Beneficiaries of Rights (Recommendation No. 16)

Recommendation—Beneficiaries should be made aware of the process of reconsideration and appeal of a denial of coverage for continued inpatient hospital care. Notification should be through a written notice or information bulletin. It should explain beneficiary rights in a clear, helpful, and understandable manner. In addition to a clear statement of rights, the bulletin should inform beneficiaries that they should not accept any oral communication to the effect that they must leave the hospital because their "coverage" has "run out" or because there is a limit on the number of days "allowed" by Medicare for a DRG. The bulletin should be distributed at the time of admission or as soon thereafter as is appropriate based on the patient's clinical condition. However, additional avenues of distribution should also be developed.

Response—On February 24, 1986 we released a notice for Medicare beneficiaries to be distributed to them upon admission to a hospital. The notice explains to beneficiaries their rights under the prospective payment system and informs them of how to appeal a decision if they believe they are being discharged prematurely. In addition, we are developing a new pamphlet to discuss in greater detail Medicare beneficiary appeal rights. The new pamphlet will combine the current physician appeals and hospital appeals pamphlets, and add new information for beneficiaries on appeal rights under the prospective payment system. We intend to release this pamphlet within the next few months.

We understand that the geometric mean lengths of stay used in determining the outlier thresholds may have been misperceived as "maximum" lengths of stay, thereby fostering the misunderstanding, among hospitals, doctors, and the public generally, that Medicare does not cover inpatient services for days beyond the average lengths of stay. In the September 3, 1985 final rule (50 FR 35710), we reiterated our policy that there are *no* requirements under the prospective payment system that Medicare patients classified within a given DRG be discharged after a specific number of days as indicated by the geometric mean length of stay for that DRG, *nor* will hospitals be paid for only a certain number of days of care for each discharge within a given DRG. To assist the reader in understanding the difference between the arithmetic and geometric mean lengths of stay, we published the arithmetic mean lengths of stay in Table 5 of the September 3, 1985 final rule (50 FR 35722).

To further dispel any misunderstanding about lengths of stay by DRG, we are publishing in this document, in Table 7 of the Addendum, the range of lengths of stay for each DRG in terms of selected percentiles. Each percentile threshold represents the proportion of Medicare discharges in each DRG with lengths of stay less than or equal to the indicated value.

These data provide the reader an idea of the variability in Medicare length of stay for each of the DRGs. For example, from the presentation in Table 7 of the addendum, one can see that in FY 1984, 90 percent of the patients in DRG 127 (heart failure and shock) experienced hospital stays of less than 17 days (that is, the 90th percentile length of stay value is 17), even though the mean length of stay for this DRG was only 8.8 days. However, ten percent of the patients were in the hospital less than 3 days (that is, the 10th percentile length of stay value is 3).

3. PRO Episode of Care Review (Recommendation No. 17)

Recommendation—ProPAC recommends that the focus of PRO quality of care review should be, to the extent possible, on the entire episode of care. The PRO's review should include, in addition to the period of hospitalization, the quality of care (and outcome) related to the overall episode of illness, including, if appropriate, skilled nursing or home health care.

Response—During the 1986–1988 contract period, PROs will substantially intensify the quality of care aspects of inpatient hospital medical review, including discharge planning. We recognize the importance of PRO review of a patient's condition at the time of discharge. Therefore, every case under PRO review will be subject to—

- Discharge review criteria to detect premature discharges; and
- Review of discharge planning, to determine that the availability of needed post-discharge care was considered.

In addition, six PROs are currently involved in a pilot study to determine a patient's health status at the time of hospital discharge. We believe that the results from this study will provide insight into the extent of premature discharges from hospitals under the prospective payment system. In addition, we intend to identify the most effective method of review for dealing with this problem. It should also be noted that HCFA is exploring the possibility of developing a survey-type study on post-hospital care received by Medicare beneficiaries. This study will focus on both covered and non-covered services in an attempt to assess the post-hospital needs of beneficiaries and how the Medicare program addresses those needs.

4. PRO Review of Outpatient Surgery (Recommendation No. 18)

Recommendation—ProPAC is concerned that efforts to shift surgical services from the inpatient to the outpatient setting could have an adverse impact on quality of care for certain Medicare beneficiaries. The PROs should be required to review and monitor the quality of care (and

outcome) of outpatient surgery for selected patients and procedures. As a starting point, the PROs should be required to review outpatient surgery cases for those procedures that have been identified for preadmission review, including in particular a sample of those cases for which the PRO has denied admission on preadmission review.

Response—Section 9401 of Pub. L. 99–272 requires 100 percent PRO review for certain surgical procedures including mandatory second opinion for those cases. We are in the process of developing a list of surgical procedures for which PRO review would be required. We are also considering changes in medical review for outpatient surgery for certain procedures.

Also, under section 9307 of Pub. L. 99–272, PRO review is required on a preprocedural basis for assistants at surgery for certain cataract operations whether the services are performed on an inpatient or outpatient basis. The Secretary, after consultation with the Physician Payment Review Commission, is responsible for developing recommendations and guidelines with respect to other surgical procedures for which an assistant at surgery is generally not medically necessary, and the circumstances under which the use of an assistant at surgery is generally appropriate but should be subject to prior approval of an appropriate entity.

We believe that this level of activity is sufficient to deal with potential quality problems in the outpatient setting. If further experience reveals additional problems or issues, we would, of course, re-examine this position.

5. *Recalculating the Inpatient Hospital Deductible (Recommendation No. 19)*

Recommendation—The Secretary should seek a legislative change in the formula for computing the inpatient hospital deductible so that the annual increase in the deductible is more consistent with the annual per-case increase in Medicare payments to hospitals. The proportion of the costs of inpatient hospital care borne by Medicare beneficiaries has inappropriately increased as a result of significant declines in length of stay experienced since the inception of the prospective payment system. This proportion should be lowered to its calendar year 1983 level.

Savings from shorter lengths of stay have benefited both hospitals and the Federal government, and ProPAC believes that Medicare beneficiaries should share in these gains as well. Hospitals have gained from the decline in length of stay because they keep the difference between the prospective payment and their costs for treating Medicare beneficiaries. The Federal government has gained as well, since the decline in the length of stay has been one of the factors considered in limiting increases in prospective payment rates.

Response—Section 1813(b)(2) of the Act specifies the manner in which the hospital inpatient deductible is computed. (The deductible represents the amount of beneficiary cost-sharing before the Medicare program assumes any liability for the additional costs of covered inpatient services.) The Secretary is required to determine the deductible amount each year according to the formula contained in the law.

For calendar year 1985, the amount of the deductible was $400. For calendar year 1986, the deductible increased 23 percent to $492. (For detailed explanations of how these figures were determined, see the notices of September 28, 1984 (49 FR 38510) and September 30, 1985 (50 FR 39940) or the 1985 (March 28, 1985) and 1986 (April 1, 1986) Annual Reports of the Board of Trustees of the Medicare Part A Trust Fund to Congress). The dramatic increase in the inpatient deductible was largely caused by the significant decrease in inpatient hospital utilization evident since the inception of the prospective payment system. As hospitals have responded to the financial incentives of the system, Medicare length of stay and admission rates have decreased substantially. Because payments for inpatient services are now being spread over fewer days, the per-diem formula for calculating the inpatient deductible described in section 1813(b)(2) of the Act has resulted in a substantial increase in the amount of the inpatient deductible, an increase that far exceeds the amount of inflation in the cost of furnishing hospital care.

To avoid future increases of this magnitude, ProPAC has recommended that the deductible reflects a per discharge rather than per-diem payment formula, an approach consistent with the prospective payment system. The basis for ProPAC's recommendation is an anticipation of further significant declines in the days of care per admission furnished to Medicare inpatients.

We are currently examining this issue and possible alternatives for calculating the inpatient hospital deductible. Under section 9128 of Pub. L. 99–272, the Senate Finance Committee is expected to report legislation to reform the calculation of the annual increase in the deductible so that it is more consistent with annual increases in Medicare payments to hospitals.

D. Patient Classification and Case Mix

1. Improving the Measurement of Hospital Case Mix (Recommendation No. 20)

Recommendation—ProPAC believes that the DRG system is currently the most appropriate of the available measures of hospital case mix for the Medicare prospective payment system and should be retained in principle as the system upon which to base Medicare payments to hospitals. Resource use varies considerably, however, within some DRGs. Therefore, ProPAC intends to continue its analysis of individual DRGs and to undertake a systematic evaluation of the entire system. The goal is to identify potential problems in DRG construction and classification and recommend changes that will improve the homogeneity within DRGs and the equity of payment across hospitals.

Response—We agree with ProPAC's assessment of the DRG system and support its evaluation efforts. We anticipate the evaluation of the DRG system to be an ongoing process. To improve DRG assignment criteria and refine the grouping methodology in order to obtain more clinically homogeneous categories reflective of actual inpatient resource consumption, we modified the DRG classifications in the September 3, 1985 final rule (50 FR 35647) and made further modifications in the final notice located elsewhere in this edition of the Federal Register, as discussed above.

2. Process for Maintaining and Updating the ICD–9–CM (Recommendation No. 21)

Recommendation—ProPAC recommends that the Secretary should establish a mechanism for maintaining and updating ICD–9–CM diagnosis and procedure codes in a timely and effective manner. This process should include adequate educational support for all users.

Response—The ICD–9–CM Coordination and Maintenance Committee has already been established for the purpose of maintaining and updating the ICD–9–CM codes. The Committee is comprised entirely of representatives of Federal agencies with an interest in ICD–9–CM coding and its modification, updating, and use for Federal programs. The Committee is co-chaired by staff from HCFA and the National Center for Health Statistics.

Public meetings of the Committee are held quarterly. Meeting dates and locations are announced in the Federal Register. The public is encouraged to submit items for the agenda, attend the

public meetings and actively participate in the decisions. Although only the members of the committee may vote on the issues presented, their decisions are not made without consideration of the opinions expressed by non-Federal users of ICD–9–CM codes. Past meetings of the committee have been attended by representatives of the AHA, ProPAC, American Medical Records Association and the Commission on Professional and Hospital Activities, as well as noted physicians and hospital medical records administrators.

As was previously stated in the March 13, 1986 proposed notice (51 FR 8776) concerning DRG classification changes, new ICD–9–CM codes adopted by July 1 of each year by this Committee, would accommodated by the GROUPER program, without DRG classification changes, at the beginning of the next Federal fiscal year. The ICD–9–CM Coordination and Maintenance Committee has thus far approved new procedure codes in 9 areas. The Committee held its spring meeting on May 21 and 22, 1986. New ICD–9–CM codes are currently being considered to identify the following:

Parenteral and Enteral Nutrition
HTLV–3/LAV Infections
Pacemaker Technology
Gastric Endoscopic Balloon Procedures
Percutaneous Balloon Valvoplasty
Lasers
Ureterscopy and Pyeloscopy
Percutaneous Angioscopy
Endoscopic and Percutaneous Procedures on the Biliary Tract
Percutaneous Embolization
Rectosigmoid Resection

We also note that the Committee mission includes establishment of educational activities related to the appropriate use of ICD–9–CM coding. An educational subcommittee was formed to review available ICD–9–CM educational material. Suggestions for action items for the subcommittee have been requested from attendees at the public meetings.

As part of its educational activities, the Committee spends a considerable portion of its time on revision of instructions included in the coding manuals. Addendum, errata and revisions of the "includes notes, excludes notes and alphabetical indexes" are considered. The Committee intends that publication of all new codes and coding actions be accompanied by appropriate indexing changes and instructions.

Finally, we wish to point out that current plans do not envision the revision of volume 3 of ICD–9–CM to accompany publication of ICD–10. (ICD–10 will only include diagnosis codes.) We are presently exploring, with interested parties, how to best handle long-term coding issues. Intuitively, we believe for Medicare purposes that a single coding system for all procedures, regardless of whether performed in hospitals or physician offices, would be more appropriate than the present method of using two unique procedure coding systems for each aspect of the program. We welcome comments and suggestions on this issue as we continue to evaluate our long-term coding policies.

3. Process for Interpretation and Assignment of Existing Codes (Recommendation No. 22)

Recommendation—The Secretary should ensure that interpretation and assignment of existing ICD–9–CM diagnosis and procedure codes for payment purposes strictly adhere to coding rules and guidelines. In order to maintain the integrity and uniformity of the coding system while allowing flexibility for payment purposes, the process for interpretation and assignment of existing ICD–9–CM codes should be assigned to one authorized group.

Response—As ProPAC notes in its discussion of this recommendation, there are a number of organizations currently disseminating conflicting coding advice. We consider the ICD–9–CM Coordination and Maintenance Committee as the single group officially authorized to interpret and clarify coding guidelines and assign new codes to the ICD–9–CM system. We believe the educational role and responsibilities of this Committee encompass appropriate interpretation and assignment of existing ICD–9–CM codes. By having a single entity dually responsible for interpretation and assignment of existing codes as well as revision and updating of the coding manuals, we believe we can assure consistent and expeditious dissemination of coding advice. Of course, as ProPAC pointed out in its discussion of this recommendation, the Department reviews and approves material published in the AHA's *Coding Clinic*. Thus users of the AHA's service may assume that the *written* material is consistent with our position on coding.

Like ProPAC, we recognize the necessity of curtailing the dissemination of inaccurate and conflicting coding advice. Under contract to HCFA, the PROs are responsible for verifying the accuracy of ICD–9–CM codes reported on Medicare bills. The PROs continue to review a sample of claims, correct coding errors, and make educational contacts with appropriate hospital staff when problems are identified. We have established a procedure whereby PROs can direct coding questions to HCFA staff members intimately involved with the ICD–9–CM Coordination and Maintenance Committee. In addition, we now require PROs to have a trained coding person on staff and we intend to increase coding instructional material disseminated to the PROs from HCFA. We believe we are taking the action necessary to encourage consistent application of ICD–9–CM; however, there is little we can do to abate the dissemination of inaccurate or inconsistent instructions from private sources.

4. Interim Mechanism for Coding Problems (Recommendation No. 23)

Recommendation—The Secretary should establish an interim mechanism to allow early identification of new technologies, procedures and diagnoses and more appropriate DRG assignment when ICD–9–CM codes cannot be updated in a timely manner.

Response—We support ProPAC's recommendation for a refinement to the ICD–9–CM codes to permit more rapid identification of new technologies and are currently considering alternatives for implementing such a mechanism. We are particularly soliciting comments and suggestions on how best to adopt the Medicare claims processing system to assure more rapid availability of data on new and changing technologies.

E. DRG Classifications and Weighting Factors

1. Adjustment of the Labor Portion of the Standardized Amounts for Some DRGs Involving Expensive Devices (Recommendation No. 24)

Recommendation—The labor portion and nonlabor portion of the standardized amounts should be redefined for DRGs 39 (lens procedures with or without vitrectomy), 104 and 105 (cardiac valve procedures with pump, with and without cardiac catherization, respectively), 209 (major joint and limb reattachment procedures), 471 (bilateral or multiple major joint procedures of the lower extremity), and the newly defined DRGs for pacemaker implantation and replacement (Recommendations 25 and 26), implantable defibrillators (Recommendation 27), and penile prostheses (Recommendation 28). The new portions should more closely reflect the labor-related and nonlabor-related shares of costs for cases in each of these DRGs. These recalculations should be made so that total hospital payments

remain unchanged. The correct labor and nonlabor portions of the standardized amounts should be calculated from data currently being generated in HCFA's study of the labor portion of costs by DRG. If this information proves to be incomplete, the portions should be calculated from available cost and charge data for these DRGs. The Secretary should study the need for adjustments to the labor and nonlabor portions of the standardized amounts in all DRGs.

Response—We are continuing our studies to identify DRGs with high nonlabor-related cost shares. Our analyses of FY 1984 PATBILL charge patterns confirm ProPAC's finding that the following DRGs have charges for supplies that average approximately 20 percent or more of total inpatient charges:

- DRG 39 (lens procedures).
- DRG 115 through 118 (cardiac pacemakers).
- DRG 209 (joint and limb procedures).
- DRG 341 (penis procedures).

However, the ratio of average charges for supplies to total inpatient charges for DRGs 104 and 105 (cardiac valve procedures), which represent the highest average charges of the nine DRGs under study, are lower than 20 percent.

Our review confirms ProPAC's conclusion that rural and urban hospital charges for cases in the selected DRGs are more similar than those for other DRGs because both types of hospitals must buy devices from the same national markets. But the fact that some DRGs have supply charges that account for a much higher share of a bill than the average supply charge of 8.0 percent does not justify an automatic adjustment to the labor and nonlabor portions of the standardized amounts.

We believe that increasing the nonlabor share for these DRGs would minimally redistribute funds from urban to rural hospitals. Our reimbursement simulations, which assume no changes in the classes of hospitals performing the identified DRGs, indicate that for each ten percent reduction in the labor-related portion of the standardized amounts for *all* DRGs, rural hospitals would gain up to four-tenths of one percent, while urban hospitals would lost about one-tenth of one percent. Thus, lowering the labor-related portion for only the identified DRGs would result in a much smaller effect. In 1985, these DRGs represent nearly seven percent of urban hospital cases and over eight percent of urban hospital revenues, but only less than four percent of rural hospital cases and about six percent of rural hospital revenues.

Moreover, lowering the labor-related portion of the standardized amounts for some DRGs logically implies increasing that portion for other DRGs. This could imply that ultimately the standardized amounts would be differentiated for each DRG. We believe to do so would unduly complicate the administration of the prospective payment system and may distort hospital incentives. While the ProPAC analysis and our preliminary analyses suggest that rural hospitals are relatively disadvantaged on certain types of cases, namely, those in which the nonlabor portion is higher than the national average, they are, by the same token, advantaged on those types of cases in which the nonlabor-related share is less than the national average. Accordingly, we believe that it is preferable to use national averages for all cases since there is no evidence to suggest that a class of hospitals is systematically disadvantaged in their entire Medicare business by our use of national average labor-related and nonlabor-related shares. Therefore, we are not accepting ProPAC's recommendation to adjust the labor and nonlabor portions of the standardized amounts for certain DRGs.

2. Reclassification of Pacemaker Cases Based on Type of Device (Recommendation No. 25)

Recommendation—Prior to recalibration, the DRGs involving implantation of cardiac pacemakers (currently DRGs 115 through 118) should each be restructured into two DRGs, one for cases involving dual-chamber or functionally similar pacemakers, and one for cases receiving other single-chamber pacemakers. New ICD-9-CM procedure codes should be created to distinguish between these types of cases. A mechanism should be established to evaluate the appropriateness of all implants involving dual-chamber of functionally similar pacemakers. In the initial year of this new classification, the weights for all pacemaker DRGs should be calculated using charge data from the Part A tape bills (PATBILL) file and data on cost differences between pacemaker types.

Response—We do not agree with this recommendation for several reasons. First, DRGs 115 through 118 cover a wide spectrum of pacemaker procedures ranging from the initial implantation of a pacemaker system where there is acute myocardial infarction, heart failure or shock, through the replacement of an electrode. We do not believe that restructuring all of these DRGs into two classifications based on the type of pacemaker implanted would be appropriate in view of the numerous pacemaker procedures included in each DRG. Such cases involving implantation of a pacemaker (the initial implantation or replacement) should be grouped into either DRG 115 or 116. These are the only DRGs that should reflect any differences due to the distinction in the cost of the two devices. If we propose changes on this basis in pacemaker case at a future date, our changes would be limited to DRGs 115 and 116. At this time, however, there is no method available on our records for distinguishing between the two types of devices, and therefore, we do not have a method of establishing different DRGs for single and dual-chamber pacemakers.

As the guidelines indicate, if the use of the dual chamber is not appropriate, we do not cover it. With respect to ProPAC's concerns on the appropriate use of dual-chamber pacemakers, we note that we issued revised guidelines, effective on May 9, 1985, which clarify our coverage policies on dual-chamber pacemakers (Section 65-6 of the Coverage Issues Manual (HCFA-Pub. 6), formerly the Coverage Issues Appendix of the Part A Intermediary Manual). We believe these policies respond to ProPAC's concerns in this matter.

In the interim, we agree that a change in ICD-9-CM coding would be the first step in any evaluation. This would allow for the collection of data for evaluation purposes, and to propose changes, as appropriate. As noted above, new ICD-9-CM codes to distinguish single-chamber from dual-chamber pacemakers have been proposed.

3. Reclassification of Pacemaker Replacement Cases (Recommendation No. 28)

Recommendation—Prior to recalibration, the cases involving replacement of a permanent cardiac pacemaker, except those with myocardial infarction, congestive heart failure or shock, should be reassigned to DRGs that include only pacemaker replacements.

Response—We do not agree with ProPAC's recommendation because we believe the inconsistencies of assigning a DRG weight for the cases involving pacemaker replacement, as identified by ProPAC, are a result of inappropriate use of the ICD-9-CM codes rather than the DRG classification system. The ICD-9-CM coding system, if properly used, provides for the grouping of cases that involve replacement or removal of electrodes (and other changes to the

system) to DRG 117. Likewise, because replacement of a pulse generator is more resource intensive than the replacement or removal of electrodes, it would properly be assigned to DRG 118.

The replacement of a permanent pacemaker in its entirety is even more resource intensive than the pacemaker procedures in DRGs 117 and 118. If properly coded, that is, using operating room procedure codes 3770 (Insertion of cardiac pacemaker, not otherwise specified), 3773 (Insertion of permanent pacemaker into atrium, transvenous route), 3774 (Insertion of permanent pacemaker into ventricle, transvenous route), 3775 (insertion of permanent cardiac pacemaker into unspecified site, transvenous route), 3776 (Insertion of permanent pacemaker into epicardium), and 3777 (Insertion of permanent cardiac pacemaker, unspecified approach), the replacement of a permanent pacemaker would be assigned to either DRG 115 or 116 depending upon the presence or absence of acute myocardial infarction, heart failure, or shock.

We believe that careful and consistent use of the surgical codes for pacemaker-related procedures would alleviate the difficulties identified by ProPAC. We are not, therefore, reassigning cases involving replacement of a permanent cardiac pacemaker.

4. Implantable Defibrillator (Recommendation No. 27)

Recommendation—Implantable defibrillator cases should be assigned to a unique DRG. The labor portion and nonlabor portion of the standardized amounts should be redefined for this new DRG to reflect the labor-related and nonlabor-related shares of costs for these cases.

Response—We believe there are not sufficient data available currently to accept or reject this recommendation. At the time coverage was extended to the Automatic Implantable Cardioverter Defibrillators, we recognized that a separate DRG was a consideration but that additional cost and charge data were needed before this decision could be made. We believe that the best approach when insufficient data are available is the one we have taken in the final notice of DRG classification changes located elsewhere in this edition of the Federal Register, which was to—

- Establish a unique ICD-9-CM code as soon as possible;
- Make payment based on an existing DRG; and
- Collect data.

When cost and charge data are available, a decision can be made as to the appropriate placement of the new procedure within the system.

5. Penile Prostheses (Recommendation No. 28)

Recommendation—Prior to recalibration, ProPAC recommends that cases involving the implantation of a penile prosthesis should be removed from DRG 341 and reassigned to a unique DRG. The labor portion and nonlabor portion of the standardized amounts should be redefined for this new DRG to reflect the labor-related and nonlabor-related shares of costs for these cases. ProPAC contends that the difference in charges for DRG 341 (between penile prosthesis cases and other cases within this DRG), estimated from the 1984 PATBILL data at about 35 percent, is due largely to the cost of the prosthesis.

Response—In analyzing the FY 1984 PATBILL data for DRG 341, we find little reason to believe that reclassification of cases involving penile prosthesis procedures is appropriate at this time. Our analysis indicates that—

- DRG 341 shows very little variation in charges in comparison to the other DRGs. (The coefficient of variation equals .55.);
- Forty-three percent of the penile prosthesis cases showed standardized charges at or below the average standardized charge for the DRG;
- The most frequently reported standardized charge range (mode) for these cases was approximately 28 percent lower than the average standardized charge for DRG 341;
- The median standardized charge and the mean standardized charge for penile prosthesis cases were only slightly higher (nine percent and 17 percent respectively) than the average standardized charge for DRG 341; and
- Distributional analysis indicates that the same hospitals performing penile prosthesis procedures are also performing lower cost penis procedures. Nationally, only one hospital furnished more than 30 penile prostheses to Medicare beneficiaries during FY 1984. Thus, it seems that hospitals do not have more difficulty with DRG 341 than any other DRG.

We note that there are some differences between ProPAC's analysis and our own. This is primarily due to the fact that ProPAC used unadjusted charges while we analyzed standardized charges. We believe it is more appropriate to evaluate standardized charges as such charges eliminate much of the individual variation in hospital charge structures attributable to wages and teaching status. Moreover, standardized charges serve as the basis for the DRG weighting factors. We note that ProPAC used standardized charges in much of its analysis related to other DRG classification changes. In reviewing ProPAC's analysis, we also noted that removal of penile prosthesis procedures from DRG 341 results in an increased coefficient of variation for the remaining penis procedures. Despite ProPAC's conclusion that removal of penile prosthesis is appropriate, the data indicate that penis procedures are more homogeneous in resource intensity when grouped with penile prosthesis than when prosthesis procedures are removed. That is, although penile prosthesis cases may be more resource intensive than many minor penis procedures, they are similar in resource or less resource-intensive than several other penis procedures cases, such as reconstruction of penis. Thus, ProPAC's own data demonstrate that the homogeneity of DRG 341 is superior without reclassification.

In addition, we do not believe it is appropriate to establish single procedure DRGs under most circumstances. The basic concept of the DRG system is to group a number of clinically similar diagnoses and procedures that are similar in resource use. The establishment of single-procedure DRGs runs counter to the grouping concept and would establish a precedent to classify and develop weighting factors separately for all individual procedures and diagnoses. Under such a precedent, the number of DRGs could grow dramatically, rapidly resulting in an unmanageable system. In addition, establishing DRGs along these lines would represent a major step away from the prospective payment system as currently established, and a major step back toward a cost-based reimbursement system, in which payment to a hospital is closely tied to the actual costs incurred in furnishing individual services.

We believe that procedure-specific DRGs should be utilized only in those situations in which the data indicate that the procedure is neither clinically coherent nor homogeneous with respect to resource use with any other procedures in the major diagnostic category. As we indicated above, our analysis of the data on penile prostheses does not indicate that this is the situation.

6. Additional Payment for Magnetic Resonance Imaging (Recommendation No. 29)

Recommendation—ProPAC recommends that, for a period of three years, Medicare should pay hospitals an

additional amount for each covered inpatient magnetic resonance imaging (MRI) scan performed on a Medicare beneficiary in a prospective payment system hospital. Under existing capital payment policy (that is, payment of capital on a reasonable cost basis), the add-on for FY 1987 should be $124 for each scan performed on beneficiaries in institutions in which Medicare pays for the capital costs of an MRI scanner and $282 for each scan performed on a beneficiary in a hospital other than the hospital in which the beneficiary is currently an inpatient. In FY 1988 and FY 1989 the add-on amounts for all hospitals should be recalculated to reflect any change in the average cost of an efficiently produced scan and changes in capital payment policy.

Response—Because of the costliness of MRI, ProPAC has recommended an explicit add-on to the prospective payment rate for Medicare discharges in which the procedure was performed. MRI was not reflected in the 1981 cost data base used to develop the initial prospective payment rates. Therefore, ProPAC maintains that, absent historical data, an additional payment for MRI would provide an incentive for the adoption of a clinically beneficial although costly technology.

MRI is a relatively new medical technology involving the production of images when a patient is placed in a controlled magnetic field. While similar to computerized tomography (CT) scanning, MRI can provide images along more than one plane, without use of radiation and, often does not require the use of contrast agents for image enhancement. Many clinicians maintain that MRI provides images of greater clarity compared to other alternative technologies, particularly in sites surrounded by bone.

While this technology is covered by the Medicare program, MRI typically involves large capital outlays. The potential impact of MRI is substantial because of the large number of DRGs that may reflect this procedure.

We believe that providing an explicit additional payment for the use of a particular technology would establish a precedent that runs counter to one of the principal objectives of the prospective payment system; that is, the establishment of a single payment rate for all cases classified within a DRG regardless of the specific resources used in any particular case. Moreover, to the extent MRI replaces other imaging technologies that are reflected under the prospective payment rates, we believe that an additional payment would be unwarranted. In fact, a separate payment could be counterproductive because it potentially creates an incentive to use the technology in cases in which it may not be appropriate. Furthermore, such a payment would insulate hospitals from the consequences of their choices with respect to resource use. While there would be no "cost" to hospitals that use MRI in addition to other techniques, we would be providing a real bonus to hospitals that use MRI instead of other imaging techniques. In addition, we point out that a portion of capital payments would continue to be based on actual costs during the capital payment transition period. Therefore, the Medicare program already reimburses hospitals for its share of the capital costs of new technology.

In addition, we note that under section 1886(e)(2) of the Act, ProPAC is required to consider changes in technological (such as the MRI technology) and scientific advances in determining its recommended percentage change in the prospective payment rates. Since the Secretary is required under section 1886(e)(4) of the Act to take account of ProPAC's recommendations, we also consider technological changes and scientific advancements in determining the applicable percentage change in the prospective payment rates. We believe the allowance that we are proposing for science and technology in this document, and that we will consider each year, represents the appropriate means of taking into account such special technologies. Rather than proposing a special add-on for MRI technology, which would only benefit those hospitals that make use of that technology, the general allowance for technological and scientific advances permits hospitals to choose which technological advances are appropriate for the care and services they furnish to Medicare beneficiaries.

If the widespread adoption of MRI technology materially affects the relative resource use of specific DRGs, the DRG relative weights would automatically reflect the resources associated with MRI as cases involving MRI are used to recalibrate the DRGs. Therefore, because the prospective payment system already provides sufficient means to incorporate both the capital and operating costs of new technology, we have not adopted ProPAC's recommendation.

7. Extracorporeal Shock Wave Lithotripsy (Recommendation No. 30)

Recommendation—Prior to recalibration, cases in which extracorporeal shock wave lithotripsy (ESWL) is the principal procedure should temporarily be removed from DRG 324 and reassigned to DRG 323. The payments and costs for all cases in this DRG should be monitored to determine the appropriateness of prospective payments for operating costs. A unique procedure code should be identified for this procedure.

Response—ProPAC's analysis found that payment under DRG 324 substantially understated the cost of ESWL. We have received similar correspondence on this matter ever since Medicare coverage was extended to this new technology. Heretofore, we had no means of identifying this procedure in our data base. Consequently, our past analyses have been based on limited data derived largely from institutions involved in clinical testing of ESWL and our ability to resolve the problem has been severely limited.

As stated in the final notice of changes to the DRG classification system, published elsewhere in this issue of Federal Register, a unique procedure code has been approved for ESWL (59.95). Given that we will now be able to identify this procedure, we are accepting ProPAC's recommendation. That is, we are proposing to classify all cases involving a principal diagnosis of urinary stones treated by ESWL to DRG 323, regardless of age or absence of complications or comorbidities. We will continue to monitor the resource intensity of ESWL and will consider further classification changes if necessary.

8. Lymphomas and Leukemias (Recommendation No. 31)

Recommendation—Prior to recalibration, cases currently assigned to DRGs involving lymphoma, leukemia, and other related diagnoses (DRGs 400–404) should be reclassified into one of five newly defined DRGs:

DRG 400—Lymphoma/leukemia with major operating room procedure;

DRG 401—Acute leukemia without major operating room procedure;

DRG 402—Lymphoma/non-acute leukemia with other operating room procedure and complication/comorbidity;

DRG 403—Lymphoma/non-acute leukemia with other operating room procedure or complication/comorbidity; and

DRG 404—Lymphoma/non-acute leukemia without operating room procedure or complication/comorbidity.

ProPAC recommends that the new classification provide a unique DRG for

acute leukemia cases not involving a major operative procedure (as distinct from non-acute leukemia and lymphomas), eliminate age as a criterion for DRG assignment, and modify present classification based on operative procedure, complications and comorbidity. Other ways of further improving these DRGs should continue to be explored.

Response—We agree with ProPAC that DRGs 401 through 404 are more heterogeneous than most DRGs and, consequently, may indicate that reclassification of cases within these DRGs is appropriate. We are particularly concerned, however, with ProPAC's proposed reconfiguration of DRG 403, which combines about 7,000 surgical cases of lymphoma and non-acute leukemia with some 28,000 non-surgicial cases of lymphoma and non-acute leukemia with complications or comorbidities. Our analyses indicate that the latter group of cases are about 25 percent more resource intensive than the surgical cases without complications or comorbidities. Moreover, the basic logic of the GROUPER program is structured so as to establish DRGs that are either medical or surgical. Each medical DRG is assigned based on a specific set of principal diagnoses, whereas a surgical DRG generally does not entail looking at a diagnosis but only at procedures. The predominant exception to this logic occurs in cases where a principal diagnosis alone explains resource use, without regard to whether or not a surgical procedure is performed. This generally occurs when cases with a specific principal diagnosis virtually always entail surgical treatment or virtually never entail surgical treatment. We have found the latter to be the case with acute leukemias in that fewer than four percent of the cases in our data base involved surgical treatment.

In light of our analysis and the foregoing discussion, we believe similar improvements in the homogeneity of these DRGs may be achieved without disrupting the logic inherent in the current classification structure. Therefore, we are proposing to accept the basic premises of ProPAC's recommendation. That is, we are accepting ProPAC's suggestion that acute leukemia cases without major operating room procedure be classified into a single DRG. We have added acute leukemia not otherwise specified (code 2080) to the other acute leukemia codes included in ProPAC's recommendation. In addition, we are accepting ProPAC's suggestion that age consideration be eliminated from the decision tables for classification of lymphoma/leukemia cases.

We are proposing to establish the following classifications for lymphoma/leukemia patients:

DRG 401—Lymphoma/non-acute leukemia with other operating room procedure with complications and/or comorbidities.

DRG 402—Lymphoma/non-acute leukemia with other operating room procedure without complications and/or comorbidities.

DRG 403—Lymphoma/non-acute leukemia without operating room procedure with complications and/or comorbidities.

DRG 404—Lymphoma/non-acute leukemia without operating room procedure without complications and/or comorbidities.

DRG 405—Acute leukemia without major operating room procedure, age less than 18.

DRG 473—Acute leukemia without major operating room procedure, age greater than 17.

Acute leukemia is defined as patients with a principal diagnosis of—

- Acute lymphoid leukemia (code 2040);
- Acute myeloid leukemia (code 2050);
- Acute monocytic leukemia (code 2060);
- Acute erythremia (code 2070); and
- Acute leukemia, not otherwise specified (code 2080).

Although the reclassification we are proposing is somewhat different from that proposed by ProPAC, we have found similar improvements in homogeneity. We believe it is appropriate to create an additional DRG for acute leukemia cases without major operating room procedure and to maintain the distinction between surgical and medical lymphoma and non-acute leukemia cases.

9. Upper Extremity Procedures (Recommendation No. 32)

Recommendation—Prior to recalibration, cases involving procedures of the upper extremity that are currently classified in DRGs 223, 224, 228, and 229 should be reassigned based on anatomical location and the presence of systemic collagen vascular disease or implantation of joint prostheses or complications and/or comorbidities. Nonsurgical hip fracture cases currently being assigned to DRGs 223, 224, 225, 228, and 229 should be reassigned to the appropriate medical DRG.

Response—ProPAC's analysis in this regard includes 2 pairs of DRGs. DRGs 223 and 224 include upper extremity procedures except humerus and hand; DRGs 228 and 229 include humerus and hand procedures. With regard to DRGs 223 and 224, ProPAC found that age groups explained very little of the variation in charges between the DRGs. Rather, they found complications and comorbidities and joint replacement procedures showed a significant difference in resources from all other cases in these DRGs.

Similarly, in DRGs 228 and 229, which are currently distinguished based on ganglion and cyst diagnoses, ProPAC found rheumatoid diagnoses, complications and comorbidities and joint replacement procedures more appropriate indicators of resource utilization.

We also have been studying these four DRGs throughout the year and have reached similar conclusions with regard to complications or comorbidities and joint procedures. We do not, however, agree with ProPAC's recommendation with regard to collagen vascular diseases in the hand. We note that in ProPAC's analysis of DRGs 228 and 229, the addition of collagen vascular diseases decreased the amount of explained variation by 16 percent. Further, the addition of this diagnosis (1328 cases) reduced the mean standardized charge for the DRG by five percent. We believe the commingling of uncomplicated rheumatoid cases with complicated cases and expensive joint replacement procedures would detract from the homogeneity of the revised DRGs. We should point out that ProPAC did not recommend classification of rheumatoid cases into the more resource-intensive DRG in upper extremity procedures except humerus and hand where inclusion of these diagnoses similarly reduced the amount of explained variation by almost ten percent. Moreover, as part of our analysis we have found that other major joint procedures, such as arthrodesis and arthrotomy are similar, both clinically and in resource utilization, to joint procedures involving a prosthesis. Consequently, we are proposing to expand upon ProPAC's recommendation to include major joint procedures with the joint prosthesis procedures included in the more resource-intensive classification. We are proposing to establish the following classifications in MDC 8:

DRG 223: Major shoulder or elbow procedures, or other shoulder, elbow or forearm procedures with complications or comorbidities.

DRG 224: Shoulder, elbow or forearm procedures, except major joint

procedures, without complications or comorbidities.

DRG 228: Major thumb or joint procedures, or other hand or wrist procedures with complications or comorbidities.

DRG 229: Hand or wrist procedures, except major joint procedures, without complications or comorbidities.

Major elbow and shoulder procedures include the following procedure codes:

8011 Other arthrotomy of shoulder
8012 Other arthrotomy of elbow
8123 Arthrodesis of shoulder
8124 Arthrodesis of elbow
8181 Shoulder arthroplasty with prosthesis
8183 Shoulder arthroplasty, not elsewhere classified
8184 Elbow arthroplasty with prosthesis
8185 Elbow arthroplasty, not elsewhere classified

These procedures would be eliminated from DRG 224. All other procedures currently in DRGs 223 and 224 would result in assignment to proposed DRG 223 only if a complication or comorbidity is also present.

Major wrist, thumb and hand procedures include the following procedure codes:

8013 Other arthrotomy of wrist
8014 Other arthrotomy of hand/finger
8171 Hand arthroplasty with prosthesis
8179 Hand arthroplasty, not elsewhere classified
8186 Carpal arthroplasty with synthetic prosthesis
8187 Wrist arthroplasty, not elsewhere classified
8261 Pollicization operation
8269 Other reconstruction of thumb

These procedures would be eliminated form DRG 229. All other procedures currently in DRGs 228 and 229 would result in assignment to the proposed DRG 228 only if a complication or comorbidity is also present.

In addition we noted that procedure code 8421, thumb reattachment, had inadvertently been omitted from the procedures classified in MDC 8. Therefore, we are proposing to add this procedure to DRGs 228 and 229.

Finally, ProPAC has included in this recommendation a suggestion that cases involving both a surgical foot or upper extremity procedure and a nonsurgical hip diagnosis be classified on the basis of the more resource-intensive hip diagnosis.

We believe this situation is one example of the generic problem that could occur in any of the MDCs which contain a medical DRG with a higher weight than the least resource-intensive surgical DRG. Although we recognize that this issue may appear problematic, the situation occurs very infrequently. For example, ProPAC found only 125 cases related to this hip fracture issue. We believe this problem needs to be studied in a broad spectrum with detailed analysis of the frequency of occurrence, cost impact and impact on the DRG logic system before any piecemeal changes are implemented. Therefore, we have deferred proposing any action on this recommendation at the present time.

VI. Other Required Information

A. Public Comments

Because of the large number of items of correspondence we normally receive on a proposed rule, we are not able to acknowledge or respond to them individually. However, in preparing the final rule, we will consider all comments that we receive by the date and time specified in the "Dates" section of this preamble.

B. Paperwork Reduction Act

Section 412.65(b) contains information collection requirements that are subject to Office of Management and Budget review under the Paperwork Reduction Act of 1980. A notice will be published in the Federal Register when approval is obtained. Other organizations and individuals desiring to submit comments on the information collection requirements should direct them to the agency official whose name appears in the preamble and to the Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C., 20503, ATTN: Desk Officer for HCFA.

C. List of Subjects

42 CFR Part 405

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Nursing homes, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 412

Health facilities, Medicare.

42 CFR Chapter IV would be amended as follows:

CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES, SUBCHAPTER B—MEDICARE PROGRAMS

I. Part 405 is amended as follows:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

A. Subpart D is amended as follows:

Subpart D—Principles of Reimbursement for Providers, Outpatient Maintenance Dialysis, and Services by Hospital-Based Physicians

1. The authority citation for Subpart D is revised to read as follows:

Authority: Secs. 1102, 1122(d), 1814(b), 1815, 1833(a), 1861(v), 1871, 1881, 1886, and 1887 of the Social Security Act as amended (42 U.S.C. 1302, 1320a–1(d), 1395Al(b), 1395g, 1395i(a), 1395x(v), 1395hh, 1395rr, 1395ww, and 1395xx).

2. Section 405.401 is amended by revising paragraph (d)(2) to read as follows:

§ 405.401 Introduction.

* * * * *

(d) *Payment for inpatient hospital services.*

* * * * *

(2) For cost reporting periods beginning on or after October 1, 1983, payment to short-term general hospitals located in the 50 States and the District of Columbia for the operating costs of inpatient hospital services is determined prospectively on a per discharge basis under Part 412 of this chapter except as follows:

(i) Payment for capital-related, medical education, and kidney acquisition costs, and the costs of certain anesthesia services, is provided in § 412.113 of this chapter.

(ii) Payment to children's, psychiatric, rehabilitation and long-term hospitals (as well as separate psychiatric and rehabilitation units (distinct parts) of short-term general hospitals), which are excluded from the prospective payment system under Subpart B of Part 412 of this chapter, and to hospitals outside the 50 States and the District of Columbia is on a reasonable cost basis, subject to the provisions of § 405.463.

(iii) Payment to hospitals subject to a State reimbursement control system is described in paragraph (e) of this section.

* * * * *

3. Section 405.435 is amended by revising paragraph (b) to read as follows:

§ 405.435 Nonallowable costs related to certain capital expenditures.

* * * * *

(b) *Applicability.* Under the principle specified in paragraph (a) of this section, any costs related to capital expenditures including the expenditures described in

§ 412.65 of this chapter) the obligation for which was incurred by or on behalf of a provider subsequent to 1972 (except as described in paragraph (c) of this section), are not allowable if the Secretary has determined that the capital expenditures have not been submitted to the designated planning agency as required or that they have been determined to be inconsistent with the standards, plans, or criteria developed by the designated planning agency or other health planning agency in the State to meet the need for adequate health care facilities in the area covered by the plan or plans so developed (see §§ 100.101 through 100.109 of this title). Costs claimed by a provider in connection with capital assets that are donated or transferred to a provider are also subject to the application of such principle. Such principle also applies to the reasonable equivalent of that portion of any rental expense incurred pursuant to a lease or a comparable arrangement (and to any amounts deposited under the terms of such a lease or comparable arrangement in computing the return on equity capital) that would have been excluded had the provider acquired such a facility or equipment by purchase. The amounts excluded are not subject to reimbursement under any other provisions of Medicare.

* * * * *

4. In § 405.454, the introductory text of paragraph (j) is redesignated as paragraph (j)(1) and revised; current paragraphs (j)(1) through (j)(5) are redesignated as paragraphs (j)(2) through (j)(6) respectively; in newly redesignated paragraph (j)(2), the introductory text and paragraphs (j)(2)(i) through (j)(2)(iii) are revised; and paragraph (m) is revised to read as follows:

§ 405.454 Payments to providers.

* * * * *

(j) *Periodic interim payment method of reimbursement.* (1) *Applicability.*—(i) *Covered services furnished before July 1, 1987.* In addition to the regular methods of interim payment on individual provider billings for covered services, the periodic interim payment (PIP) method is available for Part A hospital and skilled nursing facility inpatient services and for both Part A and Part B home health agency services.

(ii) *Covered services furnished on or after July 1, 1987.* Effective with covered services furnished to beneficiaries on or after July 1, 1987, the PIP method, in addition to the other methods of interim payment on individual provider billings for covered services, is available only for the following:

(A) SNF services.

(B) Part A and Part B HHA services.

(C) Hospitals receiving payment in accordance with a demonstration project authorized under section 402(a) of Pub. L. 90-248 (42 U.S.C. 1395b-1) or section 222(a) of Pub. L. 92-603 (42 U.S.C. 1395b-1 (note)), or a State reimbursement control system approved under section 1886(c) of the Act and Subpart C of Part 403 of this chapter, if that type of payment is specifically approved by HCFA as a part of the demonstration or control system.

(2) Any participating provider furnishing the services described in paragraph (j)(1) of this section that establishes to the satisfaction of the intermediary that it meets the following requirements may elect to be reimbursed under the PIP method, beginning with the first month after its request that the intermediary finds administratively feasible:

(i) The provider's estimated total Medicare reimbursement for inpatient services is at least $25,000 a year computed under the PIP formula or, in the case of an HHA, either its estimated—

(A) Total Medicare reimbursement for Part A and Part B services is at least $25,000 a year computed under the PIP formula; or

(B) Medicare reimbursement computed under the PIP formula is at least 50 percent of estimated total allowable cost.

(ii) The provider has filed at least one completed Medicare cost report accepted by the intermediary as providing an accurate basis for computation of program payment (except in the case of a provider requesting reimbursement under the PIP method upon first entering the Medicare program).

(iii) The provider has the continuing capability of maintaining in its records the cost, charge, and statistical data needed to accurately complete a Medicare cost report on a timely basis.

* * * * *

(m) *Prospective payments.* (1) *General rule.*—

(i) *Final payment.* For cost reporting periods beginning on or after October 1, 1983, hospitals subject to the prospective payment system are paid for Part A inpatient operating costs on a per discharge basis using prospectively determined rates. The amounts represent final payment based on the submission of a discharge bill. Unless the provisions of paragraphs (m)(2) through (m)(5) of this section apply, year-end retroactive adjustments are not made for prospective payment hospitals.

(ii) *Outlier payments.* Payments for outlier cases (described in Subpart F of Part 412 of this chapter) are not made on an interim basis. The outlier payments are made based on submitted bills and represent final payment.

(iii) *Other payments.* Medical education costs are reimbursed as described in § 405.421, and capital-related costs are reimbursed as described in § 405.414 or, effective with cost reporting periods beginning on or after October 1, 1986, are paid for as described in §§ 412.65 through 412.67 of this chapter.

(2) *Interim prospective payments per discharge.* (i) Prospective payment hospitals meeting the criteria in paragraph (j) of this section may elect to receive periodic interim payments for discharges occurring before July 1, 1987. Therefore, at the discretion of the intermediary, the hospital's prospective payments are estimated and made on a periodic interim basis (26 biweekly payments). These payments are subject to final settlement. Each payment is made two weeks after the end of a biweekly period of services, as described in paragraph (j)(5) of this section. Hospitals electing periodic interim payments may convert to payments on a per discharge basis at any time.

(ii) For the hospitals receiving periodic interim payments for inpatient operating costs, the biweekly interim payment amount is based on the total estimated Medicare discharges for the reporting period multiplied by the hospital's estimated average prospective payment amount. These interim payments are reviewed at least twice during the reporting period and adjusted if necessary.

(iii) For purposes of determining periodic interim payments under this paragraph, the intermediary computes a hospital's estimated average propective payment amount by multiplying its transition payment rates as determined under § 412.70(c) of this chapter, but without adjustment by a DRG weighting factor, by the hospital's case-mix index, and subtracting from this amount estimated deductibles and coinsurance.

(3) *Special interim payments for certain costs.* For the direct costs of medical education, which are not included in prospective payments but are reimbursed as specified in § 405.421, interim payments are made subject to final cost settlement. Interim payments for the estimated cost of approved medical education programs (applicable to inpatient costs payable under Part A

and for kidney acquisition costs in hospitals approved as renal transplantation centers) are determined by estimating the reimbursable amount for the year based on the previous year's experience and on substantiated information for the current year and divided into 26 equal biweekly payments. Each payment is made two weeks after the end of a biweekly period of services, as described in paragraph (j)(5) of this section. The interim payments are reviewed by the intermediary at least twice during the reporting period and adjusted if necessary.

(4) *Special interim payments for the indirect costs of medical education.* Payments for the indirect costs of medical education [described in § 412.118 of this chapter] are paid based on an estimate of the total for the Federal portion of the diagnosis-related group revenue to be received in the current period. The total estimated annual amount of the adjustment is divided into 26 equal biweekly payments and included with other inpatient costs reimbursed on a reasonable cost basis. This estimate is subject to year-end adjustment. Each payment is made two weeks after the end of a biweekly period of services. The interim payments are reviewed by the intermediary at least twice during the reporting period and adjusted if necessary.

(5) *Special interim payments for unusually long lengths of stay.* For discharges occurring on or after July 1, 1987, a hospital may request an interim payment if a Medicare beneficiary's length of stay exceeds 45 days. The amount of the interim payment is equal to the hospital's Federal rate multiplied by the appropriate diagnosis-related group weighting factor. Only one interim payment per discharge is permitted.

5. Section 405.463 is amended by revising paragraph (b)(1) to read as follows:

§ 405.463 Ceiling on rate of hospital cost increases.

* * * * *

(b) *Cost-reporting periods subject to the rate of increase ceiling.* (1) Base period. Each hospital's initial ceiling will be based on allowable inpatient operating costs per case incurred in the 12-month cost reporting period immediately preceding the first cost reporting period subject to ceilings established under this section, except that, when the immediately preceding cost reporting period is a short reporting period (fewer than 12 months) the first 12-month period beginning on or after the date the hospital's exemption from the ceiling ends will be the base period.

* * * * *

II. Part 412 is amended as follows:

PART 412—PROSPECTIVE PAYMENT SYSTEM FOR INPATIENT HOSPITAL SERVICES

A. The authority citation for Part 412 is revised to read as follows:

Authority: Secs. 1102, 1122, 1871, and 1886 of the Social Security Act, as amended (42 U.S.C. 1302, 1320a–1(d), 1395hh, and 1395ww).

B. The Table of Contents of Part 412 is amended by adding the titles of new §§ 412.65 through 412.67 to Subpart D to read as follows:

Subpart D—Basic Methodology for Determining Federal Prospective Payment Rates

Sec.

* * * * *

412.65 Addition of capital payments into the Federal rates.
412.66 Federal capital-related rates beginning on or after fiscal year 1987.
412.67 Phase-in period and methodology for capital payments.

* * * * *

C. Subpart A is amended as follows:

Subpart A—General Provisions

1. Section 412.1 is amended by revising paragraph (a) to read as follows:

§ 412.1 Scope of part.

(a) *Purpose.* This part implements section 1886(d) of the Act by establishing a prospective payment system for inpatient hospital services furnished to Medicare beneficiaries in cost reporting periods beginning on or after October 1, 1983. Under the prospective payment system, payment for the operating costs of inpatient hospital services furnished by hospitals subject to the system (generally, short-term, acute care hospitals) is made on the basis of prospectively determined rates and applied on a per discharge basis. Payment for other costs related to inpatient hospital services (capital-related costs for cost reporting periods beginning on or after October 1, 1982 and before October 1, 1986, kidney acquisition costs incurred by hospitals with approved renal transplantation centers, direct costs of medical education, and, for cost reporting periods beginning on or after October 1, 1984 and before October 1, 1987, the costs of qualified nonphysician anesthetists' services) is made on a reasonable cost basis. Additional payments are made for outlier cases, bad debts, and indirect medical education costs. Under the prospective payment system, a hospital may keep the difference between its prospective payment rate and its operating costs incurred in furnishing inpatient services, and is at risk for operating costs that exceed its payment rate.

* * * * *

2. In § 412.2, the introductory text of paragraphs (c) and (d) is reprinted without change for the convenience of the reader; a new paragraph (c)(5) is added; and paragraph (d)(1) is revised to read as follows:

§412.2 Basis of payment.

* * * * *

(c) *Inpatient operating costs.* The prospective payment system provides a payment amount for inpatient operating costs, including—

* * * * *

(5) For cost reporting periods beginning on or after October 1, 1986, capital-related costs as described in Subpart D of this part.

(d) *Excluded costs.* The following inpatient hospital costs are excluded from the prospective payment amounts and paid for on a reasonable cost basis:

(1) For cost reporting periods beginning on or after October 1, 1983 and before October 1, 1986, capital-related costs, and an allowance for return on equity, as described in §§ 405.414 and 405.429 of this chapter.

* * * * *

3. Section 412.10 is amended by revising paragraph (a) to read as follows:

§412.10 Changes in the DRG classification system.

(a) *General rule.* HCFA issues changes in the DRG classification system in a Federal Register notice at least annually. Except as specified in paragraphs (c) and (d) of this section, the DRG changes will be effective prospectively with discharges occurring on or after the same date the payment rates are effective.

* * * * *

D. Subpart B is amended as follows:

Subpart B—Hospital Services Subject to and Excluded from the Prospective Payment System

1. In §412.23, the introductory language in paragraph (c) is revised to read as follows:

§412.23 Excluded hospitals: Classifications.

* * * * *

(c) *Alcohol/drug hospitals.* If an alcohol/drug hospital meets the

following requirements, it is excluded from the prospective payment system for its cost reporting periods beginning before October 1, 1987, but no hospital is excluded for its cost reporting periods beginning during Federal fiscal years 1986 and 1987 unless it was excluded for its cost reporting period beginning during Federal fiscal year 1985:

* * * * *

2. In § 412.32, the introductory language is revised to read as follows:

§ 412.32 Distinct part alcohol/drug units: Additional requirements.

If a distinct part alcohol/drug unit meets the following requirements, it is excluded from the prospective payment system for its cost reporting periods beginning before October 1, 1987, but no unit is excluded for its cost reporting periods beginning during Federal fiscal years 1986 and 1987 unless it was excluded for its cost reporting period beginning in Federal fiscal year 1985:

* * * * *

E. Subpart D is amended as follows:

Subpart D—Basic Methodology for Determining Federal Prospective Payment Rates

1. Section 412.63 is amended by revising paragraph (a)(1) and adding paragraphs (b)(3), (c)(4), and (c)(5) to read as follows:

§ 412.63 Federal rates for fiscal years after Federal fiscal year 1984.

(a) *General rule.* (1) HCFA will determine a national adjusted prospective payment rate for each inpatient hospital discharge in a Federal fiscal year after fiscal year 1984 (including an additional payment, effective with cost reporting periods beginning on or after October 1, 1986, for the incorporation of capital payments as described in § 412.65) involving inpatient hospital services of a hospital in the United States subject to the prospective payment system, and will determine a regional adjusted prospective payment rate for such discharges in each region, for which payment may be made under Medicare Part A.

(b) *Geographic classifications.* * * *

(3) Effective with discharges occurring on or after October 1, 1986, a hospital classified as rural, as described in § 412.62(f), is deemed to be urban and receives the urban Federal payment amount if the county in which it is located meets the following criteria:

(i) The rural county is surrounded on all sides by urban counties.

(ii) The county was reclassified from an urban area to a rural area after April 20, 1983, as described in § 412.62(f)(1)(iv).

(iii) At least 15 percent of employed workers in the county commute to the central county of one of the adjacent urban areas.

(c) *Updating previous standardized amounts.*

* * * * *

(4) For fiscal years 1987 and 1988, HCFA standardizes the average standardized amounts by excluding an estimate of the payments for hospitals that serve a disproportionate share of low-income patients.

(5) For fiscal year 1987 onward, HCFA restandardizes the average standardized amounts by excluding an estimate of indirect medical education payments.

* * * * *

2. New §§ 412.65 through 412.67 are added to read as follows:

§ 412.65 Addition of capital payments into the Federal rates.

(a) *General rule.* Effective with cost reporting periods beginning on or after October 1, 1986, HCFA provides an amount for capital-related costs, in addition to the Federal rates, as determined in § 412.63, for each inpatient hospital discharge.

(b) *Requirements.* In order to receive full payment for the Federal portion of the capital-related prospective payment amount, a hospital with capital expenditures, as defined under section 1122(g) of the Act, obligated after September 30, 1986, must be located in a State that has an agreement with the Secretary pursuant to section 1122 of the Act as described in § 405.435 of this chapter, under the terms of which a planning agency—

(1) Submits findings and recommendations to the Secretary concerning health facility capital expenditures; and

(2) Recommends approval of capital expenditures initiated by the hospital in its cost reporting periods beginning on or after October 1, 1986.

(c) *Capital expenditures that are not approved.* Except as discussed in paragraph (d) below, if capital expenditures are not approved as required under paragraph (b) of this section, the Federal portion of the capital-related prospective payment amount is reduced by the percentage of the total disapproved capital expenditures divided by total hospital capital assets.

(d) *Exception.* If a hospital can demonstrate to the satisfaction of HCFA that no part of the asset for which a capital expenditure is not approved, as required under paragraph (b) of this section, is used in the provision of inpatient hospital services for which payment may be made under this part, the Federal portion of the capital-related prospective payment amount will not be reduced under paragraph (c) of this section.

(e) *Cost reporting periods beginning on or after October 1, 1986 through September 30, 1990.* For cost reporting periods beginning during the period October 1, 1986 through September 30, 1990, the capital payment amount is based on a combination of a hospital-specific capital-related rate and a Federal capital-related rate as determined in §§ 412.66 and 412.67.

(f) *Cost reporting periods beginning on or after October 1, 1990.* For cost reporting periods beginning on or after October 1, 1990, the capital payment amount is based on a Federal capital-related rate as determined in §§ 412.66(g).

§ 412.66 Federal capital-related rates beginning on or after fiscal year 1987.

(a) *Determining allowable base-year capital-related costs.* The Federal capital-related rate is determined by identifying the average capital-related costs, as described in § 405.414 of this chapter, using audited hospital cost reports from fiscal year 1983 for hospitals subject to the prospective payment system and reducing the costs, using fiscal year 1984 hospital cost reports, by an estimated amount for investment income derived from funded depreciation.

(b) *Updating the capital-related costs.* HCFA updates each amount determined under paragraph (a) of this section by—

(1) Updating from fiscal year 1983 through fiscal year 1986 using the calendar year annual rate of increase in the capital component of the market basket; and

(2) Projecting for fiscal year 1987 onward the applicable percentage change under § 412.63(e).

(c) *Standardizing the amounts.* HCFA standardizes each amount updated under paragraph (b) of this section for each hospital by—

(1) Adjusting for resource intensity in case mix among hospitals;

(2) Excluding an estimate of indirect medical education payments;

(3) Excluding an estimate of the payments for hospitals that serve a disproportionate share of low-income patients; and

(4) Adjusting for the effects of a higher cost of living for hospitals located in Alaska and Hawaii.

(d) *Computing urban and rural averages.* HCFA computes an average of the standardized amounts determined under paragraph (c) of this section for urban and rural hospitals, as defined in § 412.62(f), in the United States and for urban and rural hospitals in each region.

(e) *Reducing for value of outlier payments.* HCFA reduces each of the average standardized amounts determined under paragraph (d) of this section by a proportion equal to the proportion (estimated by HCFA) of the total amount of payments based on DRG prospective payment rates that are additional payments for outlier cases under Subpart F of this part.

(f) *Application of blended percentages during the transition period.* For cost reporting periods beginning during the period October 1, 1986 through September 30, 1990, the amounts determined in paragraph (e) of this section are multiplied by the appropriate phase-in period percentages as described in § 412.67(b).

(g) *Federal capital-related payment.* The Federal capital-related payment equals the product of—

(1) The national and regional capital-related rate as determined under paragraphs (a) through (f) of this section and § 412.67(b); and

(2) The DRG weighting factor determined under § 412.60(b) for each discharge.

§ 412.67 Phase-in period and methodology for capital payments.

(a) *Phase-in period.* Except for new hospitals and sole community hospitals as described in paragraphs (f) and (g) of this section respectively, inclusion of payments for capital in the prospective payment rates is to be phased-in over a four-year period as described in paragraph (b) of this section. During this period, the capital payment amount is based on a combination of a hospital-specific capital-related rate, and a Federal capital-related rate as determined in § 412.66. At the end of the transition period (that is, for discharges occurring in a cost reporting period beginning on or after October 1, 1990), payment amounts are based on a Federal capital-related rate.

(b) *Blended percentages for capital-related rates.* The blends of the hospital-specific capital-related rates and the Federal capital-related rates are as follows:

(1) For discharges in cost reporting periods beginning on or after October 1, 1986 and before October 1, 1987, the blend is—

(i) 80 percent of the hospital-specific capital-related rate; and

(ii) 20 percent of the Federal capital-related rate.

(2) For discharges in cost reporting periods beginning on or after October 1, 1987 and before October 1, 1988, the blend is—

(i) 60 percent of the hospital-specific capital-related rate; and

(ii) 40 percent of the Federal capital-related rate.

(3) For discharges in cost reporting periods beginning on or after October 1, 1988 and before October 1, 1989, the blend is—

(i) 40 percent of the hospital-specific capital-related rate; and

(ii) 60 percent of the Federal capital-related rate.

(4) For discharges in cost reporting periods beginning on or after October 1, 1989 and before October 1, 1990, the blend is—

(i) 20 percent of the hospital-specific capital-related rate; and

(ii) 80 percent of the Federal capital-related rate.

(5) The appropriate Federal capital-related rate is a combined regional and national rate and changes with the Federal fiscal year. For Federal fiscal year 1987, which begins October 1, 1986, the Federal capital-related rate is 50 percent regional and 50 percent national. For Federal fiscal year 1988, which begins October 1, 1987, the Federal capital-related rate is 100 percent national.

TABLES.—SUMMARY OF HOSPITAL-SPECIFIC AND FEDERAL PORTION PERCENTAGES FOR DETERMINING PHASE-IN PERIOD CAPITAL-RELATED RATES

Cost reporting period beginning on or after—	Hospital-specific capital-related percentage	Federal capital-related percentage
October 1, 1986	80	20
October 1, 1987	60	40
October 1, 1988	40	60
October 1, 1989	20	80
October 1, 1990		100

(c) *Methodology—Hospital-specific capital-related rate.* The hospital-specific capital-related rate is the total allowable capital-related costs, as determined by HCFA, for the hospital's cost reporting period occurring in Federal fiscal year 1986 as calculated by—

(1) Calculating the allowable capital-related costs in the base year and dividing the remaining costs by the hospital's number of Medicare discharges in that period; and

(2) Adjusting the costs per discharge for resource intensity in case mix.

(d) *Hospital-specific capital-related payment.* The hospital-specific capital-related payment equals the appropriate phase-in period percentage described in paragraph (b) of this section multiplied by the lower of—

(1) The hospital-specific capital-related rate as determined under paragraph (c) of this section, updated for fiscal year 1987 onward using the applicable percentage change under § 412.63(e), multiplied by the DRG weighting factor determined under § 412.60(b) for each discharge, and totalled for the number of Medicare discharges in the applicable period: or

(2) The total actual allowable Medicare inpatient hospital costs for the applicable transition year.

(e) *Cost reporting periods less than 12 months:* If a hospital has less than a 12-month cost reporting period, the amount of costs determined for the hospital-specific capital-related rate, for purposes of paragraph (c)(2) of this section, is the capital-related cost from the latest and longest cost reporting period in the base-year period, calculated on a per discharge basis and adjusted appropriately to make the costs consistent with standard 12-month cost reports for the base year.

(f) *Payment rate for new hospitals.*

(1) A new hospital is paid solely on the basis of the Federal capital-related rate, as determined in § 412.66, during the phase-in period, and thereafter, if it meets either of the criteria in paragraphs (f)(2) and (f)(3) of this section.

(2) The hospital—

(i) Is newly participating in the Medical program (under previous and present ownership); and

(ii) Does not have a 12-month cost reporting period ending on or before September 30, 1986.

(3) The hospital is under new ownership and documents to the satisfaction of its intermediary that the ownership and occupancy rate requirements described in § 412.74(a)(2) are met.

(g) *Payment rate for sole community hospitals.* A hospital that meets the criteria in § 412.92(a) for classification as a sole community hospital receives capital-related payments on the basis of—

(1) 25 percent of the regional capital-related payment as determined under § 412.66; and

(2) 75 percent of the hospital-specific capital-related payment as determined under paragraph (c)(1) of this section.

E. In Subpart E, § 412.70, the footnote to paragraph (c) is revised to read as follows:

BEST COPY AVAILABLE

Subpart E—Determination of Transition Period Payment Rates

§ 412.70 General description.

* * * * *

(c) *Amount of blended portions.*[1]

* * * * *

F. Subpart F is amended as follows:

Subpart F—Payment for Outlier Cases

1. In § 412.80, the introductory language of paragraph (a)(1)(ii) is reprinted without change for the convenience of the reader; and paragraphs (a)(1) introductory language, (a)(1)(ii)(B), and (c) are revised to read as follows:

§ 412.80 General provisions.

(a) *Basic rule.* (1) Except as provided in paragraph (a)(2) of this section concerning transferring hospitals, HCFA provides for additional payment,

Federal fiscal year	Federal rate		Federal capital-related rate	
	Regional rate percentage	National rate percentage	Regional rate percentage	National rate percentage
October 1, 1983	100	0		
October 1, 1984	75	25		
October 1, 1985	75	25		
October 1, 1986	50	50	50	50
October 1, 1987	0	100	0	100

* * * * * * *

(c) *Relation to indirect medical education costs and hospitals that serve a disproportionate share of low-income patients.* The outlier payment amounts will be included in total DRG revenue for purposes of determining payments for indirect medical education costs under § 412.118(b) and hospitals that serve a disproportionate share of low-income patients under § 412.108.

3. In § 412.82, paragraph (c) is revised to read as follows:

§ 412.82 Payment for extended length-of-stay cases (day outliers).

* * * * *

(c) The per diem payment made under paragraph (a) of this section is derived by first taking 60 percent of the average per diem payment for the applicable DRG, as calculated by dividing the Federal prospective payment rates (capital-related and noncapital-related) determined under Subpart D of this part by the geometric mean length-of-stay for that DRG. The resulting amounts are then multiplied by the applicable Federal portions (capital-related and noncapital-related) of the blend as follows:

FEDERAL NONCAPITAL-RELATED PORTIONS

Cost reporting periods beginning on or after	Federal portion (percent)
October 1, 1983	25
October 1, 1984	50
October 1, 1985:	
The first seven months of the cost reporting period	50
The remaining five months of the cost reporting period	55
October 1, 1986	75
October 1, 1987	100

FEDERAL CAPITAL-RELATED PORTIONS

Cost reporting periods beginning on or after	Federal capital-related portion (percent)
October 1, 1986	20
October 1, 1987	40
October 1, 1988	60
October 1, 1989	80
October 1, 1990	100

* * * * *

4. In § 412.84, paragraphs (g) and (i) are revised as follows:

§ 412.84 Payment for extraordinarily high-cost cases (cost outliers).

* * * * *

(g) The intermediary bases the cost of the discharge on 71 percent of the billed charges for covered inpatient services. The cost is adjusted further to exclude an estimate of indirect medical education costs, and payments for hospitals that serve a disproportionate share of low-income patients, and to include the reasonable charges for nonphysician services billed by an outside supplier in accordance with § 409.23(c)(3) of this chapter.

* * * * *

(i) The additional payment amount is derived by first taking 60 percent of the difference between the hospital's adjusted cost for the discharge (as determined under paragraph (g) of this section) and the threshold criteria established under § 412.80(a)(2). The resulting amounts are then multiplied by the applicable Federal portions (capital-related and noncapital-related) of the blend as indicated in § 412.82(c).

G. Subpart G is amended as follows:

Subpart G—Special Treatment of Certain Facilities

1. In § 412.92, the introductory language of paragraphs (a) and (a)(2) are reprinted without change for the convenience of the reader and paragraphs (a)(2)(ii) and (d) are revised to read as follows:

§ 412.92 Special treatment: Sole community hospitals.

(a) *Criteria for classification as a sole community hospital.* HCFA classifies a hospital as a sole community hospital if it is located in a rural area (as defined in § 412.62(f)), and meets one of the following conditions:

* * * * *

(2) The hospital is located between 25 and 50 miles from other like hospitals and meets one of the following criteria:

* * * * *

(ii) The hospital has less than 50 beds and the intermediary certifies that the hospital would have met the criteria in paragraph (a)(2)(i) of this section were it not for the fact that some beneficiaries or residents were forced to seek care outside the service area due to the unavailability of necessary specialty services at the community hospital; or

* * * * *

(d) *Determining prospective payment rates for sole community hospitals.* For all cost reporting periods beginning on or after October 1, 1983, the prospective payment rates for sole community

[1] For purposes of this paragraph and §§ 412.80(a)(1)(ii)(B) and 412.82(c), but not for purposes of determining blended portions for capital-related payments under § 412.87(b), see section 9108(d)(4) of Pub. L. 99-272 for special provisions concerning the transition period applicable to hospitals in the State of Oregon.

hospitals equal the sum total of the following payment rates:

(1) 75 percent of the hospital-specific base payment rate as determined under § 412.73;

(2) 25 percent of the appropriate regional prospective payment rate as determined under Subpart D of this part; and

(3) The capital-related payment rate as determined under § 412.67(g).

* * * * *

2. In § 412.96, the introductory language of paragraph (c) is reprinted without change for the convenience of the reader: paragraphs (c)(2) (d) and (e) are revised, and a new paragraph (h) is added to read as follows:

§ 412.96 Special treatment: Referral centers.

* * * * *

(c) *Alternative criteria for cost reporting periods beginning on or after October 1, 1985.* For cost reporting periods beginning on or after October 1, 1985, a hospital that does not meet the criteria of paragraph (b) of this section is classified as a referral center if it is located in a rural area (as defined in § 412.62(f)) and meets the criteria specified in paragraphs (c)(1) and (c)(2) of this section and at least one of the three criteria specified in paragraphs (c)(3), (c)(4), and (c)(5) of this section.

* * * * *

(2) *Number of discharges.*

(i) Except as provided in paragraph (c)(2)(ii) of this section for an osteopathic hospital, for the hospital's most recently completed cost reporting period, its number of discharges (excluding discharges from subprovider and newborn units) is at least equal to the number of discharges under either the national or regional criterion set forth in each year's annual notice of prospective payment rates published under § 412.8(b). The methodology HCFA uses to calculate these criteria is described in paragraph (h) of this section.

(ii) Effective with cost reporting periods beginning on or after January 1, 1986, an osteopathic hospital, recognized by the American Osteopathic Hospital Association, that is located in a rural area must have at least 3,000 discharges during its most recently completed cost reporting period to meet the number of discharges criterion. The 3,000 discharges benchmark is also used in evaluating an osteopathic hospital for purposes of the triennial review.

* * * * *

(d) *Payment to rural referral centers with 500 or more beds.* A hospital that meets the criteria of § 412.96(b)(1) will be paid prospective payments per discharge based on the applicable urban payment rates as determined in accordance with § 412.62(j) or § 412.63(f), and § 412.66(g), as adjusted by the hospital's area wage index.

(e) *Payment to all other rural referral centers.* For cost reporting periods beginning on or after October 1, 1984, a hospital that is located in a rural area and meets the criteria of § 412.96(b)(2) or (c) will be paid prospective payments per discharge based on the applicable urban payment rates as determined in accordance with § 412.62(j) or § 412.63(f), and § 412.66(g), as adjusted by the hospital's area wage index.

* * * * *

(h) *Methodology for calculating number of discharges criteria.* For purposes of determining compliance with the national or regional number of discharges criterion under paragraph (c)(2) of this section, HCFA calculates the criteria as follows:

(1) *National criterion.* Except as described in paragraph (h)(6) of this section, HCFA determines the annual number of admissions to non-Federal, acute-care general and other special hospitals and compares it to the 1981 annual number of admissions. The percentage of change between those two figures is used to update the 1981 national number of discharges criterion of 6,000.

(2) *Regional criterion.* HCFA calculates the median urban number of discharges for each census region by updating the 1981 regional criterion using the percentage of change that is calculated under paragraph (h)(1) of this section.

(3) *Source of data.* In making the calculations described in paragraphs (h)(1) and (h)(2) of this section, HCFA uses the most recent hospital admissions data available for the Federal fiscal year ending prior to the publication of the annual notice of prospective payment rates under § 412.8(b).

(4) *Effective date.* HCFA sets forth the national and regional criteria in the annual notice of prospective payment rates published under § 412.8(b). These criteria are compared to a hospital's number of discharges for its most recently completed cost reporting period in determining if the hospital qualifies for referral center status for cost reporting periods beginning on or after October 1 of the Federal fiscal year to which the notice applies.

(5) *Applicability of criteria to HCFA review of referral center status.* For purposes of the triennial review of a referral center's status as described in paragraph (f) of this section, the referral center's number of discharges for its most recently completed cost reporting period is evaluated using the updated discharge criteria published in the subsequent Federal fiscal year's notice of prospective payment rates.

H. Subpart H is amended as follows:

Subpart H—Payments to Hospitals under the Prospective Payment System

1. Section 412.113 is amended by revising paragraph (a) and adding a new paragraph (d) to read as follows:

§ 412.113 Payments determined on a reasonable cost basis.

(a) *Capital-related costs.* Payment for capital-related costs (as described in § 405.414 of this chapter) is determined on a reasonable cost basis for cost reporting periods beginning on or after October 1, 1983 and before October 1, 1986. During that period, the capital-related costs for each hospital must be determined consistently with the treatment of such costs for purposes of determining the hospital-specific portion of the hospital's prospective payment rate under §§ 412.70 through 412.73. For cost reporting periods beginning on or after October 1, 1986, capital-related costs are paid on a prospective basis as described in §§ 412.65 through 412.67.

* * * * *

(d) *Kidney acquisition costs incurred by hospitals with approved renal transplantation centers.* Payment for kidney acquisition costs incurred by hospitals with approved renal transplantation centers, as described in § 412.100, is made on a reasonable cost basis.

2. Section 412.125 is amended by revising paragraph (b) to read as follows (the introductory language of § 412.125 is reprinted without change for the convenience of the reader):

§ 412.125 Effect of change of ownership on payments under the prospective payment system.

When a hospital's ownership changes, as described in § 489.18 of this chapter, the following rules apply:

* * * * *

(b) Payment for capital-related costs (for reporting periods beginning before October 1, 1986) and bad debts, as described in §§ 412.113(a) and 412.115(a), respectively, will be made to each owner or operator of the hospital (buyer and seller) in accordance with the principles of reasonable cost reimbursement.

Addendum—Schedule of Standardized Amounts Effective With Discharges on or After October 1, 1986, and Update Factors and Target Rate Percentages Effective With Cost Reporting Periods Beginning on or After October 1, 1986

I. Summary and Background

In this proposed rule, we are proposing changes in the methods, amounts, and factors for determining prospective payment rates for Medicare inpatient hospital services. In addition, we are proposing new target rate percentages for determining the rate-of-increase limits (target amounts) for hospitals excluded from the prospective payment system.

For hospital cost reporting periods beginning on or after October 1, 1986 and before October 1, 1987, except for sole community hospitals and hospitals located in the State of Oregon that are subject to the prospective payment system, each hospital's payment per discharge under the prospective payment system will be the sum of a Federal portion that is 75 percent of the Federal rate and a hospital-specific portion that is 25 percent of the hospital-specific rate (section 1886(d)(1)(C) of the Act as amended by section 9102 of Pub. L. 99-272). Sole community hospitals will continue to be paid on the basis of a rate per discharge composed of 75 percent of the hospital-specific rate and 25 percent of the applicable Federal regional rate. For hospitals located in the State of Oregon that are subject to the prospective payment system, each hospital's payment per discharge will be based on the Federal national rate (section 9102(d)(4) of Pub. L. 99-272).

We note that, while the changes to the hospital-specific portion of the prospective payment rate are determined on the basis of cost reporting periods, the changes to the Federal portion are determined on the basis of the Federal fiscal year (FY).

During FY 1987, except for the policy on hospitals located in the State of Oregon as described above and for sole community hospitals, the Federal rates will be comprised of a blend of 50 percent of the national rate and 50 percent of the appropriate regional rate as required by section 1886(d)(1)(D) of the Act (as amended by section 9102 of Pub. L. 99-272). (Sole community hospitals also receive special treatment for the Federal rates, that is, their Federal portion is based on 100 percent of the regional rate.) During the first year of the transition period (that is, FY 1984), the Federal rates were comprised solely of the regional rate. During the second and third years, FYs 1985 and 1986, the Federal rates are comprised of a blend of 25 percent of the national rate and 75 percent of the regional rate.

As discussed below in section II, we are proposing to make changes in the determination of the prospective payment rates. The method for determining these rates was described in the final rules listed at the beginning of the preamble of this proposed rule. The changes, to be applied prospectively, would affect the calculation of the Federal rates. As part of these changes, we would incorporate adjustments for the updated hospital market basket and additional adjustments as authorized under section 1886(e)(4) of the Act.

Section III, below, sets forth our proposed changes in determining the rate-of-increase limits for hospitals excluded from the prospective payment system. The tables to which we refer in this preamble are presented at the end of this addendum.

II. Proposed Changes to Prospective Payment Rates and DRG Weighting Factors for FY 1987

The basic methodology for determining Federal national prospective payment rates is set forth at § 412.63. Below we discuss the manner in which we are proposing to change some of the factors or methodology used for determining the prospective payment rates. The federal rate changes, including the updated market basket, the establishment of capital-related standardized amounts into the prospective payment system, the updated wage index and DRG weights, once issued as final, would be effective with discharges occurring on or after October 1, 1986.

In summary, we are proposing to establish the FY 1987 national and regional rates (that is, the standardized amounts set forth in Table 1 of the addendum) by—

- Restandardizing the hospital costs used to establish the rates to reflect the indirect costs of medical education as measured by the revised indirect medical education adjustment factor and to reflect payment adjustments to disproportionate share hospitals, per sections 9104(b) and 9105(b) of Pub. L. 99-272, and to reflect technical corrections to the wage index;
- Computing average capital-related costs per case per hospital and adjusting the costs per case to exclude the effects of case mix, indirect medical education costs, payment adjustments to disproportionate share hospitals, and cost-of-living differences for Alaska and Hawaii;
- Grouping the adjusted operating costs per case (labor-related, nonlabor related, and capital-related) to compute urban and rural, national and regional average standardized amounts;
- Reducing for the value of outlier payments;
- Updating the standardized amounts by 0.5 percent; and
- Making a further adjustment to the standardized amounts to reflect the savings from the change in the indirect medical education adjustment as required under section 9104(b) of Pub. L. 99-272.

A. Calculation of Adjusted Standardized Amounts

1. Standardization and Restandardization of Base-Year Costs

Section 1886(d)(2)(A) of the Act required the establishment of base-year cost data containing allowable operating costs per discharge of inpatient hospital services for each hospital in order to set the payment rates for FY 1984. The preamble to the interim final rule, published September 1, 1983 (48 FR 39763), contained a detailed explanation of how base-year cost data were established and how they were used in computing the Federal rates.

Section 1886(d)(2)(C) of the Act required that the updated base-year per discharge costs be standardized for the FY 1984 rates in order to remove from the cost data the effects of certain sources of variation in cost among hospitals. These include case mix, differences in area wage levels, cost of living adjustments, and indirect medical education costs. Under other statutory authority, we are proposing to restandardize the base-year costs to reflect changes resulting from Pub. L. 99-272, as discussed below.

In the following sections we discuss how we are proposing to restandardize (or not restandardize) the base-year costs for the following variables:

- Hospital wage levels.
- Case mix.
- Indirect medical education costs.
- Cost of living for Alaska and Hawaii.
- Costs for hospitals that serve a disproportionate share of low-income patients.

For the benefit of the reader, we are also discussing in the following sections whether or not capital-related costs

would be standardized for each of the above variables. A more detailed discussion of the proposed standardization of capital-related costs is provided in section II of the preamble.

a. Adjustments for Variation in Hospital Wage Levels. Section 1886(d)(2)(C)(ii) of the Act requires that for each inpatient hospital discharge in FY 1984 we standardize the average cost per case of each hospital used to develop the separate urban and rural standardized amounts for differences in area wage levels. Section 1886(d)(2)(H) of the Act requires that the FY 1984 standardized urban and rural amounts be adjusted for hospital area wage levels by a factor (established by the Secretary) as part of the methodology for determining prospective payments to hospitals. To fulfill both requirements, we constructed a wage index to eliminate variations in the average cost per case.

In accordance with Part III of the preamble, we are proposing to use the rebased market basket as a basis for revising the labor and nonlabor portions. Thus, for each hospital, instead of 79.15 percent, we would use 75.04 percent as the labor portion when standardizing for area wage variations.

In response to the June 10, 1985 proposed rule, we adopted a HCFA gross wage index in developing the FY 1986 prospective payment rates as published in the September 3, 1985 final rule. However, as a result of congressional action, we postponed application of several provisions of the September 3, 1985 final rule until May 1, 1986, as we discussed in the preamble of this proposed rule.

As a result of section 9103 of Pub. L. 99–272, the HCFA wage index, which was published in the September 3, 1985 final rule and modified subsequently for corrections to the data, became effective with discharges occurring on or after May 1, 1986. We published the wage indexes in the May 6, 1986 interim final rule (51 FR 16778) that implements section 9103 of Pub. L. 99–272.

Section 9103(a) of Pub. L. 99–272 also eliminated retroactive implementation of the revised wage index.

As indicated above, the HCFA wage index values published in the September 3, 1985 final rule were developed from hospital wage and employment records for cost reporting periods that ended in calendar year 1982. In the June 10, 1985 proposed rule, we specifically solicited comments on how the HCFA wage index should be updated, once adopted. However, we received only a few comments in response to our solicitation. In the September 3, 1985 final rule we stated that, because further consultation with the hospital industry was necessary to determine the proper vehicle for updating the HCFA wage index on a regular basis, we were deferring a final decision on the updating method (50 FR 35666).

We are now in the process of collecting audited data, based on hospital cost reports for cost reporting periods beginning in FY 1984, in order to update the HCFA wage index. However, these data will not be available for analysis or use until after October 1, 1986, when the FY 1987 prospective payment changes are scheduled to take effect. In addition, as part of the revised form HCFA–339, we are also collecting wage and salary data from hospitals filing cost reports during calendar year 1985.

The HCFA wage index is the latest available measure of hospital wage levels that addresses the part-time employment deficiency inherent in the BLS data. Therefore, we propose to use this measure of hospital wage levels to calculate the FY 1987 prospective payment rates. Except for changes resulting from (1) changes in MSA designations that may occur, as described elsewhere in this document, and (2) the proposed change in the designation of the Flint, Michigan MSA for Medicare prospective payment system purposes, also described elsewhere in this document, the HCFA wage index values that appear in this proposed rule are based on the same data used to develop the wage indexes published in the May 6, 1986 interim final rule (51 FR 16778).

We are not proposing to standardize capital-related costs for area wage variations because capital-related costs represent a *nonlabor* component and are, therefore, not affected by area wage variations.

b. Variations in Case Mix Among Hospitals. Section 1886(d)(2)(C)(iii) of the Act requires that the updated FY 1984 amounts be standardized to adjust for variations in case mix among hospitals. The methodology used for determining the appropriate adjustment factor (that is, the case-mix index) is explained in the September 1, 1983 interim final rule (48 FR 39768–39771). A case-mix index has been calculated for each hospital based on 1981 cost and billing data.

Standardization, necessary to neutralize inpatient operating costs for the effects of variations in case mix, is accomplished by dividing the hospital's average cost per Medicare discharge by that hospital's case-mix index. Table 3a in the addendum to the September 1, 1983 interim final rule (48 FR 39847–39870) contains the case-mix index values used for this purpose.

Although we are not proposing to make any changes to the case-mix index for inpatient operating costs and, therefore, are not restandardizing the updated amounts for variations in case mix, we are proposing to standardize each hospital's allowable Medicare capital costs per case by a later case-mix index (that is, hospital case-mix indexes for Federal FY 1985) as one of the adjustments appropriate under the authority of section 1886(d)(5)(C) of the Act to incorporate capital into the prospective payment rates. This is the latest and most complete case-mix data available. It would be improper to use the same case-mix index that was used to standardize the 1981 operating costs since we now have this more recent data available. This case-mix index is designated as Table 3c in the addendum, and is applied for purposes of standardizing capital costs. (We are also providing a Table 3d in the Addendum (Average Case-Mix Index by Hospital Classification Group) for those hospitals without a specific case-mix index in FY 1985.) The case-mix indexes in Tables 3a and 3b of the September 1, 1983 interim final rule (48 FR 39847) continue to apply for purposes of standardizing the non-capital operating costs per case.

C. Indirect Medical Education Costs. Section 1886(d)(2)(C)(i) of the Act requires that the updated FY 1984 amounts be standardized for indirect medical education costs. Section 1886(d)(5)(B) of the Act provides that prospective payment hospitals receive an additional payment for the indirect costs of medical education. Section 9104(a) of Pub. L. 99–272 revised section 1886(d)(5)(B) of the Act to reduce the education adjustment factor used to determine the indirect medical education payment from 11.59 percent to approximately 8.1 percent for discharges occurring on or after May 1, 1986 and before October 1, 1986. For discharges occurring on or after October 1, 1986, the adjustment factor is equal to approximately 8.7 percent. These factors are approximations because in addition to being reduced, the adjustment factor is no longer applied on a linear basis, but rather on a curvilinear or variable basis. An adjustment made on a curvilinear basis reflects a nonlinear cost relationship, that is, each absolute increment in a hospital's ratio of interns and residents to beds does not result in an equal proportional increase in costs. Therefore, the adjustment factors are only approximately 8.1 percent and 8.7 percent.

In the interim final rule of May 6, 1986 (51 FR 16778), we revised §412.118 to provide that for discharges occurring on or after May 1, 1986 and before October 1, 1986, the indirect medical education factor equals the following:

$$2 \times \left[\left(1 + \frac{\text{interns and residents}}{\text{beds}}\right)^{.406} - 1\right]$$

(Note that the exponent (.406) was printed incorrectly as .045 in the preamble to the May 6, 1986 interim final rule (51 FR 16778)).

For discharges occurring on or after October 1, 1986, the indirect medical education factor equals the following:

$$1.5 \times \left[\left(1 + \frac{\text{interns and residents}}{\text{beds}}\right)^{.5765} - 1\right]$$

Section 9104(b) of Pub. L. 99-272 amended section 1886(d)(2)(C)(i) of the Act and provides that the standardized amounts be restandardized to reflect the changes made to the payment adjustment for indirect medical education under section 9104(a) of Pub. L. 99-272. Although section 1886(d)(2)(C) specifically refers to standardizing the FY 1984 amounts, we believe that the amended section 1886(d)(2)(C)(i) was intended to require that the FY 1984 amounts, which were standardized for indirect medical education costs, be restandardized in FY 1987 based on the section 9104(a) of Pub. L. 99-272 changes. Therefore, in establishing the standardized amounts used to determine the FY 1987 prospective payment rates, after adjusting each hospital's inpatient operating cost per discharge for inflation, differences in area wage levels, and case mix, we are proposing that we divide each teaching hospital's cost per discharge by 1.0 plus the individual hospital's indirect medical education adjustment factor as computed using the formula above which the law requires be used for discharges on or after May 1, 1986 and before October 1, 1986.

The following is an example of how we would calculate a hospital's indirect medical education factor for purposes of restandardizing the standardized inpatient operating amounts:

Step 1.—Calculate the ratio (r) of the number of interns and residents to beds based on data for cost reporting periods ending in calendar year 1981.

Assume r=.2, where $r = \frac{\text{Number of Interns and residents}}{\text{beds}}$

Step 2.—Calculate the percentage adjustment (in decimal format) according to the following formula: $2[(1+r)^{.406}-1]$.

Therefore, the indirect medical education adjustment equals: $2[(1+.2)^{.406}-1] = .15327$ or rounded to .1533.

Step 3.—Add the result from step 2 (.1533) to 1.0. .1533+1.0=1.1533.

Step 4.—Divide the result from step 3 into that hospital's cost per discharge.

We are proposing to standardize capital-related costs for indirect medical education costs using the same adjustment formula, as described in the example above, but based on intern and resident to bed ratios developed from FY 1984 data.

d. Cost-of-Living Factor for Alaska and Hawaii. Section 1886(d)(5)(C)(iv) of the Act authorizes the Secretary to provide for such adjustments to the payment amounts as the Secretary deems appropriate to take into account the unique circumstances of hospitals located in Alaska and Hawaii.

Generally, these two States have higher levels of cost in comparison to other States in the nation. The high cost of labor is accounted for in the wage index adjustments discussed above. However, the high cost of living in these States also affects the cost of nonlabor items (for example, supplies and equipment). Therefore, in order to remove the effects of the higher nonlabor costs from the overall cost data (that is, for standardization purposes), the nonlabor portion of the average cost per Medicare discharge in hospitals located in Alaska and Hawaii is divided by an appropriate cost-of-living adjustment factor. Because the nonlabor portion has already been standardized for this adjustment, we are not proposing a further restandardization.

We are proposing to standardize the capital-related costs for the cost of living in Alaska and Hawaii using the most recent cost-of-living adjustment factor as described in Part II of the preamble.

e. Costs for Hospitals that Serve a Disproportionate Share of Low-Income Patients. Section 9105(b) of Pub. L. 99-272 amended section 1886(d)(2)(C) of the Act (which relates to FY 1984 rates) by adding a new section 1886(d)(2)(C)(iv) to provide that effective with discharges occurring on or after October 1, 1986 and before October 1, 1988, the updated amounts be standardized for the estimated additional payments made to hospitals that serve disproportionate shares of low-income patients. That is, although erroneously drafted as an amendment to the methodology for determining FY 1984 rates, we believe that the law was intended to require us to remove the effects of the payments made to disproportionate share hospitals from the costs used to establish the standardized amounts. For discharges occurring on or after October 1, 1988, we would no longer restandardize the standardized amounts for the estimated payments made to disproportionate share hospitals, since section 1886(d)(5)(F) of the Act does not authorize such payments for discharges after September 30, 1988.

Section 9105(a) of Pub. L. 99-272 added a new section 1886(d)(5)(F) to the Act to require that we make an additional payment for hospitals that serve a disproportionate share of low-income patients. In the interim final rule of May 6, 1986 (51 FR 16786), we added a new § 412.106 to implement this provision.

Section 1886(d)(5)(F)(i) of the Act provides that for discharges occurring on or after May 1, 1986 and before October 1, 1988, an additional payment must be made for each prospective payment hospital that meets one of the following criteria:

- During the hospital's cost reporting period, the hospital has a disproportionate patient percentage that is at least equal to—

—15 percent, if the hospital is located in an urban area and has 100 or more beds;

—40 percent, if the hospital is located in an urban area and has less than 100 beds; or
—45 percent, if the hospital is located in a rural area.

(Section 1886(d)(5)(F)(i)(I) of the Act.)

• The hospital is located in an urban area, has 100 or more beds, and can demonstrate that during its cost reporting period, more than 30 percent of its total inpatient care revenue is derived from State and local government payments for indigent care furnished to patients not covered by Medicare or Medicaid.

(Section 1886(d)(5)(F)(i)(II) of the Act.)

Under section 1886(d)(5)(F) of the Act, the additional payment adjustments for hospitals that meet the criteria of a hospital that serves a disproportionate share of low-income patients are determined as follows:

• For urban hospitals with 100 or more beds, the hospital's total DRG revenue is increased by 2.5 percent plus one-half the difference between the hospital's percentage of low-income patients and 15 percent, up to a maximum of 15 percent; that is, the disproportionate share adjustment factor is the lesser of 15 percent or (P−15)(.5) + 2.5, where P equals the hospital's disproportionate patient percentage expressed as a decimal.
• For urban hospitals with fewer than 100 beds, the hospital's total DRG revenue is increased by five percent.
• For rural hospitals, the hospital's total DRG revenue is increased by four percent.
• For hospitals that qualify for disproportionate share adjustments based on a certain proportion of their revenue coming from State and local sources for indigent care, the hospital's total DRG revenue is increased by 15 percent.

Therefore, in establishing the standardized amounts for FY 1987, we are proposing to adjust each disproportionate share hospital's inpatient operating cost per discharge by adding 1.0 to the applicable disproportionate share payment factor, and dividing the hospital's cost per discharge by that number. In this way we would remove the effect of payment adjustments for disproportionate share hospitals from the standardized amounts as required under section 1886(d)(2)(C)(iv) of the Act.

In determining the disproportionate share adjustment factors for purposes of standardizing the standardized amounts, we would use available data on the percentage of Medicaid days from Medicare costs reports with cost reporting periods beginning in Federal FY 1984 and the percentage of SSI/Medicare days for FY 1984 derived from matching FY 1984 SSI eligibility files to Medicare FY 1984 PATBILL records.

In accomplishing such standardization for this proposed notice, we have not taken into account any payments to hospitals that qualify for disproportionate share payments based on the percentage of their revenue from State and local government sources for indigent care. This is because these hospitals must demonstrate on a hospital-by-hospital basis that they meet the criteria for a payment adjustment. Since the disproportionate share hospital provision has been in effect only since May 1, 1986, we do not know at this time how many or which hospitals will ultimately qualify under this provision. While the number of such hospitals may be small, and therefore may not have a significant effect on the standardized rates, we will monitor this situation closely, and, to the extent possible, will present our data and analysis in the final rule. We plan to restandardize the rates to take account of payments to these hospitals in the final rule.

We are proposing to standardize capital-related costs for the costs of hospitals that serve a disproportionate share of low-income patients in the same manner that we are standardized the standardizing inpatient operating amounts.

It should be noted that, to standardize both the capital-related and operating costs for the effects of indirect medical education costs and disproportionate share payments, we added the adjustments together and divided the cost per discharge by the resulting sum. We did this in order to remain consistent with the manner in which the additional payments for indirect medical education and disproportionate share are made.

2. Grouping of Urban/Rural Averages Within Geographic Areas

Under section 1886(d)(2)(D) of the Act, the average standardized amounts must be determined for hospitals located in urban and rural areas of the nine census divisions and the nation. For FY 1987, except for sole community hospitals and hospitals in Oregon, the Federal rates will be comprised at 50 percent of the national rate and 50 percent of the regional rate (section 1886(d)(1)(D) of the Act). Therefore, Table 1 contains 20 standardized amounts (ten urban amounts and ten rural amounts further divided into labor-related, nonlabor-related, and capital-related portions). The methodology for computing the national average standardized amounts is identical to the methodology for determining the regional amounts, except that the national urban and rural groups include hospitals from all urban and all rural geographic areas, respectively.

The Executive Office of Management and Budget (EOMB) may announce revised listings of the MSA and New England County Metropolitan Area (NECMA) designations that are used in calculating the standardized amounts. If EOMB makes the announcement before we issue the final rule, we will list the revised MSA/NECMA designations in the addendum to the final rule. The changes in designation will apply beginning in FY 1987.

3. Updating the Average Standardized Amounts

a Statutory Requirements. The basic requirements governing the method by which the average standardized amounts are updated are set forth at section 1886(d)(3)(A) of the Act, as follows:

(A) Updating Previous Standardized Amounts.—The Secretary shall compute an average standardized amount for hospitals located in an urban area and for hospitals located in a rural area within the United States and for hospitals located in an urban area and for hospitals located in a rural area within each region, equal to the respective average standardized amount computed for the previous fiscal year under paragraph (2)(D) or under this subparagraph, increased for each of fiscal years 1985 and 1986 by the applicable percentage increase under subsection (b)(3)(B), and adjusted for subsequent fiscal years in accordance with the final determination of the Secretary under subsection (e)(4), and adjusted to reflect the most recent case-mix data available.

In accordance with section 1886(d)(3)(A) of the Act, we are proposing to adjust the urban and rural average standardized amounts using the applicable percentage as determined by the Secretary in accordance with section 1886(e)(4) of the Act. That section reads as follows:

(4) Taking into consideration the recommendations of the Commission [that is, the Prospective Payment Assessment Commission, or ProPAC], the Secretary shall determine for each fiscal year (beginning with fiscal year 1987) the percentage change which will apply for purposes of this section as the applicable percentage increase (otherwise described in subsection (b)(3)(B)) for discharges in that fiscal year, and which will take into account amounts necessary for the efficient and effective delivery of medically appropriate and necessary care of high quality.

As prescribed by section 1886(e)(2) of the Act, the Commission, in making its recommendations to the Secretary:

Shall take into account changes in the hospital market-basket described in subsection (b)(3)(B), hospital productivity, technological and scientific advances, the quality of health care provided in hospitals (including the quality and skill level of professional nursing required to maintain

quality care), and long-term cost-effectiveness in the provision of inpatient hospital services.

Section 1886(b) of the Act sets forth the requirements under which a rate of increase limit (target amount) is established for the inpatient operating costs of hospitals excluded from the prospective payment system. Under this section, a target amount is determined annually for each hospital cost reporting period, based on each hospital's base year cost per case, updated by an "applicable percentage increase."

For FYs 1987 and 1988, as required under 1886(b)(3)(B)(i)(II) of the Act, the "applicable percentage increase" is determined by the Secretary pursuant to section 1886(e)(4) of the Act and may not exceed the "market basket percentage increase" defined in section 1886(b)(3)(B)(ii) as:

> With respect to cost reporting periods and discharges occurring in a fiscal year, the percentage, estimated by the Secretary before the beginning of the period or fiscal year, by which the cost of the mix of goods and services (including personnel costs but excluding non-operating costs) comprising routine, ancillary, and special care unit inpatient hospital services, based on an index of appropriately weighted indicators of changes in wages and prices which are representative of the mix of goods and services included in such inpatient hospital services, for the period or fiscal year will exceed the cost of such mix of goods and services for the preceding 12-month cost reporting period or fiscal year.

We have used the hospital market basket as the means to measure the change in the cost of goods and services for both prospective payment rates and the target amounts applicable to hospitals and units excluded from the prospective payment system. Under section 1886(b)(3)(B) of the Act as amended by section 9101(b) of Pub. L. 99-272, for FY 1987 the percentage determined by the Secretary under section 1886(e)(4) would be applied to both the prospective payment rates and the target amounts (rate of increase limits) applicable to hospitals and units excluded from the prospective payment system.

b. Factors Considered in Determining the Proposed FY 1987 Update. As is clear from the discussion of the legal requirements for establishing the FY 1987 update, we must consider at least the following factors in addition to the hospital market basket index:

- Hospital productivity.
- Cost-effective technologies.
- Improvements in practice patterns.

In addition, since the standardized amounts for FY 1986 are used as the basis for the determination of rates for later years, we believe the level of the FY 1986 standardized amounts must be corrected for any experience that has developed since they were published. In short, we believe that it is necessary, each year, to review the appropriateness of the level of the previous year's prospective payment rates for providing reasonable payment for inpatient hospital services furnished to beneficiaries. Further, this review must include an assessment of whether the previous year's prospective payment rates have established adequate incentives for the efficient and effective delivery of needed care. In this way we would avoid carrying forward inaccuracies in the previous year's rates into the future and, thus, avoid overpaying or underpaying hospitals as a result of those inaccuracies.

Therefore, we believe that the FY 1987 standardized amounts should be established by a methodology that takes into account the prior year's experience (whether understated or overstated). To this end, we have measured the observed change in case mix to be 2.7 percent. We estimate that 0.6 percent of the observed change is for real increases in case-mix, and thus 2.1 percent is for improved coding practices for FY 1986 as discussed in section II.A.3.c., below. The market basket forecast error (−0.4 percent) for FY 1986 is discussed in section II.A.3.d., below, that contributed to an overstatement of the FY 1986 standardized amounts. We are proposing to reduce the FY 1987 prospective payment rates accordingly.

In addition, we have developed factors representing allowances or offsets for productivity, technological advances, and improvements in practice patterns that are necessary to ensure the cost-effective delivery of care. Each of these factors interacts with the others, to some extent, and has an impact on the quality of care. Taking into consideration ProPAC's recommendations on the policy target adjustment factor, we have determined an appropriate percent value for each of these factors, making conservative assumptions with regard to their potential effect on quality, and have combined these values into a proposed composite policy target adjustment factor, as discussed in section II.A.3.f., below. For FY 1987, the factor would equal −2.0 percent.

The forecast hospital market basket increase for FY 1987 is +3.6 percent. With the offsets for net case-mix change from FY 1986 (−2.1 percent), forecast market basket error in FY 1986 (−0.4 percent), and the composite policy target adjustment factor (−2.0 percent), we believe there is justification for a 0.9 percent decrease in the FY 1987 standardized amounts, as compared to those FY 1986.

c. Nominal Case-mix Change for FY 1986. We believe it is necessary to update the standardized amounts to take into consideration the overstatement in case mix as a result of improved coding practices. Through such an adjustment we would ensure that we are providing the amounts necessary for the efficient and effective delivery of medically needed health care. Not taking such overstatement into account would result in overpayments to hospitals, since the increased case mix would not be related to actual increases in resource use. As part of our prospective payment monitoring system, we have been generating monthly case-mix index values for each hospital under the prospective payment system. Based on hospital bills received through April 1986, which include about 2.7 million discharges in FY 1986 for prospective payment system hospitals in States which did not have waivers in FY 1985, we have observed that hospital case-mix index values have increased an average of 2.7 percent over the comparable period in FY 1985. We intend to use the latest discharge data available to us in the final rule in determining the change in case mix over the FY 1985 period.

To determine the degree of difference, we computed a separate case-mix index for each hospital for each month in which we received bills by multiplying the number of discharges for each DRG by the relative weight for that DRG, summing the products, and then dividing that sum by the number of total discharges for that month and hospital. The discharge weighted average prospective payment case-mix index for all hospitals and months in the file for FY 1986 was 1.1983.

We then computed a comparable average case mix for FY 1985. This was done by computing a case-mix index for each hospital, for each month in FY 1985 and determining a weighted average of the monthly case-mix averages using the FY 1986 discharges already reported to us through March 1986 as weights.

This automatically excludes data for FY 1986 months for which we have no bills. This also compensates for any biases that could have been due to seasonal variations, and the timeliness of submitting bills. Hospitals in States with Medicare waivers (New York and Massachusetts) in 1985 were excluded from this analysis so that the case-mix increase was measured only for hospitals under the prospective payment system for both FY 1985 and FY 1986.

The comparable case-mix level for FY 1985 was 1.1670.

We then computed the ratio of the average FY 1986 case-mix index to the FY 1985 case-mix index. This ratio is 1.027 (1.1983 divided by 1.1670 equals 1.027). ProPAC recommended a 1.0 percent reduction in the prospective payment rates for observed case mix based on the latest data available to them. Our data, which indicate a 2.7 percent decrease is justified, are more recent, and we believe our proposed adjustment coincides with ProPAC's recommendation for observed nominal case-mix changes due to improved coding.

d. Correction for Forecast Market Basket Error for FY 1986. The forecast hospital market basket increase factors used to calculate the FY 1986 standardized amounts were 4.8 percent for 1985 and 4.1 percent for 1986. Based on these calendar year factors, we projected a hospital market basket increase factor for FY 1986 of 4.27 percent. Our latest hospital market basket factors, as of April 1986 (which do not include a value for capital-related costs, as described in section II of the preamble, nor are the factors rebased or reweighted, as described in section III of the preamble) reflect more actual experience than those available at the time the FY 1986 rates were published. The most recent factors are 4.6 percent for 1985, 3.6 percent for 1986, and 4.1 percent for 1987. Based on these calendar year factors, we project the hospital market basket increase for FY 1986 should have been 3.85.

FORECAST MARKET BASKET (MB) PERCENT INCREASE FY 1986 RATES AND OUR MORE RECENT FY 1986 DATA

Calendar year	Forecast MB percentage	Updated MB percentage
1985	4.8	4.6
1986	4.1	3.6
1987	4.8	4.1

Using the latest market basket factors for correction of the standardized amounts, we would reduce them by 0.4 percent (4.27 percent minus 3.85 percent equals 0.42 percent). We expect to have even more recent and accurate factors available at the time we publish final FY 1987 standardized amounts, and will use those factors in making corrections to the standardized amounts.

e. Forecast Market Basket Increase. We must consider forecasted market basket increases in determining the percentage increase for both prospective payment rates and rate-of-increase limits (target amounts) for FY 1987. However, the percentage change determined under section 1886(e)(4) of the Act does not have to equal the market basket. Rather, the percentage change, or update factor, may not exceed the increase in the market basket. We note that this market basket would include a capital component in addition to being updated using a more recent base year (rebased), and additional cost categories (reweighted and revised price proxies).

FORECAST MARKET BASKET (MB) PERCENTAGE INCREASE

	MB percentage
Calendar year:	
1986	3.2
1987	3.7
1988	4.9

Based on these calendar year factors, we project a hospital market basket increase factor for FY 1987 (that is, October 1, 1986 to September 30, 1987) of 3.6 percent.

Data Resources, Inc. (DRI) provides HCFA the historical and forecasted rates of increase in the market basket cost categories. Anyone interested in obtaining additional information on these forecasts may contact Data Resources, Inc., 1750 K Street, NW., 9th Floor, Washington, DC 20006. Upon request DRI will provide in writing a description of the general methodology as well as all of the variables used in the market basket forecast model.

f. Composite Policy Target Adjustment Factor—(1) General considerations. In analyzing the prospective payment system, we must consider the effects of the rates we set on outcome measures such as quality and access to care, and the financial viability of the hospital industry insofar as it relates to beneficiary access to high quality care.

(a) Quality of and Access to Care. We have not found any evidence of compromise or deterioration in the quality of, or access to, inpatient hospital care for Medicare beneficiaries since the inception of the prospective payment system. In conjunction with our own studies on quality and access, we have monitored ProPAC's activity on quality and access assessments. Available data and study findings on subjects such as mortality trends and readmission rates do not indicate any negative findings regarding a deterioration in quality or access under the prospective payment system. Furthermore, we believe our commitment to high quality care and access are evident in the monitoring functions of the peer review organizations and the implementation of procedures to ensure that beneficiary rights are maintained so that beneficiaries are protected against premature discharges as discussed in section V of the preamble.

(b) Financial Viability of the Hospital Industry: Profitability measures of the hospital industry have received much attention recently. We believe that it is *not* our responsibility to determine specific levels of appropriate hospital profit margins. However, since Medicare inpatient hospital benefit payments represent over 40 percent of total community hospital inpatient revenues, Medicare should be a prudent purchaser of services furnished under the prospective payment system. A review of financial information is appropriate in order to determine how well the hospital industry has done before and after the inception of the prospective payment system. Our concern with the financial viability of the hospital industry does not extend beyond ensuring that high quality hospital care is accessible to Medicare beneficiaries.

ProPAC has conducted a number of studies on the financial condition of hospitals in 1984 (see "Medicare Prospective Payment and the American Health Care System," Chapter 4, page 47, Report to Congress, February 1986). According to hospital industry financial data, operating margins increased significantly. Although rural hospitals had the lowest profit margins, they experienced large profitability gains in the first year of the prospective payment system. These findings also showed that both teaching and nonteaching hospitals experienced large gains in operating margin ratios.

In addition, the Department's Office of the Inspector General has released a priority audit memorandum titled, "Large Profits Earned by Hospitals under the Medicare Prospective Payment System" (ACN: 09-62021), which confirms ProPAC's findings.

Table 1 below contains AHA panel survey data on operting margins, for both total revenue and patient care revenue, of community hospitals for FY 1983, 1984, and 1985. The operating margins are shown for each AHA geographic region (which correspond to the census regions used in establishing the prospective payment rates). Table 2 below contains comparable national data for calendar years 1974–1984. It should be noted that these substitutes for profit margins should be used cautiously. For example, net operating revenues in the 1970s indicate large losses in the industry, but this is

because patient revenues only is compared with *total* hospital expenses. This is not a valid comparison but is, nevertheless, the one which the hospital industry frequently makes. More relevant in this analysis is how well hospitals did prior to and after the inception of the prospective payment system, using these measures as a guide.

BILLING CODE 4120-01-C

Without attempting to determine an appropriate level of profitability, it is clear that hospital operating margin for both total revenue and patient revenue recorded historic highs during the first two years of the prospective payment system. Analyses of geographic distributions of hospital profit margin yield some interesting observations. The Middle Atlantic region showed the lowest level of operating margins. This region consists of Pennsylvania, New York, and New Jersey, the latter two being States that were paid under alternative reimbursement programs during the periods shown. The New England region had the second lowest level of operating margins, and the largest State in that region, Massachusetts, also was paid under an alternative reimbursement program during the periods shown. In comparing changes in operating margin between FYs 1983 and 1985, it is interesting to note that the range of operating margin across the regions has narrowed.

Some have argued that overall hospital profitability gains are in spite of, rather than a result of, the prospective payment system. They assert that inadequate Medicare payments have resulted in cost shifting to the private insurance industry. Our actuarial studies effectively rebutted that assertion in Actuarial Note 85-01, "Exploding the Cost Shifting Myth," released on July 29, 1985. Table 3 below contains data on AHA and Medicare inpatient hospital experience for days of care, revenues, and benefit payments. The data indicate no evidence of cost shifting and suggest further that hospitals have fared quite well under the prospective payment system. Data are shown for each calendar year 1978–1985, on the ratio of Medicare inpatient days of care to total hospital days used, and the ratio of Medicare benefit payments and beneficiary liabilities to total community hospital inpatient revenue. During 1984 and 1985, the ratio of Medicare days to total hospital days *decreased* by 7.8 percent. At the same time, the ratio of Medicare benefit payments and beneficiary liabilities to total hospital inpatient revenue *increased* by 10.4 percent. If cost shifting to the private sector was occurring, the Medicare share of revenues would decrease faster than the the Medicare share of days.

TABLE 3.—MEDICARE SHARES OF TOTAL COMMUNITY HOSPITAL INPATIENT DAYS AND EXPENDITURES, CALENDAR YEARS 1978–85

Calendar Year	Days of Care				Expenditures (in millions)				Ratio of Medicare Payments to Total Inpatient Revenue	Percent Change
	Medicare Inpatient Days	Total AHA Inpatient Days	Ratio of Medicare to Total Days	Percent Change	Medicare Inpatient Benefit Payments	Beneficiary Deductible and Coinsurance	Total Medicare and Beneficiary Payments	Total AHA Inpatient Revenue		
1978	100,300	[illegible]	[illegible]		$16,943	$1,229	$18,172	$31,700	[illegible]	
1979	105,861	[illegible]	[illegible]	1.9	19,775	1,425	21,200	36,712	[illegible]	2.7
1980	112,865	[illegible]	[illegible]	2.9	24,092	1,707	25,799	46,140	[illegible]	3.3
1981	115,339	[illegible]	[illegible]	2.0	29,071	1,970	31,041	61,784	[illegible]	1.8
1982	116,304	[illegible]	[illegible]	0.5	32,809	2,057	34,466	85,037	[illegible]	1.1
1983	115,120	[illegible]	[illegible]	1.6	37,306	3,057	40,295	104,581	[illegible]	0.6

Note.—Medicare data represent total inpatient hospital experience. Short-stay hospitals represent about 95 percent of total Medicare inpatient days and about 96 percent of total inpatient Medicare benefit payments.

Presented in Table 4 below are further data indicating that the prospective payment system is not adversely affecting the financial viability of the hospital industry. Although charge data themselves are not a true reflection of hospital costs, the ratio of medicare expenditures to charges over time shows some interesting trends. Both the ratios of total program payments and program payments plus Medicare beneficiary liabilities to hospital charges reversed decreasing trends and showed significant increases in the first two years of the prospective payment system.

TABLE 4. ESTIMATED RATIOS OF MEDICARE EXPENDITURES TO TOTAL CHARGES: SHORT-STAY HOSPITAL INPATIENT CARE, FY 1980–85

Fiscal Year	Billed Payments	Retroactive Adjustments [1]	Pass throughs [2]	Total Program Payments	Beneficiary Liabilities [1]	Total Program and Beneficiary Expenditures
1980	.688	.031		.719	.052	.771
1981	.679	.029		.708	.050	.758

(c) *Summary.* In determining the update level for the FY 1987 prospective payment rates, the above evaluation of outcome measures attempts to measure current and prospective effects on taxpayers, beneficiaries, and the industry.

- *Beneficiary Perspective*—There is not evidence of a deterioration in quality of, or access to, inpatient hospital care.
- *Industry Perspective*—Experience under the prospective payment system shows evidence that current Medicare payments for inpatient hospital care are more than adequate to cover hospital costs.
- *Prior Year's Experience*—Despite our calculation showing that the prospective payment rates should have been decreased by 4.42 percent in FY

1986 (as described in the September 3, 1985 final rule (50 FR 35680)) we provided a zero percent increase, and subsequently Congress provided a 0.5 percent increase in the rates.

The annual prospective payment percentage update factor should be set so that it provides incentives for desired outcomes under the prospective payment system. To achieve incentives for the desired outcome targets, we must ensure that the annual prospective payment update factor takes proper account of variables affecting the cost, efficiency, effectiveness and quality of hospital inpatient care. Our objective is to translate the intent of the statutory requirements for updating the prospective payment rates into a methodology for making adjustments to the current update factory that would enable us to express our consideration of these variables as policy targets.

To this end, we have identified three factors that correspond to matters that must be considered under section 1886(e)(2) and (e)(4) of the Act. For FY 1987, we are proposing to incorporate into the prospective payment update factor a composite policy target adjustment factor that takes account of productivity, cost-effective technologies, and improvements in practice patterns. Although, as we discuss below, we have changed the descriptive title of the third factor (from "elimination of cost-ineffective practice patterns" to "improvements in practice patterns"), the three factors are the same as those we identified in the September 3, 1985 final rule (50 FR 35705). While, for the purposes of analysis and discussion, we have developed separate values for each of these three factors, we are proposing to combine them into a composite policy target adjustment factor, which would be considered in determining the FY 1987 prospective payment update factor.

(2) Productivity. As was the case last year, there does not exist and aggregate hospital industry productivity measure that can be used to interpret the intent of sections 1886(e)(2) and (e)(4) of the Act. The Bureau of Labor Statistics (BLS) is currently constructing a hospital productivity measure based on discharges adjusted for case-mix. The BLS index measures adjusted admission per employee in non-Federal, short-stay hospital. However, the BLS measure is an index of discharges per employee and not an overall operating input productivity index.

In setting the FY 1986 policy target adjustment factor, we considered productivity in terms of the ratio of real input to hospital outputs, where outputs are defined as the various tests, procedures, and services provided by the hospital. (In contrast, ProPAC defines output in a more inclusive fashion, so as to include changes in practice patterns.) We pointed out that national productivity increases over the economy as whole had averaged three percent per year in 1983 and 1984, and that after years of cost-based reimbursement, hospitals should be able to achieve a reduction imputs of at least that amount. The argument was that hospitals ought to be able to equal the national average for productivity increses in the future because, with fixed and known payment rates, they could adjust their inputs to eliminate unnecessary costs. The FY 1986 productivity factor was set at one percent. This target was set conservatively because of uncertainty with regard to achievable productivity gains.

A primary objective of the prospective payment system is to encourage the efficient provision of hospital care by changing economic incentives under the payment system. It is reasonable to assume that hospitals have (or should have) made substantial productivity grains during the first thre years of the prospective payment system. The only adjustment that we have made to DRG prices for any such productivity gains was the one percent offset used in updating the FY 1986 rates. We believe that productivity gains can and should continue. Although ProPAC recommends a 1.5 percent productivity offset, we are proposing a 1.0 percent productivity offset in the FY 1987 policy target adjustment factor. We expect that a two percent or more annual increase in productivity would not be unreasonable; however, consistent with our approach in the September 3, 1985 final rule (50 FR 35707), we believe that a conservative offset (1.0 percent) would not impact hospitals to the same extent as a greater adjustment would.

Average annual growth for productivity in the non-farm business sector during the period 1980 through 1985 was 1.07 percent according to the Bureau of Labor Statistics, Department of Labor. Average annual growth over a longer span of time, 1965 through 1985, was 1.12 percent per annum. Though these two growth rates imply a degree of stability, such is not the case. Year to year changes in productivity are quite volatile (see following table). Data Resources Incorporated (DRI), in their May 1986 forecast model, is predicting a productivity gain of 1.8 percent for 1987. Because these numbers are at variance, and in order to be conservative, we are proposing to set the FY 1987 productivity adjustment offset at one percent.

Output Per Hour of All Persons, Non-Farm Business Section (DRI)

Percentage Growth:	
1975	1.8
1976	2.5
1977	1.6
1978	0.8
1979	−1.6
1980	−0.5
1981	−1.0
1982	−0.6
1983	3.4
1984	1.6
1985	−0.1
1986*	0.0
1987*	1.8

*Forecast.

(3) Cost Effective Technologies. This add-on is a policy target rate of increase to allow for growth in cost-increasing, health-enhancing new technologies and scientific advances.

As with productivity, there is limited historical data to set a prospective target empirically, and there are substantial definitional problems in determining what measures would accurately reflect the intent of the law. Further, acquisition costs for some technologies or scientific advances eventually have cost-decreasing effects.

ProPAC is conducting a number of studies to analyze this factor. Our assessment appears to be consistent with ProPAC evaluations. A major difference is that ProPAC is conducting analyses of the use of individual technologies for potentially making changes to the prospective payment rates. Of particular interest is the ProPAC finding that new medical devices and diagnostic procedure costs may have only a small impact on overall increases in Medicare payments and that major increases in costs during the 1970s were the result of changes in practice patterns (see p. 11 of the Technical Appendixes of ProPAC's April 1, 1986 Report). ProPAC has recommended a much lower target value (0.7 percent) for cost-effective technologies in FY 1987 than the 1.5 to 2.0 percent they recommended last year, although they are also recommending (Recommendation 29) a specific add-on amount for magnetic resonance imaging technology.

Our proposal is to set the policy target adjustment factor for cost-effective technologies and associated labor and nonlabor inputs at 1.0 percent. We have deliberately set this factor at a more generous level than that recommended by ProPAC because we are proposing to incorporate capital-related costs into the prospective payment system. We note that in its report to the Secretary,

ProPAC recommended that the adjustment for scientific and technological advances be increased if capital were added to the prospective payment system, although they did not include a specific increment. Our intention is to encourage hospitals to use health-enhancing new technologies and scientific advances through setting this factor at a level that would promote such usage.

(4) Improvements in Practice Patterns. We are changing the descriptive title of this output measure used in the analytical framework for updating the FY 1988 rates from the "elimination of ineffective practice patterns" to "improvements in practice patterns." However, the essence of this measure remains unchanged. It reflects the relationship between efficacious and cost-effective outputs (services) and discharges. We refer the reader to Appendix B of the June 10, 1985 proposed rule (50 FR 24440) for a more indepth discussion of the framework for analyzing the policy target adjustment factors. Substantial savings result from improving practice patterns through cost effective use of resources. Improvements in practice patterns include shifts in the use of certain inpatient services for hospitalized patients to more appropriate lower cost settings and the elimination of services that do not give value for money expended; that is, reduced outputs associated with improvements in practice patterns.

In the first two years of the prospective payment system, the average length of stay of Medicare beneficiaries in prospective payment system hospitals decreased by 18 percent, despite an increase in case mix.

TABLE: MEDICARE AVERAGE LENGTH OF STAY

FY 1983 Nonexcluded State Short-Stay Hospitals	FY 1985 Prospective Payment Hospitals (days)	Percent Change
8.5 days	7.0	−18

Source: HCFA Medicare Statistical System, Bureau of Data Management and Strategy.

Part of this reduction in length of stay resulted from providing certain care and services, either prior to hospital admission or after discharge, in a lower cost setting or from reductions in ancillary services provided. Prior to implementation of the prospective payment system, similar services had been furnished to beneficiaries as inpatient hospital care. Lower cost settings include outpatient, skilled nursing facilities (SNFs), home health agencies (HHAs), and intermediate care facilities (ICFs).

Both ProPAC data and Medicare data on site substitution for prospective payment system and non-prospective payment system bills show that the percentage of discharges to SNFs, HHAs, and ICFs are higher for prospective payment system patients than non-prospective payment system patients. In light of the differences between the types of hospitals subject to and excluded from the prospective payment system, however, one cannot infer a direct causal link between the type of payment system and the utilization of lower cost settings.

It is difficult to determine the precise level of cost reduction associated with an 18 percent drop in average length of stay. The percentage of cost reduction can vary considerably in individual cases. For example, if prior to hospital admission a beneficiary receives required tests on an outpatient basis and the same laboratory or diagnostic tests were previously provided and billed in the inpatient setting, inpatient costs could be reduced for both ancillary and routine services. If physicians determine that skilled nursing care could be provided in an SNF setting, the level of inpatient cost reduction associated with the reduced hospital stay would differ from the first example. Further, if a hospital improved practice patterns by performing diagnostic or lab tests in the hospital, whereas these services were previously contracted out, there may not be any change in the number of these services furnished and related costs could increase, but improved processing times could lower length of stay and total hospital costs. In this situation, inpatient cost reductions could be relatively lower, comprised mainly of changes in the cost of routine services.

For purposes of determining day outlier cases, we assume the marginal cost of an additional day of care to be equal to 60 percent of the average per diem for the applicable DRG, excluding payment for pass-through costs. ProPAC references studies that indicate that marginal costs associated with a patient day range between 20–60 percent. Assuming an average marginal cost rate of 50 percent, the 18 percent reduction in length of stay in the first two years of the prospective payment system translates into a nine percent reduction in costs. Since two percent were already offset for improved practice patterns in determining the FY 1986 prospective payment system update, a seven percent reduction in costs remains. Considering incentives inherent under prospective payment, together with the intent to be gradual and conservative, we are recommending a two percent offset for improved practice patterns in the FY 1987 policy target adjustment factor.

ProPAC's recommendation for this factor is a 0.6 percent offset. With respect to the 1.4 percent difference (between ProPAC's recommendation and our proposal) in the amount of the offset for this particular portion of the policy target adjustment factor, we point out that ProPAC's accounting for the effects of changes in site of substitution is less inclusive than a measure reflecting overall improvements in hospital practice patterns. Just as there are definitional differences between ProPAC and us regarding what is included in the factor "hospital productivity targets", improvements in hospital practice patterns reflect not only shifts in the furnishing of inpatient services to alternative settings, but also the elimination of unnecessary or cost ineffective services. When the combined effects of our productivity and ineffective practices patterns offsets (−3.0 percent, exclusive of cost-effective technologies) are compared to ProPAC's discretionary adjustment factors for productivity and site-of-care substitution (−2.1 percent), we believe that we are not so dissimilar from ProPAC.

(5) Proposed Composite Policy Target Adjustment Factor. For FY 1987, we propose to adjust the average standardized amounts by a percentage composite policy target adjustment factor, as authorized under section 1886(e)(4) of the Act. For FY 1987, this composite policy target adjustment factor is a composite of the offsets and add-ons for productivity, cost-effective technologies, and improvements in practice patterns, as follows:

	Percent
Productivity	−1.0
Cost-effective technologies	+1.0
Improved practice patterns	−2.0
Total	−2.0

(6) Other ProPAC Recommendations on the Policy Target Adjustment Factors. ProPAC recommends (Recommendation 3) that an allowance should be made in the overall update factor to reflect real changes in case mix that are due to changes associated with the characteristics of patients. The allowance should reflect both shifts in patients among the DRG categories, as measured by changes in the average case-mix index (DRG case-mix change), and changes in the mix of patients within DRG categories (patient complexity change). ProPAC

recommends an allowance in the FY 1987 Federal rates of 0.9 percent, representing a 0.2 percent adjustment for DRG case-mix change and a 0.7 percent adjustment for patient complexity change.

This recommendation was previously reflected in ProPAC's recommendations No. 1 and No. 11 issued April 1, 1985. (See the June 10, 1985 proposed rule (50 FR 24448).) We agree, in principle, that the prospective payment rules should reflect real increases in case-mix.

ProPAC also recommends that the DRG weights should be adjusted to remove any increase in reported case mix during FY 1988. This would include nominal increases *net* of real increases.

Of the 0.9 percent add-on for real case mix that ProPAC recommends, 0.7 percent is for "patient complexity," which ProPAC defines as changes in the mix of patients within DRGs. We do not recognize changes in the mix of patients *within* DRGs (that is, severity of illness), because we do not believe there is currently any satisfactory method for measuring such severity.

ProPAC based its recommendation on a study being conducted by the Commission on Professional and Hospital Activities (CPHA). This study uses medical record discharge abstract data on Medicare and non-Medicare discharges from 1980–1984. Based on a complexity score for each discharge, the study results indicate significant increases in length of stay associated with greater complexity for both Medicare and non-Medicare patient populations during the period 1982–1983. However, the increase was substantially greater for the Medicare patients. (See *Technical Appendices* to the April 1, 1986 ProPAC Report, p. 22.)

We do not believe, based on the information provided by ProPAC, that we should accept at this time the results of the CPHA study. We note, for example, that the data are based on a self-selected sample of hospitals. We believe that any study dealing with as sensitive an issue as patient severity should be based on a more objectively established data base than a self-selected sample. Also, as stated in the report, "The Commission has assumed that the increase (in length of stay) during the period 1982–1984 was highly subject to the influence of improved hospital coding practices and may not represent actual changes in complexity. Thus, the Commission has chosen to base its estimate of real complexity change on the experience of hospitals prior to 1982." We do not believe it is proper to increase the prospective payment rates for FY 1987 based on conclusions about patient complexity prior to the implementation of the prospective payment system. It is widely acknowledged that the prospective payment system created new incentives for hospitals and we believe it would be appropriate for any severity adjustment or other adjustment purporting to represent increases in patient severity within DRGs to be based on prospective payment system data.

ProPAC also states that "The Commission has also assumed that a 0.7 percent increase in length of stay associated with increased complexity would translate into a 0.7 percent increase in costs." We question the basis for this statement in that it presumes that increases in cost per case are perfectly proportional to increases in length of stay due to increased complexity. There is no reason to assume *a priori* that there is a one-to-one relationship between cost increases and increases in length of stay. To the contrary there is considerable evidence that the marginal cost of care on a per diem basis is generally well below 1.0. We believe these kinds of DRG patient complexity adjustments should await the development of specific methodologies especially designed to measure them.

Preliminary HCFA estimates indicate that case mix has increased by 2.7 percent in FY 1986. Using ProPAC's estimate of a 0.9 percent add-on for real case mix, the net case-mix change adjustment would be −1.8 percent. However, as discussed above, only 0.2 percent of ProPAC's add-on is for real case mix. Our preliminary estimate is that real case mix has increased 0.0 percent. This estimate is based on long term trend estimates of real case mix increases of 0.4 percent and an additional adjustment of 0.2 percent for further shifts of DRG 39 (lens procedures with or without vitrectomy) cases to outpatient settings. Thus, our proposed adjustment for net case-mix change is −2.1 percent, that is, −2.7 percent for total case-mix change plus 0.6 percent for real case-mix increases. These estimates for both total case-mix and real case-mix changes are to be updated in the final rule based on additional FY 1986 data that is expected to be available subsequent to the publication of this proposed rule.

ProPAC recommends (Recommendation 13) that the standardized amounts be recalculated using cost data that reflect hospital behavior under the prospective payment system. The results of such a recalculation, with appropriate modifications, could be used in determining the update factor or in rebasing the standardized amounts.

The initial standardized amounts were established by using data from 1981 cost reports for each geographic class of hospitals and updating that data to FY 1984 by an inflation adjustment. Section 1886(d)(3)(A) of the Act specifically provides that the average standardized amounts for any given year beginning with FY 1985 are to equal the respective standardized amounts for the previous year, adjusted by an update factor. We believe, therefore, that it would be inappropriate to recalculate (or rebase) the standardized amounts by repeating the original process with later data, such as cost data accumulated under the prospective payment system.

We also believe that it would be inappropriate to calculate the update factor using cost data under the prospective payment system. Under the law, the increased costs of the market basket of hospital inputs, plus a factor for increased costs of items not otherwise specifically identified, rather than actual hospital costs, are the baseline for annual adjustments. In other words, this provision implies that Congress envisioned the annual update being related to the change in the market basket even if, as in the period prior to implementation of the prospective payment system, actual hospital costs rose more rapidly. This limitation is also reflected in the methodology specified in the statute for deriving the FY 1984 rates based on 1981 cost data. That is, section 1886(d)(2)(B) of the Act allowed updating to FY 1983 by the full amount of estimated hospital cost inflation, but allowed updating from FY 1983 to FY 1984 only by the market basket plus one percentage point.

In short, the statute clearly did not intend that actual costs be routinely considered in setting future prospective payment rates to the extent that those costs increased faster than the market basket index plus adjustments to reflect costs not otherwise specifically identified. Efforts to mechanically adjust the payments rates to reflect current costs could frustrate the statutory intent of restricting inflation in the payments to approximately the market basket inflation rate. (In this regard, we note that section 9101 of Pub. L. 99–272 amended section 1886(b)(3)(B) of the Act to require that the update factor not exceed the market basket.)

The foregoing discussion does not imply a prohibition on considering actual hospital cost experience as one factor in the determination of the yearly prospective payment update factor. To the contrary, the various statutory criteria to be considered by ProPAC in recommending the update factor clearly

center on certain aspects of the costs being incurred by hospitals. Section 1886(e)(2) of the Act requires ProPAC to consider "hospital productivity, technological and scientific advances, the quality of health care provided in hospitals . . . , and long-term cost-effectiveness in the provision of inpatient hospital services." These considerations are intended to identify valid reasons why payments should rise more or less than the market basket increase and necessarily involve assessments about the costs actually being incurred by hospitals. Similarly, the Secretary, in determining the update factor, is required by section 1886(e)(4) of the Act to "take into account amounts necessary for the efficient and effective delivery of medically appropriate and necessary care of high quality," a formulation that authorizes the consideration of costs incurred under the prospective payment system.

In summary, we believe that the 1981 cost data met the statutory requirement that we use the best data available to establish the initial prospective payment rates. Subsequently, the FY 1984 rates are to be adjusted each year by taking into account those factors (such as productivity and technology) stated in section 1886(e)(2) of the Act. We do not believe it is appropriate to engage in a wholesale recalculation of the rates based on later data, update factors, or adjustments that are tied exclusively to later cost data.

g. Summary. The combined effect of the forecasted increase in the hospital market basket, the proposed correction for the forecast market basket error for FY 1986, the proposed correction of case-mix change for FY 1986, and the proposed composite policy target adjustment factor would be as follows:

	Percent
Forecasted market basket increase	+3.6
Forecasted market basket error for FY 1986	−0.4
Correction for case-mix change for FY 1986	−2.1
Composite policy target adjustment factor	−3.0
Total	−0.9

Such a negative update factor would result in a modest decrease in the standardized amounts for FY 1987, compared to those for FY 1986, and a corresponding reduction of anticipated revenue for hospitals subject to the prospective payment system. However, although we have substantial technical and legal justification for issuing FY 1987 standardized amounts that would be lower, on average, than FY 1986 standardized amounts (similar to the justification for a 4.42 percent decrease in the FY 1986 standardized amounts), we do not propose to do so. In addition, because we believe it is important to protect the prospectivity of this payment system, we do not plan to recoup any excessive payments resulting from the overstated FY 1986 standardized amounts.

The prospective payment system was intended, from its inception, to produce significant changes in the hospital industry. However, we do not want to cause these changes to take place too rapidly, because that may result in disruptions and unintended consequences that would adversely affect the industry, its patients, and us. Neither do we want to encourage changes that would comprise the access to quality inpatient hospital care historically enjoyed by Medicare beneficiaries. Our objective is to set the FY 1987 update factor at a percentage level that takes into account amounts necessary for the efficient and effective delivery of medically appropriate and necessary care of high quality, in accordance with section 1886(e)(4) of the Act, and we believe that the payment rates should be set no lower than we have proposed in order to assure that this statutory standard is met.

We believe that in an ideal course of events, the FY 1986 amounts would have been set at a lower level, and the FY 1987 amounts would be increased appropriately. However, the implementation of a new system seldom follows an ideal course. Moreover, we recognize that actually decreasing the standardized amounts would have adverse effects, not only relative to the expectations of affected hospitals, but on the development and acceptance of the prospective payment system. We also recognize that a large portion of the overstatement of the FY 1986 standardized amounts is not attributable to the actions or behavior of the hospital industry. The overstatement is to some extent the result of our desire, shared by Congress, to proceed cautiously with the implementation of the new system. Therefore, it would be inappropriate to set the FY 1987 Federal rates at a level that would appear to be punitive of the hospital industry.

We believe the situation at this point is similar to the situation we faced last year at this time, when our analysis also indicated a decrease in the rates would be appropriate. In view of that analysis, we proposed that the FY 1986 prospective payment rates not be increased above the level of the FY 1985 rates. After consideration of all public comments, we determined that no increase was warranted, and promulgated this decision in the September 3, 1985 final rule. Subsequently, Congress precluded implementation of our FY 1986 changes to the prospective payment system through a series of legislative postponements, and required that all hospitals would continue to receive prospective payments through April 30, 1986 that were computed on the same basis as the payments on September 30, 1985. Effective May 1, 1986, section 9101 of Pub. L. 99-272 provided that hospitals would receive 0.5 percent increase in the Federal prospective payment rates for the remainder of Federal FY 1986, and would receive a 0.5 percent increase in the hospital-specific rates after the first seven months of each hospital's cost reporting period. Hospitals that are excluded from the prospective payment system received an increase of 5/24 percent in their target rates of increase for their cost reporting periods which began on or after October 1, 1985 (which is equivalent to an increase of 0.5 percent for the last 5 months of their 12-month cost reporting periods). The 0.5 percent increase selected by Congress under circumstances in which a decrease was technically warranted is the same increase that we are now proposing under similar circumstances.

While we have a responsibility to protect the integrity of the Medicare trust funds, we realize that to decrease the prospective payment rates while at the same time proposing major reforms in the prospective payment system (for example, our proposal to bring capital costs under a prospective payment system), could lead to concern that we would be economically disadvantaging hospitals. Therefore, we believe that it is in the best interest of all parties, that is, the public, the hospital industry, and the government, to propose an increase in the rates for FY 1987.

Accordingly, we are proposing that the Federal rates be increased by 0.5 percent for discharges occurring on or after October 1, 1986, and that the hospital-specific rates be increased by 0.5 percent for cost reporting periods beginning on or after October 1, 1986. In addition, the target rates of increase for hospitals excluded from the prospective payment system would also be increased 0.5 percent for cost reporting periods beginning on or after October 1, 1986.

For the reasons given above, we believe that the resulting payments would take into account the amounts necessary for the efficient and effective delivery of medically appropriate and necessary care of high quality. However, we wish to emphasize that our proposal of this increase does not lessen our confidence in the analysis which shows

that a decrease in the rates would be appropriate.

Because we are proposing to restandardize the base-year costs for changes to the wage index, indirect medical education costs, and disproportionate share hospital adjustments, in addition to using the revised market basket weights for determining the labor-related and nonlabor-related shares of the standardized amounts, the FY 1987 standardized amounts would be different from a 0.5 percent increase over the FY 1986 standardized amounts as published in the May 8, 1986 interim final rule (51 FR 16772). In addition, we note that further adjustments would be made to the standardized amounts for Pub. L. 98-272 provisions regarding the payment equality adjustment for indirect medical education costs, and the special adjustment for teaching hospitals under section 9202(j) of Pub. L. 99-272.

The table below compares our position with that of ProPAC with respect to the update factor. Please note that this table, unlike the table included in the September 3, 1985 final rule (50 FR 36666), contains a third column, "Adjusted ProPAC." In this column, our technical staff have revised, where appropriate, ProPAC's components of the update factor using more recent data then were available to ProPAC at the time it developed its recommended update factor. We want to emphasize that we are providing the adjusted ProPAC figures merely for purposes of comparison, and that these figures represent our technical staff analysis rather than ProPAC's views as to how those figures will be adjusted.

For the benefit of the reader, we are providing, below, a comparison table of HCFA's proposed update factor and ProPAC's recommendation.

COMPARISON OF THE HCFA AND PROPAC UPDATE FACTORS

	HCFA	ProPAC	Adjusted ProPAC
Market Basket [1]	3.6	4.6	3.6
Correction for Forecast Error for FY 1986	−0.4	[2] −0.3	[2] −0.6
Policy Target Adjustment Factor:			
Productivity	−1.0	[3] −1.5	[3] −1.5
Science and Technology	1.0	[4] 0.7	[4] 0.7
Practice Pattern	−2.0	[5] −0.6	[5] −0.6
Total	−2.0	−1.4	−1.4
Case-Mix Change for FY 1986:			
Total [6]	−2.7	−1.0	−2.7
Real [7]	0.6	0.9	0.9

COMPARISON OF THE HCFA AND PROPAC UPDATE FACTORS—Continued

	HCFA	ProPAC	Adjusted ProPAC
Net Case Mix Change	−2.1	−0.1	−1.8
Update Total	−0.9	+2.8	−0.2

[1] This is an estimate of change in the relevant market basket and includes capital.

[2] The forecast error correction is based on changes in the current market basket due to the underestimate of wage and salary increases by Data Resources Inc. (DRI), and the downward effect on the DRI forecast estimates due to the introduction of the Gross National Product (GNP) revisions. ProPAC recommends adjusting only for external price proxies that is, the total labor wages. The recommended HCFA adjustment is for all forecast errors.

[3] Discretionary Adjustment Factor. ProPAC's variation of the Policy Target Adjustment Factor.

[4] If capital is added to the standardized amounts in FY 1987 at a level lower than projected under current law, ProPAC recommends that this component be increased in addition to providing for a separate add-on for magnetic resonance imaging scans.

[5] ProPAC measures site substitution here and includes observed productivity changes in their Productivity offset.

[6] This is preliminary estimate by HCFA based on billing data, and is subject to revision. A preliminary ProPAC estimate, based on historical trends, indicates a 1.0 percent increase which they note is subject to change with newer data, and which we believe to be too low. Included in ProPAC's total is an estimate of real case-mix of 0.2 percent.

[7] This estimate includes long term trend estimates of real case mix of 0.4 percent and an adjustment of 0.2 percent for further shifts of DRG 39 to outpatient settings.

For the benefit of the reader, we are displaying actual and projected increases in payment per admission under the prospective payment system.

RATE OF INCREASE IN PER CASE PAYMENTS UNDER THE PROSPECTIVE PAYMENT SYSTEM

Fiscal year	National average total payment (per case) [1]	Annual rate of increase (percent) [2]	Cumulative rate of increase (percent) [2]
1983 [3]	$3,166		
1984	3,486	10.0	10.0
1985	3,870	11.1	22.2
1986	4,134	6.8	30.5
1987	4,298	4.0	35.7

[1] These numbers represent total payment per admission, inclusive of payments for capital-related costs and other pass-throughs, assuming the adoption of this proposed rule.

[2] The prospective payment system was implemented at the beginning of FY 1984.

[3] These percentages are rounded to the nearest one-tenth of one percent.

4. Other Adjustments to the Average Standardized Amounts

a. Part B Costs. Section 1862(a)(14) of the Act prohibits payments for nonphysician services furnished to hospital inpatients unless the services are furnished either directly by the hospital, or by an entity under arrangements made by the hospital under which Medicare's payment to the hospital discharges the beneficiary's liability to pay for the services furnished.

In the September 3, 1985 final rule, we increased the average standardized amounts by 0.13 percent so that they represent costs previously billed under Part B (50 FR 35708). We are proposing to make no further adjustments for this factor in FY 1987, or in the future, because the appropriate adjustment has been built into the FY 1986 base.

b. FICA Taxes. Section 1886(b)(6) of the Act requires that adjustments be made in the base period costs in recognition that certain hospitals were required to enter the Social Security system and begin paying FICA taxes as of January 1, 1984. In the September 3, 1985 final rule, we increased the average standardized amounts by 0.18 percent to account for additional costs of payroll taxes for hospitals entering the Social Security system (50 FR 35708). We are proposing to make no further adjustments for this factor in FY 1986, or in the future, because the appropriate adjustment has also been built into FY 1986 base.

c. Nonphysician Anesthetist Costs. Section 1886(d)(5)(D) of the Act provides that hospital costs for the services of nonphysician anesthetists are paid in full as a reasonable cost pass-through. Under section 2312(c) of Pub. L. 98-369, this pass-through is effective for cost reporting periods beginning on or after October 1, 1984, and before October 1, 1987. In the September 3, 1985 final rule, we noted that the FY 1986 average standardized amounts automatically included the appropriate adjustment (0.5 percent) (50 FR 35708). Therefore, because this adjustment has already been built into the FY 1986 base, we are not proposing to make further adjustments to the average standardized amounts for FY 1987.

d. Indirect Medical Education. Section 9104 (b) of Pub. L. 99-272 added section 1886(d)(3)(C)(ii) to the Act to provide that, effective for discharges occurring on or after October 1, 1986, the average standardized amounts be further reduced, taking into consideration the effects of the standardization for indirect medical education costs as described in section II.A.1.c. of this addendum. Specifically, for each geographic area (regional and national, urban and rural), total payments including indirect medical education and disproportionate share hospital adjustments, based on payment rates standardized for an 8.1 percent curvilinear indirect medical education factor and disproportionate share, shall be neither more nor less than the estimated total of payments, including indirect medical education adjustment payments that would have been made based on rates standardized for an 11.59 percent linear indirect medical education factor and paid out at 8.7 percent on a curvilinear basis. The adjustment is accomplished on a regional basis in order to reflect Congressional intent that the necessary

calculations will not redistribute payments among the regions.

Through this adjustment, Congress is ensuring that total prospective payments, on a regional basis, taking into consideration the nonstandardization of rates for disproportionate share payments and for a revised indirect medical education payment factor of approximately 8.1 percent on a curvilinear basis, will equal payments that would have resulted with rates standardized for an 11.59 percent indirect medical education adjustment factor, and payments computed using an indirect medical education factor of 8.7 percent applied on a curvilinear basis. For discharges on or after October 1, 1986 (that is, after that part of the law requiring disproportionate share payments sunsets), the adjustment must be such as to ensure that the system savings resulting from the changes to the indirect medical education factor are preserved.

We recognize that the statute discusses that adjustment in terms of a "reduction" in the average standardized amounts. However, we note that, as stated in sections 1886(d)(2)(C)(ii)(I) and (II), the purpose of this "reduction" is to attain equality of payments. As can be seen from the table below, attaining such equality in certain regions requires a slight increase in the rates. This result, along with the discussion in the Conference Committee Report that stresses the equality of payments, supports our interpretation that the standardized amounts are not to be reduced except where necessary to attain payment equality.

Therefore, under section 1886(d)(3)(C)(ii) of the Act, for FY 1987 we are proposing to adjust the urban and rural regional and national standardized amounts (including the capital amounts) to account for indirect medical education payments. It should be noted that these factors have been applied to both the Federal operating standardized amounts (excluding capital) and the Federal capital-related standardized amounts. The reason for this is that section 1886(d)(2)(C)(ii) requires an adjustment to "each of the average standardized amounts. . . so as to provide for a reduction in the total of the payments. . . ." Since as described elsewhere in this document, eligible hospitals will be able to receive additional payments for the indirect costs of medical education and as disproportionate share hospitals, adjustments must be made to the capital rates in order to maintain the payment equality required in the law.

The indirect medical education payment equality factors are as follows:

Region	Urban		Rural	
	Operating Costs Excluding Capital	Capital-Related Costs	Operating Costs Excluding Capital	Capital-Related Costs
1. New England (CT, ME, MA, NH, RI, VT)	.99095	.99498	.99892	.99987
2. Middle Atlantic (PA, NJ, NY)	1.00728	.99154	1.00574	.99861
3. South Atlantic (DE, DC, FL, GA, MD, NC, SC, VA, WV)	.99090	.99090	.97596	1.00106
4. East North Central (IL, IN, MI, OH, WI)	.99259	.99045	.99027	.99995
5. East South Central (AL, KY, MS, TN)	.99448	.99162	1.00343	1.00349
6. West North Central (IA, KS, MN, MO, NE, ND, SD)	1.01842	.99505	.99909	.99918
7. West South Central (AR, LA, OK, TX)	1.00104	.99774	.99596	.99998
8. Mountain (AZ, CO, ID, MT, NV, NM, UT, WY)	1.04998	1.00995	1.02291	.99997
9. Pacific (AK, CA, HI, OR, WA)	1.01121	.99785	1.01257	1.00079
10. National	.99994	.99707	.99999	.99998

a. Special Treatment of States Formerly Under a Waiver From Medicare's Hospital Reimbursement System. Section 9202(j) of Pub. L. 99-272 provides for special treatment of States formerly under a waiver. The provision provides for special treatment of hospitals in a State whose waiver under section 1886(c) of the Act has been terminated effective with cost reporting periods beginning on or after January 1, 1986, in which—

- The hospital shall be permitted to change the method by which it allocates administrative and general costs to the direct medical education cost centers to the method specified in the Medicare cost report;
- The hospital's hospital-specific portion of the prospective payment rate shall be adjusted for any hospital that actually chooses to use the Medicare cost report; and
- The regional adjusted DRG prospective payment rate in the region the State is located may be appropriately adjusted based on the assumption that all teaching hospitals in the State use the Medicare cost report. All such adjustments are to be based on the best data available.

Of the States for which hospitals were reimbursed under a waiver, Massachusetts and New York have terminated their waivers. However, hospitals in those States had been reimbursed for services pursuant to a reimbursement system approved as a demonstration project under section 402 of the Social Security Amendments of 1967 or section 222 of the Social Security Amendments of 1972. Under current existing waivers, Maryland hospitals are paid for services pursuant to a reimbursement system under section 1814(b) of the Act and New Jersey hospitals are paid for services pursuant to a reimbursement system under section 1886(c) of the Act.

Even though section 9202(j) of Pub. L. 99-272 cites waivers under section 1886(c) of the Act, the conference committee report does not express any such restriction. The conference committee report (H.R. Rep. No. 453, 99th Cong., 1st sess. 486 (1985)) expressing the committee's expectation states,

"Certain hospital reimbursement systems that received waivers from Medicare have used methods of allocating administrative and general costs that are different from those required by the Medicare hospital cost reporting forms. The conferees are concerned that, where these alternative allocation methods are in use, the base year direct GME costs used to determine the approved FTE resident amounts established by other provisions of this legislation, may be understated.

The conferees direct the Secretary to permit changes in these alternative allocation methods. The conferees further direct the Secretary to adjust the regional standardized payment amounts and the hospital-specific amounts to account for the overstatement of these amounts due to the method of allocation of overhead used by teaching hospitals in the base period."

In order to meet the expectations of the committee, we believe we should treat hospitals in States under a previous waiver that were not paid pursuant to section 1886(c) of the Act in accordance with such expectations. However, since there is no authority to treat hospitals in States formerly under waivers other than section 1886(c) waivers under the provisions of section 9202(j) of Pub. L. 99-272, we believe the expectations of the conference committee may be carried out under the general exception and adjustment authority under section 1886(d)(5)(C)(iii) of the Act.

Of the two States which terminated their waiver, New York is the only State affected by this provision. Most hospitals in New York, including hospitals with direct medical education cost centers, allocate administrative and general costs in a manner which differs from the recommended order prescribed in the Medicare cost report. Many of these hospitals use an order of allocation in which the administrative and general cost center *follows*, rather

then precedes the direct medical education cost centers. As a result of this methodology, none of the hospital's administrative and general costs were allocated to the direct medical education cost centers. This had the effect of increasing the Medicare inpatient operating costs for teaching hospitals in New York and reducing the amount of medical education costs. The results are the same as the expressed concerns of the conference committee as stated above.

Under the authority of section 1886(d)(5)(C)(ii), we propose to implement the expectations of the conference committee for teaching hospitals in New York. Effective for cost reporting periods beginning on or after January 1, 1986, hospitals in New York with direct medical education cost centers will be permitted to change the method by which they allocate administrative and general costs to the method specified in the Medicare cost report. Also, the hospital-specific portion of the prospective payment rate will be adjusted for any such hospital that chooses to use the Medicare cost report effective with cost reporting periods beginning on or after January 1, 1986.

With respect to adjusting the regional standardized payment amounts, the Middle Atlantic census division will be affected by such an adjustment. The Middle Atlantic census division consists of the States of New York, New Jersey, and Pennsylvania, and these States would be affected by any change. We believe that it is important for the effectiveness of the prospective payment system to ensure that payment rates are actually prospective in their effect and based on the best data available. For purposes of this proposed rule, we are estimating the impact on the regional standardized payment amounts using cost reports from a sample of New York hospitals with direct medical education cost centers. The adjusted regional standardized payment amounts would be effective for discharges occurring on or after October 1, 1986.
